

NEPAL & INDIEN

Oktober-December 1995

Fugleiagttagelser
af

Henning Vikkelsø Rasmussen
og
Knud-Erik Strange

INDLEDNING

Hermed rapporteres fugleagttagelser fra Nepal og Indien i oktober, november og december 1995 af Knud Erik Strange (KES) og Henning Vikkelsø Rasmussen (HVR) (samlet: RF Nepal Division). Fra oktober kun iagttagelser af KES, idet HVR først stødte til 1/11. KES havde inden da tilbragt det meste af tiden i og omkring Pokhara og Annapurnamassivet/Nepal.

I alt tilbragte vi 43 dage i Nepal og 18 dage i Indien. Idet vi kun havde 2 måneder til vor rådighed, måtte vi nøje udvælge, hvilke oplevelser vi ville satse på. Vi valgte 2 trekkingture i Himalaya/Nepal (Everest & Langtang) og 4 nationalparker (Chitwan/Nepal, Corbett, Keoladeo og Sultanpur Jeels/Indien). Herudover besøgte vi områder omkring Kathmandu, Arung Khola og Hetauda i Nepal samt Agra i Indien.

De primære formål med rejsen var at se mindetavlerne ved Everest Base Camp, yngleområder for Ibisbill samt tiger. Herudover dels at opleve den enorme og storslåede natur i Himalaya samt indsnuse landenes kultur og mentalitet. Og dels at registrere de fugle som vi stødte på eller mere eller mindre gik efter.

Hans Meilstrup og Jørgen Bech takkes for rapporter, oplysninger, råd og tips samt psykologisk og lægefaglig støtte inden afrejse.

I Corbett N.P. skal Mehar Ban Singh Patwal takkes for uvurderlig gåpåmod, knowhow og køreegenskaber under vor "tigerhunting". Yoegendra Singh Patwal for god guidning og rygetilladelser. Harak Singh Aswal for ornitologiske tips.

Hans Ægidius for behageligt selskab i Bharatpur og Sultanpur.

Herudover skal et antal unavngivne personer have stor tak.

I Kathmandu – specielt vor vært hos Kathmandu Peace Guesthouse for hjælp til diverse transportarrangementer samt rengøring af tøj. I Khumbu Himal – alle vi mødte for deres høje humør og store venlighed. I Helambu–Langtang samt øvrige Nepal alle for deres hjælpsomhed. I Indien specielt vor vært og værtinde på Falcon Hotel i Bharatpur for en dejlig julekylling og organisering af byens eneste lovlige taxi. Alle Departmentfolkene i Corbett for deres venlighed, samt alle andre venlige indere vi mødte. Faktisk mødte vi ikke nogen "uvenlige" og ja – uærlige indere! Kun en enkelt platugle i bussen fra Sunauli!

SPECIES ACCOUNT

This species account and the birdnames follow: A Guide to the Birds of Nepal by Carol and Tim Inskipp, second edition, 1991. And for species only recorded in India: The Birds of The Indian Subcontinent by Ali & Ripley, 1983.

The numbers should be regarded as minimum numbers, especially for the more numerous species.

In total we recorded 415 different birdspecies and in addition 38 species only identified to genus.

All October-observations were made by KES only. During November and December a few birds were seen by only one of us, these observations are marked KES or HVR accordingly.
