GRAND DESIGN

I am so pleased to hear that Sir Ed
has returned to Nepal. Of course I
had. Living three days on the
mountain, I was able to witness
the spectacular beauty of the
Himalayas and the clear, crisp
air. It was truly a breathtaking
experience. I am also happy to
hear that he is planning to
return by BP Koirala to his
country in one of the world’s most-deprived
regions. The 1965 “exchange of
villages” between Gen Musharraf and
Prachanda and his team are no
longer the only question is:
whether we can ensure the
accountability of all such events.

When a leader talks about
“democracy” or “human rights,”
we all know that he is referring
to himself. The only real
difference is political, but India’s
so-called “mass-based political
parties” are no different from the
“people’s war”. It is true that no
one has been stopped from donating
a certain amount of humanitarian
aid. But I think we should be more
critical of the motives behind such
donations. It is only when we see
the real intentions behind these
donations that we can truly
understand their significance.

Why can’t “manpower” agencies find jobs for women?

The article discusses the challenges faced by women in finding jobs through manpower agencies. It highlights that while there is a demand for their services, the agencies often fail to provide them with suitable employment opportunities. The article attributes this to the perception of women as less capable and their rights to be free from exploitation.

The Different Points

- All of these points are either valid or worth debating, but none of them are absolutely foolproof.
- The state of society is such that women are often seen as less capable and their rights are often violated.
- The law provides protection for the rights of women, but the implementation is often lacking.

The Example

- An example of this is the ban on women traveling alone to the Gulf to work. This ban is a violation of women’s rights and is often enforced despite the fact that it is not supported by the public opinion.

The Solution

- The government needs to take stronger action to protect the rights of women and ensure that they are not exploited.
- The agencies need to be held accountable for their actions and punished if they violate the rights of women.

This article provides a strong argument for the need to change the way we think about the role of women in society and to ensure that their rights are respected and protected.
All for the people

If the monarchy, the political parties and the Maoists are all so steadfastly committed to ensuring a prosperous Nepal, how do we come to feel so abandoned?

Someone said the reason there are so few results from such an ambitious reform process is that the people are not interested in the process. This is not the way it should be. The people should be involved in the process. The people should be made to participate in the process. The people should be made to be part of the process.

Now, private airports

The Madanpur airport is the only privately-owned airport in Nepal. It is a small airport located in the eastern part of the country. The airport is used for domestic flights and is operated by a private company. The airport has a 1,500-metre runway and can accommodate aircraft up to the size of a Boeing 737.

Lalitpur in Helsinki

Lalitpur is a city in the central region of Nepal. It is the capital of Lalitpur District and is located on the banks of the Bagmati River. Lalitpur is known for its rich history and cultural heritage. The city has a population of around 500,000 people and is home to many important religious sites, including the renowned Pashupatinath Temple.

A day after King Gyanendra issued three ordinances under the Finance Ordinance 2003, Finance Minister Bardi Prasad Pradhan explained the provisions as they relate to revenue, taxation, investment, exports and tourism. Excerpts:

From Afghanistan, a glimpse of Nepal

“It’s all about getting quicker to Year Zero.”

Tales from the new countries of the world have been numerous, but one of the most compelling is Afghanistan. The country is in the process of rebuilding after years of war and conflict. The Taliban regime was overthrown in 2001, and since then there has been significant progress in stabilizing the country.

Economy

The receipts of foreign loans and grants in this fiscal year are very encouraging. The trend of defence expenditures can be seen only after mid-term. The government had allocated Rs1.12 billion to provide concessional loan interest for the fiscal year. The revenue mobilisation has grown by over 7 percent.

MIN BAJRACHARYA

There is enough money to finance development...

Dr. Narendra Pandey, chairman of the World Bank's Nepal office, has recently said that Nepal has the resources to finance development. This is a positive sign for the country's future.

The government will issue bonds to those industries that are yet to get loans from banks. Total outlay of this year's budget, Rs 96.12 billion, remains the same. The government has already conducted feasibility studies to construct international airports in Biratnagar, Janakpur, Pokhara and the capital city, Kathmandu. The government has also approved the construction of a new international airport in the capital city.

For Nepal, exports within the country are as important as exports to other countries. The government is promoting the export of goods and services within the country through the extension of necessary facilities, including trade liberalization, and tax incentives.

Angry start to 2003 in Serbia

BELGRADE – Several cases of cruel and violent violence in the first month of 2003 have caused concern in Serbia and throughout the region. In recent days, conflict in the region has been escalating, with both sides blaming each other for provoking the violence.

In the town of Kragujevac, a few kilometers from the Serbian border with Croatia, a group of Serb nationalist youths attacked a group of Albanian students, causing injuries and damage to property. The incident has sparked outrage in the region, with many calling for an immediate end to the violence.

The United Nations has also expressed concern, calling for all parties to exercise restraint and adhere to international law. The organization has urged the governments of Serbia and Croatia to work towards a peaceful resolution of the conflict.

Evolution has turned up copies

Genes are the instructions that guide the development of an organism. They are passed down from generation to generation, and each organism inherits a set of genes from its parents. Over time, these genes can evolve and change, leading to new species and new traits.

It is now known that there are at least 4.5 billion years of biological evolution, and the study of these evolutionary changes has led to the development of modern evolutionary biology. The study of genes and their evolution is a central part of this field.

The Indian Ocean is becoming a strategic naval base for the United States. This is part of a larger effort by the U.S. military to expand its presence in the region.

More people are using reproductive technologies to have children. This has led to an increase in the number of multiple births and the use of artificial reproduction methods.

HIV in South Africa

Infection rates among women are increasing, and this is a major concern for public health officials. HIV/AIDS is a major global health crisis, and it is estimated that there are currently over 35 million people living with the disease worldwide.

Suicide rate up in Pakistan

ISLAMABAD – By 2005, a long-delayed gas pipeline linking the oil fields of Central Asia to South Asia will finally be completed. During the Cold War, the United States had wanted to use its warships to refuel tankers en route to the Indian Ocean, and it had planned to refuel them to refuel as they passed through Pakistan.

The pipeline will originate in Turkmenistan’s Daulatabad gas fields, and it will cross four countries—Kyrgyzstan, Tajikistan, Afghanistan, and Pakistan—before reaching India.

The pipeline will be able to carry 100 million cubic meters of gas per day, and it will be able to transport gas to India, Pakistan, and Iran.

HIV in Thailand

AIDS, which is caused by the human immunodeficiency virus (HIV), is a major global health crisis. It is estimated that there are currently over 35 million people living with the disease worldwide.

International TV pulls out condom ad

The ads were pulled at the behest of the Pakistani government.

The ads were part of a campaign to promote condom use and raise awareness about HIV/AIDS.

The ads were supposed to run on a channel owned by a private group in Karachi, but they were pulled just days before they were set to air.

The ads were produced by a group of activists who were working to raise awareness about HIV/AIDS and promote condom use.

The ads were pulled because they were deemed to be too graphic and explicit.
