Comité de rédaction : Anne Chayet, Jean-Luc Achard.

Comité de lecture : Ester Bianchi (Università degli Studi di Perugia), Anne Chayet (CNRS), Fabienne Jagou (EFEO), Rob Mayer (Oriental Institute, University of Oxford), Fernand Meyer (CNRS-EPHÉ), Françoise Pommaret (CNRS), Ramon Prats (Universitat Pompeu Fabra, Barcelona), Charles Ramble (EPHE, CNRS) Françoise Robin (INALCO), Brigitte Steinman (Université Paul Valéry, Montpellier III) Jean-Luc Achard (CNRS).

Périodicité

Participation
La participation est ouverte aux membres statutaires des équipes CNRS, à leurs membres associés, aux doctorants et aux chercheurs non-affiliés.

Les articles et autres contributions sont proposées aux membres du comité de lecture et sont soumis à l’approbation des membres du comité de rédaction. Les articles et autres contributions doivent être inédits ou leur réédition doit être justifiée et soumise à l’approbation des membres du comité de lecture.
Les documents doivent parvenir sous la forme de fichiers Word, envoyés à l’adresse du directeur (jeanluc.achard@sfr.fr).

Comptes-rendus
Les livres proposés pour compte-rendu doivent être envoyés à la Revue d’Etudes Tibétaines, 22, avenue du Président Wilson, 75016 Paris.

Langues
Les langues acceptées dans la revue sont le français (en priorité), l’anglais, l’allemand, l’italien, l’espagnol, le tibétain et le chinois.

The British Library

1. Introduction

I said before that, in my opinion, Ch’an did not completely disappear from Tibet and that traces of it can be found in the rDsogs c’en, a branch, as is known, of the rÑin ma pas.

– Guiseppe Tucci,

Minor Buddhist Texts II

Guiseppe Tucci, one of the founders of the Tibetology, made the above statement in 1958, and though the specific arguments he offered to support it are no longer taken seriously, the idea that Dzogchen was influenced by Chan continues to exert a fascination for contemporary scholars. Partly this is because Tucci was not articulating an original theory, but recasting an old polemical argument with roots deep in the Tibetan tradition itself. Partly it is simply that texts from these two genres often look similar — both are meditation traditions based on the direct access to one’s own enlightened nature. Yet similarity does not equate to influence, and the issue continues to haunt us because various attempts to establish the matter one way or another have failed to do so.

1 This paper was made possible by a Research Development Award from the British Academy.
2 The quote is from Tucci 1958: 60. See also pp. 64, 102, 110. Tucci’s main argument for the influence of Chan on Dzogchen was the pro-Chan sections of the fourteenth-century Minister’s Edict. But since then it has been shown that these sections were lifted from The Lamp for the Eyes of Contemplation, a tenth-century work written with the contrary aim of showing the differences between Dzogchen and Chan (see Karmay 1988: 89–99 and Tanaka and Robertson 1992). Thus the Minister’s Edict tells us only that its redactor had a positive attitude to the Chan teachings that he had encountered in the Lamp for the Eyes of Contemplation. Given that the Minister’s Edict was his main source, it is puzzling that Tucci (1958: 110) also stated that “there was a continuous tendency, even among the rDsogs c’en themselves, to conceal as far as possible their connection with a teaching which was said to have been condemned by a king considered to be the founder of Tibetan Buddhism and the patron of their chief master Padmasambhava.” In fact, the redactor of the Minister’s Edict was attempting to forge, rather than conceal such a connection. Other influential Nyingma writers, including Longchenpa and Jigmé Lingpa, far from attempting to conceal anything, occasionally made positive statements about Chan (see van Schaik 2003).
3 See the discussion of these polemics in van Schaik 2004a: 14–16. As mentioned there, the most explicit identification of Dzogchen with Chan came from the Gelug school, beginning with Khedrup (1385–1438). On other forms of controversy around Dzogchen in the Tibetan tradition, polemics directed against the Great Perfection are discussed in Karmay 1988, pp. 121–33, 178–84, 186–89, 195–97.
4 Since Tucci, there have been several counter-arguments pointing out where Chan and Dzogchen literature diverge. Yet, like the argument from influence which they attempt to refute, they are essentially following a pattern laid out by the Tibetan tradition itself.
When questions prove unanswerable, there are two possibilities. One is that we need more data, and better ways of processing that data; the other is that the question is a bad one, that it is not answerable in the terms in which it has been stated. Now, it is true that we have frustratingly few sources from the time in which Chan is supposed to have been exerting its influence on Dzogchen (the eighth and early ninth centuries), but I think this is not the only problem. I do think the question ‘was Dzogchen influenced by Chan?’ is a bad one, for this reason: it entails an ahistorical reification of the entities ‘Dzogchen’ and ‘Chan’.

Both ‘Dzogchen’ and ‘Chan’ are terms that represent a sprawling, messy complex of textual material, spanning centuries of historical development. A question like ‘was Dzogchen influenced by Chan?’ elides this, implying that we can point to an essence in both that can serve as the basis for comparison. Any attempt to isolate such an essence is by nature highly selective, and thus the result of the comparison will depend on the sources that we choose for the purpose. We can make such a comparison more feasible by limiting the historical scope of our enquiry; for Dzogchen and Chan, it makes sense to look at the time when the influence is supposed to have taken place, the eighth and early ninth centuries. Yet we are still looking at a varied complex of textual material in both cases.

And there is another reason why a direct comparison of Dzogchen and Chan as two entities remains dubious. During the eighth and ninth centuries, neither Dzogchen nor Chan had yet developed an identity that would allow them to be considered in separation from the cultures of Buddhist praxiss in which they were embedded. Recent studies have shown how the meditation instructions of Chan were closely associated with the practices of what became the Tiantai school, were embedded in the Chinese Yogācāra transmissions, and incorporated esoteric Buddhist practices. Likewise, recent work on Dzogchen has shown that it cannot be considered in separation from its relationship with Mahāyoga sādhanā practice.

The reification of ‘Chan’ and ‘Dzogchen’ as independent entities is something that has happened in the tradition itself. Both realms of discourse were gradually separated from their scriptural and doctrinal basis in the...
Dzogchen, Chan and the Question of Influence

sutrás and tantras, respectively. Modern teachers in both traditions – here I am thinking particularly of D.T. Suzuki and Namkhai Norbu – have also done much to engender a popular view that both traditions transcend their cultural contexts. In the second part of this article, we will look at both Chan and Dzogchen in the context provided by the Dunhuang manuscripts, and looking at them as forms of praxis, we will see that they both came to be applied to the practice of deity yoga. This, I would argue, is where we might be justified in saying that Chan and Dzogchen did come together. Thus what we see, looking at this earliest documentary evidence, is not a case of influence, but one of convergence.

2. The uses and abuses of terminology

Arguments for and against the influence of Chan and Dzogchen have often been based on comparing specific technical terms found in their texts. Such a practice encourages us to extract both kinds of text from their contexts, in order to resolve the issue of influence to a straightforward equation. It is easy to highlight similarities or differences between Chan and Dzogchen texts, depending on one’s agenda; we need not even be consciously aware of the selective nature of our reading. Take for example the following passage, a teaching attributed to the Indian master Haklenayaśa which is found in several Dunhuang manuscripts:

There are many methods of contemplation in the Mahāyāna. The ultimate among them is the instantaneous approach to the Madhyamaka. The instantaneous approach has no method. One meditates upon nature of reality like this: phenomena are mind, and mind is uncreated. In that it is uncreated, it is emptiness. Since it is like the sky, it is not a field of activity for the six sense-faculties. This emptiness is what we call vivid awareness. Yet within that vivid awareness there is no such thing as vivid awareness. Therefore without remaining in the knowledge gained from learning and studying, meditate upon the essential sameness of all phenomena.

---

8 See for example Suzuki 1949 and Norbu 1989.
9 There are three copies of this text. In IOL Tib J 709, the name of the teacher is given as ‘Gál na yas. As far as I am aware this name has not previously been connected to Haklenayaśa, the 23rd patriarch in the list of 28 that appears in the Platform Sutra and elsewhere. The Tibetan version of the name, which seems to have undergone some corruption in the form we have it in this manuscript, comes via the Chinese Helenayeshe 聯那底等. In another copy, Pelliot tibétain 812, the scribe has garbled the name further as ‘Gál ya nas; subsequently, this has been ‘corrected’ to Ma ha yan, which led Luis Gomez (1983: 123–4) to include this text among the works of Moheyan (though he noted that the attribution was doubtful). The third version, in IOL Tib J 706 verso, seems to be embedded in a longer text, and there is no attribution on the fragment of the manuscript that has survived.
10 IOL Tib J 709, 42v: $/:/mkhan po ‘gal na yas bs[am] g+tan gl snying po bshad pa’// theg pa chen po i bsam gtan gl sgo yang mang ste// de’l nang na dam pa n don dbu ma la cig car’jug pa yin te/ / clg car’jug pa la nl thabs myed de// / chos nyid kyi rlang bzhin la bsgom mo// / de la chos nl sems sems [sic] nl ma skyes pa’o// / ma skyes pa nl stong pa
One might pick up a number of terminological similarities with early Dzogchen texts here; for example, the emphasis on the mind and its emptiness, the imagery of the sky, and the valorization of the direct connection with the ultimate over the scholastic path. Yet there are also significant differences. Most important perhaps is the term “vivid awareness” (Tib. tshor, Ch. jue 覺), which plays a key role in many Tibetan Chan texts, including those of Moheyan 摩訶衍, but does not appear in Dzogchen texts. The same term, tshor ba频繁 appears in Tibetan Buddhist literature as a translation of a completely different term, vedanā. Similarly jue 覺 is sometimes used in Chinese texts for vedanā, in other contexts. It seems that the argument for identifying Dzogchen and Chan texts through terminology is dependent upon how one selects the terms for comparison.

A recent attempt to reinvigorate the argument for the influence of Chan on Dzogchen has come from Jeffrey Broughton, who points to the terminology found in a précis of Shenhui’s teachings in two Dunhuang manuscripts. It is quite entertaining to see, in the passage quoted above, the old polemical issue of whether Dzogchen ‘originated’ in India or China being recast here as a dispute between Indologists and Sinologists. Perhaps there is something in Broughton’s suggestion that the study of Tibetan Buddhism has a bias towards Indian sources, but this objection alone will not suffice if Dzogchen has a much more evident genealogical connection to those Indian sources.

But Broughton argues, in the most recent example of the method of comparing terminologies, that the earliest Dzogchen texts are clearly drawing on terminology from Chan texts – in particular, from a text summarizing the teachings of the founder of the ‘Southern school’, Shenhui 神会 (684–758). In choosing this particular text, by a teacher who strongly rejected all gradualist language and the discussion of meditation techniques, Broughton seems to tacitly acknowledge that the texts that form the bulk of Tibetan Chan are dissimilar to Dzogchen. For the Tibetan Chan texts, both translations and original compositions, contain much discussion of specific meditation practices, especially those that cluster around the idea of “viewing the mind” (Tib. sens la bltas, Ch. kanxin 看心).

Shenhui’s rejection of specific meditation instruction as a hindrance to engaging with the uncaused state of enlightenment does find echoes in many Dzogchen texts. But Broughton makes an ambitious claim for this particular Shenhui text, stating that “all the major points of early Rdzogs chen teaching as found in both the Rig pa’i khu byug (Cuckoo of Awareness) and the Bsam gtan mig sgron (Lamp of the Eye of Dhyana) are found in this.
Accomplish the sign of truth, which is to be always without recollection. What does this mean? The nature of thought is primordially a non-resting essence. It is not to be obtained, nor can it be fixated by mental clarification or meditative absorption. It cannot be fixed as “it is thought” or “it is not thought” or good or bad, or thought as colour and shape. Nor can it be fixed as having limits or not having limits, as having size or not having size, as having a place or not having a place.

Do not fixate on any of the characteristics of mental activity. If by doing this you do not rest upon thought, then that primordial non-abiding in the essence of thoughts’s sameness is reflexive awareness. Awareness means coming to rest in non-resting. For example, a bird flying through the open sky goes without resting. If it did rest in the open sky, it would fall. In the same way, it is not possible for there to be no awareness. Without awareness you would fall into the extreme of emptiness.

Therefore non-resting is the primordially peaceful essence. Through the wisdom of the patriarchs you are able to be aware of the essence of this rare peace. If you apprehend this directly, there is no mental activity in that apprehension. If you see it directly, there is no mental activity in that seeing. This is the total perfect dharmakāya, equivalent to the dharmadhātu, the same as the sky. Since it is by nature nonabiding, its qualities are limitless and spontaneously perfected. 14

It is clear that Broughton has made a good choice of text here; unlike many of the Dunhuang Chan texts there is no discussion of techniques like viewing the mind, and there is some overlap of terminology with Dzogchen texts. Broughton points out a number of key terms that he believes link Shenhui’s teachings to Dzogchen:

— awareness (rig pa),
— reflexive awareness (rang gis rig pa),
— the peaceful essence (zhi ba’i ngo bo nyid),
— no mental activity (yid la bya ba myed),
— spontaneous perfection (lhun kyis rdzogs pa).

14 PT 116: [v.60]: //bsam brtan gyi mkhan po shin ho'i bsam brtan gyi mdo las 'byung ba// rtag tu dran ba myed pa'i bden paI mttshan ma bsgrub bo// de yang gang [v.61] zhe na// //sems kyi rang bzhin ye nas myi gnas paI ngo bo nyid nI// thob par bya ba myed de //sams dangs ba dang ting nge 'dzin du dmyigs pa myed //sems la yin ba dang/ + ma yin ba dang/ bzang ba dang/ ngan dang/ //sems la kha dog dang dbyibs su yang dmyigs pa myed// //sems la mtha yod pa dang/ mtha’ myed pa dang/ tshad yod’ pa dang/ tshad myed pa dang/ gnas yod pa dang/ gnas myed pa 'ang dmyigs pa myed de// yld la bya baI mttshan ma thams cad myi dmylgs so// de llar sams la gnas myed par gyur na// //sems kyi mnyam baI ngo bo nyid ye nas myi gnas de ni// //rang gls reg [sic] pa yin [v.62] no// //rlg pa zhes bya ba ni myI gnas paI gnas su phyin pa'o// // dper na bya ni bar snag nam ka la myi gnas par 'gro ste// //gal te nam ka bar snang la gnas par gyur na ni ltung bar 'gyur ro// //deI phyir rlg pa myed pa yang ma yin no// // rig pa myed na stong paI mttar ltung ngo// // de bas na myi gnas paI nl ye nas zhi baI ngo bo nyid de// // phyi moI ye shes kyis na zhi ba dkaI baI ngo bo nyid rig par nus so// // de bas na mngon sum du shes na yang/ // shes par yid la bya ba myed// // mngon sum du mthong na yang// // mthong bar yid la [v.63] bya ba myed pa de ni yongs su rdzogs paI chos kyi sku ste// //chos kyi dbyings dang 'lung bas nam ka dang mnyam ste// //ngo bo nyid kyis myi gnas pas// //yon tan dpag tu myed pa<so> lhun kyis rdzogs par 'gyur ro//. The other version is PT 813: 2v.4-3v.1.
For those familiar with Dzogchen literature, it is clear that this list will not establish the influence of Chan on Dzogchen once and for all. First of all, not all the terms are characteristic of Dzogchen texts. The “peaceful essence” is not found in the early Dzogchen literature that I am aware of, and the term “no mental activity” is rare. And rather than “spontaneous perfection,” the usual formulation in Dzogchen texts is ‘spontaneous accomplishment’ (lhun kyis grub pa). Secondly, and more importantly, all of these terms are found in scriptural texts that would have been familiar to the writers of both Chan and Dzogchen texts. Look for example at the two terms that are popular in Dzogchen texts, rig pa and rang gis rig pa. Both appear throughout the Lāṅkāvatārā, the Saddharmapūṇḍarīka, and many other popular sūtras. Moreover, they are also found throughout some of the most influential tantras, including the Sarvatathāgata-tattvasamgraha and, crucially for Dzogchen texts, the Guhyagarbha.15

It is not necessarily that the writers of Chan and Dzogchen texts were drawing on exactly the same sources. As we know, much of the terminology of Dzogchen discourse is also found in the tantras, rather than the sūtras, particularly the Guhyagarbha and other tantras of the Māyājñāla class.16 On the other hand, much of the Tibetan Chan literature of Dunhuang makes its roots in the sūtra literature very explicit. Where there is a convergence of terminology between Dzogchen and Chan, this is because the tantric sources for Dzogchen literature (like the Guhyagarbha) are themselves steeped in the terminology of the sūtras that inform Chan discourse (like the Lāṅkāvatārā). Thus many of Dzogchen’s key terms are also found in the sūtras. A very simple diagram of the transmission of technical terms would be this:

---
15 For the Guhyagarbha instances, see D.834, f.202b, 233b. Likewise, ‘spontaneous perfection’ (lhun kyis rdzogs pa) is found in the Guhyagarbha (D.834, f.217a). In fact, all of the Tibetan terms Broughton cites linking Dzogchen to Chan appear in popular scriptural texts like the Lāṅkāvatārā and Prajñaparamitā sūtras, thus forming the common stock of terminology that could be drawn upon by both Chan and Dzogchen teachers. The phrase ‘no mental activity’ (yid la bya ba med) is particularly popular in the Perfection of Wisdom sūtras, especially the Satasahasrīkā and Pañcaviṃśatisahasrīkā. The term ‘peaceful essence’ (zhi ba'i ngo bo rgyud), which is, as I mentioned, not characteristic of Dzogchen texts anyway, also appears in the Satasahasrīkā (D.8, f.9a), as well as the Pitṛputrasamāgamuna (D.60, f.109a) and Sāgarānḍagarjaparipṛcchā (D.153, f.193b).
If there is one thing in the précis of Shenhui that might give us pause, it is the repeated contrast between thought (sems) and awareness (rig pa), which is similar to the use of these terms in Dzogchen literature. However, this raises another issue. We have no reason to think that the Shenhui précis is particularly early, as the manuscripts containing it are probably from the tenth century. The version of Shenhui’s teachings presented here may have been written by a Tibetan who was familiar with the language of Dzogchen texts. This being so, we cannot conclude any influence running from Chan to Dzogchen (as against the other direction) in the appearance of similar terminology in such texts.

3. Chan, Dzogchen and the tantras

According to the texts of Chan, Sūtra and Mantra, the view is non-fixation.
– Dunhuang manuscript, 10th century

The anonymous writer of this line, from a treatise on Mahāyoga, shows that for some, at least, there was a point at which the texts of the sūtras, the tantras, and Chan teachers converged: the ‘view’ (lta ba), that is, the philosophical position or general attitude to be adopted. This was not an idle observation. Recent studies of Chinese Chan show a great deal of overlap between Chan and esoteric Buddhism during the eighth to tenth centuries. A striking example of this is the manuscript Pelliot chinois 3913, an 87-folio book written in the early tenth century. The book is a compilation serving as a manual for the ritual of entering the maṇḍala of the buddha Vairocana. The text gives two lineages of transmission for its teachings, and these are both unmistakeably lists of Chan teachers.

Furthermore, the title of the work implies that it is intended for the a ritual on an ordination platform (jietan 戒壇). The ritual of initiation into Chan held on ordination platforms was ubiquitous in early Chan lineages, to the extent that, as Wendi Adamek has put it, “Chan can be said to have been born on the bodhisattva precepts platform.” Manuscripts like Pelliot chinois 3913 suggest that the ordination platform used in Chan lineages came to be regarded as coterminous with the tantric maṇḍala. It is not very useful to call this ‘syncretism’, a term implying the conjoining of two distinct entities. Rather, what we are seeing is the transmission of texts and teaching lineages without the firm distinctions imposed by the later traditions. An illuminating example of this trend from the Tibetan manuscripts is found in Pelliot tibétain 996, a treatise on a Sino-Tibetan

---

18 On Pelliot chinois 3913, see Tanaka 1981. On this and many other manuscripts concerning mandalas, see Kuo 1998.
19 Adamek 2011: 33. See also Adamek 2007 for a detailed discussion of the historical development of the precepts ceremony in China, with regard to Chan lineages.
20 Kuo Liying (1998) has investigated the mandala diagrams of Pelliot chinois 2012, showing how they depart from normative tantric mandalas, and how they were used for the three rituals of consecration, confession, and ordination. Though she does not suggest it, the unusual forms of these maṇḍalas and their uses suggest that they may also have been developed in Chan lineages.
21 On critiques of syncretism, and recent attempts to rehabilitate the term, see the introduction to Stewart and Shaw 1994.
Chan lineage. Towards the end of the manuscript there is a poem attributed to the Tibetan teacher Namkai Nyingpo, titled *In Praise of the Path of Yoga*:

Non-abiding, equality — this is the path of ultimate yoga,
Unchanging, unproduced and unceasing from the start.
That which appears is like a bird’s path through the sky:
Impossible to objectify it with a view, or express it in words.
Those noble beings with the wisdom-mind of reflexive awareness,
Understand and master this freedom from objectifying concepts.
Homage to the treasury of the tathāgatas themselves,
The tradition that is the source of noble beings.
The path of the sages in equality from the beginning,
The mandala of non-objectification and sameness,
The equalization without arising or cessation
Which is the wisdom of the Vajradhātu.
Those who have mastered bodhicitta
Can perform the summoning of an immoveable mind.
The mudrā that liberates the children of the Conqueror,
Is the supreme form, sameness itself — to cultivate it,
Is to be the dharmakāya, complete and perfect.
This, it is said, is the supreme siddhi.

The presence of terminology drawn from the tantras is unmistakeable here — the *mandala* of the *vajradhātu*, the *bodhicitta*, the *mudrā* and the characterization of realization as ‘the supreme siddhi’. All of this, especially the allusion to the vajradhātu mandala, points to an association with the tantric literature like the *Sarvatathāgata-tattvasaṃgraha*. The way Namkai Nyingpo’s verses weave together allusions to concepts from the sūtras and tantras suggests an audience familiar with both Chan discourses and tantric practices.

This allusive language is intriguing, but does not tell us how Chan meditation techniques might have been applied to tantric sādhanā practice. For this, we can turn to a couple of manuscripts which seem to be written by the same scribe. Pelliot tibétain 626 and 634 are instructions for meditation in

---

22 There has been some discussion about whether the author of these verses is the same Nam mkha’i snying po known to the later Tibetan tradition as a disciple of Padmasambhava and exponent of Dzogchen. Samten Karmay (1988: 98–99) argued that these were two different people, because Pelliot tibétain 996 at one point gives the name as Tshig tsha Nam ka’i snying po, whereas the figure known to the traditions is Gnubs Nam mkha’i snying po. However, unlike Gnubs, Tshig tsha is not a known clan name, and could even be a corrupted form of cig car, ‘instantaneous’. The question should probably remain open.

23 Pelliot tibétain 966: 3r.4–3v.4. mkhan po nam ka’l snying po/ rnal ’byor gi lam la bstd pa/ myl gnas mnyam pa rnal ’byor nges pa’i lam/ ye nas skye med ’gag par myl ’gyur te/ ji ltar bar snang bya lam rjes bzhin du/ bta ba’i dmyylgs myed tshig gli brjod myi rung/ ’phags pa rang rig ye shes blo ldan bas/ dmyylgs pa’i rto bral mkhas shing shes pas rig/ ’phag ’tshal de bzhin gshegs pl nyld kyl mdzod/ de ni ’phags pa’i byung gnas lam srol te/ ye nas mnyam pa drang srong chen po’i lam/ dmyylgs myed mnyam pa dkyll ’khor te/ skye ’gags myed par snyoms pa nl/ rdo rje dbyings kyl ye shes so/ byang chub sens ldan mkhas pa yls/ myl g.yo yid la zlos byed pa/ rgyal sras grol ba’l phyag rgya ste/ gzugs mchog mnyam nyld ’dl bsogs pas/ rdzogs pa yang dag chos kyl sku/ ’dl ni dngos grub mchos ces gsungs/.

24 Another early example is Or.15000/494, a manuscript from the imperial-period fortress of Miran. The manuscript contains a Chan text on the verso, and a tantric text on the recto.
the Mahāyoga practice of deity yoga. The writing style of the manuscripts is similar to that of many other tantric manuscripts that almost certainly date to the latter part of the tenth century.

The striking feature of these two sādhana in particular is that they apply to the practice of deity yoga techniques of viewing the mind normally found in Chan instructions. Meditation in the Mahāyoga sādhana tends to proceed along the structure of the three concentrations (ting nge 'dzin, Skt. samādhi), and this is what we see in Pelliot tibétain 626 and 634. These three are: (i) The concentration on suchness (de bzhin nyid), (ii) the concentration on total illumination (kun tu snang ba), and (iii) the concentration on the cause (rgyu). It is in the first of these that we find the technique of viewing the mind described.

Regarding the phrase ‘viewing the mind’ – the method is looking at one’s own mind, and the knowledge is to neither abide in nor conceptualize it. ‘Not being anything’ means settling the mind, which is taught in two methods: the method for examining the mind, and the method for settling. Regarding the method for examining: to look at the mind with the mind is a method for realizing that the entity mind is without any colour or shape whatsoever. Regarding the method for settling: one should settle the mind without thinking of anything.

The mental state resulting from this concentration is described in these two sādhana in terms of non-thought (mi bsam), non-conceptualization (mi rtog), and not engaging the mind (yid la mi byed pa), a trio seen elsewhere in Tibetan Chan texts, including those attributed to Heshang Moheyan. The resulting state of mindfulness is also described using a series of metaphors,

25 This discussion is based on van Schaik and Dalton 2004, with some new suggestions. See also Meinert 2002 and 2007, which discuss Pelliot tibétain 699. The latter, which is written in the same hand, is a Chan text accompanied by a commentary. The argument of van Schaik and Dalton 2004 is that this commentary places the Chan text in the context of Mahāyoga sādhana practice, as a mirror image to Pelliot tibétain 626 and 634. In Meinert 2002 and 2007a, on the other hand, the commentary is identified as coming from the position of Atiyoga. In fact, given that Atiyoga was understood as an approach to sādhana practice in this period, both interpretations are correct. This is made particularly clear by the citation in Pelliot tibétain 699 of the Rdo rje sens dpa’i zhus lan, a treatise on Mahāyoga practice that takes a position usually identified with Atiyoga.

26 They may be compared to many of the tenth century Tibetan manuscripts listed in Takeuchi forthcoming.

28 For an extended discussion of the three absorptions, see van Schaik 2008b. Among the Dunhuang manuscripts, see also IOL Tit J 437, 552, 553, 554, 716; Or.8210/S.95/7; Pelliot tibétain 42 (26–29), 283.

29 Pelliot tibétain 626, ff.2v–3r: sems lta zhes pa ni/ bdag gi sens la lta ba ni/ thabs yin la/ de la myi gnas myi rtog pa ni shes rab yin no/ cir yang myin zhes pa ni/ sens la gzhag thabs gnyis su bstan te/ de yang sens kyi brtag thabs dang// gzhag thabs so/ de la brtag thabs ni/ sens la sens kyi bta/ la na sens kyi dngos po ka dog dang dbyibs cir yang ma yin bar rtogs pa/ ni thabs/ gzhag thabs ni/ cir yang myi bsam bar bia gzhag go/.

30 For these three terms in Tibetan Chan texts see Pelliot tibétain 117 6v:3–4, and STMG 165:4–5. For Moheyan’s use of them see Gomez, 1983: 152 n. 43. These three are clearly related to the ‘three phrases’ of Wuzhu: no-recollection (wuxi 無想), no-thought (wuxiang 無想), and do not allow the unreal (mowang 莫妄) – see Adamek 2007: 206, 246, 338, and Broughton 2009: 183.
like that of the watchman spotting a thief, which are also drawn from the teachings of Moheyan, and before him, Shenxiu.\(^{31}\)

Thus these two sādhanas show that the contemplative techniques taught under the heading of ‘viewing the mind’ – which were popular in Chinese and Tibetan Chan at Dunhuang – were adapted to the first stage of Mahāyoga meditation practice, the concentration on suchness. These sources, and the verses attributed to Namkhai Nyingpo, strongly suggest that the context for the practice of meditation instructions from Chan lineages was often a tantric one. Since by the tenth century, Mahāyoga had become the most popular form of tantric Buddhism in Tibet, it is not surprising that Mahāyoga sādhanas became one of the main settings for these Chan meditation practices.\(^{32}\)

* * *

Let us now look at the relationship between Dzogchen and tantric Buddhism. From the eleventh century and onwards, the Tibetan tradition came to separate the texts of Dzogchen from other kinds of tantric discourse, eventually assigning them their own ‘vehicle’. This has obscured the way Dzogchen developed before this time. Recent work on the earliest sources for Dzogchen has shown that it emerged from the milieu of Mahāyoga tantra in the eighth century and for a long time thereafter was understood primarily as a framework for the practice of Mahāyoga sādhanas.\(^{33}\)

Thus in the Guhyagarbha tantra, the term ‘great perfection’ (rdzogs chen) appears in the thirteenth and fourteenth chapters, on the sexual yoga of the completion (rdzogs) stage and its experiential aftermath. This aftermath is expressed in terms of the spontaneous fulfillment of all aspects of enlightenment in a stage that transcends all thought. The sense here that ‘great perfection’ refers to the realization engendered by the stage of perfection is made explicit on a treatise based on the Guhyagarbha tantra and attributed to the eighth-century figure Padmasambhava: the Garland of Views. In this treatise, esoteric yoga is divided into three ‘modes’ – development (bskyed), perfection (rdzogs) and great perfection (rdzogs chen).

When we turn to the two Dzogchen texts preserved in the Dunhuang collections, we find them still in dialogue with Mahāyoga. For example IOL Tib J 647, a commentary on a popular six-line verse known as The Cuckoo of Awareness, is full of allusions and direct references to Mahāyoga practice. For example, the author summarizes the general meaning of the verse in question as ‘Samantabhadra, great bliss, the mode of perfection’, a direct reference to the sexual yoga of the perfection stage. After this the author writes of the ‘great inner nectar’, a euphemism for the sexual fluids that are tasted at the culmination of the perfection stage, saying that the method here is to ‘accept the bodhicitta,’ (another euphemism for the same thing) ‘without accepting’.\(^{34}\) The author goes on to deal with topics relevant to practitioners

\(^{31}\) See Gomez 1983: 92, 102, 153.

\(^{32}\) On the popularity of Mahāyoga in the tenth century, see chapter 8 of van Schaik and Galambos 2012.

\(^{33}\) I have discussed these issues at length in van Schaik 2004b and 2008.

\(^{34}\) IOL Tib J 647, f.3v: ‘di spyi don ni/ /dpal kun tu bzang po bde ba chen po rdzogs pa’i tshul zhes bya ba’o/ ... /nang gi bdud rtsi chen po zhes bya ste/ /myi len pa’i byang chub len pa’i thabs dam pa yin pa’i phyir/
of Mahāyoga sādhanas, including the practices of ‘liberation’ and ‘union’ (ritual killing and sex).

The manuscript containing IOL Tib J 647 is from the tenth century, and we do not know how much earlier the text itself was composed. We do have one text that was later accepted into the canon of early Dzogchen scripture that can be placed in the early ninth century, thanks to its being listed in the imperial-period library catalogue, the Ldan dkar ma. This is Mañjuśrīmitra’s Meditation on Bodhicitta, also known as Gold Refined from Ore.\(^{35}\) This text addresses the themes usually associated with Dzogchen, but makes it quite clear that this is to be applied within the context of Mahāyoga sādhana practice:

Stabilize the three concentrations. Then bind the three symbolic mūdras. Then in the mūdra of the dharma, generate mind itself. At this point, recite the mantra and abide in meditation. To meditate on Vajrasattva is to meditate unerringly on all paths.\(^{36}\)

What this passage shows is that the context for the experiential state evoked in these early Dzogchen texts was deity yoga (which, in Mahāyoga, was generally focussed on the deity Vajrasattva). Furthermore, we encounter here once again the three concentrations – the stages in which the visualization is developed in Mahāyoga sādhana. As we saw in the previous section, it was here that the techniques of Chan were being applied in the tenth century. Since this had been the role of Dzogchen style teachings since at least the early ninth century, if there is an influence here, it looks like it is Dzogchen influencing the practice of Chan.

4. Conclusions

I have written at length because of my concern about the errors that may be caused by the similarities between the doctrine of sudden enlightenment and Dzogchen.

– The Lamp for the Eyes of Contemplation

It seems to me quite valid to suggest that the use of Chan meditation techniques in the context of practising Mahāyoga sādhana is a case of Chan being influenced by Dzogchen. But I also think it might be better to replace the idea of influence with the better-suited concept of convergence. From the eighth century, teachers of Chan texts in China, and Dzogchen texts in Tibet, were engaged with esoteric Buddhism. By the tenth century, these parallel developments converged, at least in the context of Tibetophone Buddhist practitioners, when both Chan and Dzogchen were being practised in the context of the three concentrations of Mahāyoga sādhana.

The fact that Chan texts came to have a parallel function to Dzogchen texts helps to clarify the motivation behind the composition of the Lamp for the Eyes of Contemplation – that is, it explains why the apparent similarities between Chan and Dzogchen had become problematic. The passage cited

\(^{35}\) The Tibetan names as Byang chub sogs gsum pa and Rdo la gser zhan. On the Ldan dkar catalogue, see Lalou 1953: 333–334. This text occurs in a section of the catalogue on meditation texts, including one that may be a Chan text, entitled Bsam gtan gi yi ge.

\(^{36}\) D.134: 4a.
above suggests that by the tenth century Chan and Dzogchen lineages had
come to occupy the same space in Tibetan Buddhism, and this was
perceived, at least by those promoting Dzogchen lineages, as a threat. 37
Sangyé Yeshé’s solution was to create a four-stage hierarchy, in which the
two sūtra-based approaches of gradual and instantaneous awakening were
placed lower than the two tantra-based approaches of Mahāyoga and
Dzogchen. With this hierarchy Sangyé Yeshé attempted to show, for once
and all, that only Dzogchen had the authority to function as a framework for
Mahāyoga.38

As we have seen, Chan meditation continued to be practised at
Dunhuang after Sangyé Yeshé. Indeed, Tibetan Chan lineages seem to have
still be alive in the eleventh century, when the Amdo master Aro Yeshé
Jungné is said to have held both Chinese and Indian lineages. 39 Still, such
marks of influence became fewer and fewer. By the thirteenth century Chan
came to be represented in the Tibetan imagination primarily in the narrative
of the debate held at Samyé between the Chinese Chan teacher Moheyan
and his Indian opponent Kamalāśīla. The classical forms of this narrative
present a caricature of Chan as an extreme quietism, and represent Moheyan
as losing the debate, resulting in the banning of all Chinese teachings from
Tibet. Once Chan had become stigmatized in this way as a heretical
teaching, it was easy for those who distrusted Dzogchen to attempt to
identify the one with the other, beginning the tradition that was revived in
modern scholarship by Tucci.

I suggested earlier that ‘was Dzogchen influenced by Chan?’ is a badly-
phrased question, one that cannot lead to a satisfactory answer. Yet the
temptation to phrase the question in this way is influenced by the traditional
portrayals of Dzogchen and Chan as autonomous entities, transcending their
own Buddhist context. Though a study of the history of both traditions
undermines such portrayals, they seem to have a strong hold on the
imagination; as Ludwig Wittgenstein put it, “a picture held us captive.”40 It
might be better for us to turn away from this particular picture, to stop
trying to compare ahistorical essences, and look instead for specific
historical moments of dynamic interaction.

37 Lamp for the Eyes of Contemplation, 186: rnal ‘byor mig gi bsam gtan gyi skabs ’dir/ ston
mun dang/ rdzogs chen cha ’dra bas gol du dogs pa i phyir rgyas par bkod do//.
38 On the way Sangyé Yeshé distinguishes Chan from Dzogchen see Dalton and van Schaik
2003. Incidentally, Sangyé Yeshé was, at the same time, making a more distinct separation
between Mahāyoga and Dzogchen than had previously been the case. See van Schaik
2005: 195–199. On the doctrinal stratification of sūtra and tantra in Buddhism, and its
roots in Indic Buddhism, see Davidson 2005: 286–287. Of course, scheme like these were
also developed in China in the process of the “Sinification of Buddhism” (Gregory 1991).
Sangyé Yeshé’s hierarchy has a similar function to those of Zongmi, compartmentalizing
and ranking a diversity of Buddhist approaches, and can certainly be seen as part of the
“Tibetanization of Buddhism” even though Sangyé Yeshé’s particular system was not
directly influential on the later Tibetan tradition.

Western language sources

airocana Rakṣita is famed for his completion of five early translations (snga ‘gyur lnga), usually described as including: Rig pa’i khyu phyug, rTsal chen sprugs pa, Kyung chen mkha’ lding, rDo la gser zhun, and Mi nub pa’i rgyal mtshan nam mkha’ che. A search for the source text for the Mi nub pa’i rgyal mtshan Nam mkha’ che leads us to a fascinating set of works, works of both individual and collective interest. To understand the full portent of the Nam mkha’ che literature a thorough and careful study of these works will be required. This article is intended to open that door. There are three parts: a catalogue of extant works in the Nam mkha’ che cycle, a brief discussion of authenticity, and a look into a set of fifty five verses that have become an important source for the Nam mkha’ che teachings, The Mahā Ākaśa Kārikā. Observations on how these Kārikās move through Tibetan history will shed light on the development of the so-called “Old” (rNying ma) and “New” (gŚar ma) traditions of Buddhism in Tibet, and on the concerns of one early gŚar ma reformer, Pho brang Zhi ba ‘od.

The Texts of the rDo rje sens dpa’ Nam mkha’ che

A review of the bKa’ ‘gyur and rNying ma rgyud ‘bum collections reveals a number of texts on the Nam mkha’ che. There are Tantras, Mula Tantras, Puṣṭi Tantras, and Tantras that unite the Nam mkha’ che with the Guhyagarbha. The catalogues of Jigs med gling pa and the lists of Nyang ral Nyi ma ‘od zer offer titles that we can find in these collections as well as titles that are not presently evidenced. Here is a listing of the titles evidenced:

Mula Tantras

Mi nub rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud1

Early Catalogues

‘Jigs med gling pa’s catalogue

‘Jigs med gling pa lived 1729-1798. His catalogue was based on the sMin gling Manuscript of the rNying ma rGyud ‘bum. The manuscript it catalogues has not yet been found. The rDo rje sms dpa’ nam mkha’ che literature has a major place in the collection.13

Volume 1 contained:

1. rDo rje sms dpa’ nam mkha’ che bram ze rgyas pa’i rgyud : 16 chapters.
14. rDo rje sms dpa’ nam mkha’ che rgyas pa zhes bya ba rgyud : 11 chapters.
15. Nam mkha’ che rgyas pa zhes bya ba rnal ’byor ma rgyud : 13 chapters,
Translated by Vimalamitra and dPal brtsegs.
20. rDo rje sms dpa’ nam mkha’ che gsang ba snying po rnal ma don gyi rgyud : 12 chapters.

Volume. 2 contained:

35. rDo rje sms dpa’ nam mkha’ che :
Translated by Śrī Śimha and Vairocana.
39. Nam mkha’ che rgyas pa yi ge med pa’i rgyud : 8 chapters.

Volume 3 contained:

55. rDo rje sms dpa’ nam mkha’ che kun tu bzang po gsang ba snying po’i rgyud kyi mdo : 26 chapters,
Translated by Śrī Śimha and Vairocana.

---

12 In the bKa’ ma shin tu rgyas pa edition the title is “Kun byed rgyal po'i rgyud”.
13 Achard, “La liste des Tantras du rNyin ma'i rgyud 'bum selon l'édition établie par Kun mkhyen 'Jigs med gling pa”, p. 62.
Nyang ral Nyi ma ‘od zer

The Chos ’byung me tog snying po sbrang rtsi’i bcud by Nyang ral Nyi ma ‘od zer (1136-1204) lists two titles among seventeen teachings propagated by Vairocana:14

— Mi nub rgyal mtshan nam mkha’ che
— Nam mkha’ che rgyal po

It also lists six separate Nam mkha’ che titles in a list of twenty five teachings Vairocana received from Śrī Śiṃha:15

— Nam mkha’ che rtsa ba can gyi rgyud
— Nam mkha’ che ye ge med pa’i rgyud
— Nam mkha’ che dbang gi rgyal po’i rgyud
— Nam mkha’ che grol ba’i rgyud
— Nam mkha’ che rgyas pa’i rgyud
— Nam mkha’ che rgyas pa phyi rta’i rgyud

Questions of Authenticity

General Concerns

In the Tibetan tradition the authenticity of the Nam mkha’ che literature has been questioned in two basic ways: its authenticity as a Buddhist teaching, and whether an individual text is authentically the same as what Vairocana Rakṣīta brought from India to Tibet.

We find that there are statements in the Nam mkha’ che Tantras themselves that seem to say that it is not the Buddha’s teaching while there are other statements that say that it is. It may be the case that there was a difference of opinion in different transmissions of the Nam mkha’ che or it may be that a central element of this tradition was a spirit of inclusiveness that considered its inspiration to be both what the Buddha taught about and something that was unspeakable, and so beyond even the Buddha’s teaching capacity. A thorough study will be required to sort this out. Here is a hint to get started:

The opening words of the rDo rje sems dpa’ nam mkha’ che rgyas pa’i yi ge med pa’i rgyud describe the Nam mkha’ che as an innovative teaching:

As it says in the King Tantra, when this Yi ge med pa was proclaimed, I was not different from anyone else: We had heard something we had not heard before. We were afraid.

Rgyal po’i rgyud du gsungs pa\ yi ge med pa’di gsungs pa’i tshe na\ nyid dang tha mi dad pa rnams singon ma thos pa’di thos pas sgrag par gyur to 16

14 Nyang ral’s Chos ’byung is not presently available to me. See Norbu and Clemente, pp. 246-247.
15 Norbu and Clemente, p. 242.
Statements to the effect that the Nam mkha’ che is not a Buddhist teaching can be found in its own Tantras. The rDo rje sems dpa’ nam mkha’ che rgyas pa zhes bya ba rnal ’byor ma’i rgyud tells us: 17

This reality is the nature of all things.
It must be realized in whole.
The method is to develop wisdom.
It cannot be seen by looking at things partially.
The nature of reality
Cannot be seen by anyone.
Even the Buddha cannot see it.
It is a self-arising wisdom, an illumination without locus.

There is a quotation in the Paṇsgrub rnams kyi thugs bcud snying gi ní ma, to be discussed shortly, of a statement in the Nam mkha’ che itself regarding the Buddha not having taught this: 18

There is no meditation that goes beyond The conventions of speech.
Conceptions arise in meditation.
We do not meditate on or search for
The body of self awareness.
This is how we place our ordinary nature (gyin-dhar)
In what is.
We place it, but there is no ground we place it on.
We place it down on the placing ground
Where there is no placement.
The thing we place is the heart of Vajrasattva.
The Buddha himself does not have teachings that say this.

16 mTshams brag, vol. 1, p. 586-587. Note that there are three Nam mkha’ che Tantras translated with the help of Jñanagarbha: the Yi ge med pa, the rNal ’byor ma, and the rGyal po rgyas pa. It may be that this opening of the Yi ge med pa refers to the rGyal po rgyas pa.

18 Vairo, vol. 1, p. 67. I have not been able to locate the original reference.
These kinds of remarks in the Tantras might be taken to indicate that the Nam mkha’ che was not a teaching of Śākyamuni, or even a Buddhist teaching. As if to address this very point there is a passage in the rDo rje sens dpa’ rtsa ba’i rgyud skye ba med pa:

This Root Tantra (rTsa ba’i rgyud) is, among transmissions,
The supreme transmission.
It was proclaimed by Śākyamuni,
The protector of living beings,
The lord of sages,
The holder of all good knowledge, without exception.
This great Root Tantra’s transmission
Is a vehicle he proclaimed with his own mouth.
Those who wish for the Buddha’s enlightenment
Must look into this unsurpassed supreme vehicle.

Authenticity in the Commentarial Tradition

The Paṇ śgrub rnams kyi thugs bcud snying gi nyi ma

The question of authenticity is more fully developed in the commentarial tradition. The Paṇ śgrub rnams kyi thugs bcud snying gi nyi ma is an overview of the significance and practice of the early rDzogs chen translations. It is the premier document in the Vairo rgyud ‘bum.20 The text is divided up into chapters which include instructions on meditation and practice as specifically related to six Sems sde teachings: the five early translations and the rMad du byung ba. There is a chapter on how to meditate on the Mi nub rgyal mtshan Nam mkha’ che on pages 64-84. There follows a chapter on the meditation for the rMad du byung ba from page 84 to 104. Then there is an interesting statement right before the colophon that closes the text:

This has no resemblance to what Universal Monarchs or teachers like Śākyamuni have taught. An investigation that will work out or refute the ocean of Upadeśa on the Mi nub rgyal mtshan Nam mkha’ che, which is the heart transmission of Samantabhadra dGa’ rab, does not disturb my mind. I hope this will be a lamp for those whose fortune it is to see things partially.

19 mTshams brag rNying ma rgyud ‘bum, vol. 3, p. 118.
The unnamed author of the *Pan sgrub* recognizes that the *Nam mkha' che* teachings do not resemble the teachings of the Buddha Śākyamuni, but nonetheless finds value in them as Buddhist teachings to the extent that he writes a full commentary on how to practice them. He clearly understands Buddhist teachings to include more than what Śākyamuni taught, and has accepted the transmission of dGa' rab rdo rje as authentically Buddhist. He recognizes that there is a dispute about the *Nam mkha' che*’s authenticity as a Buddhist teaching, and has adopted an understanding of what Buddhism is that includes teachings that Śākyamuni might not have given.

The Letter of Pho brang Zhi ba ‘od

Pho brang Zhi ba ‘od, a Tibetan scholar of the 11th century C.E., does not share the inclusive view of the *Pan sgrub*. He wrote an *Open Letter* in which he denounces a large number of scriptures as forgeries. The only known remaining source for Pho brang Zhi ba ‘od’s *Letter* is in the *gSang sngags snga ‘gyur la bod du rtsod pa snag phyur byung ba rnams kyi lan du brjod pa nges pa don gyi ‘brug sgra* by Sog zlog ba Blo gros rgyal mtshan (1552-1624). Of particular interest to us is his interdiction of the *Rig pa'i nyi ma*, a commentary on the *rDzogs pa chen po nam mkha' che* written by gNubs Sangs rgyas ye shes. He also rejects a text called the *rNal 'byor rig pa'i nyi ma*, which is probably none other than gNubs Sangs rgyas ye shes. It is also important to this study that Zhi ba ‘od rejects the *Kun byed rgyal po*, for chapter thirty of the *Kun byed rgyal po* purports to contain the text of the *Mi nub rgyal mtshan Nam mkha' che*.

Zhi ba ‘od’s general concern is that the texts he mentions were fabrications made to resemble the Buddha’s own oral instructions (*sangs rgyas kyi bka' ltar bcos*) by Tibetans who put Indian names on them (*rgya gar ma'i ming btags shing bod kyiis byas pa*). His specific concern with the *rNal 'byor rig pa'i nyi ma* is that it is referred to as an Upadeśa (*man ngag tu gsol*). His specific complaint against the other works under consideration is as follows:

> The Thirteen Latter Translations of the *Sems phyogs* which were translated by Ācārya Vimalamitra include the forty three chapters of the *rMad du byung ba*, the *Byang chub sems bDe 'byams rin po che*, and the *Tt a ba bal nag*, their

---

21 This transcribes what is actually in the text, orthographical errors inclusive.
24 Samten Karmay is of this view. See Karmay, *ibid.*, p. 24 n. 93.
25 Sog zlog pa Blo gros rgyal mtshan p. 462.
26 Sog zlog pa Blo gros rgyal mtshan p. 464.
commentaries, synopsis, and notes. The Eighteen Sems bDe, which were fabricated in the snowy mountains of upper Nyang to using a technique of rendering the original works into excerpts, include the Kun byed rgyal po, the mDo bcu gsang ba, and the Ye shes gsang ba, their commentaries, empowerments, and Upadeśa. These include the Upadeśa of Bha pa, the Upadeśa of Sems nyams, and the Srid pa rgyud lung.

Acarya Vimamitras bsgyur ba'i sems phyogs kyi phyis 'gyur bcu gsum la| rmad du byung ba'i le'u bzhi bcu zhe gsum dang| byang chub sems bde 'byams rin po che dang| lta ba bal nag la sogs pa'i grel ba dang| sa bcod dang| yig chung dang bcas ba dang| nyang stod khor gang dzu drang du shag tshul gyis byas pa'i sems bde bco bryad kyi rgyud rnam la| kun byed rgyal po dang| mdo bcu gsang ba dang| ye shes gsang ba dang| 'grel pa dang| dbang bskur gyi man ngag dang| bha pa'i man ngag dang| sems nyams kyi man ngag dang| srid pa rgyud lung la sogs pa|

Pho brang Zhi ba ‘od held that the Eighteen Sems sde texts, including the Kun byed rgyal po, were produced by taking texts apart, or rendering them, to get excerpts (drang du shag). The Eighteen Sems sde texts are generally held to be the five early translations of Vairocana and the thirteen latter translations of Vimalamitra. Zhi ba ‘od does list the rmad du byung ba and the rest of the thirteen latter translations of Vimalamitra in the separate category he mentions at the beginning of the passage. It may be that he duplicates his warnings on these works, but his primary concern with the Thirteen Latter Translations is that they were put together by Tibetans. His special concern for the Eighteen Sems sde texts and the Kun byed rgyal po relates to the techniques used to produce them. The first is a question of authorship, the second a question of editorial policy.

Samten Karmay’s transcription does not bring this out fully. I offer an alternate reading to the Open Letter below.

---

27 The text reads “nyang stod khor gang,” which is not an attested place, see Taranatha’s Myang gi chos byung. I believe the best reading is “nyang stod khro gang,” which I follow in my translation. Nyang (Myang) was an important area in the early development of rDzogs chen. Nyang Ting bzang po, a student of dPal gyi Seng ge, who was also a student of Vimalamitra, built a temple there.

28 Sog zlog pa uses “drang” and “drangs” as nominal forms of “dren.” E.g. ibid., p. 467 line 6 (Sog zlog pa Blo gros rgyal mtschan).

29 Sog zlog pa also points this out, p. 469: “They say that Vairocana’s five early translations are piled on top of the rmad du byung ba and the rest of Vimala’s latter translations, but this is not what is intended” (rmad byung la sogs pa bi ma la'i phyis 'gyur bcu gsum gyi steng du| bat ro'i snga 'gyur luga bsam pa la zer ba de ma dgongs pa'o).
Note that on Line 4 the reading is: nyang stod khro gangs su drang du shag tshul gyis byas pa'i sems bde bco bryuyad kyi rgyud rnams.

On line five the reading is: dbang bskur gyi man ngag dang. bha pa'i man ngag dang. l sems nyams kyi man ngag dang. l

Samten Karmay has read: nyang stod khro gangs su drang nga shag tshul gyis byas pa'i sems sde bco bryuyad kyi rgyud rnams la kun byed rgyal po dang mdo bcu gsang ba dang ye shes gsang ba dang 'grel ba dang sa bcood dang dbang bskur gyi man ngag dang sgeom pa'i man ngag dang sems nyams kyi man ngag dang l.

There is clearly some problem with the reading. While Sog zlog pa copies "drang du shag tshul" in his quotation of Zhi ba 'od, he comments on the passage saying: “The Dharma Cycles of the Eighteen Sems sde that were composed by Drang nga Shak Tshul at Nyang stod khro gangs include the Kun byed rgyal po (nyang stod khro gangs su drang nga shak tshul gyis brtsams pa'i sems bde bco bryuyad kyi chos skor rnams la kun byed rgyal po).” He also uses this name later on: “They say that the Kun byed rgyal po was fabricated by Drang nga Shag Tshul” (kun byed rgyal po drang nga shag tshul gyis byas zer). Samten Karmay has noted the unusualness of the name. I can locate no other appropriate reference to this name. It is possible that Sog zlog pa misunderstood Zhi ba ‘od’s statement, either by accident or with deliberation, replacing a description of the editing process with a personal name.

The Integrity of the Early Translations

It is especially interesting that Zhi ba ‘od does not speak out against the five early translations of Vairocana, the Nam mkha’ che in particular, even though he does speak out against gNubs chen’s commentary. Can we be sure that

31 Karmay, op. cit., p. 19.
32 Samten Karmay notes that he has read “sde” for “bde”.
33 Sog bzlog pa Blo gros rgyal mtshan, p. 469.
34 Sog bzlog pa Blo gros rgyal mtshan, p. 470.
36 Zhi ba ‘od does speak out against the “rgyal po chos lnga” (S. G. Karmay p. 16). Sog zlog pa comments on this: “They say the Five Dharmas for the King are Vairo’s Five Early Translations, but I believe they are something else. Due to the fact that these books have not been catalogued, there is no reason to categorize them as such” (rgyal po’i chos lnga ni bai ro tsa na’i lnga ’gyur lnga po la zer te gshan shig yin snyam du dgongs pa ‘dra’o ‘di’i sdebs
Zhi ba ‘od, gNubs chen, and the Pan sgrub have the same text in mind when they say “Nam mkha’ che”? Let us have a look at gNubs chen’s commentary, the rNam ‘byor rig pa’i nyi ma.

The rNam ‘byor rig pa’i nyi ma

The rNam ‘byor rig pa’i nyi ma is a commentary on the Byang chub kyi sens mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che. It can be found at present in the bKa’ ma shin tu rgyas pa collection. The text’s colophon does not explicitly state that gNubs chen Sangs rgyas ye she is its author. The title Rig pa’i nyi ma is directly associated with gNubs chen in Zhi ba ‘od’s Open Letter. The style of writing and vocabulary usage are consistent with that in gNubs chen’s bSam gtan mig sgron. I do not doubt that this is gNubs chen’s writing.

The Fifty Five Verses

The text gNubs chen comments on is a fifty five verse monologue. It is substantially the same text we have in Chapter 30 of the Kun byed rgyal po. These same fifty five verses also appear in three other texts found in the rNyim ma rgyud ‘bum collections: the Mi nub rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud, the rDo rje sens dpa’i lta ba, and the so-called Khyung chen lding ba.

I offer a critical edition of these fifty five verses in Appendix A which takes into account the versions from the Rig pa’i nyi ma, the three texts just mentioned, and the following editions of the Kun byed rgyal po: the bKa’ ‘gyur collections from sDe dge, Nar thang, Lhasa, and Urga along with the rNyim ma rgyud ‘bum collections from mT shams brag, gTing skyes, and the bKa’ ma rgyas pa. This edition also references quotations of these fifty five verses as found in the bSam gtan mig sgron and the Pan sgrub rnam kyi thugs bcud snying gi nyi ma.

To gain a better understanding of why Zhi ba ‘od made warnings about these documents let us examine similarities and differences in the extant versions of the Fifty Five Verses: the introductions, closings, and important differentials in content.

Differentials in the versions

The Rig pa’i nyi ma

gNubs chen Sangs rgyas ye she tells us that the text he is commenting on is called Byang chub kyi sens mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che. He describes the content of the work as follows:

37 bKa’ ma shin tu rgyas pa, vol. 103, pp. 51-112. This copy of the collection of manuscripts is a personal possession of Dr. David Germano, who has kindly made it available to scholars and translators through Gene Smith’s TBRC project. Special thanks are in order.
38 This is an intuitive statement I make, based on 27 years of familiarity with the bSam gtan mig sgron.

34 Revue d’Etudes Tibétaines
A proper explanation of the versification of words is that a few words are used to carry a vast significance. There are fifty-five ślokas,\(^{39}\) they are suitably arranged so that twenty-seven topics (skabs) are subsumed into six headings (thig le).\(^{40}\)

\[
tshig sdeb sbhor legs pas bshad pa ni \t tshig nyung la don rgya che \t ba'i phyir sho lo ka lnga bcu rtsa phyed dang lnga \t skabs nji shu \t rtsa bdun \t thig le drug rim par tshig don bsdu legs su bkod pa \t rnams so\]

The text gNubs chen describes begins with the words: “Homage to the Blessed One Vajrasattva” (bCom ldan 'das dpal rdo rje sems dpa' la phyag 'tshal lo). His text has no preamble. It does have a colophon, where we find the title of the text presented in the Indian language at the commentary’s end:

These words were proclaimed by the glorious Vajrasattva, the personification of all the Blessed One’s transmissions. The significance of the title has been explained to be Mahā Ākāśa Kārikā.

The rNal 'byor rig pa'i nji ma is an illuminator,
An extract of the significant roots
From a vast mental transmission.
This is only for mature vow keepers.
May it not come into contact with degenerates
Who use its words to deceive.
This ends the commentary on the Nam mkha’ che.

\[
de skad ces bcom ldan 'das lung thams cad kyi bdag nyid dpal rdo rje sens das dpas gsums pa \t ma haa a ka shi ka ri ka zhes mtshan don bstan pa'o \t don gyi rtsa ba lung sens yongs kyi bcud \t rnal 'byor rig pa'i nji ma sna ng byed pa \t dam can sru rgyu can las ma gtags pa \t nyams pa bka' slu rnams dang ma phrad ceg \t nam mkha che'i 'grel pa rdzogs sto\]

The Rig pa'i nji ma presents the text of each verse written out in full. The heading and topic titles are also written into the commentary as quotations from the Tantra. The fifty-five verses it contains are dissimilar from all other available versions of these verses in two ways: between verse 21 and 22 of all other versions gNubs chen has a verse that is otherwise unattested.\(^{41}\)

\[
lus dang rgyag gi bya brtsal med \t ting 'dzin sens kyi rims gsol med\]

\(^{39}\) Four lined verses with seven syllables each.

\(^{40}\) The Thig le drug is a known rubric in rDzogs chen teaching. See Karmay, *The Great Perfection (rDzogs chen): A Philosophical and Meditative Teaching of Tibetan Buddhism*, Brill’s Tibetan Studies Library, vol. 11, Leiden, 2007, p. 118. Rong zom Chos kyi bzang po (1042-1136) presents a discussion of this grouping in his *Theg pa chen po'i thshal la 'jug pa*. See *Rong zom bka' 'bum*, Reproduced from a manuscript copy of an incomplete print from the Ze-chen blocks with the detailed *dkar-chag* of *Jam-mgon Mi-pham rin-po-che*. Published by Kusang Topgay, Thimphu, Bhutan, 1976, pp. 217-219.

\(^{41}\) bKa' ma shin tu rgyas pa (kaH thog), vol. 104, p. 80.
gNubs chen achieves fifty five verses by leaving out verse number thirty eight.

A number of important Sens sde texts are cross referenced in the commentary. These include the Khu byug, the Khyung chen, the rMad byung ba, the bDe ‘byams, and the sPyi gcod.

The Kun byed rgyal po

The Kun byed rgyal po has at present become the locus classicus for Vairocana’s five early translations. It contains these renditions of the Five Early translations:

Chapter 31: rDo rje tshig drug a.k.a. Rig pa’i khyu phyug.
Chapter 22: Khyung chen ldin ba.
Chapter 26: rDo la gser zhung.
Chapter 27: rTsal chen sprugs pa.
Chapter 30: rDo rje sens dpa’i rang bzhin mi nub pa’i rgyal mtshan.

Chapter 30 consists of fifty five verses, the same verses we have in the Maha Akasa Karkkas, excepting the above mentioned differences in verses 22 and 38 and the addition of a preamble at the beginning. Since the fourteenth century C.E. the Kun byed rgyal po has been included in the bKa’ ‘gyur, a widely distributed and universally recognized source of authenticated Buddhist literature in Tibet. This was not the case at Zhi ba’od’s time, as the bKa’ ‘gyur had not yet been compiled.

The Kun byed rgyal po is currently available in versions from both the bKa’ ‘gyur and from rNYing ma rgyud ‘bum collections. The text of chapter 30, the Mi nub rgyal mtshan Nam mkha’ che, is basically the same in all of them. The opening to chapter 30 of the Kun byed rgyal po sets the stage for the presentation by Kun byed to Vajrasattva:

Then the Bodhicitta, Kun byed rgyal po, proclaimed this Mi nub rgyal mtshan, the transmission of being perfect without doing [anything], to Sens dpa’ rdo rje, his own essential character, for it is Sens dpa’ rdo rje’s true nature:

42 bKa’ ma shin tu rgyas pa (kaH thog), vol. 104, p. 88.
43 bKa’ ma shin tu rgyas pa (kaH thog), vol. 104, p. 66.
44 bKa’ ma shin tu rgyas pa (kaH thog), vol. 104, p. 62.
45 bKa’ ma shin tu rgyas pa (kaH thog), vol. 104, p. 92.
46 bKa’ ma shin tu rgyas pa (kaH thog), vol. 104, p. 69.
47 Ngag dbang blo bzang rgya mtsho, the Fifth Dalai Lama (1617-1682), considered the five early translations to have come from the Kun byed rgyal po. See Karmay, The Great Perfection, p. 207 n. 7.
48 The early compilation of the bKa’ ‘gyur was done by Bu ston Rin chen grub (1290-1364). Bu ston did not include the Kun byed rgyal po, but it was added soon after. For a detailed discussion see Neumeier-Dargyay The Sovereign All-Creating Mind The Motherly Buddha p. 23-26.
O Sems dpa’ rdo rje! You! Listen!
Sems dpa’ rdo rje,
I must teach you your own true nature.
You are Kun byed. That is me.
I have always been the Bodhicitta.
The Bodhicitta is as follows:

Then the Bodhicitta, Kun byed rgyal po, proclaimed this Mi nub pa’i rgyal mtshan Nam mkha’ che:

De nas byang chub kyi sens kun byed rgyal po des nyid kyi snying po sens dpa’ rdo rje la sens dpa’ rdo rje nyid kyi rang bzhin bya med rdzogs pa’i lung mi nub pa’i rgyal mtshan ‘di gsungs so

 At the end of the fifty five verses we read:

This ends the thirtyith chapter of the Byang chub kyi sens kun byed rgyal po: Mi nub pa’i rgyal mtshan, the true nature of Vajrasattva.
In the bKa’ ma shin tu rgyas pa collection we find a text which has a cover page with the title Mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud. The title at the beginning of the text itself is rdo rje sens dpa’ nam mkha’ che. Its Indian language title is Vajra Svabhāva Mahākārśa Kārika. The text contains the same set of fifty five verses as that found in the Kun byed rgyal po, but is missing verse thirty eight. It begins with the words: “Homage to the Blessed One Vajrasattva” (bCom ldan ‘das dpal rdo rje sens dpa’ la phyag ‘tshal lo). Without further ado, the fifty five verses are presented. The verses are divided into topics (skabs) and headings (thig le).

The text does have a colophon:

This ends the oral proclamation by the glorious Vajrasattva, the personification of all transmissions, of the rDo rje sens dpa’ nam mkha’ che. At the second heading, that of Samantabhadra, just after the words “mthong ba med,” there follows:

nyon mongs pa yi dbang gis na |
 tā la’i ngo bo bcad pa dang |
 sa bon me yis bsregs pa dang |
 de yi dbang du mi ’gyur ston

After that “rNam grangs” and the rest [of verse thirty nine] is proclaimed. This verse about the Bodhicitta not being controlled by karma or emotions is in the Kun byed.

rdo rje sens dpa’ nam mkha’ che |
 lung thams cad kyi bdag nyid dpal rdo rje sens dpa’i zhal nas gsungs pa rdzogs so |
 ‘di la kun tu bzang po’i thig le’i skabs gnyis par |

 nyon mongs pa yi dbang gis na |
 tā la’i ngo bo bcad pa dang |
 sa bon me yis bsregs pa dang |
 de yi dbang du mi ’gyur ston |
 de nas rnam grangs sog gsung te |
 byang chub kyi sens las dang nyon mongs pa’i dbang du mi ’gyur ba’i don gi tshigs bcas ‘di kun byed na bzhugs |

rDo rje sens dpa’i lta ba

The gTing skyes and Rig ‘dzin nor bu editions of the rNying ma rgyud ‘bum contain a text called rDo rje sens dpa’i lta ba. The Indian language title is Āryapada Vajrasadtvā. The text starts right out, without homage or preamble, on the first of the fifty five verses: “rDo rje sens dpa’ nam mkha che...”

50 According to the rNal ‘byor rig pa’i ngyi ma, the Mi nub rgyal mtshan rdo rje sens dpa’ nam mkha’ che zhes rtsa ba’i rgyud, and the so-called Khyung chen lding ba, the kun tu bzang po’i thig le begins with verse 48.
51 My discussion is based on the gTing skyes edition. I have not yet examined the Rig ‘dzin nor bu edition.
The fifty five verses are given in the same order as in the *Kun byed rgyal po*, and are not divided into headings (*thig le*) and topics (*skabs*). At the end of the text there is this colophon:

This ends the *Byang chub sens mi nub pa’i rgyal mtshan lta ba nam mkha’ che*. The *rDo rje sens dpa’ nam mkha’ che* was proclaimed in the cave of Asura ‘Od ldan by the master from Urgyan, dGa’ rab rdo rje.

*Byang chub sens mi nub pa’i rgyal mtshan lta ba nam mkha’ che rdzogs so| rdo rje sens dpa’ nam mkha’ che ‘u rgyan gyi slob dpon dga’ rab rdo rjes dpal a su ra’ od ldan gyi brag phlug tu gsungs pa rdzogs so|*

The So-called Kyung chen lding ba

In Volume 2 of the *Vairo rgyud ‘bum* there is a cover page with the title *Khyung chen lding ba*. The text following it is catalogued under this title. The text given is exactly that we find in the *Mahā Ākāśa Kārika* except that verse number thirty eight is included. It presents no Indian or Tibetan title, and no preamble. It starts right out with “Homage to the Blessed One Vajrasattva” (*bCom ldan ‘das dpal rdo rje sens dpa’ la phyag ‘tshal lo*). The text starts out with “The topic of reality” (*chos nyid kyi skabs*). There follow the fifty five verses, beginning with “rDo rje sens dpa’ nam mkha’ che.” The verses are divided up into headings (*thig le*) and topics (*skabs*). At the end there is a colophon:

These words were proclaimed by the glorious Vajrasattva, the personification of all the Blessed One’s transmissions. This is the *rDo rje sens dpa’ nam mkha’ che*. The end.

*Bcom ldan ‘das lung thams cad kyi bdag nyid dpal rdo rje sens dpas de skad gsungs so| rdo rje sens dpa nam mkha’ che rdzogs so|*

Distinctions

There are five remarkable distinctions to be noted between these renditions of the fifty five verses: the title, the speaker, added and missing verses, headers and topics, and the five lined verse.

The Title

The *Rig pa’i nyi ma* purports to comment on a text with the title of *Byang chub sens mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che*. At the very end of the text gNubs chen tells us that the significance of the title is *Mahā Ākāśa Kārika*.

The text with a cover page where we find the title *Mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud* has a title at the beginning of the
text itself: rDo rje sens dpa’ nam mkha’ che. It’s Indian language title is Vajra Svabhāva Mahā Akarsha Kārika. The sMin gling manuscript of the rNyin ma rgyud ’bum catalogued by jigs med gling pa, which has not yet been recovered, has a text titled rDo rje sens dpa’ nam mkha’ che translated by Śrī Sinha and Vairocana. It is likely the same text.

The rDo rje sens dpa’i lta ba has a title in the colophon: Byang chub sens mi nub pa’i rgyal mtshan lta ba nam mkha’ che.

The So-called Khyung chen lding ba also has a title in the colophon: rDo rje sens dpa’ nam mkha’ che.

The rDo rje sems dpa’i lta ba has a title in the colophon: Byang chub sens mi nub pa’i rgyal mtshan lta ba nam mkha’ che.

The speaker of the fifty five verses in the Kun byed rgyal po is Kun byed rgyal po. In the Mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud and the So-called Khyung chen lding ba they are spoken by Vajrasattva. In the rDo rje sens dpa’i lta ba they come to us from dGa’ rab rdo rje.53

It is not necessary to look for a contradiction in this. Chapter thirty of the Kun byed rgyal po starts right out by telling us that the speaker, Kun byed rgyal po, is none other than Vajrasattva, who is the listener. It sounds almost as if Kun byed rgyal po is talking to himself in a mirror. This accommodates the larger structure of the text, where Kun byed rgyal po is the overarching character. In the rDo rje sens dpa’i lta ba dGa’ rab rdo rje delivers these verses at a geographical location on earth. We might take this to explain how these lofty teachings became available in our world. It is possible to understand Vajrasattva as the originator of these words in any case, but this understanding will have been informed by the greater tradition. It is not immediately evident in the texts.

Added and Missing Verses

gNubs chen’s Rig pa’i ngyi ma has an otherwise unattested verse between verses 21 and 22. He achieves fifty five verses by leaving out verse 38. The Mi nub pa’i rgyal mtshan rdo rje sens dpa’ nam mkha’ che rtsa ba’i rgyud also lacks verse 38, although it does not add a verse, as gNubs chen’s text does. The resulting text has only 54 verses. The scribe notes this in the colophon and supplies us with verse 38, taking it from the Kun byed rgyal po. We may speculate that the scribe was working with a manuscript representing

53 According to the Vairo ‘dra bag, an early biography of Vairocana, the very first thing dGa’ rab rdo rje did when he was born was to recite the rDo rje sens dpa’ Nam mkha’ che. See Karmay, The Great Perfection, p. 19.
the same lineage that gNubs chen had used for his commentary. It is possible that the scribe lifted the verses out of gNubs chen’s *Rig pa’i nyi ma* to build his text. Differentials in details such as the wording of the Indian language title make it preferable to posit that this was not so. In any case a thorough knowledge of the content of the *Kun byed rgyal po* preceded the copying of this manuscript. We cannot guess whether this scribe left out the verse between 21 and 22, believing it to be extraneous due to its absence from the *Kun byed rgyal po*, or it was left out by an earlier scribe in the same lineage. We know for sure that this scribe took the text in the *Kun byed rgyal po* as the *locus classicus* and prepared his manuscript in conformity with it. His integrity is remarkable: he notes the omitted verse and provides his source for the correction, rather than correcting it silently.

### Headers and Topics

gNubs chen tells us that the text has six headers (*thig le*) to divide twenty-seven topics (*skabs*). In the actual commentary he gives twenty six topics. This is how he explains the difference:\(^{54}\)

> Under the “Heading on *dByings*” the first three topics teach that reflexive awareness is effectively the source of everything, which ascertains the titles. The last one joins the presentation on *dByings kyi mtshan nyid* with the *Ngo bo* into a fourth topic, so there is certainly no contradiction.

\[^{54}\] *bKā ma shin tu rgyas pa* (kaH thog), vol. 104, p. 67. This information tends to disprove any hypothesis that gNubs chen himself wrote the *Maha Akāśa Kārikās.*

### The Five Lined Verse

The text gNubs chen comments on in his *Rig pa’i nyi ma* has fifty five verses. Fifty four of them are normal *ślokas* with four *padas* or lines. Verse number four is different. It has five lines:

> ‘byung ba chen po bcom ldan ‘das
> chub par gnas pas bcom ldan ‘das
> ’gro ba kun la rang bzhin gnas
> phyin ci log tu rnam brtags kyang

The *Mi nub rgyal mtshan Nam mkha’ che* and the so-called *Khyung chen lding ba* present the same headings and topics, indicating a reliable textual tradition where the index is included with the verses as the text of the *Kārikās*. On the other hand, the *rDo rje sens dpa’i lta ba* and the *Kun byed rgyal po* both lack these headers and topics, indicating a very strong textual tradition without this internal indexing.

---

\[^{54}\] *bKā ma shin tu rgyas pa* (kaH thog), vol. 104, p. 67. This information tends to disprove any hypothesis that gNubs chen himself wrote the *Maha Akāśa Kārikās.*
The rDo rje sems dpa’i lha ba also has five lines:

‘byung ba chen po bcom ldan ‘das
chub par gnas pas bcom ldan ‘das
grol ba kun la rang bzhin gnas
phyin ci log tu rnam rtogs kyang
grol ba rang byung gzhlan las min

The only difference is in the first syllable of the third pada, the preferred reading being gNubs chen’s version. In all other versions the verse reads:

‘byung ba chen po bcom ldan ‘das
’gro ba kun la rang bzhin gnas
phyin ci log tu rnam brtags kyang
grol55 ba rang byung gzhlan las min

The second line is missing.

Verse Number Four in Other Nam mkha’ Che Tantras

This same verse is found outside of the Fifty Five Verses in a number of Nam mkha’ che Tantras. The rDo rje sems dpa’ nam mkha’ che rtsa ba’i rgyud skye ba med pa reads:57

‘byung ba chen po bcom ldan ‘das
chub par gnas pas bcom ldan ‘das
’gro ba kun la rang bzhin gnas
phyin ci log tu rnam brtags kyang
grol ba rang byung gzhlan las med

The rDo rje sems dpa’ nam mkha’ che’i rgyud reads:58

‘byung ba chen po bcom ldan ‘das
chub par gnas pas bcom ldan ‘das
’gro ba kun la rang bzhin gnas
ye nas rgyal ba’i dkyil ‘khor nyid
phyin ci log tu rnam brags kyang
grol ba rang byung gzhlan las min

The rDo rje sems dpa’ nam mkha’ che rgyas pa zhes bya ba rnal ‘byor ma’i rgyud reads:59

‘byung ba la stsogs bcom ldan ‘das | |
Dudjom Rinpoche tells us that the transmission of Vairocana’s teachings has three main branches: one through the Sogdian dPal gyi Ye shes to Gra dPal gyi snying po, one through the Sogdian dPal gyi Seng ge to gNubs chen, and a third through gTsang Shak rdor on down to the Zur.60 dPal gyi Seng ge is mentioned as the translator of the \textit{Latter Kun byed rgyal po} along with Vairocana. He is also the teacher of gNubs chen, who wrote the \textit{bSam gtan mig sgron}. According to Zhi ba ‘od, gNubs chen also wrote the \textit{rNal 'byor rig pa'i ngyi ma}.61 This shows the close relationship between the transmission through dPal gyi seng ge dgon po with three of the texts interdicted by Zhi ba ‘od.

The \textit{Paṇsgrub rnams kyi thugs bcud snying gi ngyi ma} consists of meditation and practice instructions related to each of six \textit{Sems sde} texts. At its end we find the following statement:

\begin{quote}
This Heart Sun is bequeathed  
To dPal gyi Ye shes,  
Seer of the significance of glory.  
Hold on to it as if it were your heart.  
The End.62
\end{quote}

\begin{flushright}
dpal gyi don mthong dpal gyi ye shes la  
snying gi ngyi gtad do snying ltar chongs  
rdzogs sho  
I thi
\end{flushright}

The connection with the transmission through dPal gyi ye shes is clear. We might even wonder whether Vairocana himself wrote this book for his student.

The Blue Annals tells us that Zhig po bdud rtsi, who lived from 1143 to 1199,63 studied “the twenty four Tantras of the “Mental” Class, including the ten \textit{mDo of Kun byed}. The basic text of the “Mental Class” (\textit{Sems sde}). . . . Among the great treatises on mind-concentration according to the method of Rong, belonging to the “Great Achievement” (rDzogs chen), he heard the

\begin{footnotes}
\item[60] Dudjom Rinpoche Jikdrel Yeshe Dorje, vol. 1, p. 540.
\item[61] The text we have in the \textit{bKa’ ma shin lo rgyas pa} does not mention an author.
\item[62] Vairo rgyud 'bum, vol. 1, p. 104. According to my reading this colophon closes the \textit{Paṇ sgrub rnams kyi thugs bcud snying gi ngyi ma}. The index to the Vairo \textit{rGyud ‘bum} and Kapstein (“The Sun of the Heart and the Bai-ro-rgyud-’bum”) list the \textit{sNying gi ngyi ma} as ending on p. 172, where the colophon reads: “This is the teaching on effortlessly acquiring the entirety of all the Buddha’s deeds and wonderful qualities (sangs rgyas kyi mdzad pa thams cad dang! yon tan ‘bad med lhun grub du bslan pa’i thi’).”
\end{footnotes}
exposition of the rNal ‘byor rigs pa’i nyi ma, the bSam gtan mig gi sgron ma, the bSam gtan snying gi nyi ma, the gDar shar, the gZer bu, the Zhus lan khungs kyi gdab pa, the rDo rje sms can dpa’i zhu lan, and others.”

Dudjom Rinpoche presents an almost identical clause. Matthew Kapstein presents the case that our Pan sgrub rnam kyi thugs bcud snying gi nyi ma may well be the bSam gtan snying gi nyi ma mentioned by Dudjom Rinpoche. At present we note that by the twelfth century the Kun byed rgyal po, the rNal ‘byor rig pa’i nyi ma, the bSam gtan mig gi sgron ma, and this Pan sgrub rnam kyi thugs bcud snying gi nyi ma were considered closely related works.

Now the bSam gtan mig sgron contains twenty four direct quotations from the Nam mkha’ che, and all of them refer to text found in the fifty five verses. The Rig pa’i nyi ma comments on this precise set of fifty five verses. The Pan sgrub rnam kyi thugs bcud snying gi nyi ma’s chapter on the Nam mkha’ che, on the other hand, has thirty eight quotations; only twenty of them correspond with the Fifty Five Verses, indicating that he found more to the Nam mkha’ che than what is in the Kun byed rgyal po.

It is evident that the verses that comprise the Fifty Five Verses were available to both dPal gyi seng ge and dPal gyi ye she’s transmissions. It is also evident that gNubs chen has taken the text of the Kārikās to represent the entire Nam mkha’ che teaching, while the author of the Pan sgrub did not. A larger investigation of all the Nam mkha’ che literature will be required to determine if there was a difference of opinion in the different transmissions of Vairocana’s teachings.

A Difference of Opinion

The Rig pa’i nyi ma calls the Fifty Five Verses “Mahā Ākāśa Kārikā.” It does not say they are the exact text delivered by dGa’ rab rdo rje. A careful reading of the colophons tells us that Vajrasattva, who is the personification of all the transmissions, spoke the words. This might be taken to mean that all the verses were originally inspired by Vajrasattva, or it might be taken to mean that Vajrasattva delivered this exact set of fifty five verses as a single text. The scribe who copied the Mi nub pa’i rgyal mthshan rdo rje sms can dpa’ nam mkha’ che rtsa ba’i rgyud clearly accepted the latter, as did the scribe who copied the rDo rje sms can dpa’ ita ba, attributing the entire text to a proclamation by dGa’ rab rdo rje.

The reality is that verses we find in the Fifty Five Verses are to be found throughout the corpus of the Nam mkha’ che literature, catalogued at the beginning of this article. The preponderance of evidence is that the Fifty Five Verses, referred to hereafter as the Mahā Ākāśa Kārikā, were brought together from throughout the oceanic teachings on the Nam mkha’ che with a specific

---

64 Roerich p. 137.
65 Dudjom Rinpoche Jikdrel Yeshe Dorje p. 654. He also lists the ten mDo and the Kun byed rgyal po as separate works.
67 All are transcribed in Appendix B.
68 My transcription of the Nam mkha’ che verses found in the Thugs kyi Nyi ma is in Appendix C.
69 Ka thog mkhan chen Nus ldan mKhyen brtse’i blo gros supported this view in the early part of the twentieth century.
didactic purpose. This will be documented by a comprehensive study of all these texts.

The rDo rje sens dpa‘ nam mkha’ che rtsa ba‘i rgyud skyes ba med pa describes a setting where dGa’ rab rdo rje requested the teachings of the Nam mkha’ che from the Bhagavan dPal bDe ba chen po. Some, not all, of these Kārikās are found in the body of that text. It might be argued that these Kārikās were the original teaching of Vajrasattva as given to dGa’ rab rdo rje, who then passed them down the lineage, but due to turbulent circumstances the verses got scattered into a miscellaneous collection of texts, only to be brought together again by Vairocana’s students. This is not a position to be argued with. The present study is merely a study of textual tradition, not a study of the inspiration behind it.

Problems with Designating the Fifty Five Verses as a Root Tantra

Not even one of the versions of the fifty five verses has a colophon stating that Vairocana is the translator. In fact, none of them has a recorded translator at all.

The only text of Fifty Five Verses with the word “Tantra” in its title is the cover page for the Mi nub pa‘i rgyal mtshan rdo rje sens dpa‘ nam mkha’ che rtsa ba‘i rgyud, and this is not the actual title in the text.

We have ten texts that are Tantras (rgyud) with “rDo rje sens dpa‘ Nam mkha’ che” in their titles that do not present this sequence of fifty five verses, though they do contain verses found in the Fifty Five Verses scattered throughout.

The Hypothesis

The following hypothesis offers a solution. It will be borne out by a careful study of the entire body of Nam mkha’ che literature along with the Sens sde literature in general.

dPal gyi Seng ge mgon po was a close student of Vairocana and had available to him a number of Tantras concerned with the Nam mkha’ che. It was he or one of his peers that extracted their outstanding verses, sorting them out with headers and topic titles for a specific presentation, coalescing them into a Kārikā. He was involved in the compilation of the Kun byed rgyal po materials and was instrumental in the inclusion of the Mahā Akāśa Kārikās as chapter thirty. He was a primary teacher of gNubs chen Sangs rgyas ye shes, who wrote the Rig pa‘i nyi ma as a commentary on this work.

These Kārikās were both copied as an individual document and included in the Kun byed rgyal po as chapter thirty of that work. Two extant versions of the Kārikās retain the original heading and topic titles while they have been

---

70 mTshams brag rNying ma rgyud ’bum, vol. 3, p. 87.1.
71 Those lines and verses common to both the Kārikās and the rTsa ba‘i rgyud skye ba med pa have been noted in the present annotated transcription. I have completed a transcript and rudimentary translation of the rTsa ba‘i rgyud skye ba med pa, and hope to offer it in an upcoming study.
72 The development of a comprehensive database of colophonic information is needed. This will allow us to determine to the extent possible who was working on what, with whom, when, where, and under what conditions.
removed from the third one. The original Kārikās have five lines in verse number four. The surviving copy that does not have the header and topic titles in the text retains this anomaly, while the Kārikās incorporated into the Kun byed rgyal po truncate verse number four to four lines, conforming to the format of that text.

The Kun byed rgyal po gradually became the locus classicus for Sems sde Tantras and the Nam mkha' che teachings, and came to be accepted as their original source. The so-called Mi nub pa'i rgyal mtshan rdo rje sens dpa' nam mkha' che rtsa ba'i rgyud reflects this with a cover that uses the title rTsa ba'i rgyud, even though the true title is “rDo rje sens dpa nam mkha' che,” simply the first line of the Kārikās' first verse. The text is not a rGyud at all.

We cannot know what Zhi ba 'od was actually thinking when he wrote his interdictions. The evidence is that the Mahā Ākāśa Kārikās were drawn from extant volumes of Nam mkha' che Tantras, then put together in a specific order for pedagogical reasons. A Tibetan Language title was created, using the first line of the first verse: rdo rje sens dpa' nam mkha' che. gNubs chen appears to have translated "Nam mkha' che" as “mahā ākāśa”, adding the word “kārikā” to describe the type of document it represents. He did not claim that the text had an Indian title. A version of this text does survive that is presented as a Tantra and formatted with an Indian and Tibetan title, the Mi nub rgyal mtshan rdo rje sens dpa' nam mkha che rtsa ba'i rgyud. So Pho brang Zhi ba 'od's concern that texts were being created from excerpts and given Indian titles is therefore validated by the evidence. His claim that the Rig pa'i nyi ma was presented as an Upadeśa (man ngag), however, cannot be substantiated with the available evidence. One explanation for his disgruntlement might be that these Kārikās had been incorporated into the Kun byed rgyal po as if they represented the entire body of Vairocana's fifth early translation, and that many believed this to be so. This view is supported by Zhig po bdud rtsi's apparent assumption that gNubs chen Sangs rgyas ye shes's works, the Rig pa'i nyi ma and the bSam gtan mig sgron, were source works on rDzogs chen. If the Kun byed rgyal po contained a Kārikā in the guise of an authentic Tantra this might also be symptomatic of a general discrepancy between the Kun byed rgyal po's recognized status as a Root Tantra for the Sems sde teachings and the reality that it was a compendium of these teachings. The bSam gtan mig sgron seems to support this misunderstanding by quoting the Kārikās as if they were a Mūla Tantra. If this is symptomatic of a larger methodology, Zhi ba 'od may have had reason to be unhappy with the bSam gtan mig sgron, along with the Kun byed rgyal po.

The bSam gtan mig sgron and the Kun byed rgyal po are both monumental works that demonstrate the highest understanding. Their brilliance in laying out their topics is inconceivable. They are not, however, Root Tantras, but represent a curriculum for rDzogs chen study.

There is no evidence that gNubs chen acted deceptively in any way. To the contrary, he clearly states that he has extracted his information from other sources. It would seem that by Pho brang Zhi ba 'od's time (the 11th century C.E.) gNubs chen's works and the Kun byed rgyal po were believed to be Root Tantras in and of themselves.

We may conclude, then, that a great undertaking toward establishing a curriculum for the study of rDzogs chen, represented by the Kun byed rgyal po, was most likely being used in consort with the comprehensive overview
of the great meditation traditions that is the bSam gtan mig sgron, these being supplemented by writings such as gNubs chen’s Rig pa’i nying ma and the Pan sgrub Nying gi nying ma. dPal gi Seng ge and gNubs chen formed a powerful team and no doubt had the blessings of both Vairocana and Vimalamitra. The volumes in question, suitable for a curriculum of advanced study, were produced at the very dawn of the Tibetan assimilation of Buddhism. There was no deception or forgery involved in this great work, but in the course of time these great manuals superceded the original works they had been based upon. The original Tantras were rarely copied, while these manuals became more widely available. It appears that in some cases the manuals were mistakenly presumed to be the original works. Some of them were brought into conformity with standards for the Buddha’s teachings and given Indian names by the Tibetans who copied and studied them. Pho brang Zhi ba’od was not, apparently, speaking out to ridicule the early transmission of the teaching or the message presented in the Nam mkha’ che literature, but rather to point out that these great manuals represented abridged versions edited by Tibetans rather than original Tantras. His warnings appear to have been motivated by the imperative to separate the Buddha’s own words (bka’), Sūtra and Tantra, from derivative or commentarial works, Śastra (bstan bcos). This is the reason, then, for his statement that Tibetans were fabricating or developing on (bcos) the Buddha’s words (sangs rgyas kyi bka’ itar bcos).

The Need for Further Research

A true understanding of the Nam mkha’ che literature will require the development of a critical edition of the body of texts in this cycle. The present annotated transcription of the Mahā Akāśa Kārikās is a start. Concerns of intertextuality will be addressed by locating content different texts share in common, exemplified in this study by differential versions of verse number four. A comprehensive study of intertextual references will facilitate an understanding of which content is common to the Nam mkha’ che cycle as a whole and which is peculiar to a particular sub-set of its transmission.

The three texts that purport to be root tantras of the Nam mkha’ che, the rDo rje sems dpa’ nam mkha’ che rtsa ba’i rgyud skye ba med pa, the rDo rje sems dpa’ nam mkha’ che’i rgyud, and the Byang chub sens rdo rje ‘od ‘phro ba’i rgyud kyi rim pa must be examined for their content as root sources for this teaching.

The three works translated by Vairocana with the assistance of Jñanagarbha, the rDo rje sems dpa’ nam mkha’ che rgyas pa yì ge med pa’i rgyud, the rDo rje sems dpa’ nam mkha’ che rgyas pa zhes bya ba rnal ’byor ma’i rgyud, and the rDo rje sems dpa’ nam mkha’ che rgyal po rgyas pa’s rgyud should be studied as a special sub-class. The rDo rje sems dpa’ nam mkha’ che rgyas pa yì ge med pa’i rgyud and the rDo rje sems dpa’ nam mkha’ che rgyas pa zhes bya ba rnal ’byor ma’i rgyud are attested in virtually every manuscript collection of rNying ma Tantras. Preponderance of instantiation is an important criterion for identifying the most commonly accepted renditions of the teaching. Both of these texts refer to the rGyal po rgyas pa internally. Its survival in a single manuscript provides a unique opportunity for research.
The rDo rje sems dpa' nam mkha' che rgyas pa zhes bya ba rnal 'byor ma'i rgyud and the rDo rje sems dpa' nam mkha' che rgyas pa zhes bya ba rnal 'byor pa'i rgyud appear to be the same text, the rNal 'byor ma having a full fifteen chapters while the rNal 'byor pa cuts off abruptly at the end of chapter eleven. The rNal 'byor ma mentioned by 'Jigs med gling pa was translated by Vimalamitra and dPal brtsegs and had thirteen chapters. This text has not yet been found. A study of how these documents relate to each other and the wider body of Nam mkha' che literature is indicated.

The role of Vajrasattva as a cleanser of karmic filth is common to all branches of Tibetan Vajrayana. In the Byang chub sens rdo rje 'od 'phro ba'i rgyud there are many verses found in the Kārikās, indicating its character as a rDzogs chen document, yet where his function as a cleanser of samaya downfalls is dominant. One important section of the rDo rje sems dpa' nam mkha' che rtsa ba'i rgyud skye ba med pa is devoted to behavioral concerns: students killing teachers, teachers killing students, general prohibitions, etc. Morals and discipline as they apply to rDzogs chen in general and the Nam mkha' che in particular deserve inquiry.

The classes of Nam mkha' che literature that are basic (rTsa ba), expanded (rGyas pa), and associated with other Tantric cycles should be analyzed for any distinctions they may have as to literary structure and content.

References to non-Buddhist, Buddhist, and amalgamated traditions within the Nam mkha' che literature should be identified. A particular starting point might be the reference in verse thirteen of the Kārikās, which is attested in the rTsa ba'i rgyud skye ba med pa, the bSam gtan mig sgron, and the Pañ sgrub, that mentions a "dGon pa'i rgyud" (Aranyaka Tantra). The prologue to Chapter thirty of the Kun byed rgyal po has Kun byed rgyal po telling Vajrasattva "You are me." Possibilities of some form of Vedanta type thought within the Vajrayana of this period are worth investigation.

The early period this literature represents may give valuable insights into the histories of these traditions. One interesting aspect of this is that there are distinct titles related to Yoginis (rNal 'byor ma), Yogis (rNal 'byor pa), Kings (rGyal po), and Brahmins (Bram ze). An inquiry into the ways the Nam mkha' che was presented to differing sectors of society will give us a better understanding of rDzogs chen anthropology.

The need for a special study of the relationships between the Nam mkha' che cycle and the traditions of Guhyagarbha is indicated by the rDo rje sems dpa' nam mkha' che gsang ba'i snying po rnal ma don gyi rgyud and the rDo rje sems dpa' nam mkha' che kun to bzang po gsang ba snying po'i rgyud.

The antiquity of the Nam mkha' che literature will provide scholars of language with ample opportunity to look into early Tibetan language and usages. A comparative study of how the different Nam mkha' che texts render identical and similar passages will provide valuable insights into the early translation period.

Bibliography

Tibetan Sources

I would like to insert a special word of thanks to Gene Smith for his establishment of the
Tibetan Buddhist Resource Center (TBRC), and to the good people who keep it going while
Gene is in bDe ba can. This resource has revolutionized Buddhist Studies, making resources
that were once supremely difficult to access available to those who truly need them. The
world is a better place because of this. Thank you.

The Exposition of Atiyoga in gNubs-chen
Sangs-rgyas ye-shes’ bSam-gtan mig-sgron

Dylan Esler
Institut Orientaliste
Université Catholique de Louvain

Introduction

The importance of the bSam-gtan mig-sgron for our understanding of the early history of the Great Completeness (rDzogs-chen) and its interaction with the contemplative traditions of 9th and 10th century Tibet is already well-known. Its author, gNubs-chen Sangs-rgyas ye-shes (ca. early 10th century), presents a classification of four vehicles that can lead to enlightenment, hierarchically arranged as follows: the gradual approach of the sūtras; the simultaneous approach of the sūtras; the tantric approach of Mahāyoga (which also includes Anuyoga); and finally the Great Completeness, also called Atiyoga. Although written from the perspective of the Great Completeness, the bSam-gtan mig-sgron is not a rDzogs-chen text per se, but rather a doxographical treatise (grub-mtha’; Skt. siddhānta), as has been pointed out by Achard; in fact, it is probably the first such doxography to have been written by a Tibetan.

In the present article, it is the long seventh chapter, concerning Atiyoga, which will be the focus of our study. The section concerning the view has already been summarized by Karmay. Mention should also be made of Meinert, who gives an overview and exposition of the chapter, providing extract translations into German, and of Baroetto, who recently published a critical edition of the seventh chapter, along with an Italian translation. It is inevitable that the discussion of the seventh chapter presented here should somewhat overlap with these previous excellent studies; nonetheless, for English readers such an overall presentation of the bSam-gtan mig-sgron’s Atiyoga chapter will still be useful. Given the extreme difficulty of this work, there are bound to be differences in various scholars’ interpretation of individual passages of the text; these I have signalled, where appropriate, in

the notes to this essay. Moreover, the comparisons and parallels suggested in this article (such as those between gNubs-chen’s nine views of the ground and the seven theories on the same subject discussed by Klong-chen-pa) and the hermeneutical reflections developed, have not been touched upon so far. In my presentation, I have also sought to point out wherever possible the many parallels and interconnections that exist between Chapter VII and the previous chapters of the bSam-gtan mig-sgron.

The bSam-gtan mig-sgron’s exposition of Atiyoga

The seventh chapter follows a relatively straightforward structure: after an introductory section where the basic premises of Atiyoga are exposed, the view, meditation, conduct and fruition are elucidated in turn. A final section is devoted to clarifying the distinction between rDzogs-chen and the lower vehicles. In this respect, the structure of the chapter parallels that of Chapter IV (concerning the gradual approach), Chapter V (concerning the simultaneous approach), and Chapter VI (concerning Mahāyoga). Only Chapter IV can be said to stand somewhat apart: since the gradualist approach takes the lowest position in Sangs-rgyas ye-shes’ classification, there is no entire section devoted to distinguishing it from lower vehicles. Nevertheless, the text does mention that the gradual approach presented there, referred to as Sauratrāntika [Madhyamaka], is superior to the Vijnaptimātra and to the Yogācāra [Madhyamaka].

In the introductory section to the seventh chapter, gNubs-chen Sangs-rgyas ye-shes gives a succinct presentation of the ground, in terms of its being the state of spontaneity (lhun-gyis-pa’i ngang-nyid) and the great seminal nucleus of self-originated wisdom (rang-byung-gi ye-shes thig-le chen-po); he emphasises that it is not to be known by evaluating it through individually discerning sapience, but rather that it is to be assimilated as the actual perception of intrinsic awareness, in which case it is made clear to intrinsic awareness without having to make any assumptions (blo-bzhag) about it.

Here one should recall that in rDzogs-chen, the ground is neither a cosmological basis localizable somewhere, nor is it to be sought in the mind or any of its functions. It refers to the individual’s abiding mode (gnas-lugs),
which is both the ground of liberation (grol-gzhi) and of confusion (’khrul-gzhi). Such qualifiers as primordial (ye-nas), original (gdod-ma), alpha (ka-nas) or primeval (thog-ma) do not refer to a golden age long past, but indicate this very abiding mode, which is ever-fresh and ‘prior to’ (in an experiential and phenomenological rather than temporal sense) cyclic existence (Skt. samsāra) and transcendence (Skt. nirvāṇa). As the ground of our being and the reason for our being here, this ground is itself not grounded anywhere; being pure dynamics, it has neither a beginning nor an end.

I. The view

1. Six questions regarding the view

Next comes the section concerning the view. gNubs-chen introduces this section by asking six questions, which he answers one after another. Since this has already been dealt with by Karmay, our presentation will be very brief. Suffice it to say that the six questions allow our author to clarify the view according to the Great Completeness, by answering certain misconceptions or objections that could be raised. One should note that all these questions revolve around the epistemological problem of how to know absolute meaningfulness (don), since the tradition of the Great Completeness as it is taught by gNubs-chen Sangs-rgyas ye-shes is uncompromising in its insistence that absolute meaningfulness is beyond examination and scrutiny. Let us now turn to these six questions:

1. The first question is introduced by way of a citation from the Srog-gi ’khor-lo, to the effect that if the three realms are examined, there is neither cyclic existence nor transcendence. The question, then, is whether this quote does not imply that even here, in the Great Completeness, there is something to be evaluated (Skt. prameya)?

gNubs-chen answers the following:

[...] The term “if one examines” is different [in meaning] and does not refer to evaluation. One is struck by intrinsic awareness, neither

---

10 As such, the ground is always alpha-pure (ka-dag); it is according to an individual’s recognition or non-recognition of the ground’s illumination (gzhi-snang) that it becomes, in the experience of a Buddha, the ground of liberation (grol-gzhi) and, in the experience of ordinary sentient beings, the ground of confusion. See Achard, Jean-Luc, ‘Le Mode d’Emergence du Réel: L’avènement des manifestations de la Base (gzhi snang) selon les conceptions de la Grande Perfection’, in Revue d’Etudes Tibétaines, no.7, April 2005, pp. 64-96, esp. p. 74.
11 Achard, L’Essence Perlée du Secret, p. 103.
13 C 292-315.
14 Karmay, The Great Perfection, pp. 109-113; a summary of these six questions is also found in Meinert, Chinesische Chan- und tibetische rDzogs chen- Lehre, pp. 253f.
16 I take mya-ngan to be an abbreviation for mya-ngan las-’das-pa (Skt. nirvāṇa), unlike Baroetto, who translates it as “sofferenza”. Cf. Baroetto, La dottrina dell’atiyoga nel bSam ghan mig sgron, vol.1, p. 68.
thinking nor examining nor scrutinizing: this is the upright path and is maintained to be the supernal evaluation.17

2. Can the mind be liberated without examining or scrutinizing anything?
gNubs-chen’s reply is as follows:

The absence of any liberating action is itself liberation. If it be asked why this is, it is because, transcending examination and scrutiny, one is without imagining any fetters. As a mere designation one speaks of ‘liberation’.18

3. How should absolute meaningfulness (don) be indicated?
After replying with quotations from the sPyi-bcings and Mañjuśrīmitra’s Sems-bsgom,19 gNubs-chen Sangs-rgyas ye-shes writes:

[…] If one shows a clod [of earth] to someone desiring to view gold, he shall not see it; but if he is shown gold, he will recognize it. Likewise, the absolute meaningfulness which is without scrutiny and which liberates from speaking and thinking is not found through the inference of searching and scrutinizing. Being without action and effort, when it is understood as it is revealed, that is the supreme valid measure of actual perception.20

In effect, gNubs-chen is saying that searching and scrutinizing are like a clod of earth and are quite distinct from the gold of absolute meaningfulness, which itself is beyond all forms of evaluation, but must be known through actual perception (Skt. pratyakṣa).

4. If these [previously exposed methods] are confused, how is the unmistaken meaning?
The answer given is:

Primordially, it is without the designation of non-duality. Through this state, one is already free from searching, yet there is no exaggeration in terms of being free from searching. Originally, there is no name of spontaneous presence, and the primordial Great Completeness is free from the intellectual label of Great Completeness. Originally, self-originated wisdom is without the

17  C 293.2-4: brtags na zhes pa’i sgra yang tha dad pas ‘jal ba ni ma yin te/ rang rig pas ci yang ma bsams la ma brtags ma dpjad pa nyid thog tu phes pas drang po’i lam ste de ni gzhal ba dam pa ‘dod do’.

labelling as self-originated wisdom. Primordially, 21 in the great seminal nucleus, one does not label ‘a great seminal nucleus’.22

5. Now for the fifth question along with its answer:

“In any case, absence of strain is said to be a great purpose. Yet how is one to see the truth of the genuine meaning through the means of not examining anything at all?”

It is replied that all phenomena are without the duality of self and other and without the duality of the knowable and the knower. Therefore, ‘seeing’ is merely a metaphor for not seeing anything and not viewing anything. Certainly, there is nothing at all to see aside from this.23

6. The final question concerns the intent of the vehicle of non-action, i.e. the Great Completeness.

gNubs-chen Sangs-rgyas ye-shes’ answer is unequivocal:

The mother who generates all the Victorious Ones is the antidote to all effortful activities. Whatever means and paths one accomplishes, if this is not realized, there is no awakening.24

He goes on to explain that all the way up to Anuyoga, the meaning of equality is not seen. This is because the lower vehicles all engage in effortful action; this state of affairs is comparable to the waves on the ocean’s surface covering the ocean’s limpidity – it is only when the waves subside and the ocean recovers its inherent limpidity that the reflections appear therein without having to search for them. Hence, Atiyoga is unique in that one proceeds through non-action and that awakening (called ‘the root Buddha’) appears without searching.25

21  The expression ye phyi-ma-nas seems quite strange: while ye designates primordiality, phyi-ma refers to that which is later, and is generally opposed to sngon-ma (‘before’). It is possible that phyi-ma could here indicate the seminal nucleus labelled by the conceptual mind, which is opposed to the primordially present seminal nucleus (Lopon P. Ogyen Tanzin: personal communication). However, it is unclear to me why phyi-ma should be appended directly to ye in this way, and I have hence simply translated the whole expression as ‘primordially’.

25  C 312f.
2. Nine views concerning the ground

Having introduced his subject by way of these six questions, gNubs-chen Sangs-rgyas ye-shes proceeds to discuss nine possible views concerning the ground. As recognized by Baroetto,26 each of these can be subdivided into a section concerning that view’s proper comprehension and another section (usually briefer) presenting the flaws of incomprehension. In the glosses to the text, each of these views is attributed to certain masters of the Great Completeness lineage. Some of these, such as Vimalamitra and Vairocana, are known historical figures, whereas others, such as King Dhahenatalo or the nun Anandā, are shrouded in greater mystery. Van Schaik sees the mention of these masters’ names in the glosses as a strategy of acknowledging the authors after having removed their names from the texts quoted in the Atiyoga chapter; hence, in his view, Sangs-rgyas ye-shes would have been complicit in transforming authored texts into revealed scripture.27

The question of whether these masters actually held the views attributed to them will not concern us: as Burckhardt has reminded us in the context of European alchemical texts, the names mentioned there should not be seen as ‘authors’ in the modern sense, but rather as indications of an initiatory lineage.28 Hence it seems preferable to view these names as pointer-figures alluding to certain filiations of precepts.

Assuming that the glosses belong to an early redaction of the text,29 the names cited here show that, already in gNubs-chen Sangs-rgyas ye-shes’ time, the rDzogs-chen teachings were associated with a well-defined non-Tibetan origin, which was located in India and Odḍiyāna,30 in fact, of the masters mentioned, only two are Tibetan: Vairocana and Sangs-rgyas ye-shes himself. Considering gNubs-chen’s work as a translator and the numerous trips he is said to have made to India, Nepal and Gilgit, he would have had direct contact with at least some of these foreign masters.31

As with the different formulations concerning the ground in the context of the pith instruction section (man-ngag-sde – to which we shall briefly return below), these varying views may be compared to a rhetorical device, in that they allow the rDzogs-chen authors to clarify all possible aspects of the ground, thereby dispelling potential misinterpretations.32

---

26 See in particular the outline in Baroetto, La dottrina dell’atiyoga nel bSam gs tan mig gtron, vol.I, pp. 236f.
29 While they probably do not stem from the author’s own hand, it is likely that they were written down by an immediate disciple. See the discussion in the Appendix.
30 Cf. Karmay, The Great Perfection, p. 20; see also the table below.
32 Cf. Achard’s remarks in this regard in the context of the seven theories peculiar to the pith instruction section, in Achard, Jean-Luc, ‘La base et ses sept interprétations dans la
The Exposition of Atiyoga

It will not be without interest to note that two of the views mentioned here— the view of integral being and the view of non-duality— have identical names to two views mentioned in Chapter VI on Mahāyoga,33 where six views are discussed. Of course, the fact that the views share the same name does not mean that their meaning is the same, since they are given in two very different contexts, the one dealing with tantric practice, the other with Atiyoga.

2-1. The view that is free from thematic foci

The first of the views to be discussed is freedom from thematic foci (gza’-gtad dang-bral-ba); this view is said to be held by Oḍḍiyāna Mahārāja34 and by Vimalamitra.35 The term ‘freedom from thematic foci’ itself belongs to the special terminology of the Great Completens.36 In this context, ‘thematic focus’ (gza’-gtad) is used to point out a fault in meditation: instead of resting in the abiding mode (gnas-lugs) of intrinsic awareness and dropping all the intellect’s foci, the beginner often finds himself wondering whether or not he has found the mind’s essence. He thereby becomes once again caught up in a focus which thematizes these possibilities.37 Basically, we can say, with Sangs-rgyas ye-shes, that thematic focus (gza-gtad) refers to referential imaging (dmigs-pa; Skt. ālambana).38 Our author presents this view with the following words:

Its unmistaken meaning is that Buddhas and sentient beings, cyclic existence and transcendence, are all nothing but designations. In their essence, the various appearances are without abode. Through this state in which everything is the scope of self-originated wisdom, one is free [from stains] without having to eliminate them. There is neither the theme of something to pursue on the side of...
enlightenment, nor the theme of desiring to clarify something through absolute awareness. In the nature of oneness, how could there be a referential focus, where [in fact] there is none? It is not that [this view] originates from clarifying thematic foci, but neither is it explained by the mere name of ‘being primordially free from thematic foci’. Since this very absolute meaningfulness is myself, there is no deliberate pursuing of it. For example, the sun does not search for the light of glow-worms.

gNubs-chen Sangs-rgyas ye-shes points out that those who seek to actualize the absence of thematic foci are involved in searching for a fruition, and he compares them to the blind; since they fail to realize that absolute meaningfulness and the fruition are their integral identity, they are like deer chasing after a mirage. He quotes the rMad-du byung-ba:

For him who desires enlightenment, there is no enlightenment – The stages and the utterly supreme enlightenment are far away. Whoever knows phenomena’s beingness (Skt. dharmatā), which is like a cause, Is certain that “This enlightened mind am I” – He enters the quintessence of enlightenment. Hence, there is nothing to obtain nor to relinquish: Designations, such as ‘the enlightenment of the Buddhas’, Are not the meaning.

2-2. The view of spontaneous presence

The second view, that of spontaneous presence, is attributed to dGa’-rab rdo-rje. Its comprehension can be summarized in the following words:

Note that bsnyad-pa is archaic for bshad-pa, meaning ‘explanation’. See sKyogs-ston rin-chen bkra-shis, brDa-gsar-rnying-gi rnam-gzhan li-shi’i gur-khang, Beijing: Mi-rigs dpe-skrun-khang, 2000, p. 44.

Cf. Lamotte, Etienne, L’Enseignement de Vimalakīrti (Vimalakīrtinirdeśa), Louvain-la-Neuve: Institut Orientaliste, 1987, ch.3, §22, p. 161, where Vimalakīrti warns that the sun’s radianc should not be confused with the glow-worm’s light.

C 316.4-317.3: de la don ma nor ba ni/ sangs rgyas sems can ’khor ba dang mya ngan las ’das pa ril kyang tha snyad kyi blu chags tsam stel nge bo sna tshogs snang la gnas pa med pa ral byung ba’i ye shes kyi snyed yul thams cad mtang nyid kyi ssa ma sba’i bral ba la/ byang chub legs srig nas guyer bar ba’i gza’/ [gza’] Baroetto, p. 40: [bsa’] C 316.6, M 226b.2 [ba dang/ don rig pas gsal byar ’od pa’i gza’ ba’ang med pas/ gcig gi rang bzhin la dmigs gtad ga la yod de med do/ ’di ni gza’ gtad gsal ba las byung ba ma yin te/ ye nyid gza’ gtad med de zhes ba’i ming smig du byang bsnyad du med pa la don de nyid kyang bdag yin pas/ ched du guyer du med del dper na ni mas srim ba’i ’od mi tshol ba dang ’dra’o/.

C 318f.

C 318.
In this regard, the unmistaken meaning refers to the essence, i.e. the nature of the entire objective scope pertaining to Buddhas and sentient beings. Being in all aspects non-existent from the origin, it is non-existent at the end: as the nature of the great state of the spontaneously present beingness of phenomena, there is awakening without remainder (lhag-ma med-par sangs-rgyas).\[45\]

\[\text{gNubs-chen} \text{Sangs-rgyas ye-shes elaborates by comparing spontaneous presence to a wish-granting gem, which fulfils all one’s needs and wishes, without it being possible to determine whether the appearances that manifest from the gem are localizable inside it, outside it or in between. Likewise, the uninterruptend stream of qualities that manifest as spontaneous presence, here equated with phenomena’s beingness since it is present with all phenomena, arises as intrinsic illumination (rang-snang).} \[47\]

He specifies that it cannot be temporarily accrued in the manner of an accumulation nor can it be sought for, since it is beyond waning and increasing.\[48\]

Concerning the fault of incomprehension, the text points out the danger of thinking that spontaneous presence might be achieved through some pleasant means of practice (nyams-su blangs-pa’i thabs) – here, we must emphasize, of any kind whatsoever, since spontaneous presence cannot be ‘practised’ precisely because it is spontaneously accomplished – in particular through pith instructions concerning referential fixation (dmigs-'dzin-gyi man-ngag): all such means have the fault of being encircled by effort.\[49\] In support of this, our author invokes the \textit{Nam-mkha’i rgyal-po}:

\[\text{The great means is primordially spontaneously accomplished;}
\text{Engaging in causes and rectification is not a great means.}
\text{If one is not free from engaging with causal means,}
\text{What can one do with the great means of non-discursiveness?} \[50\]

Here it may not be without interest to turn briefly to Klong-chen-pa’s (1308-1364) discussion of spontaneous presence in the context of the seven

affirmations concerning the ground (gzhi-bdun) found in his Tshig-don mdzod and Theg-mchog mdzod. It must be emphasized at the outset that the context is different, since in Klong-chen-pa’s case the discussion is based, not as here on texts of the mind section (sems-sde), but on the sGra-thal-’gyur and the Klong-drug, texts of the pith instruction section (man-ngag-sde). Furthermore, it can be ruled out that Klong-chen-pa had gNubs-chen Sangs-rgyas ye-shes’s exposition in mind when referring to the view of spontaneous presence, since the bSam-gtan mig-sgron was probably unknown to him: while it is true that a bSam-gtan mig-gi sgron-me is mentioned by Klong-chen-pa among the texts received by his own master, Kumarāja, from sLop-dpon sGom-pa, the text in question is not by gNubs-chen Sangs-rgyas ye-shes but by Vimalamitra.

Of the different theories mentioned by Klong-chen-pa, only that concerning spontaneous presence (the first in Klong-chen-pa’s enumeration) is nominally identical to a view discussed by gNubs-chen, so we shall limit our comparison to this theory alone. For Klong-chen-pa, the conception of the ground as spontaneous presence (lhun-grub) is in danger of reifying the ground’s attributes and thereby of closing off and rigidifying what is in fact an open dimensionality. For instance, if cyclic existence and transcendence were both spontaneously present as the ground’s attributes, then a path to liberation would be meaningless; cyclic existence, like coal whose blackness cannot be removed no matter how long one cleans it, would be permanent; and the qualities of enlightenment would be innate without needing any further development, leading to fatalism on the spiritual path.

Through this example, we can see that the approaches and concerns of the two authors differ: Klong-chen-pa, for the reasons described above, considers the theory of spontaneous presence as one of several ‘flawed’ (skyon-can) interpretations of the ground, and hence rejects it, either in favour of alpha-purity (ka-dag) in his Tshig-don mdzod or of alpha-purity inseparable from spontaneous presence in his Theg-mchog mdzod. Sangs-rgyas ye-shes, for his part, nowhere rejects the view of spontaneous presence.

53 These seven theories have received detailed treatment by several Tibetologists: a translation of the relevant sections of chapter 1 of the Tshig-don mdzod will be found in Germano, David F., Poetic Thought, the Intelligent Universe, and the Mystery of Self: The Tantric Synthesis of rDzogs-chen in Fourteenth Century Tibet, PhD thesis, Madison: University of Wisconsin, 1992, pp. 143-154. Cornu, for his part, provides a French translation of this section of the Theg-mchog mdzod, in Cornu, Philippe, La Liberté Naturelle de l’Esprit, Paris: Editions du Seuil, 1994, pp. 153-161; Achard bases his discussion mainly on the Theg-mchog mdzod, providing important extracts in translation, in Achard, ‘La base et ses sept interprétations dans la tradition rDzogs-chen’, Aruguillère bases his discussion primarily on the Tshig-don mdzod and gives a pertinent philosophical analysis; see Aruguillère, Profusion de la Vaste Sphère, pp. 344-379.

54 Aruguillère, Profusion de la Vaste Sphère, p. 355f.

56 ibid., pp. 55f.
as a whole, and he seems unconcerned by the danger of fatalism mentioned by Klong-chen-pa; he is merely wary of a possible misunderstanding of spontaneous presence as implying that it can be 'practised' through various forms of referential imaging (dmigs-pa; Skt. ālambana). It will be seen that for gNubs-chen Sangs-rgyas ye-shes, each of the views he discusses can be correct, as long as it is not conceptualized into a goal that is somehow to be attained, something contrary to the spirit of the Great Completeness.

2.3. The view of integral being

The third view to be discussed is attributed to Vairocana and concerns integral being (bdag-nyid chen-po; Skt. mahātman); as mentioned above in the introduction to this section, a view of integral being is also found in Chapter VI on Mahāyoga.\(^{57}\) Given the Buddhist context in which this view is professed, some words of caution are necessary at the outset. It is well-known that the Buddha refuted the notion of an eternal self (Skt. ātman): in the Poṭṭhapāda-sutta (Dīghanikāya, sutta no. 9), for example, the ascetics’ speculations about an eternal self are likened to the fancies of a man who longs for ‘the most beautiful woman in the land’, yet has neither met nor seen the lady in question, or to a person setting up a staircase at a crossroads in order to climb to the upper storey of a mansion, yet without knowing the location of the mansion.\(^{58}\)

Having denied the existence of this eternal self, one of the problems of Buddhist philosophy has been to account for continuity; for example, how can there be wandering in cyclic existence if there is no self who wanders? The answer: just as it is impossible to say whether a flame in a given moment is the same as the flame in a preceding moment, so the incessant continuum of aggregates, etc., is named, metaphorically, a 'being', although there is no substantial self to be found therein; supported by craving, this continuum wanders through cyclic existence.\(^{59}\) Likewise, to explain recollection, Vasubandhu writes that a past thought of sight (Skt. darśanacitta) can give birth to another thought, the present thought, which is a thought of recollection (Skt. smarana\(\text{citta}\)); moreover, it is specified that a thought must belong to the same conscious continuum, otherwise one person could remember another’s thoughts!\(^{60}\)

This, then, is the orthodox position of Buddhist philosophy. It may therefore come as some surprise to see this view of integral being (Skt. mahātman) discussed in a Buddhist treatise on contemplation. Would this be an attempt to surreptitiously reintroduce the idea of an eternal self? Unequivocally, the answer must be in the negative, since here the term ‘integral being’ is not reified into an eternally enduring entity. Rather, it

---

\(^{57}\) See C 200-204.

\(^{60}\) *Ibid.*, vol.5, ch.9, p. 276.
points to the inseparability of emptiness and clarity (stong-gsal dbyer-med), which is experienced by the individual as his or her true condition. The fact that it is explicitly described as being both empty and luminous excludes reification into a monolithic self. This becomes clear from gNubs-chens own exposition, where he writes that all that appears in terms of the phenomena pertaining to ‘self’ and ‘other’ is intrinsically clear as the integral identity (bdag-nyid) of intrinsic awareness’ non-abiding wisdom. The Tibetan language precisely distinguishes between integral being (bdag-nyid chen-po) or integral identity (bdag-nyid) and the ordinary egocentric ‘I’ (nga) or self (bdag), which is an instance of misplaced concreteness. It is precisely when egocentric apprehension, the mistaken moment-by-moment reification of a self (Skt. ātman), falls aside that one can speak of integral being (Skt. mahātman), without this notion contradicting more normative Buddhist ideas of selflessness (Skt. anātman). The term ‘integral being’ is used because it conveys that which is most naturally present to oneself once the dualistic dichotomies that fragment one’s holistic experience of appearance (snang-ba) into self and others have collapsed. These words by Guenther are well to the point:

[…] Being-in-itself cannot be known as an object, nor can it be grasped as a subject behind the phenomena. It is its very own and so far as I am concerned it is my very self. It is nothing determinate and hence infinitely open to new possibilities. It cannot be defined or characterized in any way. But it seems (or is felt) to be a vast continuum, out of which all entities are somehow shaped, and which surrounds and pervades the worlds.

If the ground is spoken of in terms of integral being, then, it is in order to emphasize the fact that it is experienced as an immediately present reality. In gNubs-chens Sangs-rgyas ye-shes’ words, it is so that neophytes might avoid their ill-founded hope that the fruition can come from elsewhere.

The foregoing discussion should make it clear that the tantric and rDzogs-chen notion of integral being (Skt. mahātman) should not be misconstrued to contradict the orthodox Buddhist insistence on selflessness (Skt. anātman), simply because of the use of related words with different shades of meaning. As mentioned above, the terminology used is sufficiently precise to ward off misunderstanding, and that is to say nothing of the contextual meaning, which leaves no trace of doubt. Furthermore, it is futile to try to determine whether a given tradition, such as rDzogs-chen, is orthodox simply by judging outwardly the occurrence of certain words and phrases. This is not to say that orthodoxy is simply a matter of opinion or of political expediency, as many, who falsely consider esotericism and mysticism to be by nature heterodox, would have these days. Rather, it is necessary to

---

61 C 328f.
65 C 329.4-5. See the translation of this passage below.
examine whether a given tradition is *intrinsically* orthodox: whether it can be viewed as an organic development of the wider tradition in which it is embedded; whether its doctrine presents an internal coherence; and whether its soteriological path is capable of embracing the whole of man and hence of producing the flower of holiness.\(^{66}\) In the case that concerns us here, it must be borne in mind that the orthodox position of Buddhism is the middle way which avoids the two extremes of eternalism (Skt. *śāśvata-drṣṭi*) and nihilism (Skt. *ucceda-drṣṭi*); the former refers to the belief in an eternally valid and self-contained self and an omnipotent external God; the latter refers to the utter annihilation of any continuity at death and to the denial of karmic cause and effect. Since integral being is precisely the inseparability of emptiness and clarity, it avoids these two extremes: its empty aspect prevents any reification into an eternal self, whereas its aspect of clarity means that one avoids falling into the trap of nihilism, the belief that there is nothing.

Having given these preliminary words of caution, let us return to gNubs-chen Sangs-rgyas ye-shes’ own exposition concerning the right understanding of this view:

> [...] All phenomena without exception included in self and other – everything that appears in terms of ‘I’ and ‘mine’ – without being transformed or corrupted, are primordially intrinsically clear as the integral identity of intrinsic awareness’ non-abiding wisdom; [this is so] even without labelling them with the designation of ‘integral being’. They primordially transcend the designations expressed through words and letters. In that case, it may be asked whether it is not unnecessary to label it with words. [It is replied that words are used] in order that neophytes, individuals who believe in the great vehicle, should repel their craving for other paths and their hope in a fruition from somewhere else. Yet in its essence it is inherently without the exaggeration and denigration pertaining to self and other.

Therefore, in the state of integral being one does not pick out phenomena pertaining to others, and these are abolished in one’s integral identity. If it be asked why, [we reply with] the *sPyi-bcings*:\(^{67}\)

> I am; others are not. Great self and other are due to spontaneous presence. Since there is oneness in the state of Samantabhadra, there is no other.\(^{68}\)

\(^{68}\) C 328.6-329.6: [...] *bdag dang gzhan gyis bsdus pa’i chos ma lus pa dang/ bdag dang *bdag tu snang ba thams cad/ ma bsgyur ma bslad [bslad Baroetto, p. 61 : slad C 329.1, M 234b.2] par ye nas rang rig pa mi gnas pa’i ye shes kyi bdag nyid du rang gsal ba la bdag nyid chen po zhes kyi bsad mkha’i ba’i tha nyad kyis kyang mi thogs te/ ye [ye M 234b.3 : yi C 329.2] *tshig dang yi ges brjod pa’i tha nyad las’ das sol’ o na *tshig tu btags pa’i dgos pa [C 329.3 ins. shad] de rang med dam zhe nu/
gNubs-chen warns against certain individuals still subject to referential imaging who, while accepting that the view of integral being reflects the intent of the Thus-gone One (Skt. *tathāgata*), obstinately hold that for those unable to see absolute meaningfulness effortful exertion could lead them to awakening. He writes that their experience is dismal and compares them to someone owning a renovated castle⁶⁹ who would still put up a tent on a lawn.⁷⁰

### 2-4. The view of self-originated wisdom

According to the fourth view, attributed to the nun Ānandā,⁷¹ one sees all the phenomena included in birth and destruction as being in essence self-originated wisdom, inherently free from causes and conditions. In support of this view, the *Yon-tan bcu* is invoked:

> Earth, water, fire and air,  
> The vessel of the world and its inhabitants –  
> All is by nature the open dimension of wisdom;  
> There is no wisdom apart from that.⁷²

This *Yon-tan bcu*, a no longer extant text attributed to dGa’-rab rdo-rje,⁷³ is quoted five times in the *bSam-gtan mig-sgron* – twice in the context of *Mahāyoga⁷⁴* and thrice in the chapter on *Atiyoga*.⁷⁵ This makes it clear that at

---

⁶⁹ Note my emendation of 'khar-lan to mkhar-lan ('renovated castle').  
⁷⁰ The castle stands for primordial awakening, whereas putting up a tent on a lawn represents the useless activity of searching for awakening outside oneself. Cf. C 339.3-5: [...] das dang gi gang zag dmigs pa can rabs gcig/ thams cad bdag yin na bsgrub ci dgol/ de skad bya ba i rang bzhin te/ de bzhin gshegs pa’i dgon gyis pa’i/ gang zag gis de mthong du ni rung bas/ bsgrub dang te rtsol bas ’bad nal sangs rgya’o zhes rang nyams ngan pas smra ba kha cig mkhar [mkhar em.: ’khar C 339.4, M 241b.2] lan spangs la phub sthi chad do/ de ci’i phuy/ thugs rgyas bdag yin pa la/ gzhan nas re ba rgyed pa’i das med pa’i phuy rol. Note that my interpretation of this passage differs from Meinert’s, in that she takes it to mean that gNubs-chen recommends effort as a last resort for those still subject to referential imaging, thereby ignoring the explanation that follows in the text. Cf. Meinert, *Chinesische Chan- und tibetische RDrags chen- Lehre*, p. 258.  
⁷¹ As well as being Vimalamira’s master, she was one of Padmasambhava’s teachers. An emanation of the sky-farer (Skt. *ḍākinī*) Guhyajñāna, she is said to have transformed Padmasambhava into the syllable *HŪṂ* and swallowed him, thereby granting him the four empowerments. See Dudjom Rinpoche, *The Nyingma School of Tibetan Buddhism*, vol.1, p. 469. In the *Bai-ro’ Dra-’bag chen-mo*, she is described as the daughter of a prostitute; her own master is given as Śrīsmiha. See g.Yu-sgra snying-po, *Bai-ro’i rnam-thar ’dra-’bag chen-mo*, p. 63; Norbu and Clemente, *The Supreme Source*, p. 45.  
⁷³ See C 191.  
⁷⁴ C 191, 272.

least by the time of gNubs-chen Sangs-rgyas ye-shes, dGa’-rab rdo-rje’s name was already associated with the doctrine of the Great Completeness. Furthermore, as mentioned by Achard, we can deduce from the passages quoted in the *bSam-gtan mig-zgron* that the *Yon-tan bcu* was a doxography which covered at least the view of *Mahāyoga* to the conduct of *Atiyoga*.

The proper comprehension of this view is explained as being without any objective scope (*spyod-yul*), and hence without discursive grasping towards any view. Quotations are given to this effect from various texts, including the *Khyung-chen ldings-pa*:

> Self-originated wisdom always abides as it is in non-discursiveness;

And the *Nam-mkha’i rgyal-po*:

> Without the intellect that is intrinsic to the sense-faculties, it is free from an objective scope.

On the other hand, when one fails to have confidence in this view, one ends up desiring and searching for the clarity of self-originated wisdom. This searching causes one to be embroiled in suffering and is compared to a doctor searching a doctor, a comparison taken from the *Nam-mkha’-che*:

> Because of the confusion of corruption through childishness, One is like a doctor searching for a remedy.

### 2-5. The view without action and searching

The fifth view is attributed to Buddhagupta; here, one’s ordinary experience of the world and its inhabitants is transfigured into that of a seraphic mansion (*gzhal-yas-khang*) filled with Buddhas. It might be asked whether this is not akin to the process of tantric transformation. The answer would have to be negative, in that here there is nothing to transform or to search

---

75  C 340, 341, 453.
77  C 341.
79  C 341.4: *dbang po rang gi blo med spyod yul bral*. Cf. *Nam-mkha’i rgyal-po*, in NGM, vol.1/ka, p. 602.2-3, which reads “without the scope of objects and sense-faculties” (*yul dang dbang po'i spyod yul med pa la*/).
80  C 344.
81  Klong-chen-pa too compares ordinary conditioning to childish games. See Dowman, *Old Man Basking in the Sun*, pp. 77-79.
82  *Nam-mkha’-che*, in NGM, vol.3/ka, p. 189.7: *byis pas bslad pas [pas C 344.4, M 244b.3 : pa’i NGM] khrul pa’i phyir [phyir NGM : phyin C 344.4, M 244b.3] /sman ngyid sman pa ’tshol [’tshol NGM : ’tshol C 344.4, M 244b.3] ba bzhin/.
for: “suffering is spontaneously present as great bliss; the obscurations intrinsically blaze forth as wisdom.”

This view of freedom from action and searching (bya-btsal dang bral-ba) presents, as already noted by Karmay, a certain lexical similarity to Ch’an; hence, gNubs-chen is keen to point out the differences between both approaches. The gist of his argument lies in the fact that such freedom from action does not mean that actions are to be rejected – this would again be falling into a one-sided conceptual trap; indeed, Atiyoga is beyond both discarding virtues and taking them up, so there is no need to interrupt whatever it is one is doing. Hence, ‘freedom from action and searching’, far from referring to an artificial form of quietism in which one refrains from action, signifies that the practitioner rests in phenomena’s open dimension (Skt. dharmadhātu) beyond the contrived opposition between doing and non-doing.

This becomes especially clear when gNubs-chen Sangs-rgyas ye-shes points out the fault of not comprehending this view: one becomes caught up in effort precisely by pursuing the concept of non-action, all the while speaking the word ‘effortless’.

2-6. The view of great bliss

The next view, that of great bliss, is attributed to Kukurāja and Śrīsimha. Here, the various phenomena pertaining to suffering, the afflictions as well as their effects, are considered to be primordially non-existent. This is not to postulate an inert nothingness, but rather points to a plenum, referred to as a pure expanse of bliss. Thus, great bliss does not reside apart from suffering, or behind it, and suffering is not first to be relinquished in order to experience bliss; the non-obstructed plenitude of this expanse of bliss actually pervades each and every experience on a level ‘prior to’ the fragmentation into pain and pleasure. Put differently, great bliss is an individual’s most basic natural state, whereas the fluctuating feelings of pleasure and suffering represent various levels of disturbance of this state.

This inalienable nature of great bliss becomes clear when Sangs-rgyas ye-shes explains that intrinsic awareness is luminously clear as great bliss. In this regard, we must remind ourselves that existence itself is ‘ec-static’ in the etymological sense of ‘standing bare’ in the open clearing of the ground,

---

83 C 345.1: sdug bsgal bde ba chen por lhun gyis [gyis Baroetto, p. 89 : gyi C 345.1, M 245a.1] grub/ sgrib pa ye shes su rang ’bar/.

85 C 351.4: de ltar shes na ci byas kyang mi ’gog stel/.
86 Cf. C 351f.
87 C 352.3-4.
88 Note that two Kukurājas are mentioned in the Bai-ro ‘Dra’-bag chen-mo. See g.Yu-sgra snying-po, Bai-ro’i rnam-thar ‘dra’-bag chen-mo, p. 55, pp. 57f; Norbu and Clemente, The Supreme Source, p. 41, p. 43.
89 C 353.2: bde ba chen po’i klong dag pal/.
91 C 353.4-5.
92 Seen in itself, existence (Skt. bhūtā) is the fragmentary vision characterized by the dualistic pairs of happiness and pain, etc.
and that “we are, in an ontological sense, centres of visionary ecstasy, and not egological subjects.”

To comprehend this view means that whatever is ordinarily perceived as being characterized by suffering is instantly seen in a new, ever-fresh light, as pervaded by bliss:

The third order chiliocosm is installed in bliss. Deviations and obscurations are shifted to great bliss.

Indeed, a shift in perception is called for, whereby one’s experience of ordinary temporality (the ‘three times’) is transformed. Such a transfigured experience of temporality means that one “refuses the temptation to totalize and instead embraces the temporal ekstasis which spans our past, present, and future. [It is thereby possible to understand and enjoy] the intertwining of potentional and retentional experiences, living to the fullest its opening up to the present.”

By failing to comprehend this view, one desires to be free from suffering and seeks bliss as a separate reality; one thereby turns one’s back to one’s integral identity, which in itself is already blissful. gNubs-chen compares such an attitude to someone who, although riding an elephant, does not realize this and seeks it separately. Here, our author cites the Khyung-chen ldings-pa, which says:

Desiring bliss, one turns one’s back thereto;
Where there is already bliss, one searches for bliss with bliss.
Confused about enlightenment, one’s primordial greed casts doubt on the doctrine:
Such a subject does not see the Buddha.

2-7. The view of non-duality
The seventh view to be discussed concerns non-duality and is attributed to Mañjuśrīmitra, the author of the previously quoted Sems-bsgom. As was mentioned above, a view of non-duality is also discussed in Chapter VI on

---

96 C 356.2-3.
Mahāyoga. To illustrate what non-duality means in the context of the Great Completeness, gNubs Chen explains that by examining the enlightened mind as to its essence, it is non-existent; yet at the same time, it can appear as anything. The manner it appears depends to a great extent on the way one thinks about it, yet it cannot be limited to any of its guises: hence, existence and non-existence are non-dual. Similarly, its nature is completely indefinite, yet it rests with all phenomena, which are its qualities, so that eternalism and nihilism are non-dual.

In this context, incomprehension refers to mouthing the view of non-duality when in fact one is merely focusing on a limitation. The fact that the limitation happens to be unchanging changes nothing to the matter – indeed, this rather indicates a form of spiritual sclerosis, whereby one becomes caught up in referential imaging. Unable to find absolute meaningfulness, one deviates towards limiting positions.

2-8. The view of the great seminal nucleus

The penultimate view, attributed to Rājahastin, concerns the great seminal nucleus (thig-le chen-po). In the teachings of the Great Completeness, the abiding mode (gnas-lugs) of intrinsic awareness is often described as the unique seminal nucleus (thig-le nyag-gcig) to indicate its unitary and non-fragmentary character. This might remind us of the mystery of the supreme point mentioned in Jewish esotericism, which is comprehended in the inner palace of the heart. This supreme point manifests as a multitude of central points, each one being surrounded by an expansion that simultaneously veils and reflects its cause; each point of this expanding configuration is dependent on a point hierarchically above it, yet at once virtually contains the centre of all centres. From the perspective of sacred geometry, the point cannot be said to pertain to space, representing as it does the principle of space, a principle which it manifests by situating itself in the spatial dimension. Indeed, in the case which concerns us here, this unitary nature of the seminal nucleus remains ever-present, so that the atemporal process of the manifestation of the awakened bodies and wisdoms (sku dang ye-shes), known in the pith instruction section (man-ngag-sde) as the ground’s illumination (gzhi-snang), is in no wise separate from the ground itself. What is more, in the visions of crossover (thod-rgal) of the pith instruction section, the ground’s self-illumination (rang-snang) appears as chains of seminal nuclei; in spatial terms, every point of space becomes the centre from which a kaleidoscopic display of light manifests. The contemplation of these

visions reveals to the yogin the unique seminal nucleus which is none other than his ever-present abiding mode.\textsuperscript{106}

gNubs-chen’s description of this view, despite perhaps his more sober style typical of the mind section (sems-sde), confirms the above allusions to the seminal nucleus’ non-fragmentary reality. He writes that phenomena merely appear to be different for those with misconceptions and those still on the path. However, when awakening to the great seminal nucleus, the enlightened mind no longer referentially images such dualistically elaborated phenomena, yet needs not reject them.\textsuperscript{107} This non-referential wisdom which knows non-discriminately is, in a quote from the rMad-du byung-ba, paradoxically spoken of as ‘stupidity’ (gti-mug; Skt. moha):

Stupidity inseparably assimilates the individual views regarding all the phenomena that originate from integral identity. Since it does not possess the intent that analyses them individually, it is stupidity. [...]\textsuperscript{108} Since all phenomena become the awakened mind of the Bliss-gone One (Skt. sugata), in this gladness of the supreme secret, everything dwells in the single identity. Since it does not possess [the intent that] analyses the stages and their phases, it is stupidity. [...]\textsuperscript{109}

Here the affliction of stupidity (gti-mug; Skt. moha) takes on a spiritually ‘positive’ sense in that it is principally identified with the wisdom of phenomena’s open dimension (Skt. dharmadhātu-jiāna), which is beyond all discursiveness and conceptualization. This is clearly reminiscent of the ‘wise ignorance’ (Lat. docta ignorantia) spoken of by Dyonisius the Areopagite (ca. 5th-6th centuries) and his spiritual heir Scotus Erigena (ca. 815- ca. 877). In this current of mystical theology, man’s apotheosis is inseparable from his progression in divine knowledge: the highest form of wisdom is that where conceptual thought falls away completely, laying bare the ultimate reality in the dark light of unknowing. From the limited perspective of discursive rationality, the divine self-disclosure must always appear as an abysmal darkness, which is why the knowledge of this transcendent reality is termed ‘unknowing’.\textsuperscript{110} In this same line of understanding, the Cloud of Unknowing, a medieval English mystical work, states:

Be blind for the time being, and cut away desire for knowledge, for it will hinder you more than help you.\textsuperscript{111}

\textsuperscript{110} Nasr, Knowledge and the Sacred, pp. 191, p. 25.
The reason is that:

By grace it is possible to have full knowledge of all other created things and their works, and indeed of the works of God himself, and to think clearly about them, but of God himself no one can think. And so I wish to give up everything that I can think, and choose as my love the one thing that I cannot think.  

Importantly, the *bSam-gtan mig-sgron* reminds us that the seminal nucleus even defies the description of being ‘one’. This is crucial since the incomprehension of this view implies an artificial search for ‘oneness’ aside from duality; Sangs-rgyas ye-shes describes those subject to this misunderstanding as seeking to assemble disparate phenomena as one and compares this to pouring something into a reduced and tattered sack — the metaphor is telling in that it conveys the fundamental inadequacy of conceptual thought (it is both too narrow and too weak) in grasping non-referential reality.

2-9. *The view concerning the ground of all phenomena as it is*

The final view is espoused by our author himself and is also shared, according to the gloss, by dGa-rab rdo-rje and King Dhahenatalo. Sangs-rgyas ye-shes writes:

As for the view concerning the ground of all phenomena as it is, it is especially unmistaken. If it be asked why this is the case, [it is replied that,] since the very suchness of reified entities is uncontrived and uncontaminated, it is the Great Completeness of *Atiyoga*. Concerning the enumeration of its names, the parts of its qualities as they appear transcend numbering. Since suchness is without referential grasping, it is renowned as ‘free from thematic foci’. Since everything is complete in the fruition, it is also renowned as ‘spontaneous presence’. Since as such there is not even the name of suffering, it is also renowned as ‘great bliss’. Since it is without extrinsic phenomena, it is also renowned as ‘integral being’. Since it is without peer or elaboration, it is renowned as ‘the great seminal nucleus’. Since it is without limiting phenomena, it is also renowned

---

113 C 374.3-4.
114 Note that dGa’-rab rdo-rje is also associated with the second view described above, that of spontaneous presence (C 315.6, 320.2).
115 According to Lopon P. Ogyen Tanzin (personal communication), Dhahenatalo is probably an *Apabhramśa* name. In the Bai-ro ‘Dra-bag chen-mo’, Dhahenatalo is said to have been a direct disciple of dGa’-rab rdo-rje, from whom he received the essence of the *rDzogs-chen* teachings. He then went on to study more detailed instructions under Mañjuśrīmitra’s guidance. See g.Yu-sgra snying-po, Bai-ra’i nram-thar ‘dra-bag chen-mo, pp. 48f; Norbu and Clemente, *The Supreme Source*, p. 35.
116 Note that an alternative name of this view is given earlier in the chapter (C 316.2-3): ‘the great intrinsic mode which, without relinquishing them, is free from all limitations’.
as ‘non-duality’. Since as such everything is luminously clear, it is also renowned as ‘self-originated wisdom’. Because there is no hope for a fruition and it is non-effort, it is also renowned as ‘free from effortful action’. Since the indications may be different while the essence is non-different, and since though it is one it is everything, and though it is everything it is one, these are the enumerated names of the ground as it is.118

This passage should make it clear that for gNubs-chen this ninth view, concerning the ground of all phenomena just as it is, virtually includes the eight previous views. Hence, the different views are not contradictory, but rather represent varying angles from which to view the ground. In our author’s perspective, it is the ninth view which enables the yogin to gain a truly complete and holistic understanding of the ground, just as it is. This echoes a similar statement made in the context of the six views of Mahāyoga (Chapter VI, §1.7), where gNubs-chen Sangs-rgyas ye-shes explains that the different teachings concern the faculties of individuals, but that all of them appear from the essence of thusness according to the particular qualities required under the circumstances.119

Compared to Klong-chen-pa’s exposition of the seven theories concerning the ground alluded to above, gNubs-chen Sangs-rgyas ye-shes seems less severe towards the alternative views. In his Tshig-don-mdzod, Klong-chen-pa affirms the superiority of the theory of the ground as alpha-purity (the seventh view in his classification). On the other hand, in his Theg-mchog mdzod, he also rejects this view, since, if the ground were merely alpha-pure, it would be devoid of self-originated wisdom itself, being merely empty. Hence, in the Theg-mchog mdzod he accepts the view that the ground is both alpha-pure in terms of its essence (ngo-bo) and spontaneously present in

---

117 Here the text reads bya-rtsol bral-ba (‘freedom from effortful action’), whereas previously the expression bya-btsal dang-bral-ba (‘freedom from action and searching’) was given; cf. C 316.1, C 344.4 and M 249a.1 (correcting C 351.1 brtsal to btsal). I have resisted the temptation of standardizing the expression, as the meaning is, in any case, quite similar. There is indeed a close connection in rDzo-rje-chen between the notions of non-searching (ma-btsal) and non-effort (mi-rtsol) or effortlessness (rdo-rje-med). See Achard, L’Essence Perlée du Secret, p. 65, n.6.

119 C 213.6.
In any case, suchness as it is, the luminous nature of mind, is nonobstructed by any such characteristics, since it is not maintained to be graspable in terms of being this or that. Abiding in the great Eminent Yoga, since one is dissociated from all thoughts without inhibiting them, appearances are not discursively examined. Why is this so? Everything is the self and the self appears as everything. Therefore, the meaning of not imaging appearances is that, at one time, there is clarity without referential focus.

In this context, incomprehension refers to taking the ordinary reified entities of one’s concretistic conceptual grasping to be suchness. This, it is warned, is again referential grasping (dmigs-’dzin) and pertains to the stage of an ordinary person.\textsuperscript{129}

II. Meditation

In the second section of the chapter, which is devoted to meditation, gNubs-chen describes two methods, which focus on the body and mind respectively: the means of resting the body and those of the mind’s approaching [suchness].

1. The means of resting the body

Regarding the first, quoting the Man-ngag rgum-chung of gNyan dpal-dbyangs,\textsuperscript{130} our author points out that any emphasis on a physical posture reflects grasping towards the body, which prevents one from seeing absolute meaningfulness.\textsuperscript{131} This does not mean, however, that he is in favour of rejecting such physical posture in meditation; the point is not to engage in any deliberate action (ched-du bya-ba) – as such, this does not contradict taking up a physical posture.\textsuperscript{132} (Here, we are reminded of what was said above in the context of the view ‘without action and searching’.) In support of this, he quotes the rNal-'byor grub-pa’i lung:

Neither contemplation nor the body nor solitude should be contrived;
In this regard, uncontrived solitude
Is the abode of primordial solitude,
The domain of the supreme yogin.\textsuperscript{133}

Here, one might recall gNubs-chen Sangs-rgyas ye-shes’ statement in Chapter I that true solitude is not to be found outside, and that those who are attached to outward solitude will not see the great meaning.\textsuperscript{134} An interesting parallel might be drawn with the solitude (Germ.

Abgeschiedenheit) or detachment emphasized in the thought of the German mystic Meister Eckhart (ca. 1260- ca. 1327), where it is considered as the highest virtue;\(^{135}\) Eckhart writes that in its inward sense, solitude refers not so much to outer isolation, but rather to an attitude of complete unwavering towards any experience, whether pleasant or painful.\(^{136}\)

2. The means of the mind’s approaching [suchness]

Regarding the second means, gNubs-chen observes that the mind enters suchness without entering anything. He goes on to explain this as a non-referential state where “no scrutinizing thoughts are produced in the intellect.”\(^{137}\)

Next, three possible defects of concentration are listed: the concentration of apprehension, that of thorough searching and the hybrid concentration.

1. As it is, absolute meaningfulness is without any thoughts whatsoever; to be convinced: “This is it!” is to apprehend it. The genuine absolute cannot be seen thereby. One can trust that this is said to be a defect of grasping.\(^{138}\)

2. Concerning thorough searching, the vast expanse of phenomena’s beingness is inherently free from scrutinizing thoughts; resting in equipoise therein, one searches for the mind’s locus of resting. For example, notions are like a fly searching for a hollow; discursive thoughts that ponder: “Is it comfortable to meditate like that?” or “Is it suitable to rest like that?”\(^{139}\), are a defect that creates thoughts.

3. As for the hybrid concentration, in the expanse of equality, concepts are alpha-pure; phenomena’s beingness is without action or searching. Because one’s intellect does not assimilate the crucial point of non-duality, at times the meaning of signlessness is clear, whereas at others the conceptions of signs fluctuate. When such a medley occurs, there is hybrid [concentration]; one thereby does not realize meditation without thematic foci.\(^{140}\)

There then follows a long passage where our author explains that, if meditating correctly, all the previously listed nine views concerning the

The Exposition of Atiyoga

Because absolute meaningfulness and the meditator are not delimited and are one, phenomena’s beingness is the essence of being as it is. Hence, one rests without deliberately resting the intellect. Likewise, since phenomena’s beingness is spontaneously accomplished, intrinsic awareness too rests in spontaneous presence. Since phenomena’s beingness is luminously clear as the essence of the great seminal nucleus, intrinsic awareness too rests as the great seminal nucleus. Because absolute meaningfulness is free from effortful action, intrinsic awareness is free from effortful action. Since phenomena’s beingness is non-dual, awareness is non-dual. Since phenomena’s beingness is free from thematic focus, awareness is free from thematic focus.141

He continues in the same vein, in effect covering each of the nine views, though not necessarily in the same order as listed in the previous section. What we can see from this citation is that gNubs-chen Sangs-rgyas ye-shes juxtaposes phenomena’s beingness (chos-nyid; Skt. dharmatā) on the one hand with intrinsic awareness (rang-rig) on the other: these two aspects correspond to what might be called the ontological and sapiential dimensions of the realization of the Great Completeness; one could also say, to the ‘objective’ and ‘subjective/cognitive’ poles of this realization, if these terms were not overburdened with precisely the kind of subject-object dichotomy that the doctrine presented here intends to overcome. The indivisibility of these two aspects is indicated by the inseparable union of the primordial Buddha Samantabhadra, symbolizing intrinsic awareness, with his consort Samantabhadrī, symbolizing phenomena’s beingness, which is then evoked as phenomena’s open dimension (chos-kyi dbyings; Skt. dharmadhātu).142

Phenomena need not have the solidified concreteness that we habitually attribute to them – such concreteness is, in fact, merely the result of inveterate reification, technically termed the all-imputing ignorance (kun-tu btags-pa’i ma-rig-pa).143 It may not be without interest to recall that the

---

141 C 409.1-4: don dang bsog pa por rgya ma chad de [C 409.1 ins. shad] gcig pa’i phyirchos nyid ji bzhin pa’i ngo bo yin pas/ bla ji bzhin par ched du ma bzhig par bzhag gol/ de bzhin du chos nyid lhun gyas grub pas rang rig pa’ang lhun gyas [gyis M 289b.1 : gyi C 409.2] grub bar bzhag go/ chos nyid thig le chen po’i ngo bo gsal bas/ rang rig pa’ang thig [thig M 289b.2 : theg C 409.3] le chen por bzhag go/ [don bya ba rtol ba dang bral ba’i phyir/ rang rig pa bya ba rtsol ba dang bral ba’o/ chos nyid gnyis su med pas/ rig pa gnyis su med pa’o/ chos nyid gza’ gtag dang bral bas/ rig pa gza’ gtag dang bral ba’o/.

143 This all-imputing ignorance is itself the final phase in a triune dynamic of nescience, which the rDzogs-chen texts of the pith instruction section describe as the ignorance of one’s single identity (bdag-nyid gcig-pa’i ma-rig-pa; the most basic non-recognition of one’s true nature), the co-emergent ignorance (lhan-cig skyes-pa’i ma-rig-pa: it manifests as a misapprehension of one’s basic wisdom – hence co-emergent with it – and the subtle conceptualization that accompanies it), and the all-imputing ignorance (kun-tu btags-pa’i
etymological sense of ‘phenomenon’, which many translators use to render one of the meanings of dharma,\textsuperscript{144} is precisely that which appears, which shows itself, presences itself, or lights up.\textsuperscript{142} In this sense, phenomena (chos; Skt. dharma) are appearances (snang-ba). Whereas the Tibetan word snang-ba first means ‘appearance’ in the sense of phenomenon, we also witness a move whereby this term comes to mean illumination, hence being closely associated with the clarity (gsal-ba) aspect of the ground’s nature (rang-bzhin). This is how the same word comes to refer to vision in the wider sense, as that which lights up to and as one’s perception.\textsuperscript{146}

In their lighting-up, phenomena manifest within an open dimensionality which is their very nature. This open dimension suffuses and nurtures phenomena in their lighting-up, though we habitually become forgetful of this fact. The beingness of phenomena is therefore not some mysterious force animating phenomena, nor is it a cause: dharmatā refers simply to the way things are, hence to their beingness; it does not even begin to answer the question of why they are or happen a certain way.\textsuperscript{147} That is why phenomena’s beingness (Skt. dharmatā) or open dimension (Skt. dharmadhātu) cannot be sought separately from phenomena. Furthermore, that is why, once awareness is attuned to this open dimension, it consists “in a ‘state’ of continual presence, or continual openness: a lively, vigorous attentiveness which serenely rests in, or stays at, the primordial ground of awareness, while at the very same time it moves in a shifting succession of focusings from one being to the next. Thus, we may say that, regardless of ‘content’, regardless of the beings with which we are concerned, [...] we stay with, or dwell in, a ground of awareness – a ground which always opens limitlessly before, and around, any particular content, any particular being.”\textsuperscript{148}

In rDzogs-chen, awareness, itself inseparable from the ground, is the act of ‘awaring’ whereby the ground comes to be aware of, to know, itself.\textsuperscript{149} Hence, it refers to the direct, non-discursive and immediate cognition of phenomena’s beingness, which is none other than the ground.\textsuperscript{150} Since this unmediated act of cognition is, in effect, already potentially present as the ground’s innate intelligence, it is always possible as an ever-fresh re-cognition (ngo-shes) of one’s own true face – in fact, the practice of contemplation as described in the bSam-gtan mig-sgron is precisely what permits one to re-

\textsuperscript{146} Achard, L’Essence Perlée du Secret, pp. 107f.

\textsuperscript{147} Ibid., p. 109.

attune to this most primordial way of being and knowing, a state of open-dimensional presence suffused with innate wakefulness.

**Eight systems of meditation**

For this purpose, gNubs-chen Sangs-rgyas ye-shes presents eight different methods of meditation according to different instructors, the names of which are given in the glosses. Each of the approaches is introduced with the words “According to one perspective...” (rnam-pa gcig-tu; Skt. atha va). 

1. The first method, associated with Ācārya gSal-ba rgyal, elucidates meditation as being the realization of the expanse (klong):

   In awareness one neither deliberately gives in to the mind, nor does one lapse therein. If one intrinsically rests with recollection where there is nothing to recollect, one’s meditation is unmistaken. Furthermore, if one prolongs [one’s meditation] with the diligence of non-action, the root, phenomena’s beingness, becomes actual.

2. The second system is attributed to the nun Ānandā (whom we have already come across above in the context of the fourth view, that of self-originated wisdom) and teaches that meditation on the view of Atiyoga is settling in quietude (mnal-du phebs-pa). It is further explained that self-originated wisdom is without any objective scope (spyod-yul; Skt. gocara), so that awareness is beyond all scrutinizing thoughts.

3. The third system is again attributed to gSal-ba rgyal. Here it is mentioned that meditation allows one to rest the intellect. Awareness is compared to an ocean, wherein are reflected the planets and stars - whatever reflections arise in the ocean of awareness are neither inhibited nor grasped at.

4. The fourth approach is attributed to Buddhagupta; it will be recalled that this master was associated with the fifth view of freedom from action and

---

151 This personage is an Indian master also known as bDe-ba gsal-mdzad; he is said to have written a number of short texts on evocations and empowerments based on the dGongs-pa 'dus-pa'i mdo; these were collected, edited and translated by gNubs-chen Sangs-rgyas ye-shes. See Dalton, *The Uses of the dGongs pa’ dus pa'i mdo*, pp. 145f, n.20.

152 Note that phol-ba is archaic for rtogs-pa. See sKyogs-ston rin-chen bkra-shis, *Li-shi'i gur-khang*, p. 58.

153 C 412.4-5: [...] rig pa la sems ched du ma btang ma shor tsam du dran pas dran rgyu med pa rang bzhag na/ de bsgom pa ma nor ba stel de yang bya ba med pa'i brison 'grus kyi sün bsrings na/ phyi ma chos nyid rang mngon du gnyur ro/.

154 Cf. Chos-kyi grags-pa, *dGe-gsal*, (attributed to), *brDa-dag ming-tshig gsal-ba*, Beijing: Mi-rigs dpe-skrun-khang, 1995, p. 477, where the etymologically related expression mnal-du 'bebs-pa is found under the perfective form mnal-du phab-pa and is defined as bsam-pa skyid-po ('happy').

155 Cf. the first system mentioned above; note that the epithet Ācārya ('instructor') is not given here.

156 The simile of the reflections appearing in water is also used by Klong-chen-pa; see Dowman, *Old Man Basking in the Sun*, p. 106.
Phenomena’s beingness is without appearance;
Refrain therein without searching is meditation.\footnote{157}

gNubs-chen Sangs-rgyas ye-shes writes that quintessential enlightenment is beyond limitations and that the appearances that are experienced as objects are essenceless in absolute meaningfulness. Hence, one should desist from making anything into a referential focus (\textit{dmigs-gtad}).

5. The fifth system, attributed to Mañjuśrīmitra, teaches that spontaneously complete wisdom is untouched by limitations and is without concept-endowed loci (\textit{rnam-rtog la'an-pa'i sā}). Its clarity is compared to that of the sun, since it is clear without any deliberate effort.

6. The sixth method is associated with Vimalamitra. Quoting the \textit{Nam-mkha'i rgyal-po},\footnote{158} Sangs-rgyas ye-shes compares the beingness of phenomena (Skt. \textit{dharmatā}) to space (\textit{nam-mkha'}; Skt. \textit{ākāśa}), which is without thought; neither discursively examining nor imaging anything, the intellect (\textit{blo}) does not waver from phenomena’s beingness, and the yogin thereby rests in meditative equipoise.

7. The seventh system is said to be maintained by Vairocana and concerns freedom from action; having resolved to be free from an object of meditation, one’s meditation is uninhibited. Mention is made of the diligence of non-action (\textit{bya-ba med-pa'i brtson-'grus}), whereby “one is without grasping towards the conception of meditating, and without the conception of imaging or non-imaging.”\footnote{159}

8. The eighth approach is said to have been held by dGa’-rab rdo-rje: here, the principle is meditation in the expanse of self-originated wisdom without extremes (\textit{rang-byung ye-shes mu-mtha'} med-pa’i klong), in which the poles of awareness as subject and appearances as object are non-existent, everything being suffused\footnote{160} in one’s integral identity (which, as mentioned above, is of course beyond the subject-object dichotomy).\footnote{161}

It will have been noticed that several of the teachers mentioned in the glosses are identical to those associated with the nine views concerning the ground. The relationship will be made explicit in the following table, which also includes references to the \textit{’Dra-’bag chen-mo}:

\footnote{157} Nam-mkha’-che, in NGM, vol.3/ga, p. 175.5: \textit{snang ba med pa'i chos nyid ni [ni C 414.1, M 293a.5 : la NGM]/ma btsal bzhags pas [pas C 414.1, M 293a.5 : na NGM] bsgom pa yin/}

\footnote{158} Cf. Nam-mkha’i rgyal-po, in NGM, vol.1/ka, p. 601.5-7.

\footnote{160} Though \textit{snums} as a verb is not attested in any of the dictionaries (even those specialized in the archaic terms), it is evidently related etymologically to \textit{snum} (‘oil’), which suffuses whatever substance it comes into contact with (Lopon P. Ogyan Tanzin: personal communication).

\footnote{161} The above is summarized from C 412-417.

It is important to understand that, similarly to the nine views concerning the ground, these eight systems of meditation are not in contradiction or competition with each other. gNubs-chen takes pains to explain that it is not from the perspective of the doctrinal texts or supreme persons that these systems differ, but merely in terms of the intellects of various individuals.

¹⁷⁰ Vairocana’s search for and meeting with Śrīśimha is described in g.Yu-sgra snying-po, Bai-ro’i rnam-thar ’dra-bag chen-mo, pp. 115-139; the passage is summarized in Karmay, The Great Perfection, pp. 22-25.
observing that any of these systems of meditation, if practised properly, allows one to strike the point (thog-tu phebs-par ’gyur-ro).\textsuperscript{171}

It is noteworthy that rather than providing a set of meditative techniques, the different contemplative approaches discussed in the bSam-gtan mig-sgron appear as poetic evocations of the ground that enable the practitioner to re-attune to the intrinsic awareness of the abiding mode. Hence, there appears to be a rhetorical negation of meditation technique, something quite typical of the mind section;\textsuperscript{172} in this regard, one might recall gNubs-chen’s denial of physical posture.\textsuperscript{173} However, it must not be forgotten that this rhetorical deconstruction does not take place in a spiritual vacuum, but occurs within a particular context, which is that of a contemplative life dedicated to the practice of meditation: one will recall Sangs-rgyas ye-shes’ emphasis on the importance of retiring to a retreat location\textsuperscript{174} and of relinquishing worldly attachment\textsuperscript{175} in Chapter I, as well as the teaching concerning the defects of non-meditation\textsuperscript{176} and the qualities of meditation\textsuperscript{177} found in Chapter II. What the deconstructive approach to meditation taken in Chapter VII seems to hint at, is that the different systems of meditation do not really diverge from the perspective of contemplative praxis; rather, they are so many vistas open on to the ground, each one having the potential of eliciting a response according to the needs of particular individuals.

gNubs-chen Sangs-rgyas ye-shes continues his exposition by pointing out various defects in a beginner’s meditation, noting in particular that any dislike of signs in favour of signlessness, or any dislike of wavering in favour of unwavering, prevents realization of equality.\textsuperscript{178}

The next subsection\textsuperscript{179} contains instructions for the moment of passing away: in view of all that has been written on the subject concerning Karma gling-pa’s famous Bar-do thos-grol, it may not be without interest to say something of the matter here: whereas the usual description of the appearance of deities in the post-mortem state is clearly connected to the four visions of crossover (thod-rgal) of the pith instruction section,\textsuperscript{180} gNubs-chen’s presentation belongs to the mind section. This part (C 423-425) mainly consists of a long quote from an unidentified source, the Man-ngag bde-klong, which is translated here in full:

The greatly secret pith instructions are for the moment of passing away:
With regard to the uncontrived sphere of the seminal nucleus,
It is hidden at the centre of three secret treasuries.
Becoming confident in planting the mind’s vitality,

\textsuperscript{171} C 419.2.
\textsuperscript{173} C 404.
\textsuperscript{174} C 5, also C 21.
\textsuperscript{175} C 17-20.
\textsuperscript{176} C 36-40.
\textsuperscript{177} C 40-45.
\textsuperscript{178} C 420f.
\textsuperscript{179} Note that this subsection still belongs to the ‘means of the mind’s approaching suchness’.
\textsuperscript{180} Cf. Achard, L’Essence Perlée du Secret, p. 127f.
One ambles about in the open dimension of the three peaks.
Since its depth is unfathomable, it is vast
Like a treasure of utterly pure jewels.
In the seraphic mansion of bodhicitta\(^\text{181}\)
One plants the deathless vitality
And shows the path without deviation.
In the phalanx-sized jewelled seraphic mansion
The king of the fruition’s vitality rides
The stallion of the unhoisted breath.
Raised through A and YA,
It radiates without birth and death
In the pervasive expanse of the seminal nucleus of Akaniṣṭha,
In the pervasive expanse without hope and misgiving.
Just as, when pouring molten gold [over a statue], its form becomes luminous,
So when appearance-existence is luminously clear as the mind, it is integral being.
As for both meditation and non-meditation, they are just the path of words;
Becoming proficient is the king of meditation.\(^\text{182}\)

This quote is interesting, since its symbolic language (“The uncontrived sphere of the seminal nucleus […] hidden at the centre of three secret treasuries”) appears to allude to the fact that the matrix of enlightenment – imaged as a seraphic mansion (gzhal-yas) – is physically ‘located’ in the heart, something that will of course take on a great importance in the pith instruction section (man-ngag-sde).\(^\text{183}\) Moreover, practices involving the use of the inner winds are hinted at (“The king of the fruition’s vitality rides / The stallion of the unhoisted breath”), as well as the fact that the ultimate purpose of meditation is to realize that appearance-existence (snang-srid) is the luminous clarity of the mind, which is none other than integral being.

3. Defects in meditation

We now come to various defects in meditation. It is pointed out\(^\text{184}\) that the defects are similar to those in Mahāyoga and in the common vehicles,\(^\text{185}\) but it is in the manner of rectification that a distinction lies. Indeed, the uniqueness of Atiyoga is that it does not seek to rectify defects;\(^\text{186}\) knowing the defects to

----
\(^{181}\) The Tibetan text gives the word bodhicitta as transliteration from Sanskrit.
\(^{182}\) C 424.3-425.3.
\(^{183}\) See Achard, L’Essence Perlée du Secret, pp. 129-136.
\(^{184}\) C 425.
\(^{185}\) The defects of the lower vehicles are listed in the corresponding sections of the previous chapters; i.e. Chapter IV (the gradual approach): C 79-83, also C 77 (defects specific to calm abiding); Chapter V (the simultaneous approach, sTon-mun): C 162-170; Chapter VI (Mahāyoga): C 228-238 (concerning the defects of the gradual tantric approach) and C 242-250 (concerning the simultaneous tantric approach).
\(^{186}\) C 440f.
be the beingness of phenomena, they are instantaneously appeased, as is pointed out in the *Don-drug*,\(^{187}\) which is quoted here:

> Whatever conceptual signs occur,
> If one knows conceptions to be the beingness of phenomena,
> One need not meditate on phenomena’s open dimension elsewhere.\(^{188}\)

There seems little point to give a list of these defects, demons (*bdud*) and obscurations here, except to point out that each of the lower vehicles can be considered a deviation from the perspective of the ones above; *a fortiori*, all of these vehicles are deviations from the point of view of Atiyoga. Aside from the gradual approach, the simultaneous approach and the *Mantrayāna* (comprising both *Mahāyoga* and *Anuyoga*),\(^{189}\) the following deviations are also mentioned: the deviation of nihilism, the deviation of distracted evenness (*phyal-ba g.yeng-ba*), the deviation of unclarity and that of ordinary worldlings, the deviation of the four contemplations, the deviations of the auditors and independent victors, and the deviation of Cittamātra.\(^{190}\)

### III. Conduct

Our presentation of the practice of *Atiyoga* as described in the *bSam-gtan mig-sgron* would be incomplete without a mention, however brief, of the role of conduct. Conduct is the integration of meditative realization into daily life; hence, it is elsewhere referred to as post-attainment (*rjes-thob*; Skt. *praśṭhālabdhā*) and concerns the period following meditative equipoise (*mnyam-bzhag*; Skt. *samāhita*); for example, ‘Jam-mgon kong-sprul (1813-1899) writes that the accumulations of wisdom and merit are to be completed through meditative equipoise and post-attainment, both of which are to be integrated to each other.\(^{191}\)

#### 1. Four types of conduct

In the *bSam-gtan mig-sgron*, four types of conduct are detailed, which will briefly be discussed here. Let us note in passing that yet again the structure parallels the presentation of Chapter V on the simultaneous approach and

---

\(^{189}\) C 433-437.

\(^{190}\) C 429-433.

Chapter VI on Mahāyoga, each of which mention four types of conduct. In the context of Atiyoga, the four types of conduct are as follows:

1-1. The conduct of great compassion

Concerning the behaviour of great compassion, since it becomes the great origin of the compassionate means, great compassion shines forth without bias and effects the purpose [of wandering beings]. If it be asked in what manner this takes place, [it is replied that] by sending forth [emanations] in order to lead [sentient beings] away from cyclic existence, one’s non-obstructed mind is aware without imaging: this is not the great compassion that is primordially finished. The uninterrupted actions and emanations [that manifest] from self-originated wisdom are the behaviour of one’s integral identity. He who knows this effects the purpose [of others] without searching for great compassion and without reference.

Let us here recall Achard’s important observation that in rDzogs-chen, the semantic range of the term ‘compassion’ (thugs-rje) includes both awareness and ignorance. Literally, thugs-rje means the ‘lord of the heart’. ‘Heart’ refers to the awakened body, speech and mind, whereas the term ‘lord’ refers to the fact that it contains within itself the potential of full awareness of the ground’s abidingness (gnas-lugs). When this awareness of the ground is actualized, its natural responsiveness to the needs of others manifests as compassion: without premeditation or contrivance, one is able to fulfil the purpose of others (gzhan-don; Skt. parārtha).

Compassion, or solicitude, essentially involves an awareness of universality and wholeness: we are not alone; and we are not whole, without caring for others.
Indeed, the obstinate insistence of some translators on rendering thugs-rje by such words as ‘energy’, ‘dynamism’, etc., in the rDzogs-chen context betrays a failure on their part to grasp the multiple connotations of a single word that continue to resonate on different hermeneutical levels of meaning. Far from being mere sentimentality, compassion is intimately connected to the awareness of the ground’s intrinsic illumination. In the triadic mode of the ground’s unfolding – as essence, nature and compassion – described in the pith instruction section, compassion is particularly associated with the ground’s illumination. As when not recognizing one’s reflection in a mirror, the non-recognition of intrinsic illumination (rang-snang) means that for sentient beings, their awakened body coagulates into their physical body, the open dimension is fragmented as objects, and their intrinsic awareness manifests as their ordinary mind.

The compassion evoked by gNubs-chen is one that is without deliberate action and without reference; hence, any attempt to deliberately send forth emanations in order to help others is not great compassion, but merely a form of altruism that may be morally laudable yet remains metaphysically incomplete. Self-originated wisdom is understood as being the effortless source of uninterrupted actions and emanations for the purpose of others. Furthermore, this compassion has the specificity of never vanishing throughout the three times; that is because “it is without wavering from the state which is equal to oneself that one completes the purpose of wandering beings. In the state of great compassion, any objectifying or referential imaging is liberated as self-originated wisdom.”

1-2. The conduct free from effortful action

This aspect of conduct is described as being free from following any deliberate purpose. It should be noted that from the perspective of the Great Completeness, whatever actions one performs are deviations if they are not sealed by the recognition of mind’s beingness. gNubs-chen writes that if one were to take up non-action, that would again be falling in the trap of an action and agent. This echoes the similar statement made in connection with the fifth view of freedom from action and searching. To the question whether one is to stay without action, Sangs-rgyas ye-shes replies that one should not even referentially imagine ‘staying’. If there is such a thing as staying, then there is also its absence. One should engage in the four types of

---

198 Arguillère, Profusion de la Vaste Sphère, pp. 486f.
199 As will be explained below, this notion of the ground’s triadic expression is absent from the bSam-gtan mig-sgron’s presentation.

204 Cf. C 351.
conduct without obstructing or referentially imaging anything; in that case, whatever one does, there is no doing.  

1-3. The conduct of salvific means

Our author explains that in the state of Samantabhadra, the primordial Buddha, there is nothing whatsoever to accept or to relinquish. Once one has assimilated this with confidence, one’s conduct does not deviate, without there being anything to reject – the salvific means are nothing else. As an illustration of this form of conduct, gNubs-chen quotes the Sems-bsgom of Mañjuśrīmitra:

Because [both] the conduct of sapience and [the conduct of] means are not abided in, to engage therein is akin to Māra’s [activity]. Even the teachings of the six [heretical schools] and the activities of Māra are not rejected nor are they discursively examined as evil.

205 These are are strolling (’chag-pa; Skt. camkrama), standing up (’greng-ba; Skt. sthāna), sitting (’dug-pa; Skt. nisāda) and lying down (nyal-ba; Skt. sāya). See Negi, J.S., Dharmasaṅgraha-Kośa, Sarnath: CIHTS, 2006, p. 216.

206 C 447.4: cir yang byas kyung byas pa med.

207 Detailed in C 450-453.

209 The gloss here lists the six heretical teachers: Kakuda Kātyāyana, Ajita Keśakambala, Pūrṇa Kāśyapa, Maskarī Gosālīputra, Nirgrantha Jñātiputra and Sañjāyō Vairādīputra. Their Sanskrit names are here given according to Negi, Dharmasaṅgraha-Kośa, p. 115. These six heretical teachers were contemporaries of the Buddha. The latter criticized their teachings because they were unable to lead to release from cyclic existence. According to the Sāmaññaphala-sutta of the Dīghanikāya (sutta no.2), their respective doctrines can be summarized as follows: Kakuda Kātyāyana taught that various entities exist as uncreated and indestructible monads, so that one cannot talk of killing anyone, but merely of inserting a blade in the space between these monads. Ajita Keśakambala maintained the doctrine of nihilism, according to which there is no consciousness that can be said to survive death. Pūrṇa Kāśyapa held that virtuous and non-virtuous deeds have no karmic effect. For Maskarī Gosālīputra all of man’s actions are predetermined by fate, so there is no free will. These four teachers completely denied karmic retribution. While Nirgrantha Jñātiputra accepted karmic cause and effect, he maintained that self-mortification is the way to release. Finally, Sañjāyō Vairādīputra would not commit to any position whatsoever. See Walshe, The Long Discourses of the Buddha, pp. 93-97.

210 Norbu and Lipman, Primordial Experience, v.98, v.97, p. 63 (English translation), p. 120 (Tibetan text). Note that in the bSam-gtan mig-sgron the verses are given in reverse order.
1-4. The conduct of spontaneous completeness

Here it is mentioned that everything is awakening, without there even being the name of cyclic existence. “Since in all directions there is nothing that is not the action of the Buddha, all conduct is the behaviour [of the Buddha].”

gNubs-chen is careful to point out that the four types of conduct just mentioned are not different in essence; indeed, whether one refers to conduct as one or fourfold is a matter of taste. What is important is that one’s conduct should not be fractional (dum-bu-can-du med), but rather should be equal. This way, “whether or not one emerges from equality, there is no distinction in one’s mode of seeing.”

Next are mentioned certain deviations of conduct. gNubs-chen Sangs-rgyas ye-shes speaks of certain mantrins who merely mouth the view without having properly assimilated it with confidence. He describes them as engaging in various forms of licentious conduct (he mentions sexual union and killing), all the while shouting PHAT. His comment is telling: “they are like stones falling to the depths of hell.”

2. Proper conduct

Proper conduct is then described in terms of body, speech and psyche.

2-1. The conduct of the body

In this regard, the conduct of the body is as follows: in the state where all phenomena are equal, there is no cause for one to be on a high stage, so one does not hope to be good through hypocrisy. Since everything is integral being, one is detached from companions and remains alone. Like the elephant, one should act with great prudence and with resplendent stability.

In terms of one’s physical conduct, one does not deliberately rectify anything. Constantly staying in the wilderness, any place will be suitable. […] Throughout the four types of conduct, one restricts one’s physical actions and is never free from one’s purpose.
gNubs-chen recommends that one cultivate a certain indifference with regard to food, clothing, etc., in order to avoid getting distracted from one’s purpose.

2-2. The conduct of speech

In terms of speech, one should avoid lies and lax (‘chal ba) speech, in particular “when there is no requirement, when the time is not right, when assembling with companions of contemplation.”217 When one speaks using examples, one’s speech should meet the understanding of one’s interlocutors.

2-3. The conduct of the psyche

Here gNubs-chen Sangs-rgyas ye-shes gives a long quote from the rNal-‘byor grub-pa’i lung, of which an extract will be translated here:

As for the scope of the adamantine psyche,
It is uncontrived, undistracted and free from thought.
It is neither distracted nor lethargic, but is clear and abides.
Being detached from desire, it is free from exaggeration and denigration.
It is without acceptance and rejection, as well as without attachment and hatred.218

Concluding the section on conduct, Sangs-rgyas ye-shes reminds his readers that whatever actions the yogins engage in, they should refrain from becoming attached to their austerities; rather, their conduct should be natural and without thematic focus.219

IV. The fruition

The penultimate section of Chapter VII is devoted to the fruition. gNubs-chen describes the fruition in terms of the warmth of experience (nyamstdrod), of which there are three phases, called ‘wavering’, ‘attainment’ and ‘stability’.220 Such a threefold classification is also alluded to in a gloss in

---

217  C 459.6.
218  rNal-‘byor grub-pa’i lung, in NGM, vol.16/ma, p. 453.1-7; the citation appears in C 460.5-462.3: rdo rje yid kyi spyod yul ni [ni NGB : nyid C 460.5, M 330a.3] /ma bcos ma yengs bsam dang bral/ [mi g.yeng ma rmugs gsal zhing gnas/ ’dod la ma chags sgra skur bral/ /blang med dor med chags sdang med].
219  C 462.4-5.
220  C 464.1.
Chapter IV on the gradual approach, and is elucidated in greater detail in the context of Chapter VI on Mahāyoga. There, the three experiences are likened to a waterfall, a stream and a lake respectively: during the first experience, the mind is unstable, producing many conceptions; during the experience of attainment, a subtle oscillation of conceptions still occurs, but one remains relaxed and practises the principle of equanimity; finally, during the experience of stability, the mind remains in a clear and non-discursive state, so that there is no need even to implement equanimity. The explanation given in Chapter VI is very close to that provided in the present context, where our author quotes a no longer extant text, the pith instructions of the three ācāryas (A-tsar rnam gsum-gyi man-ngag). The difference is mainly in terminology: here, the three experiences are referred to as the first, intermediate and final feelings (tshor-ba) of the mind. He goes on to quote from orally transmitted instructions, which describe the unfolding of warmth in terms of the triad outer, inner and secret:

> Outer warmth: the outer and inner fluctuations of the breath are no longer felt. Inner warmth: when the actual perception of equality appears, the aggregate of form, like a bale of cotton tossed about by the wind, is no longer seen as having an aggregate. Secret warmth: when the mother Samantabhadrī becomes the clear mother-like sky, one experiences the great bliss which is the taste of phenomena’s beingness.

The fact that spiritual progress should be spoken of in terms of warmth is neither arbitrary nor unique to the bSam-gtan mig-sgron. For example, a recent text on contemplative praxis by bDud-’joms Rinpoche (1904-1987) states that “having obtained the warmth of stable realization, both the common and supreme accomplishments occur without difficulty”. Without doubt, such ‘warmth’ indicates that the new vista opened up through contemplation is experienced as a feeling-tone of lived embodiment, which goes far beyond mere representational assessment.

To illustrate the unfolding of this warmth, Sangs-rgyas ye-shes gives an extensive list of dream omens and indications (rtag) as signs of the fruition. Some of these have a more internalized quality: being unaffected by praise or blame, neither considering as good a vision of the Buddha nor

being afraid of seeing a female ghost. \(230\) Others take on a rather dramatic character: being able to transform earth and sand into gold and silver, \(231\) hurling the world over great distances, \(232\) or being able to teach various beings in their individual languages. \(233\)

Again, this exposition parallels what we find in the previous chapters. \(234\) It has already been pointed out by Meinert that, as such, these indications pertain to Mahāyoga rather than to Atiyoga per se. \(235\) She bases herself on gNubs-chen’s own statement to this effect, who in the introductory section concerning the fruition, writes that such experiences are used in the context of Mahāyoga rather than Atiyoga; \(236\) this position is, moreover, repeated later on: at the end of the lengthy exposition of indications, the question is asked whether the vehicle of Atiyoga, being in itself essenceless, does not contradict the occurrence of such signs. The answer provided is, on the one hand, that the indications do indeed, as such, pertain to Mahāyoga rather than to Atiyoga; but, on the other hand, that the enlightened mind (Skt. bodhicitta) – here, of course, understood in its specifically rDzogs-chen sense of referring to the true nature of mind, intrinsic awareness \(237\) – does not reject any such indications since it does not relinquish any of the signs pertaining to cyclic existence or transcendence. The unborn beingness of phenomena (Skt. dharmatā) is comparable to the ocean, the waves of which are the various miracles and signs \(238\) that ceaselessly occur upon its realization; elsewhere, the indications and signs are compared to the display of rainbows or to a flash of lightning in the sky: \(239\) they are beyond referential grasping.

Therefore, it would seem that gNubs-chen Sangs-rgyas ye-shes’ intent is to relativize the importance of such experiences and indications and to warn against becoming overly attached to them; this is not surprising, since he does so in the corresponding sections for each of the previous chapters.

concerning the lower vehicles.\textsuperscript{240} However, he does not reject the indications as such, since that would be to conceptually delimitate the infinite potentiality of intrinsic awareness.

Having made this clarification, our author further specifies that the fruition is spontaneously accomplished. This is the occasion for him to explain that unlike in \textit{Mahāyoga}, where, in an alchemical process, the obscurations must be transformed into wisdom,\textsuperscript{241} here there is nothing to transform, since the obscurations are intrinsically clear as great wisdom. He writes:

\begin{quote}
It is not the case that, as in alchemy, what at present are temporarily obscurations are transformed into wisdom. In the knowledge of inherent alpha-purity (\textit{ka-dag}), there is not even the name of that which obscures. Like the limpid ocean, this abode is free from all the seeds of the impregnations.\textsuperscript{242}
\end{quote}

Likewise, the accumulations of merit and wisdom are said to be already completed, and the accomplishments to be spontaneously present. GNubs-chen Sangs-rgyas ye-shes further explains that the accomplishments and the fruition are self-originated,\textsuperscript{243} meaning that they cannot be found elsewhere.

\section*{V. Distinguishing \textit{Atiyoga} from the other vehicles}

The fifth and final section of the chapter presents an interesting attempt to distinguish \textit{Atiyoga} from the other vehicles. Most of the section\textsuperscript{244} is devoted to a series of questions posed from the vantage point of the lower vehicles (this includes the Yogācāra Mādhyamika, Sautrāntika Mādhyamika, sTon-mun, Mahāyoga and Anuyoga), which are replied to in due sequence. The series of questions and answers allows the author to draw precise distinctions between each of these traditions and \textit{Atiyoga}, establishing the latter’s superiority. He contends that this superiority is established by using the arguments of his challengers.\textsuperscript{245}

Prior to this series of questions and answers, two subsections are specifically devoted to the relationship of \textit{Atiyoga} to the simultaneous approach (sTon-mun) and to the \textit{Mantrayāna} (including both Mahā- and Anuyoga) respectively. This is undoubtedly because these two approaches were, in his day, frequently confused with \textit{Atiyoga}. For instance, Kimura\textsuperscript{246}

and Meinert\textsuperscript{247} have worked on Dunhuang manuscripts exhibiting a marked syncretism between \textit{Ch'an}, Mahāyoga and \textit{rDzogs-chen}. In this regard, it is essential to bear in mind the distinction between synthesis and syncretism. The latter refers to the artificial assemblage of disparate elements, whereas the former proceeds from the inside, as it were, by perceiving the unitary principle behind various appearances.\textsuperscript{248} In the present text, an example of synthesis would be the ninth view of the ground elucidated above, which includes the other approaches not through syncretism but through unification.

Already at the end of Chapter V, gNubs-chen explicitly says that the lexical similarity between certain expressions of \textit{Ch'an} and the \textit{rDzogs-chen} doctrine have been the cause of deviations in understanding.\textsuperscript{249} This argument is further developed here; the gist of it is that despite a certain similarity of diction, the \textit{st}on-\textit{mun} focus on the ground as being unborn and empty (thereby losing sight of its clarity aspect, represented in \textit{rDzogs-chen} by the notion of spontaneous presence, \textit{lhun-grub}). Moreover, they still are – albeit unwittingly – involved in effort and duality: according to the author of the \textit{b}Sam-gtan \textit{mig-sgon}, this duality is apparent in that they move discretely between the two truths.\textsuperscript{250} It may not be without interest to point out that already in Chapter VI, this inability to integrate the two truths and excessive attachment to absolute truth is contrasted with the non-dual enlightened mind of Mahāyoga.\textsuperscript{251}

As far as \textit{Mahāyoga cum Anuyoga} is concerned, gNubs-chen’s verdict is that by generating deities from out of thusness, whether gradually as in \textit{Mahāyoga} or instantaneously as in \textit{Anuyoga}, one loses sight of the “great behaviour of the non-action of self-originated wisdom.”\textsuperscript{252} The difference lies in the fact that for \textit{Mahāyoga} and \textit{Anuyoga}, the generation of deities is necessary in order to accomplish the purposes of self (Skt. \textit{svārtha}) and others (Skt. \textit{parārtha}); in \textit{Atiyoga}, on the other hand, resting in non-discursiveness suffices to accomplish both purposes. Perhaps even more importantly, there is a distinction in the manner of envisaging absolute meaningfulness itself: whereas the tantric approach focuses on non-dual intrinsic awareness as universal luminosity (\textit{kun-tu \textquoteright od-gsal}), in \textit{Atiyoga} ultimate thusness is spontaneously complete, so that great non-duality is without dividing.\textsuperscript{253}

It may be somewhat anachronistic to portray the bSam-gtan mig-sgron and other such early rDzogs-chen works as belonging to the mind section (sems-sde), since, according to van Schaik, the term itself does not occur prior to the 11th century. Nonetheless, the texts now known under that rubric do share certain characteristics and are believed to represent the earliest strata of rDzogs-chen. It is in this sense that we can say that gNubs-chen Sangs-rgyas ye-shes’ exposition of Atiyoga in his bSam-gtan mig-sgron follows the perspective of the mind section. Typical in this is an approach that focuses on mind’s beingness (sems-nyid; Skt. cittatā), called the enlightened mind (Skt. bodhicitta), as being beyond the scope of ordinary mind’s representational thought. A further characteristic, witnessed quite clearly in Sangs-rgyas ye-shes’ text, is the deconstruction of formal categories of practice: the view is said to be without deliberate seeing, and the ground, itself ungrounded, cannot be examined, entered or meditated on. Whereas much space is devoted to the exposition of different meditative approaches that allow the practitioner to meditatively attune to the ground, it will be clear from our presentation above that these approaches exhibit a marked tendency to undermine any focus on meditative technique in and for itself; rather, they appear as poetic evocations of intrinsic awareness, intended to guide the practitioner to immerse himself in the abiding mode of his natural state.

Of course, as we have pointed out repeatedly, this rejection of various forms of action and of meditation as something that can be implemented through an act of will does not signify that all religious and ethical structures are to be literally discarded; one might here recall gNubs-chen’s criticism of those who take these teachings as an excuse to engage in licentious forms of conduct. While it can be said that the rejection is, to some extent at least, rhetorical, with the aim of preventing fixation upon particular meditative techniques, it is telling that Sangs-rgyas ye-shes’ reasoning in his criticism of such misinterpretations is not so much one of moral expediency, but rather that any deliberate rejection of action would itself entail entanglement in a conceptualized view.

Looking at the bSam-gtan mig-sgron’s seventh chapter, we can see that the basic themes of rDzogs-chen, such as the universal ground and the manner of meditatively attuning to it, are found here in a highly developed manner. On the other hand, other notions, more typical of the pith instruction section – e.g. the rainbow body (’ja’-lus), the practices of breakthrough (khregs-chod) and crossover (thod-rgal), as well as the visionary anatomy typical of the
latter – are absent. 264 This of course is not surprising, given the orientation (that of the mind section) of this text.

This is not to say, however, that such visionary elements need be lacking in the approach of the mind section: Achard has already signalled that this is a wrong impression that distorts our understanding of the cycle’s literature. 265 While the visionary practices are certainly less prominent than in the pith instruction section, the instructions for the moment of death translated above are valuable in showing that vision-based practices are to be found in the mind section too.

Moreover, apart from its contents, there are formal elements that justify this classification of the bSam-gtan mig-sgron as a text belonging to the mind section: gNubs-chen Sangs-rgyas ye-shes cites almost all of the eighteen texts of the mind section (sems-sde bco-brgyad), the transmission of which he received mainly from gNya gs Jñānakumāra and his disciple, the Sogdian dPal-gyi ye-shes. 266 Here is a list of these eighteen texts, though it should be noted that there are variations in their appellations, and indeed that several of these texts exist in multiple recensions: 267

(1) Rig-pa’i khu-byug; (2) rTsal-chen sprug-pa; (3) Thig-le drug-pa; (4) Khyung-chen ldings-pa; (5) Mi-nub rgyal-mtshan; (6) Yid-bzhin nor-bu; (7) rJe-bsun (l/ btsun) dam-pa; (8) Yid-spyod rgyal-po; (9) Rin-po-che kun-dus; (10) bDe-b’uams; (11) Srog-gi ‘khor-lo; (12) Nam-mkha’i rgyal-po; (13) bDe-ba ’phra-bkod; (14) sPyi-bcings; (15) rDo-la gser-zhum; (16) rTse-mo byung-rgyal; (17) rMad-du byung-ba; (18) rDzogs-pa spyi-gcod. 268 Except for the Mi-nub rgyal-mtshan and the Yid-spyod rgyal-po, all of these texts are quoted in the bSam-gtan mig-sgron; this shows that already in the early 10th century these texts formed a coherent corpus. 269

The notable exception is of course the Kun-byed rgyal-po’i mdo, considered by later tradition to be the main tantra of the mind section, which is nowhere quoted in the bSam-gtan mig-sgron; since many of the chapters of the Kun-byed rgyal-po are constituted by the eighteen mind section texts – for example, the Rig-pa’i khu-byug (cited in Č 347), also known as the rDo-rje tshig-drug, constitutes chapter 31 of the Kun-byed rgyal-po, 270 whereas chapter 30 is composed of the Nam-mkha’-che 271 and chapter 22 is made up of the Khyung-chen ldings-pa 272 – it is more than likely that the Kun-byed rgyal-po was compiled after the redaction of the bSam-gtan mig-sgron. 273

266 Meinert, Chinesische Chan- und tibetische rDzogs chen-Lehre, p. 241.

268 The first five belong to the five early translations (snga-’gyur lnga) made by Vairocana. The other thirteen texts belong to the thirteen later translations (phyi-’gyur bcu-gsum). See Karmay, The Great Perfection, pp. 23f.

269 Achard, L’Essence Perlée du Secret, p. 25.

270 Karmay, The Great Perfection, pp. 47f.

Another oddity (though it does not specifically concern Chapter VII) is the mention of a text called the Klong-drug in Chapter II\textsuperscript{274} as being one of the books that can be relied on by the adept of the Eminent Yoga (lhag-pa′i rnal-byor-pa; Skt. adhiyogin)\textsuperscript{275} this is explained in the context of the four compatible reliances (mthun-pa bsten-pa bzhi) required by the yogin.\textsuperscript{276} This is most probably a reference to the Kun-tu bzang-po klong-drug-pa′i rgyud, an important tantra of the pith instruction section.\textsuperscript{277} Although van Schaik considers it unlikely that the text mentioned in the bSam-gtan mig-sgron is the same as the Klong-drug of the pith instruction section, given the late date he assigns to the sNyung-thig tantras,\textsuperscript{278} Achard’s research, by focusing on the visionary practices of crossover (thod-rgal), has tended to show that the texts of the pith instruction section are earlier than hitherto supposed by scholars.\textsuperscript{279} Furthermore, whereas the Klong-drug is mentioned without being quoted, Vimalamitra’s commentary to the Klong-drug, the Kun-tu bzang-po klong-drug rgyud-ki’ grel-pa,\textsuperscript{280} is cited three times in the bSam-gtan mig-sgron.\textsuperscript{281} Hence, corroborating this hypothesis would require systematic comparison of Vimalamitra’s commentary with the citations found in gNubs-chen’s work; given the length of Vimalamitra’s commentary, I have not been able to do this so far.

It is also significant that the text most quoted in the bSam-gtan mig-sgron’s seventh chapter is the rNal-byor grub-pa’i lung, a text later classified as pertaining to Anuyoga rather than Atiyoga; this would suggest that gNubs-chen sought to impose an order an a still disparate body of texts, and that this order was in a state of flux.\textsuperscript{282}

From the point of view of philological and philosophical analysis, gNubs-chen Sangs-rgyas ye-shes’ exposition of Atiyoga is as interesting for what it contains as for what it does not. In the pith instruction section, the ground is described in terms of essence (ngo-bo), nature (rang-bzhin) and compassion (thugs-rje). These are collectively termed the ‘three wisdoms which abide in the ground’ (gzhi gnas-kyi ye-shes gsun). They are not three distinct things, but rather represent the triadic mode of the ground’s expression.\textsuperscript{283} While the three terms are found in the bSam-gtan mig-sgron, they appear separately and nowhere as a triad with the same weight of significance attached to them in

\textsuperscript{274} C 30.1-34.2.
\textsuperscript{279} C 9, C 276, C 456.
\textsuperscript{281} Achard, L’Essence Perlé du Secret, p. 104.
the pith instruction section. When one knows that in the Kun-byed rgyal-po the order of the first two of the three wisdoms is reversed\(^{284}\) and that, as mentioned above, the compilation of the Kun-byed rgyal-po is probably subsequent to gNubs-chens work, it is clear that during this early period the description of the ground as a triad had not yet gained foothold, at least as far as the mind section is concerned.

Similarly, whereas the terms alpha-purity (ka-dag) and spontaneous presence (lhun-grub) are found frequently throughout the text, they are juxtaposed only once. The passage in question concerns the proper comprehension of the second view of the ground, that of spontaneous presence: Sangs-rgyas ye-shes explains that unmistaken alpha-purity is the spontaneous seeing when one no longer looks at, thinks of or pursues anything.\(^{285}\) The association of alpha-purity with the essence and of spontaneous presence with the nature, typical of the pith instruction section,\(^ {286}\) is clearly absent here. This becomes evident when one compares gNubs-chens view of spontaneous presence with Klong-chen-pa’s discussion of the homonymous view from the perspective of the pith instruction section. Whereas Klong-chen-pa treats alpha-purity and spontaneous presence as a natural pair which complement each other, Sangs-rgyas ye-shes does not share this concern. For him, spontaneous presence is to be taken in its primary sense as implying the futility of any attempt to accomplish enlightenment through effort.

**Concluding remarks**

These remarks should suffice to demonstrate gNubs-chens Sangs-rgyas ye-shes’ genius in his exposition of Atiyoga. His bsam-gtan mig-sgron is unique in the history of rdzogs-chen literature in that it is the first doxography to treat Atiyoga as a distinct vehicle (theg-pa),\(^{287}\) rather than a mere mode (tshul) of practice.\(^{288}\) The detail of Sangs-rgyas ye-shes’ presentation and the rigour of his arguments clearly show that he inherited a tradition that was already rich in nuances.

What transpires through his work is a tireless concern to organize the teachings he had received and to present them in such a way that the distinctions between the various contemplative approaches of his time would not be lost sight of. This may well be in reaction to various syncretistic movements of his time, that sought to blend rdzogs-chen,

Mahāyoga and Ch’an.\textsuperscript{289} In this respect, his task is facilitated by the parallel arrangement of the four main chapters, which has been repeatedly signalled in this article. The fact that these chapters mirror each other in their structure enables the author to present each of the four doctrines independently according to a coherent framework, while at once making comparison of individual elements relatively straightforward.

Many of the categories he uses, such as the four meditative approaches themselves, the nine views concerning the ground, etc., failed to become normative for the later rNying-ma school, and gNubs-chen Sangs-rgyas ye-shes’ masterpiece was neglected for centuries, until its publication in 1974 by the late Chimed Rigdzin Rinpoche. This is precisely why delving into the deep waters of the bSam-gtan mig-sgron can offer us such a unique glimpse into the fairly unchartered territory of early Tibetan formulations of rDzogs-chen doctrine and practice.

\section*{Appendix: A remark concerning the bSam-gtan mig-sgron’s glosses}

The Tibetan text is interspersed with many interlinear notes. It is unlikely that these are the work of the author himself. Meinert has shown, for instance, that the second gloss in the text (C 2.3) is grammatically incorrect,\textsuperscript{290} and many more such examples could be adduced. This is not to say that the glosses should be rejected, but merely that one must treat them with a certain caution.

One of the glosses in particular (C 15.4) gives a hint about the date of composition of the bSam-gtan mig-sgron, since it alludes to Glang-dar-ma’s religious persecution:

\begin{quote}
At the time of Glang-dar-ma, because of the obstacles which came towards the venerable Ye-shes dbang-po, the lineage of the instructors of dialectics declined.\textsuperscript{291}
\end{quote}

This gloss occurs in the context of the advice to obtain the lineages of the various approaches (Chapter I, §5.2), where it is explained that the Tibetan branch of the lineage of the simultaneous approach (which had belonged to the [Tibetan] emperor and monks) had declined by gNubs-chen’s time.

\textsuperscript{290} Meinert, Chinesische Chan- und tibetische rDzogs chen-Lehre, p. 238, n.599.

\textsuperscript{291} C 15.4: Glang dar ma’i ring la btsun pa Ye shes dbang po bar chad du gyur pas mtshan nyid kyi slob dpon brgyad pa nubl.
One of the problems with this gloss concerns Ye-shes dbang-po, who is presumably identical to dBa’ Ye-shes dbang-po, the first abbot of bSam-yas and successor of Sāntarakṣītā; however, dBa’ Ye-shes dbang-po (whose secular name was dBa’ gSal-snang) is generally believed to have passed away before the death of Khri-srong lde’u-btsan in 797 CE, thus far predating Glang-dar-ma (r. 836-842 CE).²⁹²

A further question arises as to why Ye-shes dbang-po, who is generally referred to as a master of the gradualist approach,²⁹³ should be mentioned in the context of the decline of the simultaneous approach. Of course, the term ‘dialectics’ (mtshan-nyid; Skt. laktuṇa), which is found in the expression ‘vehicle of dialectics’ (mtshan-nyid-kyi theg-pa; Skt. laktuṇayāna), can be said to refer to the sūtra vehicle in general, and hence to englobe both the gradualist and simultaneous approaches.²⁹⁴ Nonetheless, it is clear from the context that it is the decline of the simultaneous approach that is being referred to.

The impression one gains from all these factors is that the text (or, at the very least, this gloss) was written quite some time after the events here alluded to. That is why Ye-shes dbang-po is wrongly made a contemporary of Glang-dar-ma, and perhaps also why his death is associated with the decline of the simultaneous approach.

Furthermore, the very mention of the sobriquet Glang-dar-ma seems odd, since this nickname is not found in the Dunhuang documents; this would point to the fact that the bSams-gtan mig-sgron’s glosses are insertions by a later hand.²⁹⁵

It is likely that these glosses were written down by a disciple of the author, probably an immediate one. Indeed, several indications point to the fact that the glosses incorporate fragments of an oral commentary to the text. The lack of grammatical rigour alluded to above (which contrasts with the main text) and the fact that many of the glosses are obviously incomplete²⁹⁶ indicate that they were written down hastily as notes taken during an oral teaching. It is true that two of the glosses contain the self-reference ‘small venerable’,²⁹⁷ a sobriquet which gNubs-chen Sangs-rgyas ye-shes uses in the main text of Chapter V III;²⁹⁸ while this could be interpreted to mean that they were written by the author himself,²⁹⁹ it seems more likely, given the above considerations, that the disciple noting down gNubs-chen’s oral explanations is here quoting the master verbatim.

²⁹³ Cf. Wangdu and Diemberger, dBa’ bzhed, p. 78, p. 88.
²⁹⁵ Karmay, The Great Perfection, p. 94, n.44.
²⁹⁶ For example, cf. some of the glosses to the dreams in Chapter IV, e.g. C 90.2, C 92.2 -3; in these cases, the problem can be remedied by referring to the corresponding passages in the Ratnakīrti-sūtra. However, see also Chapter VII, C 419.4-6: this gloss is a particularly good example in that it preserves but fragments of an originally continuous structure of thought and hence is untranslatable and, to some extent at least, unintelligible.
²⁹⁷ C 375.6, C 419.2.
²⁹⁸ C 497.5; the stanza is repeated in the colophon, C 502.5.
Moreover, the fact that some of these glosses contain phonetic renderings of Chinese terms (such as 'bu-ta'\textsuperscript{300} and bo-de\textsuperscript{301} for Buddha and bodhisattva respectively), typical of Chinese Buddhist translations, renders it probable that the glosses go back to a time when Chinese Buddhist translations still circulated in Tibet. Such a use of Chinese phonetic terms is not limited to the glosses, as is witnessed by the word Par-na-pan-gyi mdo for Parinirvāṇa-śūtra in Chapter V.\textsuperscript{302}

We can conclude by saying that whereas the glosses are unlikely to have been written by the author himself, they do probably go back to an early redaction of the text, and were perhaps even noted down by one of gNubs-chen Sangs-rgyas ye-shes' immediate disciples.

The Exposition of Atiyoga

On the Thig le drug pa and the sPyi chings, two of the Thirteen Later Translations of the rDzogs chen Mind Series

Karen Liljenberg (SOAS)

In an earlier article1 I discussed two missing texts from the group known to tradition as the Thirteen Later Translations, a sub-set of the Eighteen Major Statements2 of the rDzogs chen Mind Series. Proposing new identifications of the sGom pa don sgrub and the Yid bzhin nor bu, I relied for corroboration on matching citations from both texts contained in the ninth-to-tenth century bSam gIan mig sgron by gNubs sangs rgyas ye shes.

My doctoral research,3 now concluded, has led to identifications of two further members of this important text group. One, the sPyi chings, was previously thought lost, while the other, the Thig le drug pa, was only tentatively established. In addition to outlining these discoveries, this paper will also present critical editions and English translations of both texts.

1. The Thig le drug pa

Several scholars have considered Tb. 26,4 the Byang chub sems mi ’gyur ba’i thig le tig, to be the Thig le drug pa.5 This is presumably because of its similar title, its location in several editions of the rNying ma’i rgyud ’bum6 among the other Thirteen Later Translations,7 and because it does indeed list six thig le.8

Tb. 26 is the same as that in the Rig dzin Tshe dbang nor bu rNying ma’i rgyud ’bum entitled Mi ’gyur thig le tig in its final line, but sKye med ti ka at its beginning. This fortuitously allows us to identify it with the sKye med ti la ka’i lung found in Nyang Ral Nyi ma ’od zer’s twelfth-century Zangs gling ma list of the Eighteen Major Scriptural Statements.9

1  Liljenberg, 2009, pp. 51-61.
2  In Tibetan: lung chen po bco brgyud.
3  I am grateful to the UK Arts and Humanities Research Council for their support for my research.
4  That is, text 36 in the mTshams brag edition of the rNying ma’i rgyud ’bum. The same text is also found in the gTing skyes edition (Tk. 33).
6  This text is not in the sDe dge NGB. There is, however, an editor’s note after text Dg. 158, the Thugs kyi rgyud rin pa che spungs pa’i rgyan, stating “The Byang sens mi ’gyur ba’i thig le should be inserted here.” (’di mTshams byang sens mi ’gyur ba’i thig le ’dzud).
7  In mTshams brag, for example, it is situated after the rJe bstan dam pa and before the Srog gi ’khor lo.
8  The list is found in mTshams brag p. 597.2-3.
9  Rig ’dzin rNy ing ma’i rgyud ’bum, vol. Ka, 34.
10  Nyang Ral describes the sKye med ti la ka’i lung as teaching that “the nature of mind is the single sphere” (sems nyid (kyi) thig le nyag gcig tu bstan pa’i phyir). In his later work, the Me
Although Tb. 26 does have a list of the six thig le (p. 597.2-3), this text presents related doctrinal elements that one might expect to be later developments. For example, it elaborates the schema of six thig le into a further nine, which in turn encompass thirty-six smaller thig le.\(^{11}\) In addition, there are various other technical enumerations, such as the Five Certainties, Five Greats, Three Hidden Aspects, and Twenty Five Nails\(^{12}\), that do not appear in any of the other Eighteen Major Statements.\(^{13}\) These are all aspects of rDzogs chen doctrine that are likely to post-date the late eighth or early ninth century, when, according to the tradition, the Thirteen Later Translations were made.

The principal problem with Tb. 26, apart from these doctrinal issues, is, however, that it lacks the three quotations from the Thig le drug pa given in the bSam gtan mig sgron.\(^{14}\) This is the earliest (relatively) well-dated source that cites, with a high degree of accuracy, from all of the texts included in the Eighteen Major Scriptural Statements. Nowhere does it refer to a text called Mi ‘gyur ba ‘i thig le tig.

If we rule out Tb. 26, another candidate for identification with the Thig le drug pa would be chapters six to eleven of Tb. 40/Bg. 25, the Nyi zla dang mnyam pa dri ma med pa ‘i rgyud. The Thig le drug is referred to in the list of the titles given in the text’s first chapter.\(^{15}\) Furthermore, since this tantra situates the Thig le drug chapters alongside the actual root texts of the Five Earlier Translations\(^{16}\), one would expect these chapters to be of equal status with them, and not just an ancillary work such as a commentary, for example.\(^{17}\) As in the case of Tb. 26, however, the absence of the three relevant bSam gtan mig sgron citations precludes identifying these chapters as the Thig le drug pa.

The Thig le drug pa is usually included among the Thirteen Later Translations. We must ask why, therefore, the Thig le drug pa chapters of Tb. 40 are located among the Five Earlier Translations, the sNga ‘gyur inga? I have found what I believe to be an explanation for this apparent anomaly in a rNyin ma bKa’ ma commentary on the Rig pa ‘i khu byug entitled Sa gcig pa ‘i ’grel, by Dampa bde gshegs (1122-1192).\(^{18}\) Recounting how Vairocana received the teachings from Srj Simha, this text says: “The Thig le drug pa, because of all the sources of the tantras it is extant, although it is a later translation, is included in this [group of five].” (thig le drug pa ni rgyud kyi khung thams cad nas de nyid yod pas phyi ‘gyur yin kyung ’di nyid bcug pa’o).\(^{19}\) Most remarkably, it adds: "due to the fact that the Thig le drug pa is the head of the later translations, it is also present in Sanskrit" (thig le drug pa la phyi

---

\(^{11}\) Tb 26, p. 597.3: thig le drug gi mkha’ klong nal thig le dgu yi ’od gsal zhi ng/ thig phran ssum cu rtsa drug gi/ thams cad gsal bar bkra ba yang/.

\(^{12}\) The Rig ’dzin edition cuts short the ending that mentions the Twenty-five nails.

\(^{13}\) In Tibetan: nges pa Inga, che ba Inga, sbas pa ssum, gsar bu ngyi shu rtsa Inga.

\(^{14}\) The citations in the bSam gtan mig sgron are at 314.3; 347.5; 452.2.

\(^{15}\) Fol. 348v.3/p.696: thig drug rtsal drug don drug stel che ba drug dang thig drug.

\(^{16}\) In this case, the Rig pa ‘i khu byug, rTsal chen, sGom pa don drug, and the Yangs pa che ba drug, which I have identified as a partial version of the Khyung chen Iding ba.

\(^{17}\) On this point see also Liljenberg, 2009, p. 54 and note 23.

\(^{18}\) bKa’ ma shin tu rgyas pa, vol. 103, pp. 757-824.

\(^{19}\) bKa’ ma shin tu rgyas pa, vol. 103, p. 764.4.
On the Thig le drug pa and the sPyi chings

"gyur gyi dbu yin pa'i dbang gi rgya gar skad kyang yod de).20 According to Dampa bde gshegs, therefore, it appears there was a Sanskrit version of the Thig le drug pa extant in the 12th century. It is noteworthy that title lists in the Bairo 'dra' btsan,21 the mKhas pa'i dga' ston,22 and the rNying ma bKa' ma text entitled Realizations of the Eighteen Statements23 also underline the special eminence of the Thig le drug pa by likewise including it among the sNga 'gyur lnga.

After investigating numerous texts,24 I succeeded in locating25 all three of the bSam gtan mig sgron quotations from the Thig le drug pa in Tb. 124, the rDzogs pa chen po chos nyid byang chub kyi sems thig le rgya mtsho gnas la 'jug pa zhes bya ba'i rgyud.26 This tantra has two introductory chapters describing a standard sūtra-style setting. Six of its chapter titles, from chapter three onwards, each contain the main part of the names of the six thig le as set out by the bSam gtan mig sgron.27

All three bSam gtan mig sgron citations from the Thig le drug pa are contained in chapter three of Tb. 124.28 Thus this chapter should predate the composition of the bSam gtan mig sgron. This naturally begs the question: does the same conclusion apply to the whole text, or did chapter three originally circulate independently of the ten-chapter text we now have? I have established that Chapter three is unmistakably the core of the text; what precedes it serves as an introduction, and what follows expands on it in the manner of a commentary. The complete text is lengthy in comparison with the other Thirteen Later Translations, at fourteen folios. This, together with its sūtra-style framework, suggest to me that it could be a slightly later elaboration (although still firmly within Sems sde) based on Chapter Three.

It is noteworthy that Chapter Three contains numerous phrases and parts of lines found near the beginning of the rDo la gser zhun, a text normally

---

20 Tb 124 does give a Sanskrit title. When the Tibetanized spelling is corrected this is: Mahāsandhidharmatābodhicittābodhisattvādakāvatārātantra.
22 The mKhas pa'i dga' ston list (vol. 1, p. 221) describes it as "de bzhin du bsam gtan ston pa".
24 Among the numerous texts that I examined, the Bang mdzod 'phrul gyi le'u mig, Chapter 31 (Tb. 159/Dg. vol. Cha, relevant passage on fol. 158a-b) contains a very concise teaching on the Six thig le, which emphasizes how they are all contained or condensed into each other and not separate. The mTshams brag version differs slightly, but is basically the same text. This summary takes for granted that the reader is already familiar with the basic teaching on the Six thig le. More crucially, it does not contain the relevant bSam gtan mig sgron citations. I would like to thank Jean-Luc Achard for kindly drawing my attention to this text.
26 mTshams brag rNying ma'i rgyud 'bum, vol. Ca, fol. 50b.5-64a. This text is also found in Dg. vol. Ra, text 22, pp. 269b-278a; and Tk. vol. 2, text 47, pp. 128 – 148.
27 These are identical except that they omit the actual word thig le, which is simply replaced by "chapter: (le'i). The bSam giams mig sgron (STMG 374.6-375.4.) describes the thig le chen po as having six types of aspect (thig le drug pa), which are enumerated separately in the text as follows: dbyings kyi thig le/dbyings rnam par dag pa'i thig le/chos nyid thig le/gyur shes thig le/kun tu bzang po'i thig le/rnam grub pa'i thig le. Karmay, 1988, p. 118, n.55 adds a further reference to a detailed explanation in Rongzom chos kyi bzang po's Thig pa chen po'i tshul la 'jug pa, ff. 218-9.
28 Tb. 124, fol. 54a. 2-3 (p.107); fol. 54b.4; fol. 55.a.1.
considered one of the lnga ‘gyur lnga. Dam pa bde gsheg’s statement that the Thig le drug pa is the "head" of the rest of the Thirteen Later Translations makes more sense in the light of this link with the early rDo la gser zhun. I consider it possible that it began as a short instruction inspired by and elucidating at least part of the rDo la gser zhun.29

The colophon of Tb. 124 states that Vimalamitra and g.Yu sgra [snying po] were its translators. In the light of its close relationship with the rDo la gser zhun, this attribution is at least feasible.29

2. The [rDzogs pa] sPyi chings

This is the fourth of the texts that Klong cchen rab ‘byams includes among the Thirteen Later Translations that have until now been thought to be lost. The Zangs gling ma lists this under the variant title of bKa’ lung gi spyi chings, "the epitome of teachings." It describes it as teaching that "the mind (of enlightenment) encompasses all Vehicles".21 The mkhas pa’i dga’ ston describes it as "clearly distinguishing between the vehicles".32 It and the Bairo’i rgyud ‘bum concur in placing it in their category of four greater or larger texts, together with the rDo la gser zhun. The numerous title lists show several variants in their spelling of the title.33

From its title and from these characterizations, it is clear that the sPyi chings discussed the various different yāna recognised at the time of its composition. There are several early parallels for such a work. The most well-known is the Man ngag lta ba’i phreng ba attributed to Padmasambhava, and of course, the bSam gtan mig sgron itself. Such treatments eventually gave rise to the grub mtha’ literary genre. However, one would expect the sPyi chings to give clear precedence to rDzogs chen, judging by Nyang Ral’s description.

The bSam gtan mig sgron has four citations from the sPyi chings,34 all of them located within its seventh chapter, on rDzogs chen.35 The first citation concerns the concept of the bdag nyid chen po, literally the 'great self'. The bSam gtan mig sgron describes this as the all-inclusive state of Samantabha-
dra, in which there is no “other”, only "the great selfless self". The next citation is very short, describing how the realization of the insubstantiality of phenomena and consequent release of attachment to such concepts as good and bad leads to the state of natural great bliss. The third citation illustrates a discussion of how the ultimate truth cannot be found by the activity of mental analysis or reasoning. The final citation is in the context of Nub Sang rgyas ye shes’ differentiation of the view of Rdzogs chen from that of mere emptiness verging on nihilism. While the author himself distinguishes between Rdzogs chen and Madhyamaka, the Spyi chings citation refers rather to the Chan school of simultaneous enlightenment, known as ston mun. This implies that at the time of composition of the Spyi chings, an effort was underway to distinguish Rdzogs chen from Chan.

After examining numerous texts to locate the four Spyi chings citations, I found them all embedded as lemmata in the bKa’ ma commentary text sPyi gsang sngags lung gi ‘grel pa. This commentary is attributed to gNyags Jñānakumara both on the title page and in its colophon.

It was sometimes difficult to distinguish the text of the Spyi chings from the commentary. In general, however, I determined that there are four main

This passage is translated in Karmay, 1988, p. 110.

39 De kho na rdzogs (311.4) pa chen po yin te //de la ni bya ba dan gshong ba ni med do /zhes smra ba'i gang zag ni /rdzogs chen du khlas 'ches nas dgu ma'i bsam gstan la (311.5) rten 'cha' ba yin /spyi bcings las kyung /rdzogs chen bla na med par khas 'ches nas /ston men bsam gstan tsham la rten /'cha' ba 'rgyal (311.6) po'i sras 'bangs babs pa lung dang 'gal /zhes 'byung ste /des rgyal po'i sras dam pa 'bangs su babs pa dang 'dra ste /lung dang yang 'gal (312.1) lo / This passage is translated in Karmay 1988, p. 112.

40 However, Karmay points out that the Cig car ba doctrine considered itself to be bdu ma//Madhyamaka, referencing Dunhuang texts PT 117 and PT 812. Karmay, 1988, p. 112, n. 27.

41 On this term see Karmay, 1988, p. 88, n. 13.

42 Similarities between the two traditions nevertheless became in later centuries a pretext for criticism of Rdzogs chen by proponents of the New Schools of Buddhism in Tibet. See Karmay, 1988, pp. 121-133.

43 These included: in the Bairo'i rgyud 'bum, the Byang chub snying rgyug pa'i rgyud (Bq 99, Vol.4); Bq 124, Bq 125, (vol. 5); Bq 130, Bq 167 (vol. 6). In mTshams brag: Sens lung chen mo'i mdo gsal ba spyi rgyud (Tb 126); Rdzogs pa chen po byang chub kyi snying po che spung ba gsal ba man ngag gi rgyud (Tb 101); Tb 115; Tb 132; Tb 159; Tb 160; Byang chub snying kyi spyi lung chen po rgyug pa'i rgyud/man ngag gser gyi tu shal skam pa'i rgyud (Tb 175); A ri rgyud pa chen po'i rgyud (Tb 231); Ti'a ba shan chen po rin chen sgron ma rtsa ba'i rgyud (Tb 252). Another text, the rDzogs pa chen po'i spyi chings, was authored by gZhan phan mtha’ yas’od der (18th-19th century CE).

44 bKa’ ma shin tu rgyas pa, vol. 103, p. 439.
ways in which the commentary introduces or demarcates its root-text citations:45

1. The previous clause terminates emphatically with the final particle "'o".
2. The previous clause ends with a rhetorical phrase indicating that what follows will address a possible question or objection. E.g. snyam pa la.46
3. The previous clause ends with the phrase bstan pa’i phyir.47
4. The citation is followed by an end-quote phrase, e.g. zhes bya ba.

Cantwell and Meyer recently encountered similar difficulties in isolating the text of the Thabs kyi zhags pa.48 The Dunhuang copy of that text often highlights its lemmata with a semi-transparent wash, thus showing that its scribe understood the boundaries between the root text and commentary. However, the sDe dge and bKa’gyur versions of the Thabs kyi zhags pa include the commentary undifferentiated from the root text. It is possible that a similar loss of highlighting occurred to the sPyi chings.

Another factor in the disappearance of the sPyi chings may have been the development of the grub mtha’ genre itself. The proliferation of later systems of classification and analysis of the various vehicles might have left its treatment of these themes sounding outmoded. In particular, its discussion of the Chan (ston mun) school, apparently already altered to Madhyamaka in Nub Sang rgyas ye shes’ comment on one passage, supports this hypothesis.

3. Translations and critical editions

The Six Spheres - Thig le drug pa

Then all the Buddhas praised [this] and conferred empowerment in all directions, [each] teaching their own secret mantra, uniting infinite Buddha-realms in the supreme mandala, and dispelling the mesh of conceptual thought, the waves of Samsāra. Samantabhadra, lord of the mandala of [all] the Buddha-families, gazed in every direction and considered, then [spoke] in the naturally secret unexcelled manner: 50

"The non-dual meditation on the totally pure, natural mind of enlightenment, the teacher that is praised by all as the light of the world, the

45 I include this provisional list, whose criteria will no doubt be obvious to many textual experts, for the convenience of those who may find themselves faced with a similar difficulty in future.
46 "To whoever thinks..."
47 "In order to show..."
48 In a lecture on the Thabs kyi zhags pa delivered at SOAS 17/3/2010, Cantwell remarked that there was often a "fuzzy boundary" between this text and its own commentary.
49 This is IOL Tib. J 321, 42r-45r.
50 This opening passage is a necessary part of the chapter structure of the larger text, but the passage that follows may once have circulated independently before being incorporated into it.
teaching that is the essence of the Dharma, the embodiment of youthful Mañjuśrī, is [this] – one rests in equanimity in the authentic, uncontrived blissful expanse in which nothing need be done.

The basis of the immeasurable⁵¹ activity of ethical discipline and so forth, although its many different aspects are explained as the path⁵², unless the path that is the mother⁵³ of the Sugatas and is equal to all [of them] is present, they will not come about. Therefore this is the path of the supreme yoga.

Hard to travel and to understand, this is the path of all [beings], and transcends both thought [and] non-thought. Non-abiding, non-conceptual, simple and free of thinking, words do not express it. Without shape or colour, it is not the domain of the senses. Difficult to demonstrate⁵⁴ or examine, it is without even a trace of anything that can be put into words.

It is not the path of the accomplished sages of the past. Whoever enters onto the path of the sages of the past will end up gripped by the sicknesses of the path - meditation, attachment, and exertion.

As [is taught] in the [oral] statements of the teacher(s), if one views limited verbal analysis⁵⁵ as the path, that is actually [just] continuing the process of conceptual thought, like an animal pursuing a mirage. The ineffable path of total purity cannot be defined by words. Teaching [about] purity and impurity is actually just deluded words. Pure and impure are integral, non-dual, and indivisibly equal. Therefore, [this is] the way without the perception of duality [such as] renouncing and adopting, negating and affirming.

Making no differentiation whatsoever between any aspects, primordial wisdom is a continuum with ignorance. [Just as] a lamp that casts its light without any obstruction is free of all thoughts, the unwavering state presides supreme over [both] dullness and meditative concentration. The very act of seeing [that] there is nothing⁵⁶ to really see is itself the goal to be attained. This is why this is called “the eye of omniscience”.

Thus this state of resting transcends the objects of the six senses. This natural spaciousness has no limits or centre, and rests as the sovereign of equality that neither accepts nor rejects. Mind and karmic imprints are not dual, [but] are mixed and equivalent. Because subjective conceptions and phenomena appear as one’s own adornment⁵⁷, one should not reject or renounce them. Not thinking about any [specific] aspects whatsoever, one enjoys the bliss⁵⁸ of [skillful] means.

Because [even] things that are disagreeable to all and [normally] completely renounced are pure, the five disturbing emotions and the five

---

⁵¹ Literally, the ocean of conduct.
⁵² If the Dg/Tk reading here is adopted, the translation would read “...distinctions of liberation on the path are explained as the path...”.
⁵³ The Tk reading (yul rather than yum) translates as “the object/goal of the Sugatas”.
⁵⁴ Amending the reading brtan to bstan, in accord with the elaboration on this passage on fol. 58b.
⁵⁵ Amending mtha’ sphyod to mtha’ dpNyod.
⁵⁶ Amending mthong bas to mthong med, in agreement with the commentary on this passage on fol. 60a.
⁵⁷ If the alternative reading is adopted, “appear through [their?] own conditions”.
⁵⁸ Amending the phrase thabs kyi de la rol to thabs kyi bde la rol.
inexpiable actions have no actual substance. By entering this path of total purity one attains [the state] of the sovereign of equality.

No mental formations and so on are renounced, adopted or rejected. Placing [reliance] on past narratives, information and valid cognition, and then wishing for the signs of accomplishment of the three meditative samādhis, and so on,59 goes against the statements regarding effortlessness, and is a delusion.

Resting without anything that needs to be done in the blissful domain of spontaneous perfection is the very essence of total self-arising primordial wisdom, unwavering, immutable, and free of all narratives.

The nectar that is [already] attained conquers the suffering of effort; one rests without needing to do anything in the state of total authenticity. The unaltered state is free of all the limitations of conceptualizing thoughts, [and] its unimpeded qualities are forever undiminished. Without renouncing [them], shortcomings and mental objects are pure. Everywhere, inner and outer, is the unobscured locus of great, primordial wisdom.

Samantabhadra Buddha, transcending the limitations of effort and accomplishment, naturally manifests, himself, the tantras of the60 pristine, primordially arranged spontaneously present Dharma. [All] Dharmas are without elaboration in the great sphere,61 they are of the nature of bodhicitta, [and that] nature clearly manifests its essence [and] all objects.62 They are all, through the natural condition, free from creeds of actor and action,63 and constructed [concepts] of birth and cessation; they are the embodiment of primordial wisdom that transcends conventional terms of subject and object, and all conceptual thought."

[So] he spoke. [This concludes] the third chapter, establishing the meaning of the ultimate reality, of the Tantra that Enters into the Ocean-like State of the Essential Sphere of Bodhicitta, the true nature of reality that is Great Perfection.

Thig le drug pa critical edition

(Source: Chapter 3 of Tb. 124, entitled rDzogs pa chen po chos nyid byang chub kyi sens thig le rgya mtsho gnas la ’jug pa’i rgyud)

Passages cited in the bSam gtan mig sgron (where they are attributed to the Thig le drug pa) are shown in italics.

59  Adopting the Tk reading sogs in place of tshogs here.
60  The reading here (de dag de rgyud) appears corrupt, and I have amended it to de dag gi rgyud, in order to offer a tentative translation.
61  In Tibetan, thig le chen po.
62  My translation of this terse passage is tentative. In common with other sens sde texts, it reverses the order, that would become standard in rDzogs chen doctrines, of the first two aspects of the triad of ngo bo, rang bzhin, [thugs rje].
63  That is, dualistic notions of subject and object.

Homage to glorious Samantabhadra!\[117\]

[This] is the clarification, without confusion, of the all-inclusive Mantrayāṇa scriptural transmissions.

The self exists. There is no other. Spontaneous perfection exists, as the Great Self. Because it is one with the state of Samantabhadra, there is no other. In [the notion of] no-self, one falls into the error of nihilism.

As sentient beings' conceptual thoughts increase, [those] thoughts spin [them in Samsāra]. Once concepts have left their karmic imprint, [they] become [caught] in the conceptual state.

The Sūtra section and treatises that are provisional in meaning explain [phenomena] as empty. Moreover, they explain them as non-existent. Even more than that, emptiness [itself] is explained as non-self. This, unless comprehended by scriptural transmission, is not proper, and is the non-Buddhist view of nihilism, which is difficult to alter, and a serious misdeed. Therefore it is taught that a conceptual view, which is easier to alter, is less dangerous.

Even meditation on non-thought is a mental process, with a great risk of leading to [a view of] mere nothingness, which is difficult to correct. Therefore, grasping at a visualized swift\[118\] cause\[119\] is easier to correct, because grasping arises from obtaining.\[120\]

What shows this?

Just as grasping a snake is bad, so is a mistaken approach [to] knowledge mantras. Emptiness is hard to censure, [but] conceptual thoughts are basically easy.

But if so, [you] may say, doesn’t [this] become a concept? In this sense it is not a concept: because permanence does not exist, therefore [the concept of] “other” is negated. Because nothingness does not exist, therefore the self is included; and so both eternalism and nihilism are purified.

Since there is no production or cessation, they are also negated, and because there is no self or duality, there is also purity. The whole universe in its identity with the self is the spontaneous accomplishment of Great Perfection in oneself.

When the great perpetuity [that is] Vairocana, Sattvavajra [and] supreme Akṣobhya\[121\] clearly manifests in this way, since one is completely free of any

\[117\] There is no end-quote particle after the homage, but even so I take it to be part of the root text.

\[118\] drag dal appears in the Man ngag lta ba'i 'phreng ba as part of a longer phrase drag dal du 'gro ba “to go with firm steps”, which Karmay (1988, p. 161, n. 99) notes is explained as “to go with fast steps means to go simultaneously and not gradually”.

\[119\] The word “rgyu” here could simply mean “cause”, but it is also the name of the second of the three samādhi of Mahāyoga, the causal samādhi.

\[120\] The word “obtaining” (lon) may have a special technical meaning here as found perhaps in the title of the Chan text “sens lon” that is frequently referred to in the bSam gтан mig sgron. It also occurs in Dunhuang text PT 117, in the title of the bSam gタン gi lon, a work attributed by Sa skya Pandita to Hva-shang Mahāyāna. See Karmay, 1975, p. 153.

\[121\] Vajrasattva is Akṣobhya’s sambhogakāya form, and Vairocana is his nirmanakāya aspect, so we have here the three kāya.
ground for doubt after thoroughly investigating the Mahāyāna Sūtra Section Middle Way and so forth, for that reason one is vividly cognizant of everything, without concepts. After gaining certainty through this view, there is only a slight mention [here] of the lower Secret Yānas.\footnote{Concerning these "lower secret yānas" the KSG commentary specifies "the Mahāyogas and so on."}

Concerning the actual explanation: although those [lower vehicles] are said not to explain the distinctions in the context of the fruition, in the context of the cause they do not go wrong. However, they do stray from the [oral] statements. How do they go astray [from] the Mantra[yāna]? The [samādhi of] Suchness [encompasses] the Causal and the [All]-illuminating [samādhis]. As for those who state that Suchness [is] the deity meditation: in the view of those who have not studied\footnote{Literally, "not heard" (ma thos).} the great [oral] statements and are not learned, although the Suchness that they describe [as] the stage of meditating on the deity may seem to correspond to samādhī, the mantra[yāna] precepts [teach that it] leads to the Meditation of the Gods, and that samādhī hinders [future] rebirths. Although one may cleanse the mind-stream through the absence of thought and by remaining in the three isolations\footnote{I assume that dgon pa gsum here is equivalent to dben pa gsum, that is, isolation of body, speech and mind.}, [there is] apprehension\footnote{Literally, "two fears" (dogs pa gnyis).} of even the slightest thought arising.

The method of entry, the explanation of the View, and each of the different types of actions, from the basics, and also the Mantra[yāna samādhī of] Suchness, unless comprehended through the [oral] statements, are inappropriate. How is that? If you just practice one [samādhi], you will not succeed, but since [practicing] the three [samādhis] one by one is an [even] graver error, although there are precepts for beginners that just teach each of these three individually, they should all be practiced simultaneously.

In that case, [you may] object that, because [the samādhi of] Suchness is without any [visualized] object, but the Causal [samādhi] has an object, it seems difficult if [not] impossible to practice them [both] at the same time. But through the [oral] statements, it is easy to progress. This is illustrated, for example, by the [reflection of] the moon in water, or a mirror, or an ocean wave - the cause that arises from within shines out from its own depths. There is no fault of becoming fixated.

Meditation on the human body endowed with mind\footnote{I have tentatively emended the phrase sems can mi las to mi lus.} as the body of a Buddha, and the radiation and reabsorption from a\footnote{The phrase bdag gcig su las is difficult to construe and my translation here is provisional.} single self of the many deities of the maṇḍala and an unimaginable [number] of emanations, are purified by the clear visualization itself.

The pleasure and suffering of dreams, when one awakes, are exactly the same in nature; and similarly, conceptual thought and non-thought, too, when [one has] pristine awareness, are equal in their essential nature.\footnote{Although explicated in the commentary, this passage may possibly be quoted from a different source, rather than the sPyi bcings, as it ends with zhes gsungs pa.} In [their] non-fabricated [nature] they\footnote{The commentary explains this as referring to "the Three Samādhis and so on."} are primordial, spontaneously-accomplished perfection.
In that case, if they are perfect from the beginning, one may wonder whether meditation is now pointless. It is not pointless. From the non-existing cause existence manifests: the supreme maṇḍala of familiarization with what was [previously] not seen. If there is a cause that at first is non-existent, what substance does it have [to create] conceptual thought?

These are the teachings on the Great Activity.

The clarification of the [oral] statement of the Mantra […]130 monks [and?] sthāviras131 will be blind.132

This wonderful vajra [and] lotus of the totally-pure self is the father, [and at the same time] his own child.133 This lineage is the primordial view.

This great ocean of the Secret Mantra [yāna] can not be realized through comparisons, logical reasoning, inference, or superior knowledge. Therefore, the great Self135 of the Secret Mantra[yāna] that abounds in a great wave of accomplishments, whose unimaginable depth is hard to fathom, is accomplished by obtaining the statements and esoteric instructions.

For example, after barley and buckwheat have been mixed up, though they are poured together, they show up individually, [and] similarly, although mantra[yāna] and meditative absorption may be mixed up, from the point of view of the wise, the greater special qualities of the mantra[yāna] manifest distinctly.

That which abides in great bliss, [is] the great perpetuity, the perfect Sambhogakāya. Precious enlightenment that transcends the Three Realms - since it is empty, where will it be found by searching for it? The essence of primordial wisdom is no different from the beings that are primordially present in the fluid of the great sphere.137

The person who, individually elucidating these inner and outer teachings, without mixing them up, combines the provisional meaning,
without abandoning anything, with the state of great equality, the Dharmadhātu, understands all the Buddha’s teachings without exception and remains within the great oral precepts, though his body is human, his mind is a Buddha. [Such a] teacher is called “the light of the world”, and even the Victorious ones of the three times pay him homage, and all of the inner and outer oath-bound [guardians] also pay him heed and carry out whatever he commands.

Someone who does not have such realization, who does not have the statements, in his extreme ignorance [will be] seized by arrogance, and his speech will also be extremely deluded and contradictory [to the Dharma]. Claiming that it is the unsurpassed Great Perfection, sons of the Victorious ones who rely merely on the samādhi of the instantaneous approach violate the statements by assuming the role of commoners. Therefore, this non-waning lamp of the teachings is the province of those persons who have thoroughly purified their minds through an unimaginably [long] series of lives, placed their minds in the natural state over and over again, and paid reverence to the Victorious ones. But for those who only know how to mouth the meaning of their samayā, who mix up inner and outer teachings as a casual concoction, and lack the esoteric precepts of the Mantra[ṃaṇḍa], considering the risks of it entering their hearts, it is secret.

If an unsuitable recipient should hear it, it will become a great burden, and he will wander continually. There are three statements of esoteric precepts, therefore, because of the great danger and the difficult burden. [Of] the Precepts [in] Three Statements, the first gives a clear idea, the second gives understanding, and through the third, the meaning has been properly understood.

If they have not heard these three [precepts] or have not understood their meaning, some people will talk of emptiness, and others of permanence, the distinction between "the supreme vehicle", which here is Mahāyoga but with a very pronounced rDzogs chen flavour, and “sūtra section samādhi” - a reference to Chan.

139 This phrase occurs in the rDo la gser zhun, (l.4) where it may also be a quotation.
140 Literally, “place him on the crown of their heads”.
141 That is, Chan.
142 STMG “falling to the role of commoners.”
143 This passage, from “Claiming that it is the unsurpassed Great Perfection …” is quoted in the STMG at fol. 311.5-6.
144 Between the end of the previous passage and the start of this one there are two quotations, but they are not commented upon, and do not seem to be part of the root text.
145 Amending bstos to bītos.
146 There is an intriguing echo here of the famous three-line teaching known to the tradition as “Tshig gsum gnad brdegs”, “Hitting the essential point in three statements”, said to be the last testament of the eighth century rDzogs chen master dGa’ rab rdo rje.
147 There is a row of dots between “therefore” and the rest of this sentence, possibly indicating a lacuna in the source text. This hypothesis is supported by the commentary on this line: “Because there is a very great risk in not knowing the chosen recipient, it is hard [for him] to hold it in mind.”
148 The commentary (fol. 20 r.4-20 v. 3) elaborates on these esoteric precepts. It includes a reference to the Peaceful and Wrathful (zi khor) deities. Its explanation includes the term kun rtags pa, the first of the Three Natures or Three Aspects (trisvabhāva) of Cittamatra. The Three Precepts may therefore have consisted of an explanation of the Three Samādhi of Mahāyoga, with perhaps some influence from Cittamatra doctrine.
and these will be signs of their having only understood just a few words, and also expose [the fact] that they lack the three precepts.

Moreover, that which remains without contriving in the single state of these three is the spontaneously-accomplished Great Perfection. Apart from this, there is no other state beyond concepts. Because he remains in the unitary state of Samantabhadra, the bhagavān is ornamented with emptiness.

The [oral] statements of the Great Perfection [explain that] the sphere of the secret moon\[^{149}\] perfects birth [and] cessation in the self; the cause that perpetually shines forth in the mind of great beings, [and that] all Buddhas [are] non-existent.\[^{150}\] The enlightened [state] roams freely and without impediment.\[^{151}\] “Therefore, whatever their thoughts and deeds may be like, do not give [this teaching] to anyone who is fixated on attaining [this] goal” is the advice.\[^{152}\]

Having lucidly drawn out all the coiled words of Universal Inclusiveness, it should be listened to\[^{153}\] by [only] one or two. Glorious Hayagrīva, having grasped the stacked entrance to the maṇḍala of the heart, will reside [there].

If this is violated, since the Buddha has said in numerous scriptures that this will cause many evils to occur to the author in this and future lives, just as a magnet attracts iron, this should be borne in mind.

**Spyi bcings Critical edition**

Based on the version contained in the KSG commentary text *sPyi gsang sngags lung gi ’grel pa gnyags dza nya ku ma ras mdzad pa* (Vol. 103 p.439)\[^{154}\]

Dpal kun tu bzang po la phyag ’tshal lo/ sphyi bcings sngags kyi lung/ ma ’dres gsal ba’o/ bdag ni yod do/gzhan ni med do/ bdag nyid\[^{155}\] chen por lhun gyis rdzogs\[^{156}\] pas yod do/ kun tu bzang po’i ngang

---

\[^{149}\] The commentary explains (fol. 20 v.3/p. 480.3) that the “Sphere of the secret moon” (*zla gsang thig le*) signifies primordial wisdom. This is also the title of an extant Mahāyoga tantra.

\[^{150}\] This line is extremely terse and challenging to translate. I have relied for my interpretation on the commentary (fol. 22r.1-3), which states that the true nature of all conventionally-designated things is insubstantial, without color or desire, and that to be free of thoughts of such things is to enter the definitive oral precepts.

\[^{151}\] See previous note. The line *ma bdag ci bder byang chub yan du khye* is cited in the STMG at fol. 453.1

\[^{152}\] This passage ending with the “is the advice” (ces gdam pa’o) indicates the end of a citation that could be from elsewhere, but it is also possible that the *sPyi bcings* itself concluded here, as what follows begins with the text’s title and refers to how it should be transmitted, and appears to be supplemental in character. It does however, receive some commentarial explanation.

\[^{153}\] Literally, ”grasped in the ear”

\[^{154}\] Verified by cross-checking with the quotations from the *sPyi bcings* in the *bSam gtan mig sgron*, which all match. The passages cited in the *bSam gtan mig sgron* (STMG) are shown in italics in this edition.

\[^{155}\] STMG fol. 329.5 (*bdag*) *gzhan*.

\[^{156}\] STMG fol. 329.6 *grub*.

\textsuperscript{164} The commentary elucidates the previous passage with a quotation from the Kun 'dus (as found in the KSG version), as follows: bsgom pa'i gnas med dag du rab rtogs na/ bsgoms kyang skyes med chos dbying nam mkha' 'dra zhes gsangs so.

\textsuperscript{165} I have tentatively emended the reading ni las to ni lus here, in the light of the commentary on this passage which reads: 'byung ba'i lus nyid sams kho na las ni gzhan par ma skyes par gsal ba ni ye shes kyi phyag rgya ste.

\textsuperscript{166} Here the full passage in the commentary reads: sngags kyi lung gsal ba zhes bya na nas ban thangs mi phyed de mdongs so zhes bya ba'i bar du ni, i.e. "from.....to.....", implying that it has not quoted the entire passage from the root text.

\textsuperscript{167} This passage (beginning gsangs sngags rgya mtsho...) is cited in STMG 295.5 and following. There is one variant in this line: STMG [...rgya mtsho chen po] ni.

\textsuperscript{168} STMG 296.1 (dka') bas.

\textsuperscript{169} The citation in the STMG ends here, at STMG 296.1.

\textsuperscript{170} Two lines that follow here may also be part of the root text: gtan tshig kyi sgo nas bsgrub bya nyid kyang ma 'dres par bshad la/ rjes su 'jug pa'i nyangs kyang ma 'dres so zhes 'go yang drang ngo.

\textsuperscript{171} There are several lines here which could be part of the root text, but as they are not commented on in the usual way, I am inclined to think that they are quoting a different source. They read: mar dang spyan du bsres pas/ spyan gyi stobs kyang nyangs la/ mar gyi mdo'g kyang nyangs te gnyis ka ma rlung ngo/ zhes gsung so. This imagery is explained as referring to confusing the teachings of the supreme vehicle and the samādhi of the stūpa section, in preceding lines which could also conceivably be part of the root text, but are less likely to be so.

\textsuperscript{172} This quotation is from the Gold refined from ore (rDo la gser zhun), one of the Five Earlier Translations. See the edition by Norbu and Lipman, 1985, p. 115.5.

Five Principles of rDzogs chen Transmission in the Kun byed rgyal po

Jim Valby

As long as practitioners meditate any buddhist or non-buddhist view, it is impossible for them to realize primordial enlightenment. Practitioners realize primordial enlightenment by totally relaxing in Natural Presence\(^1\) beyond cause and effect. Five principles of rDzogs chen transmission — historical, root, yoga, intentional and literal — explain how to totally relax in Natural Presence. These five principles are explained in the 200 folios of the 84 chapters\(^2\) of the Kun byed rgyal po,\(^3\) the principal tantra of rDzogs chen sams sde. Khenpo Zhenphen Öser\(^4\) explains in detail these principles in his 2400 folio commentary\(^5\) on the Kun byed rgyal po named *Ornament of the State of Samantabhadra*.

These five principles establish conceptually the meaning of unmistaken effortless, self-perfected Natural Presence. Practitioners with high capacity\(^6\) do not struggle on the paths of spiritual vehicles.\(^7\) Instead, they totally relax in Natural Presence, directly recognizing the immediacy and totality of primordial enlightenment.

**Historical Principle**

The Kun byed rgyal po says:\(^8\)

\[
\text{dang po yid ches pa yi khungs bstan phyir} \\
\text{lo rgyus don gyi bshad lugs bstan par bya}
\]

---

\(^1\) Natural Presence is also called pure, perfect, intrinsic, non-dual, primordial, instant *rigpa*-knowledge-awareness.

\(^2\) These principles are explained explicitly in chapter 13. Chapters 21, 29 and 45 give additional explanations.

\(^3\) *Kun byed rgyal po* editions include: sNga 'gyur bka’ ma shin tu rgyas pa, folios 6-285 of volume 3935 of TBRC W25983; mtShams brag, folios 1-198 of volume 604 of TBRC W21521; mkHyen brtse (gTing skyed), folios 1-186 of volume 1757 of TBRC W21518; Bai ro'i rgyud 'bum, folios 383-435 of volume 1; sDe dge, folios 1-170; and sGang steng, folios 1a-93b.

\(^4\) mKhan po gzhain phan 'od zer is person P2DB5991 in the TBRC digital library. His seat was Ser shul rdzong, and this commentary is his only known composition.

\(^5\) The commentary appears in volumes 4010 and 4011 of section W25983, available as Adobe-readable PDF files from the Tibetan Buddhist Resource Center (TBRC) founded by Gene Smith.

\(^6\) Capacity is usually explained with five topics: confidence in the primordial enlightenment of the master, oneself and all beings; devoted interest and active participation in the master’s oral and symbolic transmissions; continuous attentive presence inside time; cultivation of *prajña* presence to directly experience the emptiness of mind and phenomena; and timeless contemplation in Natural Presence beyond cause and effect.

\(^7\) Vehicles include non-buddhist traditions, Śravakayāna, Pratyekabuddhayāna, Bodhisattvayāna, Kriyatantra, Caryatantra, Yogatantra, Mahāyoga and Anuyoga.

\(^8\) Folio 61, chapter 13, *mtShams brag* edition.

First, the historical principle is explained in order to provide confidence in the source.

The historical principle\(^9\) is explained to disciples to produce confidence in the primordial source, which transmits its knowledge in three ways: direct transmission is the natural empowerment of primordial emptiness with infinite potential; symbolic transmission is the raw energy of each experience, which demonstrates its definitive meaning through its own nature; oral transmission is speech and elegant compositions with profound concepts and words.

Practitioners with low to medium capacity gradually develop the high capacity to completely relax in the knowledge of primordial enlightenment by working with these three aspects of the transmission of qualified \(\text{rDzogs chen}\) masters, inside a community of practitioners who help each other.\(^10\)

Oral transmission involves words and concepts which masters and texts explain to help disciples develop capacity to continue in the recognition of the immediacy and totality of primordial enlightenment. The essence of the oral transmission is that everything is already the wisdom-energy of primordial enlightenment, beyond renunciation, antidotes, development, accomplishment, purification, transformation and attainment. Practitioners with high capacity do not take refuge in the words and concepts of oral transmission.

The meaning of symbolic transmission is that every experience of every being is already the pure, empty, self-perfected wisdom-energy of primordial knowledge. There is no hierarchy of wisdom-energy experiences. The raw energy of each experience demonstrates its definitive meaning through its own nature. Also, we may begin to recognize the immediacy of wisdom-energies through sacred symbols, such as a mirror, a crystal, space, a peacock’s feather, mandala attributes, and so forth. Practitioners with high capacity do not take refuge in the experiences of symbolic transmission.

Direct transmission is the secret refuge\(^11\) for practitioners with high capacity. Through our experiences of sensation, clarity and emptiness we find ourselves concretely in Natural Presence with our vajra master and each other. We use oral and symbolic transmission to develop our capacity to stabilize our realization of the timeless naked awareness of direct transmission, beyond cause and effect.

All teachers, teachings, disciples, times and places are already the uncorrected natural state of primordial enlightenment. Enlightenment is not newly produced by disciples who follow the teachings of teachers in particular places at specific times. Causes, conditions, effects, struggles and practices are already the self-originated wisdom of Natural Presence.

---

9 The historical principle answers questions like these: What is knowledge? From where does knowledge come? What is our situation now? From where do teachings come? What is the natural state? What is refuge? What are the three aspects of \(\text{rDzogs chen}\) transmission?\n
10 In addition to intellectual study, practitioners apply secret methods to produce experiences which help to develop higher capacity. Methods are more secret. Ideas are less secret.

11 Outer refuge is buddha, dharma and sangha. Inner refuge is guru, deva and dakini. Secret refuge is the unchanging path of Natural Presence.
Everything of the universe of samsāra and nirvāṇa arises as the enlightened energy of the one self-perfected Natural Presence. But teachers still mistakenly teach that disciples should fabricate enlightenment by applying discipline, renunciation, interruption, purification and transformation.

**Root Principle**

The Kun byed rgyal po says:12

chos kun rtsa ba sems su ’dus pa’i phyir
de nas rtsa ba’i don de bstan par bya

The root principle is explained so that (one understands that) the root of all phenomena is Presence.

The root principle13 explains that all phenomena of samsāra and nirvāṇa are primordially enlightened and unified in Natural Presence. Uncreated, primordial, all-pervasive and insubstantial Natural Presence is the source of all teachers, teachings, disciples, times and places. Natural Presence is not some object or experience to produce, discover or maintain. We relax with unstructured, raw, timeless awareness in the primordially empty source, which has infinite potential to manifest anything through sound, light and rays. 'Sound' means the vibration and movement of emptiness. 'Light' means that subtle energies begin to manifest through vibrating emptiness. 'Rays' means the diversification of the empty wisdom-energies of light. All phenomena of the animate and inanimate universe are already the wisdom-energies of essenceless light. All phenomena of samsāra and nirvāṇa are direct manifestations of self-originated wisdom and are already liberated in all-pervading, uncorrected Natural Presence. No action is necessary to produce enlightenment. Primordial liberation does not depend upon behavior, ideas, meditation, words or mind.

All phenomena are already unified in primordial unique, indivisible, non-dual Natural Presence, which transcends all frames of reference and cannot be established through words. Practitioners with capacity learn how to relax naturally in authentic unfabricated equality, beyond negation, affirmation, rejection, acceptance, fear, hope, struggle or practice. There is no need to apply mudras, recite mantras, imagine visualizations, preserve samayas, meditate deities, perform sacred activities, travel on paths, purify obstacles, or search for wisdom. Natural Presence already abides in the bliss of natural contemplation and transcends the dualistic diseases of meditation practices.

---

12 Folio 61, chapter 13, mTshams brag edition.
13 The root principle answers questions like these: What is the source? What is the main principle of rDzogs chen teaching? How does energy manifest? How are energies unified?
Yoga Principle

The Kun byed rgyal po says:\textsuperscript{14}

\textit{theg pa'i khyad par so sor dbye ba'i phyir}
\textit{yo ga'i don gyi rtsa ba bstan par bya}

The base of the yoga principle is explained in order to differentiate the features of the vehicles.

The yoga principle\textsuperscript{15} differentiates the features of spiritual vehicles, so that serious practitioners with high capacity can completely transcend actions, efforts, acceptance, rejection, cause, effect, struggle, achievement, purification and transformation.

Because all spiritual paths lead away from the recognition of the immediacy and totality of primordial enlightenment, we must learn how to use anything from any teaching without being conditioned by it. We learn how to study, practice and live in the context of Natural Presence. It is impossible to get familiar with Natural Presence when we are taking refuge in the ideas, words and experiences of spiritual vehicles. But we can quickly develop capacity using the ideas and methods of any spiritual vehicle when we do so inside the transmission of Natural Presence.

The obstacles and deviations of spiritual vehicles include views, meditations, initiations, mandalas, samayas, behaviors, paths, levels, wisdoms, sacred activities and goals. It is impossible for practitioners to get familiar with Natural Presence while conditioned by and attached to these obstacles and deviations.

‘Obstacle’ means that the practitioner fails to recognize the immediacy and totality of primordial wisdom. Obstacles of action are based upon the failure to recognize effortless Natural Presence. Obstacles of knowledge are based upon the failure to recognize that everything in the universe manifests as the ornamental energy of Natural Presence. Obstacles include concepts of two truths, three purities, acceptance and rejection, the four aspects of approach and attainment, good and bad, self and other, nirvāṇa and samsāra, enlightenment and non-enlightenment, and so forth. Basically, obstacles are concepts that something exists which is other than the self-manifesting wisdom energy of Natural Presence.

‘Deviation’ means entering into action based upon an obstacle. Deviation means searching for something other than self-perfected, all-pervading primordial enlightenment. Practitioners deviate from natural primordial enlightenment by traveling paths with conceptual characteristics. Failing to recognize the immediacy and totality of primordial wisdom, practitioners deviate through their struggles to achieve something else.

Sattvayoga, Mahāyoga and Anuyoga reject, accept, struggle and achieve. Atiyoga transcends all actions, efforts, struggles, causes and effects. Al-

\textsuperscript{14} Folio 61, chapter 13, mTshams brag edition.

\textsuperscript{15} The yoga principle answers questions like these: How do practitioners use spiritual vehicles to block the possibility of realization? How do we get free from all limitations, especially those of teachings? How do practitioners transcend correction, transformation, rejection and acceptance? What are obstacles and deviations?
though Natural Presence is beyond differentiation or exclusion, Atiyoga explains how different teachings struggle with views, behaviors, samayas, practices, and so forth. Natural Presence is far superior to any vehicle.

Because followers of spiritual vehicles are attached to methods, such as renunciation, interruption, development, purification, transformation and accomplishment, they do not know how to relax in uncorrected Natural Presence. Followers of Śravakayāna use the four truths to reject the self-originated wisdom-energies of Natural Presence. Followers of Pratyekabuddhayāna use meditation on the twelve links of interdependent origination to block relaxation in Natural Presence. Followers of the Bodhisattva vehicle conceive relative and absolute truths and gather merits and wisdom by gradually traveling on the five paths and training on the ten levels for eons. Followers of Kriyatantra try to purify and empower all phenomena, using mantras, mudras and visualizations related to jñānaśattva and samayaśattva deities. Followers of yogatantra do not understand unchanging Natural Presence, so they meditate deities, using the five factors of manifest enlightenment and the four types of miracles. They cultivate contemplation of the relative vajradhātu mandala with characteristics and contemplation of absolute emptiness without characteristics. Followers of Mahāyoga use the three contemplations and the four aspects of approach and attainment to transform the five aggregates and five elements into the pure mandala of enlightenment. Followers of Anuyoga do not understand how to relax in uncorrected Natural Presence, so they assign the name 'cause' to the dharmadhātu object, assign the name 'effect' to the self-originated wisdom subject, emanate and re-absorb light rays, and try to obtain ordinary and supreme siddhis. Followers of Atiyoga with high capacity realize primordial enlightenment beyond action and achievement by relaxing in uncorrected Natural Presence.

### Intentional Principle

The Kun byed rgyal po says:\(^{16}\)

\[
\text{rtsol sgrub bya mi dgos par bstan pa’i phyir dgos ched don gyi dgos pa de ru bstan}
\]

The purpose of explaining the intentional principle is to reveal that it is not necessary to struggle for and achieve (enlightenment).

The intentional principle\(^ {17}\) explains that struggle and achievement are not necessary for the realization of effortless primordial enlightenment. Practitioners with high capacity totally relax in direct, immediate, accessible pr-

\(^{16}\) Folio 61, chapter 13, mTshams brag edition.

\(^{17}\) The intentional principle answers questions like these: What is the purpose of rDzogs chen teaching? How does one realize? What is the main point of study and practice? Why are struggle and achievement not necessary for primordial enlightenment? Why is rDzogs chen teaching secret?
mordial knowledge, beyond views, meditations, *samayas*, sacred activities, paths, spiritual levels, trainings, antidotes, struggles, achievements and purifications.

The main point of *rDzogs* chen teaching is relaxation in Natural Presence beyond cause and effect. We do not try to set up some new, improved frame of reference in which to take refuge. We do not try to escape from the circumstances of our situation. We can take care of our responsibilities much more easily if we govern our ever-changing presence inside time with Natural Presence outside time. Right now we can understand total primordial liberation, beyond vehicles, with their views to understand, meditations to accomplish, *samayas* to preserve, sacred activities to perform, paths to travel, levels to practice, antidotes to depend upon, and purifications to apply for removing obstacles.

The intention is that each practitioner directly experiences unconditioned, primordial, Natural Presence, beyond words, ideas and actions. There is nothing to deny, establish, accept or reject based upon the dualism of relative and absolute truths. Fortunate practitioners with high capacity effortlessly self-liberate by relaxing in unfabricated primordial enlightenment beyond searching and struggling.

Natural Presence already abides as the all-pervading enlightened state of samsāra and nirvāṇa, beyond efforts to achieve some imaginary state of enlightenment. All phenomena are the enlightened energies of unborn Natural Presence, beyond the origination and cessation of four noble truths, beyond dependent origination, beyond ritual cleanliness, and beyond the development and accomplishment stages.

Beyond struggle and practice, Natural Presence experiences diverse phenomena as one flavor, beyond good, evil, pure, impure, rejection and acceptance. Practitioners with low to medium capacity hold onto the frames of reference of the provisional teachings of the gradual paths of the vehicles of cause and effect. As long as practitioners continue to grasp suggestive teachings, they will not understand and should not be taught the effortless realization of the self-originated wisdom of Natural Presence.

**Literal Principle**

The *Kun byed rgyal po* says:18

\[
\text{mi rtogs don de rtogs par bya ba’i phyir}
\]

\[
\text{tshig gi don de sgra ru brjod par bya}
\]

The words of the literal principle are communicated in order to provide understanding of the non-conceptual meaning.

The meaning of the literal principle19 is that words are precisely communicated to provide conceptual understanding of the non-conceptual meaning.

---

18 Folio 61, chapter 13, mTshams brag edition.
19 The literal principle answers questions like these: How do *rDzogs* chen practitioners understand the literal meaning? What is never the main point? How does a practitioner
of the absolute equality of Natural Presence beyond all struggle and achievement. The intellectual meaning of words and concepts is connected with non-conceptual meaning. For a practitioner with high capacity, the oral transmission is never the secret refuge. The application of the literal principle depends upon the capacities of individuals. We learn how to use words and concepts to undermine our frames of reference. We learn to connect with the intended non-conceptual meaning beyond the words and concepts.

Some practitioners almost automatically build a new 'rDzogs chen cage' in which to live. But the main point is never the words and ideas of the oral transmission. The intended meaning is always the naked Natural Presence beyond the words and ideas. We can use our human capacities to think, judge and speak to loosen up the concreteness of our temporary cages. We do not take refuge in the thinker, judge, speaker. We recognize our limitations while relaxing in the Natural Presence of the primordial source.

The proclamation in words providing intellectual understanding of the literal principle plants seeds for non-conceptual understanding. Practitioners on their own rarely get familiar with Natural Presence. When someone wants to understand Natural Presence, a teacher already familiar with knowledge explains by pointing out that Natural Presence has no essence. The real condition of Natural Presence, which cannot be expressed, is pointed out with words such as 'inexpressible'.

The sounds and words of the literal principle communicate effortless self-perfection using the ten topics: beyond views and meditations, beyond initiations, beyond samayas, beyond mandalas, beyond paths, beyond levels, beyond sacred activities, beyond behaviors, beyond limited wisdom, and beyond goals. Practitioners who develop capacity may recognize and get familiar with the qualities of unborn, non-conceptual, self-perfected Natural Presence beyond arguments and logic. Practitioners who develop high capacity totally relax in the empty natural state of primordial perfection, beyond dualities such as cause and effect, affirmation and negation, relative truth and absolute truth, manifestation and emptiness, development and accomplishment, realization and non-realization, enlightenment and non-enlightenment, and so forth.

These five principles present the essence of rDzogs chen sems sde transmission.
Abstract
In sGa ston’s list of the Southern Treasures discovered by gShen chen Klu dga’ a series of texts referred to as the Facets of Mind, Nine Minor Texts on Mind are mentioned. The Bon tradition has acknowledged from that time to the present day that these are seminal texts in the literature of Bon. Furthermore, these texts would eventually be classified as the exemplary works of the Mind Section of Bon Dzogchen. Nevertheless, the precise content of these texts has been unclear to modern scholars, both Tibetan and Western, working outside of Tibet. With the publication in 1999 of Mongyal Lhase’s Edition of the Bon Kangyur, as well as with other subsequent publications, we are now in a better position to identify and understand these works. The aim of this paper is to clearly identify the titles of these texts, to identify the various editions in which they are available, and to begin to understand how they work together with tantric elements to form a holistic system of training.

Introduction
A natural place to begin to understand the history of Mind Section (sems sde) literature in Bon Dzogchen, is Karmay’s The Treasury of Good Sayings (Karmay, 1972), an edition and translation of Shardza’s history of the Bon tradition. There Karmay’s translation reads: “Although the texts of the Great Perfection (rdzogs chen) are innumerable, they can all be reduced to The Four Cycles of Scriptural Tradition, The Three Cycles of Propagation, and The Nine Cycles of Mind Abatement.”1 The Four Cycles of the Scriptural Tradition (bka’ rgyud skor bzhig), can be easily identified with The Four Cycles of Scriptural Tradition/Transmission of the Aural Tradition of Zhang Zhung (bka’ rgyud skor bzhig, 1968 and Kangyur 171). Shardza Tashi Gyaltse (Shar rdza bKra shis rgyal mtshan) identifies this cycle as the exemplar within the Quintessential Instruction Section (man ngag sde) of Dzogchen.2 In The Treasury of Good Sayings Karmay helps us to identify the reference to The Three Cycles of Propagation as The Three Cycles of Propagation of Dzogchen (bsGrags pa skor gsum, Kangyur 174, Tengyur 207).3 Shardza Tashi Gyaltse identifies this cycle as the exemplar within the Great Vastness Section (klong chen sde) of Dzogchen.4

---

1 The Treasury of Good Sayings, p. 51. Karmay’s translation of Shardza’s description of these texts, “sems smad sde dgu”, as “Nine Cycles of Mind Abatement” is misleading. We prefer to render this phrase as “Nine Cycles of Minor [Texts on] Mind.”
2 dbYings rig, vol. 1, p. 7.
3 The Treasury of Good Sayings, p. 15, n3.
4 dbYings rig mdzod, vol. 1, p. 7. However, this association is apparently not entirely shared by either indigenous scholars of the tradition or contemporary scholars such as Jean-Luc Achard. Unfortunately, a consideration of the The Three Cycles of Propagation is beyond the scope of this paper.
From the start we should note that the phrase Mind Section (sems sde) may be used in three different ways. In the first use Mind Section (sems sde) means a section (or text) on Mind. This is the most general use and common in the early instances of the literature that we will examine. The second usage is the use of the term Mind Section (sems sde) as a technical term for organizing the sections of the Bon Kanjur. Used in this way the Mind Section of the Bon Kangyur is descriptively defined as Volume 171–178 as cataloged in the Handlist of the Tibetan Kangyur and Tengyur (Keutzer and O’Neill, 2009) or the Mdzod section (Section IV) as cataloged in A Catalog of the Bon Kanjur (Martin et al., 2003). The third use of the term Mind Section is as a technical term describing a tri-partition of Dzogchen. Shardza Tashi Gyaltsen’s terse description of Dzogchen, as given above, is enough to tell us that the exemplar of the Quintessential Instruction Section, The Four Cycles of the Scriptural Tradition of the Aural Tradition of Zhang Zhung (bKa’ rgyud skor bzhi, 1968 and Kangyur 171), and the exemplar of the Vastness Section, The Three Cycles of Propagation of Dzogchen (bsGrags pa skor gsum, Kangyur 174), are each contained with the Mind Section (Volumes 171–178) of the Bon Kangyur as described in the Handlist. Thus, we must be careful not confound the use of Mind Section (sems sde) as a way of organizing the Bon Kangyur with the use of Mind Section (sems sde) as a technical term describing a tri-partition of Dzogchen practice.5

In phrases such as “Nine Minor Texts on Mind (Sems smad sde dgu),” the word “sde” is used very generally to describe a section of a text or an individual text. Early in Volume 1 of the Precious Treasury of Space and Awareness, Shardza Tashi Gyaltsen uses the phrase “sems sde dgu” in a more technical manner that implies the “Nine [Texts of] the Mind Section of Dzogchen,” and in this way presents these “Nine Minor Texts on Mind” (Sems smad sde dgu) as exemplars within the Mind Section (sems sde) of Dzogchen.6 One might wonder: if “Nine Texts on Mind” are precisely the “Nine [Texts of] the Mind Section” then isn’t this a distinction without a difference? The problem with making these two uses equivalent is that it lulls us into thinking that when early works7 use the phrase “sems sde dgu” it implies that they are classifying these texts as Mind Section (sems sde) literature. In fact the tri-partition of Dzogchen is not a classification scheme that is native to this early literature of Bon. We will discuss again the classification schemes natively applied to these nine texts briefly in Section 1.2. In the meantime we will simply take care to note that although Shardza Tashi Gyaltsen considers these texts to be exemplars of the Mind Section (sems sde) literature, the early literature itself has no such self-reference.

---

5 An example of a potentially confusing statement is found in the otherwise enormously useful A Catalogue of the Bon Kanjur, page 437: “The Mdzod Section (mdZod sde) may also be called Sems Section (Sems sde), which for present practical purposes means exactly the same thing.” This does help us to understand the criticism, periodically heard in tea stalls in the East and coffee shops in the West, that Bon Dzogchen has no Quintessential Instruction Section (man ngag sde).

6 dBying rig mdzod, vol. 1, p. 7. That these “nine texts” mentioned in The Treasury of Space and Awareness refer to the same group of texts as mentioned in the Treasury of Good Sayings will become clearer in Section 1.4.

7 Such as ‘A zha Blo gros rgyal mshthan’s bKod pa’i rgyan (bKod pa’i rgyan, 2004).
With these caveats and considerations aside, let us progress to identifying the titles that constitute these Nine Minor Texts on Mind (Sems smad sde dgu). In another footnote of The Treasury of Good Sayings⁸ Karmay enumerates the Sems smad sde dgu as [1] gab pa dgu skor, [2] khu byug and seven smaller texts known as [3—9] Sems phran sde bdun. There are a variety of texts containing the phrase Nine Hidden (gab pa dgu) in A Catalog of the Bon Kanjur; our challenge will be finding the precise texts intended. Kapstein breaks new ground in his consideration of the The Nine Cycles of the Hidden (Kapstein, 2009), but he doesn’t seem to share our preoccupation with precisely identifying the root text. As the Bon canon has a number of major titles containing khu byug we face a similar challenge of finding the precise text intended.

As we dive in to find the titles of the texts that constitute the remainder of the nine sections (i.e., the Seven Smaller Texts on Mind [Sems phran sde bdun]), the water becomes even murkier. What may constitute the Seven Smaller Texts on Mind (Sems phran sde bdun) is not at all clear from either A Catalogue of the Bon Kanjur or A Catalogue of the New Collection of Bonpo Katen Texts (Karmay, 2003). Given that these Mind Section works are treasures of gShen chen Klu dga’, we look to the comprehensive treatment of the treasures of that treasure revealer in Martin’s book entitled Unearthing Bon Treasures (Martin, 2001). In his discussion of the “Nine series of lesser Mental Class Texts” Martin simply reiterates Karmay’s terse description cited above.⁹ Annotating a biography of rMe’u dGongs mdzod Ri khrod pa¹⁰ Kvaerne’s explanation of “sems phran” as perhaps the “sems phran bdun” also credits a personal communication from Samten Gyaltsen Karmay. From Karmay onward, not one particular title of a text in the Seven Smaller Texts on Mind (Sems phran sde bdun) is ever mentioned. In short, while Tibetan authors consider the Nine Minor Texts on Mind (sems smad sde dgu) to be important works in the Bon tradition, aside from a consideration of only one of these nine texts, The Nine Cycles of the Hidden (Kapstein, 2009), the totality of what has been published in the West on these texts Mind has been largely confined to the contents of one terse footnote by Samten Karmay.

In order to improve our understanding of these early texts that Shardza Tashi Gyaltsetn classifies as the exemplary Mind Section literature in Bon we will work in Section 1 to systematically identify the root text among the collection of works associated with The Nine Cycles of the Hidden, as well as to catalog the variant titles of the Minor Texts on Mind as they have occurred over time. To construct this list of variant titles we will use the following five resources:

- The list of gShen chen Klu dga’s Southern Treasures found in the sGaston gyi gter gyi kha byang as published in Collection of Rare Bonpo Texts (Namgyal, 2009);
- The gSang ba bsen thub kyi rgyud (gSang ba bsen thub, 2004) together with its commentary, the bKod pa’i rgyan (bKod pa’i rgyan, 2004), by

---

⁸ The Treasury of Good Sayings, p. 51 n. 8
⁹ In other words, Unearthing Bon Treasures, p. 65 n. 42, simply references The Treasury of Good Sayings, p. 51 n. 8.
the 13th century author ‘A zha Blo gros rgyal mtshan, as published by the Bon Dialectic School;
• Shardza Tashi Gyaltsen’s *The Precious Treasury of Space and Awareness (dByings rig mdzod, Volume 1)*; and
• The work on lineage transmission by dBra ston Ngag dbang sKal bzang bstan pa’i rgyal mtshan as quoted in *A Catalog of the Bon Kanjur*.

In Section 2 we will then work to identify instances of the texts themselves among the Bon *Kangyur*, Bon *Tengyur*, and other independently published works. In particular, we will identify editions of this literature in four publications:

• The third edition of the Bon *Kangyur* edited by Mongyal Lhasé (Lhasé, 1999).
• An edition of the *Tengyur* as cataloged in *A Catalogue of the New Collection of Bonpo Katen Texts*.
• A text entitled *gSas mkhar rin po che spyi spung sgron ma gsal ba’i tan tra las ngang thag bskal pa’i sgron ma ston* that is collected with other texts together in a book entitled *sPyi spungs rin po che a dkar gsang sngags kyi bka’ srung drwa ba nag po’i rgyud skor*, (Sangs rgyas bstan ‘dzin, 1974).

In Section 3 we will try to understand how these early texts of the Mind Section of Bon work together with elements from tantra to form a coherent program of practice in Bon as described in a commentary of ‘A zha Blo gros rgyal mtshan, as practiced today in the Geshe training of sMan ri Monastery, and as described by Shardza Tashi Gyaltsen in *The Treasury of Space and Awareness*.

1. Clarifying the Titles of the Texts that Constitute the Principal Early Works of the Mind Section of Bon

In our efforts to establish a list of the titles in the Nine Minor Texts on Mind (*Sems smad sde dgu*) we face three challenges. The first is simply to establish a list of of candidates for inclusion. The second is to make correspondences among different variations of the titles of the same texts. The third is to reconcile lists of names to some over-arching system of enumeration, such as “the Nine Minor [Texts of the] Mind Section (*Sems smad sde dgu*).” We will begin by an examination of a list of Minor Texts on Mind found in gShen chen Klu dga’s Southern Treasures.
1.1 gsShen chen Klu dga’ s Southern Treasures

An account of the hiding of the Bon treasures at the time of King Gtsal po and their discovery by gsShen Klu dga’ (996-1035)\textsuperscript{11} has been published in *Collection of Rare Bonpo Texts* (Namgyal, 2009). This account, attributed to the Bon scholar sGa ston Tshul khrims rgyal mtshan, contains a section on the Southern Treasures.\textsuperscript{12} The following extract from this account gives an early description of texts discovered by gsShen chen Klu dga’ (formatting added for visual clarity):

“As for the emergence of the Facets of Mind (*sems phyogs*), Nine Minor Texts on Mind (*sems smad sde dgu*):

1. The Nine Cycles of the Hidden (*gab pa dgu skor*)
2. The Golden Weighty\textsuperscript{13} Scripture (*gser gyi lung non*)
3. The Lesser Scripture (*lung chung*)
4. Resting Freely of the Mind (*sems kyi cog bzhag*)
5. The Cuckoo of Mind-Awareness (*rig pa sems kyi khu byug*)
6. The Continuity of Awareness (*rig pa rgyun thag*)
7. The Continuity of Transmission (*lung rgyun thag*)
8. Resting Loosely (*lhug ‘jug*)
9. View and Meditation in One Page (*lta sgom shog gcig ma*).”\textsuperscript{14}

While the names of the first eight texts are readily apparent and need relatively little decoding, it was initially unclear how this list constituted Nine Minor Texts on Mind (*sems smad sde dgu*). We thank Jean-Luc Achard for unravelling the title of the ninth text.

For further identification of the texts of the Mind Section we turn to an important tantric work within the Bon Kangyur, the *gsang ba bsen thub*.

1.2 The Enumeration of the Texts on Mind in the *gsang ba bsen thub*

The *gsang ba bsen thub* is not evident in the versions of the Kangyur found in *A Catalog of the Bon Kanjur*; however, the tantric cycle may be found as Volume 145 in Mongyal Lhasé’s edition of the Kangyur as cataloged in the *Handlist*, as well as volume 193 of the Tengyur as described in *A Catalogue of the New Collection of Bon Katen Texts*. For convenience we will use a modern edition of the *gsang ba bsen thub* written in *dbu can* script published by the

\textsuperscript{11} This date is mentioned incidentally in the biography of Blo gros rgyal mtshan by Jean-Luc Achard at http://www.treasuryoflives.org/biographies/view/Azha-Lodro-Gyeltsen/13092.

\textsuperscript{12} Namgyal, 2009, p. 94–102. Martin suggests this text belongs to the late 14\textsuperscript{th} century (*Unearthing Bon Treasures*, 2001), p. 280.

\textsuperscript{13} In rendering the Tibetan word “non” as “Weighty” we attempt to give the dual associations of mental reflection and the ability to weigh down, without the heaviness (pun intended) of terms such as “suppressive” or “oppressive.”

\textsuperscript{14} Namgyal, 2009, p. 100: *sems phyogs* *sems smad sde dgu byung ba la/ gab pa dgu skor/ gser gyi lung non/ lung chung sems kyi cog bzhag /rig pa sems kyi khu byug/ rig pa rgyun thag/ lung rgyun thag /lhug ‘jug lta sgom shog gcig ma*.
Bon Dialectic School (gSang ba bsen thub, 2004). In Chapter 29 of the gSang ba bsen thub, entitled Teaching the Branches of Practice, we find (formatted for visual clarity):

“As for the mirrors of the immutable enlightened body:
• The mirror of methods, activity (spyod pa) in the The Single (rkyang) and Combined (sbag) Thigle
• The mirror of apprehending, The Greater Golden Weighty Scripture
• The mirror of abiding, apprehending the root, the Minor Scripture
• The mirror of speech, the playfully resounding (sgrogs) Cuckoo
• The mirror of mind, the state of equality, Resting Freely,
• The mirror of clarity, prolonging the Continuity of Awareness
• The mirror of meditation (sgoms), sustaining (skyong) the Continuity of Transmission
• The mirror of the phases15 (bskal pa), splicing together the rope of the Continuity of State
• Resting Loosely, pointing to the insubstantiality of appearances.

Practice these as the principles (don) of the branches of the primordial Shen (ye gshen). “16

Note also that this direct quote immediately above classifies the texts referred to as “the nine mirrors” in the 8th Vehicle of the Primordial gShen and not the 9th Vehicle of Dzogchen. Kapstein gives a concise presentation of the Nine Vehicles according to the system of the Southern Treasures of gShen chen kLu dga’ in Kapstein, 2009. His translation indicates that according to the The Commentary of the Four Clever Men17 the Nine Cycles of the Hidden is classified as belonging to the 9th or Highest Vehicle. One of the principle distinguishing features between the 8th and 9th Vehicles is that there is no conceptual activity in the entrance to the 9th Vehicle. Unfortunately, a resolution between the tri-partion of Bon Dzogchen by Shardza Tashi Gyaltse as briefly discussed in the Introduction, and the classification scheme of the Nine Vehicles, is beyond the scope of this article.

---

15 The gSang ba bsen thub and its commentary use bskal pa in a highly technical way. Geshe Chaphur Lhundup explains the bskal pa bzhi as birth/generation (skye), abiding/sustaining (gnas), declining (’jig), and empty (stong ba). These four phases can be on the scale of a single individual life or an entire eon. Compare with the archaic use of bskal ba as “bar chod” meaning “interruption” as defined in Bod yig brda rnying tshig mdzod, p. 39.

16 gSang ba bsen thub, 2004, page 76: /’gyur ba med pa’i sku yi me long du/ /thabs kyi me long thig le rkyang sbags spyod/ /’dzin pa’i me long gser gyi long non chel /gnas pa’i me long lung phran rtsa bar zungs/ /gsung gi me long khu byug rol bar sgrogs/ /thugs kyi me long cog bzhag mnyam pa’i ngang / /gsal ba’i me long rig pa’i rgyan thag bsring / /sgom pa’i me long lung gi rgyan thag skyongs/ /bskal pa’i me long sens kyi ngang thag mthud/ /sngag la dngos med mdzub tshugs thug par zhog lye gshen yan lag don du ’di spyod cig/.

17 Another name for the Sems lung gab pa dgu skor gyi ’grel ba rgya cher bshad pa, Tengyur 216-5.
1.3 The Enumeration of the Works on Mind in the yid bzhin bkod pa’i rgyan

Significant help in the identification of variant names is given by the bkod pa’i rgyan, a commentary to the gsang ba bsen thub written by ’A zha Blo gros rgyal mtshan (1198–1263). A full list of the names of texts that constitute the “nine mirrors” as in the bkod pa’i rgyan is shown in Part 1 of Appendix B and will not be repeated here. We find in the bkod pa’i rgyan a number of useful minor variants of names relative to the other four sources we consider in this Section; however, two variants will be particularly important. First we should note that since the bkod pa’i rgyan is a commentary on the gsang ba bsen thub, we can be confident that the names in the commentary that refer to the texts of the “nine mirrors” should correspond with the names of the texts of the “nine mirrors” in the root. With this we can obviate two potential sources of confusion. The first is the confirmation of a correspondence of a single text entitled lung phran in the gsang ba bsen thub with the text entitled lung non chung in the bkod pa’i rgyan. The meaning of the Tibetan words “phran” and “chung” is similar; however, as in the case of gShen Chen Klu dGa’s discoveries, the phrase sems phran is periodically used to refer to an entire family of Smaller (phran) [Texts on] Mind. Another potential point of confusion is obviated by the establishment of equivalence between the text entitled sems kyi ngang thag mthud and the text entitled ngang thag. Given the difficulty of finding even a single legitimate instance of a text by either name, were it not for the mention of these variants in the discussion of the nine mirrors in ’A zha Blo gros rgyal mtshan’s commentary, we might be forever wondering whether these two titles reference the same text.

1.4 Description and Enumeration of the Titles of Minor Texts on Mind by Shardza Tashi Gyaltsen

Shardza Tashi Gyaltsen’s two Volumes of The Precious Treasury of Space and Awareness contain his masterwork on the theory and practice of Dzogchen. Shardza puts himself to the task of enumerating the sems sde literature in the first volume of the Precious Treasury of Space and Awareness where he writes:

The nature of the sections of the tantras to be explained ... has three parts: the Smaller [Texts on] Mind (sems phran), the Cycles of Propagation, and the Cycles of Scriptural Tradition.

Enumerating the first of these three Shardza Tashi Gyaltsen continues:

---

19 Dates if from the biography of Blo gros rgyal mtshan by Jean-Luc Achard at the website http://www.treasuryoflives.org/biographies/view/Azha-Lodro-Gyeltsen/13092.
21 dbYings rig mdzad, vol. 1, p. 46ff: bshad bya rgyud sde/’i rang bzhin/ go rim so so’i nges pa’i dang po la gsum stel/ sens phran gyi skor dang / bsgrags pa’i skor dang / bka’ bgyud kyi skor ro/ dang po la gsum stel/ grangs nges/ dgos ched/ go rim mo/.
As for the first, the root is the Nine Cycles of the Hidden (gab pa dgu skor) and the branches are the Nine Minor [Texts] on Mind (sems smad dgu) or the nine mirrors of minor tantras (rgyud phran me long dgu).22

Shardza Tashi Gyaltsen then goes on to quote the gSang ba bsen thub to give his full enumeration of the Nine Mirrors. As we have just quoted the gSang ba bsen thub directly in the previous section we will not reiterate Shardza Tashi Gyaltsen’s version here but only add Shardza Tashi Gyaltsen’s quotation of the titles to our growing list of variants of titles of the Minor Texts on Mind in Appendix B: Part 1. We will treat Shardza Tashi Gyaltsen’s discussion of The Nine Cycles of the Hidden and The Nine Small Texts on Mind in detail later in Section 3.3, but for now we only wish to note a few pieces of additional information that will be useful in identifying the texts. First, Shardza Tashi Gyaltsen gives us the number of chapters of several of these texts. The Nine Cycles of the Hidden is noted as having thirty-seven chapters, and this information is added to Shardza Tashi Gyaltsen’s titles of the texts in Appendix B: Part 1. Second Shardza Tashi Gyaltsen gives us a sensible enumeration of the texts. He identifies the Nine Cycles of the Hidden as the root text and then goes on to enumerate nine minor texts as synonymous with the Nine Mirrors; however, we can see that sGa ston’s list of the Nine Minor Texts on Mind in Section 1.1 doesn’t fully reconcile with the Nine Mirrors of the gSang ba bsen thub in Section 1.2. Shardza Tashi Gyaltsen warns us that the Continuity of Bodhicitta (Byang chub sens kyi nyag thag), which the bKod pa’i rgyan enabled us to associate with The Continuity of State (Ngang thag),23 was already lost in his time. Finally, although he includes the mention of The Single and Combined Thigle (Thig le rkyang sbag) in his quote from the gSang ba bsen thub, he never mentions this text again in the entire two volumes of his Precious Treasury of Space and Awareness.

1.5 Mind Section Titles from the Lineage of Transmission, the brGyud rim

Another helpful text is a description of lineage transmission by Shardza Tashi Gyaltsen’s disciple and biographer, dBra ston Ngag dbang sKal bzang bstan pa’i rgyal mtshan, referred to as the “brgyud rim” in A Catalog of the Bon Kanjur.24 We quote this text indirectly from A Catalog of the Bon Kanjur. (We have added line-breaks to facilitate grouping the texts.)

bla ma gshen chen klu dgas dngos grub tu rnyed pa’i byang sens gab pa dgu skor la / byang sens gab pa’i gzhung lung gi yi ge dgu pa / yan lag bcu pa’i le tshan / zur rde? (?) [sic] yan lag Inga pa / mde’u thung yan lag bzhis pa’am sum cu rtsa bdlun pa /

22 Ibid., p. 46ff: dang po la rtsa ba gab pa dgu bskor dang / yan lag sens smad sde dgu ’am rgyud phran me long dgu yol del/.
23 See the discussion of Section 1.3.
24 The full title of the text is: sKu gsum ston pa’i gsung rab bka’ ‘gyur rin po che’i lung rgyun ji snyed pa phyogs gcig tu bs dus pa’i bzhugs byang brgyud rim bcas pa dri med shel gyi phreng ba.
With the list of Mind Section texts in the quotation above, we now feel ready to make some adjudication of the titles of the principal works of the Mind Section of Bon, and in particular on what works constitute the Minor Texts on Mind.

1.6 Initial Conclusion: A List of the Principle Early Works on the Mind Section in Bon

We are thankful for Shardza Tashi Gyaltser’s identification (see Section 1.4) of the root text of The Nine Cycles of the Hidden as having thirty-seven chapters. This indicates that the particular root text is The Nine Cycles of the Hidden Bodhicitta (Byang sems gab pa’i dgu skor) in thirty-seven chapters. This will be more fully explained in Section 2.1.

As for what constitutes the Minor Texts on Mind, the situation is not quite as straightforward. The results of our inventory of titles associated with the Minor Texts on Mind are assembled in Part I of Appendix B. The obvious similarity of titles from among the variants we have gathered has naturally built our confidence. In addition, Blo gros rgyal mtshan’s commentary to the gSang ba bsen thub, the bKod pa’i rgyan, has helped us to gain confidence to find equivalents among the various titles for The Lesser Golden Weighty Scripture (gSer gyi lung non chung) and The The Continuity of State (Ngang thag). In the end we identify the following nine texts as the Nine Mirrors:

1. The Single and Combined Thigle (Thig le rkyang sbag)
2. The Greater Golden Weighty Scripture (gSer gyi lung non che)
3. The Lesser Golden Weighty Scripture (gSer gyi lung non chung)
4. The Cuckoo of Awareness (Rig pa’i khu byug)
5. Resting Freely (Cog bzhag)
6. The Continuity of Awareness (Rig pa’i rgyun thag)
7. The Continuity of Transmission (Lung thag)
8. The Continuity of State (Ngang thag)
9. Resting Loosely (Lhug par bzhag).

25 A Catalog of the Bon Kanjur, p. 438. This corresponds to pp. 342–343 of the brGyud rim. Regrettably, in Mongyal Lhasé’s Edition of the Kangyur this volume has no number and as a result it was not properly cataloged in the Handlist.
We may now finally give full meaning to Karmay’s famous footnote in *The Treasury of Good Sayings.* Following Tshul khrims rgyal mtshan’s enumeration in *A Commentary on the Complete Discernment of the Secret Principles* if we subtract the work *The Single and Combined Thigle* and remove, as Karmay did, *The Cuckoo of Awareness* from the list above, then we do indeed get *Seven Smaller Texts on Mind (Sems phran sde bdun).*

Alternatively, we can identify a different list of the *Seven Smaller Texts on Mind (Sems phran sde bdun)* by simply following third paragraph of the *brGyud rim* as quoted above. Among the list of minor texts we should not forget *View and Meditation in One Page* or that some also include *The Nine Cycles of the Hidden* as a minor text on mind. Adding these to the list of nine titles above gives us eleven different titles. As a result we will use Minor Texts on Mind to generally refer to any subset of this complete list of eleven titles. We now turn to locate the texts associated with these titles.

### 2.0 Identifying Editions of Texts Associated with these Titles

We now locate the texts associated with the titles identified in Section 1 as distilled into Appendix B, Part 1. We will review published editions of the Bon *Kangyur, Tengyur,* as well as other independent publications.

#### 2.1 The Nine Cycles of the Hidden in the Bon Kangyur and Tengyur

A volume entitled *The Nine Cycles of the Hidden Sprout, Bodhicitta (Byang chub sems kyi myu gu gab pa dgu skor)* is described as number 74 (running number 99) in *A Catalog of the Bon Kanjur.* Six independent texts are identified in this volume and the best candidate for the root text we are seeking is entitled *The Nine Cycles of the Hidden Bodhicitta (Byang sems gab pa dgu skor).* The associated running entry for this text, numbered 99.2, carefully identifies a list of eighteen “chapter titles”, but is unable to relate them to the nine chapters that they anticipate from the Kangyur catalogs (*dkar chags*) at the

---

26 *The Treasury of Good Sayings,* p. 51, n.8: “They [(the sems smad sde dgu)] are the byang sems gab pa dgu skor ... then the khu-byug, and lastly the seven small texts called sems-phran sde-bdun making nine in all.”

27 *gSang don rnam byed ’grel,* p. 38 (*Tengyur* 227-1 as cataloged in *A Catalogue of the New Collection of Bonpo Katen Texts*). This text also has meaningful descriptions of the names of the texts of the Nine Mirrors. Unfortunately we discovered this text too late to fully integrate its contents in this paper; however, we will use it later to identify *The Single and Combined Thigle.*

28 For those most familiar with the *Kangyur and Tengyur* of the New Translation Schools, the notion of looking for the title of a text in both the *Kangyur and Tengyur* may be puzzling. The Introduction in *A Catalog of the Bon Kanjur* and the Introduction in *A Catalogue of the New Collection of Bonpo Katen Texts* provide good context for what constitute the canonical collections of the Bonpo Kangyur and Tengyur respectively. Probably the most pertinent information is that the collection of texts cataloged in *A Catalogue of the New Collection of Bonpo Katen Texts* and in the *Handlist* has a number of duplicates with elements of the Bon Kangyur.
catalogers’ disposal. It is also hard to reconcile the eighteen chapter titles listed for this work in a Catalog of the Bon Kanjur to dBra ston’s enumeration of titles associated with the Nine Cycles of the Hidden that we reproduced in Section 1.5.

A volume of the Mongyal Lhasê’s Edition of the Bon Kangyur entitled The Nine Cycles of the Hidden: the Sprout of Bodhicitta (byang chub sems kyi myu gu gab pa dgu skor) is identified as Volume 172 in the Handlist. An investigation of the natural “chapter headings” of this volume doesn’t clearly indicate any text with nine chapters either.

While absent from Volume 172 of Mongyal Lhasê’s Edition of the Bon Kangyur, the Bon Tengyur as described in A Catalogue of the New Collection of Bonpo Katen Texts contains a text entitled Outline of the Nine Cycles of the Hidden Bodhicitta: (Byang chub gyi sems gab pa dbu skor gyi dgu’i sa gcod kyi le’u). This short text describes the contents of the Nine Cycles of the Hidden as thirty-seven branches (yan lag) distributed over four sections:

1) byang chub sems kyi myu gu gab pa dgu skor (18 branches)
2) yan lag bcu ba (10 branches)
3) zur rdeg yan lag lnga pa (5 branches)
4) gab pa mde’u thung gi yan lag bzhi (4 branches)

These thirty-seven branches correspond well with Shardza Tashi Gyaltser’s identification of the thirty-seven “chapters” of the Nine Cycles of the Hidden mentioned in Volume 1 of the Treasury of Space and Awareness (See Section 1.4). These four divisions numbered above also correspond with the first four section titles in Volume 172 of Mongyal Lhasê’s Edition of the Bon Kangyur. We provide the entire table of contents for that volume in Appendix A. Finally, we may now see the correspondence with the titles in the first paragraph of the fragment of the dBra ston’s brGyud rim presented in Section 1.5. Thus we can say with some confidence that these four texts (or sections or chapters) constitute the root text of the Nine Cycles of the Hidden. Moreover, we can shed light on the title “zur rdeg” which apparently puzzled the catalogers of A Catalog of the Bon Kanjur. Reading the Outline of the Nine Cycles of the Hidden Bodhicitta we discover that the five branches (yan lag lnga pa) are five corners (zur) that are staked down (rdeg) by the great view (lta ba chen po), hence the title zur rdeg yan lag lnga pa.

Another edition of the Nine Cycles of the Hidden may be found in volume 216-2 as described in A Catalogue of the New Collection of Bonpo Katen Texts. This edition corresponds exactly to the text with running number 99.2 in Catalog of the Bon Kanjur, and it has the same eighteen sections (or chapter) divisions noted in that latter catalog. Unfortunately, time has not permitted a reconciliation of this set of eighteen sections with the four texts and thirty-seven branches named above. There still remains the question: If there are not nine chapters in the Nine Cycles of the Hidden, then what is “nine” about the Nine Cycles of the Hidden? We will finally resolve this question in Section 3.1.

There are a number of commentaries on the Nine Cycles of the Hidden. An extensive commentary known as The Commentary of Four Sagacious Men
Revue d’Etudes Tibétaines

176  Revue d’Etudes Tibétaines

(mKhas pa’i bzhi ‘grel ba) or as The Very Extensive Commentary on the Nine Cycles of the Hidden: Mind and Scripture is found as 216-5 in the A Catalogue of the New Collection of Bonpo Katen Texts. This commentary is the focus of a paper by Kapstein (Kapstein, 2009) and his article serves as one of the few investigations of the Bon Mind Section literature in the English language. Unfortunately, a broader consideration of the numerous commentaries and supplemental literature of the Nine Cycles of the Hidden is beyond the scope of this article.

We now turn to identify the various editions of the Minor Texts on Mind.

2.2 The Minor Texts on Mind in the Bon Kangyur and Tengyur

Although they are hidden behind a single title and entry — Tengyur 164-6 gser gyi lung non che chung — in A Catalogue of the New Collection of Bonpo Katen Texts, seven of the Minor Texts on Mind listed in Section 1.6, together with their commentaries, may be found in the Tengyur volume 164. In addition, following a brief colophon at the end of the Commentary on Resting Freely (cog bzhag gi ‘grel ba) is a text that begins with “from the scripture of generalities on meditation” (spyi sgom pa’i lung las) and ends with a title “view and meditation [in] one [page]” (lta sgom cig pa) and a statement that indicates that this text is from the terma system of sGom chen gShen chen klu dga’. Here “hiding in plain sight” is an edition of View and Meditation in One Page (see Section 1.1). This publication of the minor texts ends on page 501 with a sobering note, echoed by Shardza Tashi Gyaltse, that the Byang chub sens kyi nyag thag, which we associate with the minor text entitled Continuity of State (Ngang thag), has been lost.

While the titles of the Minor Texts on Mind listed in Section 1.6 cannot be found in the first two editions of the Kangyur as described in A Catalog of the Bon Kanjur, we will apparently find eight of them in volume 172 of Mongyal Lhasé’s Edition of the Kangyur as described in the Handlist. The six texts found in the Tengyur all have counterparts in this edition of the Bon Kangyur. The Cuckoo of Awareness may also be found here together with an outline (sa gcod), and commentary (‘grel). Most exciting is the fact that we find even the Continuity of State, an Outline, and a Commentary (Ngang thag gi gzhung ‘grel pa sa bcad) with the title just as we would expect from dBra’ ston’s brGyud rim quoted in Section 1.5, although these texts were indicated as lost by Shardza Tashi Gyaltse as well as by the compilers of the Tengyur.

Unfortunately, the edition of the Continuity of State found in the Mongyal Lhasé’s Edition of the Kangyur does not bear up to careful scrutiny. An independent title page is given for the outline of the text, Sens kyi ngang thag ‘thud,’ however, the brief colophon at the end of the text gives the name of the text as the Rig pa sens kyi rgyun thag gi sa gcod. This is not among the variants of the title of the Continuity of State (Ngang thag) that we have found. The core text is entitled the Ngang thag gzhung, but the colophon gives the

30 Tengyur 164, pages 439 -444. Thanks go to to Jean-Luc Achard for alerting us to this text.

Early Mind Section Literature in Bon

A book entitled *The Cycle of Nine Minor Texts on Mind: Scriptures of the Highest Tradition of Dzogchen* (Bla med rdzogs pa chen po'i bka’ sens smad sde dgu’i skor bzhus so)\(^{35}\) has been published by the library of the Bon monastery Triten Norbutse. The introduction of the work expresses the humble goal of producing a convenient and easy to use (spyod bde) book, relative to the hard to obtain and bulky volumes of the canonical works. To identify their list of the minor texts on mind the compilers use the “Nine Mirrors” as described in ‘A zha Blo gros rgyal mtshan’s commentary on the gSang ba bsen thub much as we used them in Section 1.3, but no mention is made of sGa ston’s list of Minor Works on Mind (Section 1.1). No specific editions of the minor texts on mind that are used to produce the book are mentioned. The compilers apparently discovered, as we did, that the versions of root text (gzhung) and commentary (’grel ba) of the Continuity of State (Ngang thag)\(^{36}\) in Mongyal Lhasé’s Edition of the Kangyur are in fact none other than The Continuity of Transmission (Lung gi rgyun thag), and as a result they did not reprint those texts. This book does contain an edition of *View and Meditation in One Page*\(^{37}\), but it is included, without so much as a linespace, with the colophon for Resting Freely and before the outline of Continuity of Awareness. The text here in these pages differs from the Tengyur edition discussed in Section 2.3, so it seems that they were likely working from another edition than that compiled in the Tengyur.

**2.5 Identifying the Missing ngang thag**

In the introduction to *The Cycle of Nine Minor Texts on Mind: Scriptures of the Highest Tradition of Dzogchen* (Sems smad dgu, 2005) the compilers indicate

---

33 Ibid., p. 533.
34 Ibid., p. 533.
35 Sems smad sde dgu, 2005.
36 Although they quote the Kangyur title as ngang thag le’u.
that they do set themselves to the task of finding a version of the Ngang thag, and they look to gSas mkhar rin po che spyi spungs sgron ma gsal ba'i tantra where they find the text entitled Ngang thag bskal pa'i sgron ma. They leave the reader to ascertain whether this is or is not the missing Continuity of State (Ngang thag).

We could not find the title “sgron ma gsal ba'i tantra” using any of the catalogs at our disposal, but at the suggestion of Jean-Luc Achard we looked to an Indian reprint of the Drwa ba nag po'i rgyud skor. The initial text of that bound volume is indeed entitled gSas 'khar rin po che spyi spung sgron ma gsal ba'i tan tra las ngang thag bskal pa'i sgron ma ston. We find in the colophon of this first work the title bskal pa'i me long sms kyi ngang thag mthud and in the following pages we find a commentary entitled sms ngang thag don 'grel. This edition, together with its archaic spellings, seems to be the edition reprinted in The Cycle of Nine Minor Texts on Mind: Scriptures of the Highest Tradition of Dzogchen.

Is this work, together with its commentary, the missing Continuity of State (ngang thag) indicated as lost by the compilers of the Bon Tengyur as well as Shardza Tashi Gyaltset? The self-reference of this work as the mirror of the phases (bskal pa'i me long), echoing the gSang ba bsen thub and its commentary, is encouraging. For further evidence we note that, aside from its mention during the enumeration of the Nine Mirrors, the Continuity of State (Ngang thag) is mentioned in ‘A zha Blo gros rgyal mtshan’s bKod pa'i rgyan two times. First there is a direct quote from the Continuity of State (Ngang thag):

bKod pa'i rgyan: Second, as for conduct of wisdom: “Being free from cause to act and object of action, conduct is totally unceasing.” As this is stated in the Ngang thag [it has] three [parts].

This quote is found exactly in the text, Sms kyi ngang thag mthud, from the drwa ba nag po (the identical passage is underlined):

Ngang thag: “The lion as an exemplar of power: Being free from cause to act and object of action, conduct is totally unceasing. As that conduct is without attachment, it is pure conduct. It is the principle of skillful action that transcends everything.”

Later ‘A zha Blo gros rgyal mtshan’s bKod pa'i rgyan states:

---

38 Jean-Luc Achard: personal communication.
39 Sangs rgyas bstan 'dzin, 1974.
40 Sms smad dgu, 2005.
41 bKod pa'i rgyan, etext, p. 219: gnyis pa shes rab kyi spyod pa la bya rgyu bya yul med pa la spyod pa gar yang ma 'gag te zhes ngang thag las 'gung pas na 'gsum stel/.
42 Drwa wa nag po (Sangs rgyas bstan 'dzin, 1974), p. 3: seng ge stobs kyi dpe mtshan cing / bya rgyu bya yul myed pa la/ spyod pa gar yang ma 'gags stel/ spyod la ma chaqs rnam dag spyod/ bya rtsal kun las 'das pa'i don/.
Through skillful training in the bardos of the four phases43 (bskal pa bzhi) [and] through the [teachings of the] Ngang thag the interfaces of the past and future lives are stitched together.

Indeed, in our text under consideration, the Sens kyi ngang thag mthud, training regarding the bardos of the four phases is a significant topic. In the absence of further quotations or other evidence it is difficult to make a final judgment regarding this candidate for the Continuity of State (Ngang thag), but everything we have learned about this text supports its identification as an edition of the Continuity of State (Ngang thag) of the Nine Mirrors (See Section 1.2).

2.7 Editions of the Nine Cycles of the Hidden and Minor Texts on Mind, a Summary

A summary of our efforts in identifying editions of the Nine Cycles of the Hidden and Minor Texts on Mind, together with a table of contents for most of the texts, is given in Part 2 of Appendix B. Briefly, for the Nine Cycles of the Hidden we have editions in both Mongyal Lhasé’s Edition of the Kangyur (volume 172) and the Bon Tengyur (volume 216-2). For six of the Minor Texts on Mind – The Greater Golden Weighty Scripture, The Lesser Golden Weighty Scripture, Resting Freely, The Continuity of Awareness, The Continuity of Transmission, and Resting Loosely – we have editions in the Mongyal Lhasé’s Edition of the Kangyur (volume 172), and in the Bon Tengyur (volume 164). In Mongyal Lhasé’s Edition of the Kangyur (volume 172), we have an edition of the Cuckoo of Awareness and an additional edition of the Continuity of Transmission incorrectly labeled as the Continuity of State. In the Bon Tengyur (volume 164) we have an edition of gShen chen Klu dga’s View and Meditation in One Page. All of these texts have been reprinted in an edition that was recently published at Triten Norbutse Monastery (Sems smad sde dgu, 2005), although View and Meditation in One Page is quite hard to find there. We had to look beyond the Kangyur and Tengyur for sources for an edition of the Continuity of State; however, we did find a promising candidate for this text in a book entitled gSas ‘khar rin po che spui spung sgron ma gsal ba’i tan tra las ngang thag bskal pa’i sgron ma ston (Sangs rgyas bstan ’dzin, 1974), and a modern edition as well (Sems smad sde dgu, 2005). Identifying an edition of the Single and Combined Thigle (thig le rkyan sbag) has not been straightforward and we will revisit this topic again in Section 3.5 and Appendix C.

Briefly reviewing the sizes of the root texts of this literature may also be useful. The Nine Cycles of the Hidden is approximately 94 manuscript pages (See Appendix A.) The Greater Weighty Scripture is comparably sized. The

43 As mentioned before, the gsang ba bsen thub and the bkod pa’i rgyan use bskal pa in an archaic way to mean “bar chod” or interruption or phase. Compare with bskal ba in Bod yig brda rnying tshig mdzod, p. 39.

44 bkod pa’i rgyan, etext, p. 219: bskal pa bzhi’i bar do la rtsal sbyong bas ngang thag gis tshe snga phyi mtshams mthud pa.
Continuity of State is 30 manuscript pages. The remaining root texts are all relatively small – under 20 pages of manuscript each.

Having established our universe of discourse, we now turn to say something about the subject matter of these texts.

3. The Nine Cycles of the Hidden Bodhicitta and the Minor Texts on Mind as a System

In this section we now consider the content of the early literature of Bon Mind Section, beginning with the Nine Cycles of the Hidden Bodhicitta.

3.1 The Nine Cycles of the Hidden Bodhicitta

Because of its size, influence, and diversity of commentaries, the Nine Hidden (Gab pa dgu) must be considered the principal work on the Mind Section among gShen chen Klu dga’s treasures. There still remains the question: If there are not nine chapters in the Nine Cycles of the Hidden, then what is “nine” about the Nine Cycles of the Hidden? Fortunately, our question has been anticipated by the authors of the Outline of the Nine Cycles of the Hidden (Tengyur 216-1) mentioned in Section 2.1. This short text gives a folk-etymology of the title of The Nine Cycles of the Hidden Bodhicitta:

It is known as the Nine Cycles of the Hidden Bodhicitta. Why is that?
In the ultimate sense, it is pure (byang) because the nature of the mind is primordially unborn;
It is perfect (chub) because it does not die;
It is a mind (sems) because it contemplates the non-dual principle.
It is hidden (gab pa) because it is difficult to realize and rare to understand.
It has nine cycles (dgu skor) because this pure and perfect mind (byang chub sems) is shown to be enveloped (skor) by nine principles from its beginning to its end.
This is the way to apply its name.45

Among the literature associated with The Nine Cycles of the Hidden is a text known by the name The Nine Letters of Scripture. In the extensive commentary on the Nine Hidden (Tengyur 216-5) this name is also explained:

As for the Nine Letters of Scripture: The scripture of the yung drung mind is taught by nine principles from its beginning to its end.46

---

45 Tengyur 216-1, p. 6: byang chub kyi sems gab pa dgu bskor zhes bya ste/ de c'i phyir zhe na/ don dam par sems kyi rang bzhin ye nas ma skyes pas ni byang / mi 'chi bas ni chub/ gnyis su med pa'i don la sems pas sems so/ / rtops par dka' zhing rig par dkon pas gab pa/ mgo mjug tu don dgu dgyus bskor nas byang chub kyi sems ston pas na dgu bskor ro/ / de ni mtshan gyi gdags lugs so/ /

46 Tengyur 216-5, p. 201 (pdf page 333): / lung gi yi ye dgu dang idan pa ni/ g.yung drung sems kyi lung dgu skor mgo mjug tu don dgu dgu'i ston pa 'di'o/ /
These descriptions of the *Nine Cycles of the Hidden Bodhicitta* indicate that the primary focus of the *Nine Cycles of the Hidden* is the demonstration of *bodhicitta* or, by another name, g.yung drung mind. The term *bodhicitta* is used in its manner, characteristic of Mind Section literature, as synonymous with the nature of mind (*sems nyid*). Throughout the *Nine Cycles of the Hidden* we will find numerous synonyms expressing different facets of *bodhicitta*. This point is also discussed in Kapstein’s article on *The Nine Cycles of the Hidden*.\(^{47}\) In fact, for reasons that will become clearer in Section 3.2 below, a significant portion of the root text of the *Nine Cycles of the Hidden* is devoted to contrasting different synonyms of *bodhicitta* with facets of ordinary conceptual mind.

So what are the above-mentioned nine principles by which *bodhicitta* is taught? Given the diversity of systems of enumeration of principles, paths, *thigle*, branches, sections, systems and so forth as given in the *Nine Cycles of the Hidden* and its commentaries, it is hard to be absolutely certain; however, we were able to determine only one passage which enumerates exactly nine principles (*don*) in the *Extensive Commentary on the Nine Cycles of the Hidden*. Quoting from that commentary:

> Again, with regard to that, the condensed meaning is taught by nine principles:
> It is taught as space [that is like an] unmoving ocean.
> It is taught as primordial wisdom [that is like] an immutable fish.
> It is taught as a condition that is free of movement or delusion.
> It is taught as a dormancy that equalizes two extremes.
> It is taught as a conclusion that is latent.
> It is taught as an example that epitomizes the single *thigle*.
> It is taught as a [pair of] metaphor and meaning regarding the non-duality of space and primordial wisdom.
> It is taught as obtaining the result of the non-dual.
> Ninthly, it is taught as the *bodhicitta* of the primordial itself.\(^{48}\)

We now wish to examine the teachings of the *Nine Cycles of the Hidden* in a broader context of practice.

### 3.2 ‘A zha Blo gros rgyal mtshan on the Nine Cycles of the Hidden and the Minor Texts on Mind as a System

One of the most interesting questions we wish to understand is the relationship between the practice of these Mind Section works and the

---

\(^{48}\) Sems lung gab pa dgu skor gyi 'grel ba rgya cher bshad pa in (Byang sans gab pa dgu skor, etext), p. 367: de la yang bs dus pa'i don dgu yis bstan te/ g.yo ba med pa'i rgya mtho dbyings su bstan pa dang / 'gyur ba med pa'i nya ye shes su bstan pa dang / g.yo zhiing 'khrul ba med pa'i rkyen bstan pa dang / mtha' gnyis mnyam pa'i bag la nyal ba bstan pa dang / bag la nyal pa'i mjug saud bstan pa dang / thig le geig la 'dus pa'i dpe bstan pa dang / dbyings dang ye shes gnyis su med pa'i dpe don bstan pa dang / gnyis med kyi 'bras bu thob par bstan pa dang / ye nyid kyi byang chub sans bstan pa dang dgu'ol.
tantric practices that apparently served as their foundation. In his commentary on the *gSang ba bsen thub* ‘A zha Blo gros rgyal mtsan presents the Nine Mirrors (see Section 1.2) as working integrally with generation and completion stage practices.

What is the cycle of the nine thigle? As for the manner in which what is without distinctions (*mtshan ma med*) is discovered through [practices that use] distinctions (*mtshan ma*): It is through each of the nine cycles of principles (*don*) of three channels (*rtsa*), the three winds (*rlung*), and the three thigle (*thig le*) together with the nine cycles of the principles (*don*) of the Nine Mirrors …

The three channels are surely the left, right and central (*dbu ma*) channels. In other words, they are the three principle channels of the subtle body. A broader reading of this commentary indicates that the three winds in this context refers to the three intensities of force used in practicing with the winds: gentle (*'jam rlung*), neutral (*ma ning*), or rough (*rtsub rlung*). The three thigle are associated with the wheels (*'khor lo*) of the subtle body: the white (associated with the crown wheel), the red (associated with the navel wheel) and the blue (associated with the heart wheel). In brief, to realize “that which is without distinction” the completion stage practices of channels, winds, and thigle are performed in conjunction with the Nine Mirrors that he also seems to consider equivalent to Nine Minor [Texts on] Mind (*sems smad dgu*).

‘A zha Blo gros rgyal mtsan further nuances the uses of the Nine Mirrors a few pages later in his commentary, the *bKod pa’i rgyan*:

As for the method of practicing the principle (*don*) of bliss (*bde ba*): It is the union of father and mother, bliss and emptiness. As for the method: it is the Magical Display (*sgyu ‘phrul*); through the generation stage of the peaceful and wrathful [deities] and the completion stage of the thigles one [obtains] the primordial Buddhahood that is the self-liberated effortless essence of bodhicitta. The branches are the mirrors:

• the supreme one which clarifies the mind is the mirror of the enlightened body, namely (*ste*) The Single and Combined Thigle (*Thig le rkyang sbyag*) which reveals the immutable principle of the the nature of mind (*sems nyid*); it occurs [similarly] in the *sGron ma* or in the present [text];

---

49 *bKod pa’i rgyan*, 2004, p. 482: *gang yin na thig le dgu skor te mtshan mas mtshan med btsal ba ni rtsa gsum rlung gsum thig le gsum dang rnams me lo nga dgu dang bcas pa rnams don dgu dgu yis ...[bskor nas snod med la gsang zhing snod ldan la ston pas gsang ba de lam gzhan las ‘phags pas mchog dang f]..."

50 *bKod pa’i rgyan*, 2004, p. 104: *cha lag me long dgu bskor ni sems smad dgu ste/ thabs kyi me long thig le rkyang sbrag spong dol ..."

51 Presumably this is the set of practices given in the Chapter 9: the Magical Display—Secret Conduct (*sgyu ‘phrul gsang spong kyi le’u*) from the root tantra of the *gSang ba bsen thub*. This chapter occupies pp. 29–33 of *gSang ba bsen thub*, 2004.
• the apprehension (’dzin) of the [nature of] mind is the Greater Weighty Scripture (Lung non che ba) and the abiding in the recognized (zin) mind is the Lesser Weighty Scripture (Lung non chung ba);
• the mirror of speech, which generates inspiration and faith is the Cuckoo (Khu byug);
• the mirror of the mind, is the Resting Freely (Cog bzhag);
• the one which clarifies the principles of equality is the Continuity of Awareness (Rig pa rgyun thag);
• the one which prolongs clarity, without meditation and without distraction, is the Continuity of Transmission (Lung rgyun thag);
• the one through which one trains skillfully during the bardo of the four phases (bskal pa) is the Continuity of State (Ngang thag) and through that [training] the demarcation between past and future births is joined (mthud);
• the ultimate meaning of those [past and future births] and their resolution (la zlo bas) is Resting Loosely (lhug par zhog) directly pointing [to appearances as lacking substantial reality].

Through these, the Nine Thigles are revealed as the root-teachings of the volume (mchong).

In these two quotes ‘A zha Blo gros rgyal mtshan describes a system of practice in which the practices of these Mind Section texts are highly integrated into a system of practice grounded in the tantric practices of the

---

52 Jean-Luc Achard suggests an alternative translation of the portions associated with the last two mirrors:
• the one through which one trains skillfully during the Bardo of the four Ages, is the Ngang thag;
• the demarcation between past and future births, as well as their ultimate meaning and their transcendence is directly pointed as being “the Lhug-pa.”

We translated as we did because of the manner in which the more extensive titles of the texts associated with the Nine Mirrors (See Appendix B: Part I) are cleverly woven into the text. Thus we associate the phrase “ishe snga phyi mtshams mthud pa” with The Continuity of State and we complete “mdzub tshugs lhug par zhog” with “[sngang la dngos med] mdzub tshug lhug par bzhag.”

53 bKod pa’i rgyan, 2004, pp. 484–485: bde ba’i don nyams su len pa’i tshul ni bde stong yab yun gnis med snyoms par ’jug stel tshul ni sgyu ’phrul te zhi khor’i bskyed rim dang thig le’i rdzogs rim kyi byang chub sms kyi ngo bo ’bad med rang grol du ye sangs rgyas pa’o/ [de’i yan lag ni me long ste sms nyid gsal bar byed pa’i mchog la sgu yi me long ste sms nyid mi ’gyur ba’i don ston pa thig le rkyang sba’g ste sgron mar ’byung ba’am ’di nyid do / sms ’dzin pa lung non che ba dang sms bzang gna’i byed pa lung non chung ba dang / spro’ zhi’g dang ba bskyed pa la gsum gi me long khu byang dang / thugs kyi me long cog bzhag gis mnyam pa’i don gsal bar byed pas rig pa rgyun thag dang / gsal ba la bsgom med yengs med du goms par byed pas lung rgyun thag dang / bsikal pa bzhi’i bar do la rtsal sbyong bas ngang thag gis tsho snga phyi mtshams mthud pa dang de’i don nitar thug cing la zilo bas mdzub tshugs lhug par zhog ces bya’o/ [des thig le dgu pa dgongs pa’i mchong gi risa sdom du bstan pa’o/].
generation and completion stages. We will learn more of the practical application of this immediately below.

### 3.3 The Nine Cycles of the Hidden in Contemporary Geshe Training at sMan ri Monastery

Geshe Chaphur Lhundrup, a recent graduate of the Geshe degree program at sMan ri Monastery in Dolanji, India, was kind enough to share his experiences with training in the *Nine Cycles of the Hidden* during his Geshe program. Questioned about the role of the *Nine Cycles of the Hidden* in his training, the Geshe brought out a text entitled *gsang don rum byed phrul gyi lde mig.*\(^5^4\) This text by mNyam med Shes rab rgyal mshan is one of a number of texts memorized in the Geshe training. This particular text serves as the outline of the key topics of the Secret Principles (*gsang don*). The first few pages of this text describe the root practice of the assembled deities (*spyi spungs*) and its branches. The root is based on the *gsang ba bsen thub.* In this text are enumerated three branches: the Six Principles (*don drug*), the [Nine] Mirrors, and the two points. Among the Six Principles our text, *The Nine Cycles of the Hidden,* is associated with the principle of meditation. The [nine] mirrors are then auxiliaries (*cha lag*). The particular texts associated with the Nine Mirrors follow the *gsang ba bsen thub* as quoted in Section 1.2 with the minor exception that the title of the mirror of method is given as simply *Single and Combined (rKyang sbrag)* rather than *The Single and Combined Thigle (Thig le rkyang sbar)*, as we saw it earlier in this paper.

In practice, our Geshe indicates that the emphasis is on the tantric practices of the *gsang ba bsen thub* and these practices are augmented by meditation on the *Nine Cycles of the Hidden.* As the Nine Mirrors were merely auxiliaries, they received relatively little attention. In brief, it appears that the contemporary system of training at sMan ri monastery follows the general framework of practice described in the *gsang ba bsen thub* and its commentary the *bKod pa’i rgyan.*

### 3.4 Shardza Tashi Gyaltser on the Nine Cycles of the Hidden and the Minor Texts on Mind as an Integral System

The final source we will use to understand how *The Nine Cycles of the Hidden* and the *Minor Texts on Mind* function in an integral system of practice is the works of Shardza Tashi Gyaltser. In volume 1 of *The Precious Treasury of Space and Awareness* Shardza discusses these texts, their enumeration, value (*dgos ched*), and sequence of practice (*go rim*). His comments on the sequence of practice are translated and discussed below:

Third, as for the sequence of practice: Through the *Cuckoo* [of Awareness] inspiration is generated. Through the *Greater Weighty Scripture* the [nature of] mind is recognized. Through the *Lesser

\(^{5^4}\) ‘Phrul gyi lde mig, sMan ri.'
[Weighty Scripture] that very recognition is made firm. These are the three branches of the preliminaries.

Through the root, The Nine Cycles of the Hidden, the principle (don) of the distinction between mind and primordial wisdom (ye shes) [is understood]. Through Resting Freely confidence in the immutable is generated. Through the two Continuities [of Awareness and Transmission] one cultivates familiarity [with the nature of mind], and through these one [engages in] the three branches of the real basic [practice]. Through the quintessential instruction on [Resting] Freely one cultivates habituation [with the nature of mind] without engaging in effort, and through that one becomes allied with the three branches of the basic (gzhi) [practice].

A review of the contents of the Minor Texts on Mind enables us to slightly elaborate Shardza Tashi Gyaltsen’s descriptions: First, enthusiasm for practice is cultivated in the student through methods such as the twenty-one examples of generating hope and inspiration in the Cuckoo of Awareness. The student is then guided through a series of nine analytical meditations in the Greater Weighty Scripture aimed at enabling the student to analytically investigate, and eventually to recognize, the nature of his mind. This recognition of the nature of mind is stabilized by the Lesser Weighty Scripture.

Having recognized the nature of mind the student must gain facility in discriminating between everyday conceptual thought and primordial wisdom. To demonstrate the particular ability of the Nine Cycles of the Hidden to make distinctions between conceptual thought and primordial wisdom Shardza Tashi Gyaltsen quotes that text as follows:

Through the miraculous key of primordial wisdom (ye shes)
The bright green (sngon po) weed of delusion (gti mug) is separated [out] (dbye).  

In the Nine Cycles of the Hidden, this formula is repeated with dozens of various expressions of primordial wisdom paired with dozens of various expressions of conceptual thought.

The Nine Cycles of the Hidden continues to make its point through another poetic formula. One example of the formula is below:

The angry mind is like a demon (bdud).
The mind of loving kindness gives [it] a varnish (rtsi).
Nevertheless, that makes “nectar” (bdud rtsi).

---

55 dBysings rig mdzod, vol. 1, p. 48ff.: gsum pa go rim ni klu byug gis spro ba bskyped/ lung non che bas sms bsng / chung ngus zin pa de nyid bhrta par byed de sngon du ‘gro ba’i yan lag gsum/ rtsa ba gab pa dgu bskor gis sms dang ye shes phyed pa’ti don la/ cog gzhung gis ‘gyur med kyi gden bsng/ rgyun thag gnyis kyi goms pa bskyped pas dngos gzhur ‘gro ba’i yan lag gsum/ man ngag thug pas goms pas bskyped pa la rtsol ba ’jug pa med pas gzhur’i yan lag gsum gis grogs su ‘gro ba’o/.

Equalizing the non-dual loving kindness and anger, [and] 
Sprinkling it with the dew of bodhicitta, 
Likewise, that makes “sprinkled dew.”

This formula continues with substitutions of each of the five mental 
afflictions, and over twenty other types of conceptual mind including 
analytical mind (dpyod pa’i blo), deluded mind (’khrul pa’i blo), clairvoyant 
mind (mngon shes pa’i blo) and so forth.

After gaining stability in discriminating between conceptual mind and 
the nature of mind, the student proceeds with the instruction of Resting 
Freely. In marked contrast to the directed investigations of the Greater 
Weighty Scriptures, Resting Freely guides the student on the manner of resting 
in that state using a series of terse quintessential instructions on topics such 
as gazes (blta stangs) and principles of the understanding (shes don). The 
emphasis throughout is on non-effort and resting, rather than willful effort. 
Through the instructions of the Continuities of Awareness and The Continuity of 
Transmission the student sustains familiarity with the nature of mind. Finally, in Resting Loosely, a teaching is given that is free from explanation 
(shad du myed par bstan pa) and the principle of non-meditation is 
demonstrated (sgom du med pa’i don stan pa).

### 3.5 Identifying the Thig le rkyang sbag

In the same bound volume in which we found The Continuity of State (Ngang thag) we find a text with the title Thig le dbyings (‘chad) bsdus pa. In the same 
handwriting, in the pages that immediately follow appears a commentary 
entitled Thig le dbyings kyi ti ga. In Appendix C we argue that this two are 
our best candidates for the The Single and Combined Thigle (Thig le rkyang bag) 
and its commentary. Our most important argument in Appendix C is based 
on a brief discussion of the Nine Mirrors in the Commentary on Complete 
Discernment of the Secret Principles (gSangs don rnam ’byed ‘grel, Tengyur 227-1)

57 Gab pa dgu skor, e-text, p. 6ff.: /zhe sdang blo ni bdud ‘dra la/ /byams pa’i sens ni rtsi 
‘dra glong //bdud rtsi zhes kyang de la byal /byams sding gnys med mnyam pa 
lal/byang chub sens kyi zil par thigs/ /zil thigs zhes kyang de la byal/.

58 This approach would be completely incomprehensible to the author had he not 
been exposed to a somewhat similar formula by the Karma Kagyu Mahāmudrā 
and Dzogchen master Khenpo Tulstrim Gyamtsa (mKhan po Tshul khrims rgya 
mtsho). The Khenpo would have his students recite a formula that went, for 
example: “Anger is perfectly pure and therefore feelings are perfectly pure. 
Feelings are perfectly pure and therefore anger is perfectly pure. Thus anger, 
perfectly pure, and feelings, perfectly pure, are not dual, cannot be made dual, 
are not separate and are not different” (zhe sdang rnam par dag pa/ tshor ba rnam 
par dag pa/ tshor ba rnam par dag pa/ tshor ba rnam par dag pa sde’i de lta na zhe 
sdang rnam par dag pa dang/ tshor ba rnam par dag pa ‘di la gnys su med de gnys su 
byar med so so ma yin la mi dad do/). There were 110 different states of mind and 
states of realization that could be substituted in the formula and the resulting 
formulas would be repeated by some students for thousands of recitations. In 
this apparently childish exercise there was a surprisingly profound and lasting 
effect.

59 Sangs rgyas bstan ‘dzin, 1974, pp. 78 –95.
Early Mind Section Literature in Bon by Tshul khrims rgyal mtshan. In this the [Thig le] dbyings ‘chad appears to be given as a variant title of the [Thig le] rkyang sbag. Moreover, the essential teaching of The Single and Combined Thigle (Thig le rkyang sbag) is described as the process of spreading out from the Single Thigle (Thig le nyag gcig) (corresponding to rkyang) to forty-five thigle that are associated with the peaceful deities of the mandala, and then gathering this all back (corresponding to sbag or sbrag) into the Single Thigle. As this process of emanation and gathering of the forty-five deities is common to many practices associated with the Mandala of Peaceful and Wrathful deities in Bon, we may never be able to conclusively prove that we have identified the exact text of The Single and Combined Thigle; however, we do believe that this is a viable candidate for that text. Equally important for us, with Tshul khrims rgyal mtshan’s brief description of the practice of The Single and Combined Thigle, our Faustian anxiety regarding the existence of a lost text with unknown secret teachings has been mollified.

4. Summary and Conclusions

The objectives of this paper have been to clearly identify the titles of these texts that would, over time, constitute the early literature of the Mind Section of Bon, to identify the various editions in which they are available, and to begin to understand how they work together with other tantric elements to form a holistic system of training. Our approach has been to “assume nothing,” and that approach has served us well. Our most trusted resource for Bon literature, A Handbook for the Bon Kanjur, was hampered by missing texts in the editions that it cataloged. A Catalogue of the New Collection of Bonpo Katen Texts was found to incompletely catalog texts that it did have at its disposal — cataloging only one of The Minor Texts on Mind when the edition it was cataloging actually contained six. Even our own Handlist failed us when it was posed with the modest challenge of cataloging an unnumbered volume.

The canon itself proved less than fully reliable. While Mongyal Lhasé’s Edition of the Kangyur indicates that it contains the outline, root text, and commentary of The Continuity of State (Ngang thag), in fact it only presented variant editions of the The Continuity of Transmission (Sems lung gi rgyun thag) with the wrong titles.

Although we had some good reasons to doubt it, in the end a small book, The Cycle of Nine Minor Texts on Mind: Scriptures of the Highest Tradition of Dzogchen (Bla med rdzogs pa chen po’i bka’ sens smad sde dgu’i skor) published with the modest ambition of creating a convenient and easy to use edition, proved to be our best single source of the literature of the Minor

61 Geshe Chaphur Lhundup suggests that this is a recent scholar at g.Yung drung gling monastery in Tibet, and that Tshul khrims rgyal mtshan was one of the teachers of the contemporary Bon scholar Yongs ‘dzin bsTan ‘dzin mam dag (personal communication).
62 Tshul khrims rgyal mtshan deletes “thig le” from each of these titles.
63 For examples see Achard, 2010.
64 Sens smad dgu, 2005.
Texts on Mind. From our current perspective, that work has three deficiencies. The first is its failure, which we share, to provide a root text of *The Single and Combined Thigle* (*Thig le rkyang sbag*). The second is the book’s lack of clarity regarding the relevance of the *Commentary on the Space of the Thigle* (*Thig le dbyings kyi ti ka*) to the Nine Minor Texts on Mind. The final pervasive deficiency is that the precise sources of the texts that it assembles are unnamed and the criteria for the selection of these particular editions is not at all clear.

While we cannot claim to have discovered entirely new manuscripts or editions of any of the texts we consider, we have boosted confidence in the prior discovery of a candidate text for *The Continuity of State* (*Ngang thag*) that has long been thought lost. Altogether, we have identified and located all of sGa ston’s Nine Minor Texts (Section 1.1) and all but one of the gSang ba bsen thub’s Nine Mirrors. The failure to produce a compelling candidate for the “missing mirror,” *The Single and Combined Thigle* (*Thig le rkyang sbag*), does give a sense of a missing piece of a jigsaw puzzle. We just can’t find a piece that fits the right spot; however, in Appendix C we identify texts that cover much the same semantic ground as *The Single and Combined Thigle*, and as a result we are confident we can at least cover the spot in the jigsaw puzzle left otherwise vacant by the missing piece.

In the process of writing this article we have come to question the correspondence between the *Nine Minor Texts on Mind* and the Nine Mirrors that ‘A zha blo gros rgyal mtshan (Section 3.2), Shardza Tashi Gyaltse (Section 1.4), and Tshul khrims blo gros rgyal mtshan (Appendix C) all seem to take for granted. Specifically, we do not find *View and Meditation* (*lta sgom shog cig ma*) among the Nine Mirrors and we do not find either *The Single and Combined Thigle* (*Thig le rkyang sbag*) or *The Continuity of State* (*ngang thag*) among sGa ston’s list of Nine Minor Texts on Mind (Section 1.1).

Unfortunately the labors entailed in achieving the first two objectives of this article have left us with little time or printed space to address the third. Nevertheless, we hope to have shed some light on the content of these texts and contextualized their role in practice. In particular we have observed two ways in which this early Mind Section literature has been used. The first is based on the tantric work of the gSang ba bsen thub and its commentary the bKod pa’i rgyan. In this the *Nine Cycles of the Hidden* is used as a principal text for meditation at the end of the culmination of the completion stage practices, and the Minor Texts on Mind are used as auxillaries. This approach is continued today in the Geshe training program of sMan ri monastery in Dolanji, India.

The second approach is as described by Shardza Tashi Gyaltse. In this approach the *Nine Cycles of the Hidden* is used integrally with the other Minor Texts on Mind in a manner that describes a Dzogchen practice that is less tightly interwoven with a particular tantric cycle.

---

65 With thanks to Jean-Luc Achard for help in identifying *View and Meditation in One Page* (*lta sgom shog gcig ma*).

66 With thanks also to Jean-Luc Achard for pointing us to the bound volume of the *drwa ba nag po*. Sang rgyas bstan ’dzin, 1974. Jean-Luc Achard in turn directs all thanks to Slob dpon bsTan ’dzin nam dag who first pointed out this fact to Jean-Luc.
In this article we believe we have increased our understanding of this literature beyond Samten Karmay’s footnote in *The Treasury of Good Sayings*, but our work has many shortcomings as well. Nevertheless, we are excited that as we have expanded the bounds of our understanding of this literature, an exciting frontier of research directions stands before us. These will be detailed in the section below.

5. Shortcomings of this Article and Directions for Future Research

This article has a number of significant shortcomings:

- The evolving relationship in Bon between the classification scheme of the Nine Vehicles of the Southern Treasures and the classification scheme of the Three Sections of Dzogchen deserves a more thorough investigation than we have been able to provide.
- We believe strongly that one can never get a real understanding of a Tibetan soteriological system until one thoroughly understands the line of human transmission through which we come to know of the system; however, we have not addressed this issue at all in this article. The best we can do at this point is simply to point to Shardza’s description of the lineage of these teachings in *The Treasury of Good Sayings*.

In addition to addressing the shortcomings, we see a number of promising avenues for future research:

- Having identified a number of variant editions for all but a couple of the texts we are well poised to create a variorium edition, if not critical edition, of the *Nine Cycles of the Hidden* and *Nine Minor Texts on Mind*.
- With the existence of critical editions of these texts we will be well situated to translate them.
- Finally we are also well situated to make comparisons of the *Cycles of the Nine Hidden* and *Nine Minor Texts on Mind* with early works of the Nyingma literature from the Mind Section.

Acknowledgements

Geshe Chaphur Lhundup, a recent graduate of Geshe training at Menri (sMan ri) Monastery in Dolanji, patiently read and explained the *Greater Weighty Scripture* with this author and also shared his first-hand experience with the literature of the *Nine Cycles of the Hidden* and *Nine Mirrors* that he gained during his Geshe training at Menri. While only a few “personal communications” are formally noted in the paper, extraordinary thanks go to Jean-Luc Achard for his innumerable helpful references, comments, and suggestions that pervasively improved both the nature and content of this work.

article. Dan Martin read an early draft of this article very thoroughly and kindly pointed out forty-nine corrections. Jacob Dalton read the article equally carefully, but with very different sensibilities, and requested that I clarify the paper in over two-dozen places. Lisa Brughera read three drafts carefully and helped to identify many inconsistencies with regard to titles, terminology, section numbering, language, as well as aberrant juxtapositions of titles from the Kangyur and Tengyur. Using a newly developed optical-character recognition system for Tibetan, Zach Rowinski was able to recognize computer-printed editions of a number of the texts used as references in this article. Kevin O’Neill edited this computer output and manually input other texts. Kevin deserves special credit and thanks for his ability to decrypt even the most concentrated dbu med script. Access to the resulting etext editions was invaluable in many ways – such as locating quotations from the The Continuity of State (Ngang thag).

Appendix C: Identifying the *Thig le rkyang sbag*

(This appendix presumes the rest of this article, particularly Section 3, as context.)

Despite our best efforts we have been unable to identify an edition of the first of the Nine Mirrors, *The Single and Combined Thigle (Thig le rkyang sbag)*. The purpose of this appendix is to understand as best as we can what is the content of the *The Single and Combined Thigle*. This will help us in two ways. It will help us to understand “what we are missing,” and it will establish clear criteria by which we may evaluate future candidates for editions of this text. To begin with, we are perhaps overdue to consider the meaning of “sbag.” From an examination of other usages in the *gSang ba bsen thub* and its commentary, “sbag” seems to be an archaic variant of “sbrags”, meaning combined. Thus, our translation of *Thig le rkyang sbag* as *The Single and Combined Thigle*.

In the same bound volume in which we found *The Continuity of State (Ngang thag)* we find a text with the title *Thig le dbyings bsdus pa* and in the colophon: *gSas mkhar rin po che’i spyi spungs/ thig le dbyings kyi gsang thus*.\(^{68}\) This text appears to be an abbreviated description of the manifestation of the *mandala* of peaceful deities and we can find a corresponding abbreviated description of the *mandala* of wrathful deities in Tengyur 114-8.\(^{69}\) In the pages of the *Drwa ba nag po* that immediately follow, and in the same handwriting, there is a text with the colophon that states that it explains (i.e. it is a commentary on) the root text of the *thig le dbyings ’chad*.\(^{70}\) On the title page of the volume these texts are called *Thig le dbyings ’chad* bsdus pa and *Thig le byings gyi ti ka* respectively. These titles vary widely from the titles we presented for *The Single and Combined Thigle (Thig le rkyang sbag)* in Appendix B: Part 1, and there is no reason to presume that these particular texts are the editions of *The Single and Combined Thigle* together with a commentary that we seek. Nevertheless, as we will see they contain the material that we are looking for in *The Single and Combined Thigle* and thus help us to complete our understanding of the Nine Mirrors as a system. Let us begin by making an inventory of what we know about *The Single and Combined Thigle*.

In the quote from the *gSang ba bsen thub* in Section 1.2 we learned that this text:

1) Corresponds to the mirror of methods, activities (spyod pa) in *The Single and Combined Thigle*.

In the quote from the *bKod pa’i rgyan* in Section 3.2 we learned that:

2) This text corresponds to the mirror of the enlightened body (sku).

\(^{68}\) Sangs rgyas bstan ’dzin, 1974, pp. 78–95. We find another edition of the same text under the title *gSas mkhar rin po che zhi ba dbyings kyi gsang thus* in Tengyur 114—7.

\(^{69}\) Compare with: *bsdus bar gzhung dang cha lag dang/ ... bzhung la zhi khro gsang thus sogsl. ’Phrul gyi lde mig*, p. 500.

\(^{70}\) Sangs rgyas bstan ’dzin, 1974, pp. 97–138.

\(^{71}\) While some of what follows is redundant, we include everything we have learned to ensure to the reader that nothing of what we learned will contradict our conclusions.
3) This text reveals the immutable principle of the nature of mind (sems nyid mi ’gyur ba’i don ston pa).
4) Similar teachings may be found in the sGron ma or in the present [text] (i.e. the bKod pa’i rgyan).

Furthermore, from the Commentary on Complete Discernment of the Secret Principles we learn that it:
5) Bears the title dbyings ’chad72 at least as a variant and, when combined with the Cuckoo (khu byug), and together with The Seven Smaller Texts on Mind makes a cycle of nine minor texts on mind which correspond to the [nine] mirrors.73
6) Is a scripture of activities that consist of alternately spreading out the forty-five [thigle] and then collecting (sbrag) [them together] with the one (rkyang) Single Thigle (thig le nyag gcig) of bodhicitta: a mirror of clarifying the practical application (lag len) of methods that make the mind pliable.74

First we will reiterate that Tshul khrims rgyal mtshan appears to be implicitly describing an equivalence between the Single and Combined (rkyang sbrag) and [Thig le] dbyings ’chad.75 The title Thig le dbyings ’chad is mentioned in numerous places; however an instance of that text, other than the Thig le dbyings bs dus that we consider here, has so far also eluded us. Note that the Thig le dbyings ’chad is also a discovery of gShen chen Klu dga’. Quoting sGa ston again: “With regard to Inner Tantra: The Completely Peaceful; The Explanation of the Thigle (thig le dbyings ‘chad).”76 See Unearthing Bon

72 As we note in the Conclusions, we have come to question the equivalence between the Nine Mirrors (Section 1.2) and the Nine Minor Texts on Mind (Section 1.1). Nevertheless, what is relevant here is that Tshul khrims blo gros rgyal mtshan apparently thought of them as equivalent, and as a result we can conclude that he is associating the dByings ’chad and rKyang sbrag for the same text.
73 gSang don rnam ’byed, p. 38: don drug las sgom don gyi cha ru glong ba’i yan lag ni me long dang mthun pa’i sems phran sde bdun khu byug dbyings ’chad gnis bcs dgu yis bskor ba del. To reiterate: with this statement the most natural interpretation is that he believes that the [Thig le] dbyings ’chad corresponds with the [Thig le] rkyang sbrag.
74 gSang don rnam ’byed, p. 38 (underlining in the following attempts to emulate the original): [gsal ba ming gis rgyas bar bshad pa ni] sems las su ru ng bar bya ba’i thabs kyi lag len gsal ba’i me long byang chub sems kyi thig le nyag gcig rkyang dril dang zhe lnga dgram ste sbrag rès mos su sngub pa’i lung dang/ ... continues on to the other eight mirrors.
75 We do not feel that this single mention of the [Thig le] dbyings ’chad is enough to establish, without doubt, the equivalence between the Thig le rkyang sbrag and the Thig le dbyings ’chad. One objection to this equivalence is that both the gSang ba bsen thub and its commentary, the bKod pa’i rgyan, refer to a Thig le dbyings ’chad as among the Six Principles (don drug). It does seem unlikely that the same text would be counted among the Six Principles and the Nine Mirrors, as the Nine Mirrors are mere auxiliaries to the Six Principles. On the other hand, in both the ‘Phrul gyi lde mig of mNyam med Shes rab rgyal mtshan and in the gSang don rnam ’byed kyi ’grel ba of Tshul khrims rgyal mtshan, it is not the Thig le dbyings ’chad but the Thig le gsum sgrel that is listed among the Six principles. See for example gSang don rnam ’byed, p. 37.
76 Namgyal, 2009, p. 100: sngags nang la zhi ba yongs rdzogs/ thig le dbyings chad/.
Treasures for a good summary of various other references to the Thig le dbyings ‘chad. In the absence of an edition of either the thig le dbyings ‘chad or the thig le rkyang sbrag, Tshul khrims rgyal mtshan’s statements only tell us that we should consider the two texts as highly related.

Second, the Single and Combined Thigle is associated with two different mirrors: the mirror of methods (1) and the mirror of the enlightened body (2).

We may also note some reinforced points: Both (1) and (6) associate the text with methods (thabs) and activities (spyod). Our candidate must not be an instruction manual on non-action and non-meditation.

Let us now systematically consider other elements that should belong to a candidate for The Single and Combined Thigle beginning with (3). While we find various references to the nature of mind (sangs nyid) and immutability (mi ‘gyur ba) in Thig le dbyings bsdus pa, we do not find in the root a pithy teaching that “reveals the immutable principle of the nature of mind.” However, in its commentary, the Thig le dbyings gi ti ga we find:

As it is the nature of mind that is immutable in the three times, it is "thig."
As it abides entirely pervading the aggregates and sense bases, it is "le."  

With regard to (6): Brief as it is, this is the most detailed and specific description of the content of the Thig le rkyang sbrag that we have. Specifically, it indicates that the text describes a practice of spreading out from the Single Thigle (Thig le nyag gcig) to forty-five thigle and then gathering back into the Single Thigle. First, let us remember that the Single Thigle is used as one of the numerous synonyms for the nature of mind. Second, we may immediately recognize that the forty-five thigle are associated with the forty-five peaceful deities in the mandala of peaceful and wrathful deities. Finally, the process of spreading out and gathering back in is tersely referred to in tantric literature (of all Tibetan Buddhist schools) as emanating (‘phro) and collecting (‘dus). Can this practice of emanating out from the Single Thigle to the forty-five peaceful deities and then collecting back into the Single Thigle be found in the root text of the Thig le dbyings ‘chad? Indeed, it can. While it’s difficult to capture all these elements in a brief quote, we can see the key elements of this process unfold in the following:

Bodhicitta, the thigle, the non-duality of emanation and collection. […]
In the mandala that is complete with forty-five,
Through the emanation and collection of the essence mantra and the emanation and collection (‘dzab),
Count.

77 Unearthing Bon Treasures, 2001, p. 252.
78 Sangs rgyas bstan ‘dzin, 1974, p. 114: sens nyid dus gsum du mi ‘gyur ba ni thig yin la/ phung po ‘khum dang skye mched la kyab bdal du gnas pa ni le yin/.
This process of emanation and collection is described in a variety of ways in this text. We feel that this is good evidence that this text at least embodies very similar teachings to The Single and Combined Thigle.

Finally, we consider (4). To reiterate, similar teachings may be found in the sGron ma or in the present [text] (i.e. the bKod pa'i rgyan). We cannot be certain which text the “sGron ma” refers to, but it is easy to check to see whether the teachings described in (6), and in more detail immediately above, can be found in the bKod pa'i rgyan, and, in fact, the practice of emanation and collection is explained very clearly in the bKod pa'i rgyan. Moreover, it is explained much more clearly than in the Thig le dbiyings bsdus.81 While we only aimed to simply show that the teachings described in our copy of the Thig le dbiyings ‘chad could be found in the bKod pa'i rgyan, we may have shown why it has been so hard to find an instance of The Single and Combined Thigle. Any individual wishing to actually engage in the practice of emanating and gathering of the forty-five deities of the maṇḍala could find other texts which avoided the many idiosyncracies of the Thig le dbiyings bsdus — the challenging dbu med penmanship of our manuscript, the archaic spellings, and the terse explanations — by simply using another more extensive and “modern” text.

We should note that the Thig le dbiyings gyi ti ka, apparently based on the same manuscript as appears in the Drwa ba nag po,82 is included in The Cycle of the Nine Minor Texts on Mind: Scriptures of the Highest Dzogchen.83 In the introduction of this book from Triten Norbutse it states that this work is not included in the Nine Minor Texts on Mind but it is included because it is a rare text and for the consideration of the learned. Unfortunately, the root text associated with this commentary is not included there.

All of these references to the function and content of the Thig le rkyang sbag that we have found are in harmony with the Thig le dbiyings (‘chad) bsdus pa. Thus we believe that the Thig le dbiyings (‘chad) bsdus pa and the Thig le dbiyings gyi ti ga in the Drwa ba nag po84 are very useful texts for understanding the most important elements of the Thig le rkyang sbag of the Nine Mirrors. We fall short of offering these as candidates for the Thig le rkyang sbag and its commentary because we have no basis for choosing these two texts from among a large collection of zhi khor literature that also describes the emanation and collection of the maṇḍala of peaceful deities.

Works by or related to Shardza Tashi Gyaltsen

Enlightened Rainbows
Jean-Luc Achard, Enlightened Rainbows , Brill, Leiden-Boston, 2008. 496 pages.
This work gives a useful numbering of every text in Shardza’s writings. These numbers will be applied below with the usage “ER number(s) X-Y” indicates texts X through Y of Enlightened Rainbows.

The Treasury of Good Sayings

We had two editions of Shardza Tashi Gyaltsen’s collected works at our disposal. One is an edition printed from blocks carved at sDe dge rdza steng chen dgon. The second is a modern typeset edition that follows page for page the woodblock edition but with different page numbers (e.g. 001 rather than 301). This edition is cataloged in A Handlist of the Bon Kanjur and Tengyur.

dByings rig mdzod, volume 1
Shardza Tashi Gyaltsen, dByings rig po che'i mdzod (stod cha), Precious Treasury of Space and Awareness, volume 1 of Shardza’s collected works. ER1. Also, Tengyur volume 278 as cataloged in A Handlist of the Bon Kanjur and Tengyur.

dByings rig mdzod, volume 2
Shardza Tashi Gyaltsen, dByings rig po che'i mdzod (smad cha), Precious Treasury of Space and Awareness, volume 2 of Shardza’s collected works. ER2. Also, Tengyur volume 279 as cataloged in A Handlist of the Bon Kanjur and Tengyur.
Other Tibetan Language Texts

Sangs rgyas bstan ‘dzin, 1974)
Sangs rgyas bstan ‘dzin, editor. sPyi spungs rin po che a dkar gsang sngags kyi bka’ srung drwa ba nag po’i rgyud skor, Tibetan Buddhist Monastic Center, Solan, HP, 1974.
A text entitled gSas ‘khar rin po che spyi spung sgron ma gsal ba’i tan tra las ngang thag bskal pa’i sgron ma ston is somewhat incongruously included on pages 1–30 of this book. This book also includes: Zhi ba rin po che thig le dbyings kyi ‘phrin las (pages 31–75), Thig le dbyings (’chad) bsdus pa (pages 78–95), and Thig le dbyings gyi ti ga (pages 97–138).

To Foreign Readers — Subscribing and contributing to the RET.

The subscription to the Revue d’Etudes Tibétaines (RET) is FREE. If you are not on our mailing list yet, please send an email to: jeanluc.achard@sfr.fr with the key-word “subscribe” in the subject heading of your email. You will be informed at least twice a year (usually October and April) of new issues appearing on the web.

If you wish to send an article to the RET, please feel free to do so in French, Tibetan, English, Chinese, German, Italian or Spanish. Articles are not limited in length but should be of standard academic levels. Articles should be sent preferably through email at the following e-address: jeanluc.achard@sfr.fr.
