An Indian Classic in 19th-Century Tibet and beyond: Rdza Dpal sprul and the Dissemination of the \textit{Bodhi(sattva)caryāvatāra}\

Markus Viehbeck
(University of Heidelberg)

This paper highlights a particular episode in the entangled transmission history of the \textit{Bodhi(sattva)caryāvatāra} (BCA). This prominent Indian Buddhist work outlines the path of a \textit{bodhisattva}, the religious ideal of Mahayāna Buddhism, and is nowadays considered among the world classics of religious literature. While it occupied a special position within many traditional Buddhist contexts—and in Tibet in particular—, it is only in the nineteenth century that it gained importance in the Rnying ma tradition and hence permeated all of the Tibetan Buddhist schools. As will be shown, Rdza Dpal sprul (1808–1887),\textsuperscript{1} a charismatic yogin and scholar, can be placed at the centre of this development. His focus on a practice-oriented approach and a wide dissemination of the BCA’s content not only fostered increasing interest within his own surroundings, but also opened up avenues for approaching this text that have come to be relevant in modern settings.

\textit{Introduction: the Bodhicaryāvatāra and its contemporary significance}

The \textit{Bodhicaryāvatāra} has been widely acclaimed and respected for more than one thousand years. It is studied and praised by

\textsuperscript{1} In preparing this article I have been greatly indebted to the kind help of a number of individuals: Andreas Kretschmar and Kurtis Schaeffer for concrete advice and the inspiration that their own research instils; Blo gros ’phel rgyas for valuable assistance in reading through Dpal sprul’s hagiography (\textit{rnam thar}); Birgit Kellner, Christian Bernert, and Katharina Weiler for substantial feedback on the final article; and Philip Pierce for painstakingly correcting my English. Further I wish to thank the team of the Tibetan Buddhist Resource Center (Cambridge) for providing many of the sources that I used in the present research.

\textsuperscript{1} Here and in the following, the dates of Tibetan personalities are based on the TBRC database, if not specified otherwise.

all four schools of Tibetan Buddhism. I myself received transmission and explanation of this important, holy text from the late Kunu Lama, Tenzin Gyaltsen, who received it from a disciple of the great Dzogchen master, Dza Patrul Rinpoche. It has proved very useful and beneficial to my mind.

These words, written by the Fourteenth Dalai Lama, Tenzin Gyatso (Bstan ’dzin rgya mtsho), are to be found in a foreword to a popular English translation of the BCA published in 1997. By that time, this work had not only become known widely within the traditional domain of Buddhism spread out over various cultural contexts across Asia, but had also received attention on a global scale, in academic as well as religious circles.

Within the late eighteenth and nineteenth centuries, the philological interest that arose against the backdrop of British dominion in South Asia had brought manuscripts of numerous Buddhist works to the attention of European scholars. The subsequent canonization of these treatises in the form of critical editions laid the foundation for their academic investigation. In 1889, the Russian Indologist Ivan P. Minaev produced the first critical edition of the BCA, which was then replaced by a new edition (1901–1914) of his Belgian colleague Louis de La Vallée Poussin. The latter was also the first person to translate parts of the text into a European language (in 1892) and to explore its content in more detail. Since then, numerous translations and scientific publications that investigate individual aspects of the BCA emerged, exhibiting an academic interest that has continued up to the present. This interest must also be seen in connection with the significance that the text had acquired within religious contexts, both traditional and modern. In fact, the BCA can be regarded as an important vehicle that enabled the transmission of Buddhist teachings from a traditional (mainly Tibetan) setting to the arena of globalised religions, as the following examples aptly illustrate.

At the end of the nineteenth century, Ekai Kawaguchi, a Zen monk from Tokyo, left his country in search of not only concrete manuscripts but also the origins of the Buddhist religion in more general terms. He was the first Japanese to enter Tibet and Nepal, and managed to study for some time at Sera (se ra) Monastery in the

3 Minaev 1889; for brief descriptions of the background of this edition, see Liland 2009: 73f. and Stender 2014: 149.
4 La Vallée Poussin 1901–1914; this edition also contained the influential commentary by Prajñākaramati. In 1894, Haraprasād Śāstri also published an edition of the text, which did not, however, receive much attention, given the work of Minaev and La Vallée Poussin.
5 For some details on these translations, see Gómez 1999: 270.
vicinity of Lhasa. Having surely been exposed to the BCA during that period, he later (1921) became the first person to translate it into Japanese. The BCA is also among the first works that were translated from Tibetan into English by a Tibetan: when the Indian polymath Rahul Sankrityayan returned to his homeland from his search for Sanskrit manuscripts in Tibet, he was accompanied by Dge 'dun chos 'phel, a gifted if controversial scholar-monk from Drepung ('bras spungs) Monastery. Becoming acquainted with Western knowledge during his travels, the latter came to enjoy a unique position in being trained under the traditional monastic education system, but also having access to modern science and global flows of information. He put his newly acquired knowledge of various languages to use to produce an English translation of the BCA in the 1940s. The text further gained the interest of European converts to Tibetan Buddhism, many of whom learned about its details in direct interaction with Tibetans who had settled in the district of Darjeeling and Kalimpong in North-East India. As an interface between Tibet and modern global flows of goods and information, this area become a major hub of intellectual discourses about Buddhism at the beginning of the twentieth century. The English-born Sangharakshita (Dennis Philip Edward Lingwood), for example, had practised and studied various forms of Buddhism in Kalimpong for fourteen years, and then returned to England to found the Friends of the Western Buddhist Order (1967). While this organisation aimed to promote a decidedly "Western approach," its very first study group focused on a very traditional text: Śāntideva’s BCA. This work was, and continues to be, used widely as a basic introduction to Mahāyāna Buddhism and psychological transformation in most of the Buddhist centres with a Tibetan orientation that are mushrooming across the globe—a phenomenon rooted in the political tensions within Tibet and, even more so, in the search for alternative religious views and practices at the

6 Ekai Kawaguchi published an account of his time in Tibet under the title *Three Years in Tibet*; see Kawaguchi 1909.
7 Some remarks on that translation are provided by Liland 2009: 55f.
8 Several articles dealing with the modern translation history of the BCA refer to an English version produced by Dge 'dun chos 'phel, under the title “To Follow the Virtuous Life,” a manuscript of which is likely to be preserved at the Library of Tibetan Works and Archives (LTWA); see Padmakara 1999a: 213, Liland 2009: 101, and Martínez Melis 2005: 6. Tibetan biographies of him mention that Dge 'dun chos 'phel translated the text or at least parts of it, but do not provide any further details; see Mengele 1999: 105f., and the short biography in Mi nyag mgon po 1996–2000. It seems that the original copy of this work was located by Kirti Rinpoche in his inquiry in the life and works of Dge 'dun chos 'phel in the early 1980s, see Kirti Rinpoche 2013: 10.
9 See Triratna 2012: 1. Sangharakshita’s explanations of the BCA were published as “The Endlessly Fascinating Cry” (Sangharakshita 1978).
receiving end. In his role as both the political and religious leader of many Tibetans, and many sympathisers around the globe as well, Tenzin Gyatso, the Fourteenth Dalai Lama, has been most instrumental in popularising the teaching of the BCA. Not only has he inspired many of the translation projects relating to the text, but he has also taught it himself on various occasions. Published in the form of broadly accessible books for personal development, these explanations aim to convey aspects of the BCA to a vast and varied audience, one interested in Buddhism foremost as a means of spiritual practice.

The possibility of engaging with the text through so many channels seems to be indeed one reason for its popularity. As Luis Gómez has pointed out, people have engaged with the BCA in various ways: it can be viewed as either a spiritual text that addresses the “universal longings” of mankind, a practice manual that teaches meditation, a philosophical treatise that explicates the intricacies of Madhyamaka thought, or as a ritual and devotional text. In addition, most of its readers recognise the BCA’s poetical qualities. Such a variety of approaches, however, is not only an effect of the diversity within the audience that this text encountered in its global spread in the twentieth century; as I will show in the following, it was also an important factor governing its transmission within traditional settings.

The Bodhicaryāvatāra in premodern contexts

Modern scholars commonly accept that the BCA was composed by Śāntideva at the monastic university of Nālandā at the beginning of the eighth century CE. Based on the number of Indian commentarial works that are included in the Tibetan Bstan ’gyur, one can assume that it became a rather popular work quite soon after its appear-

---

10 See Batchelor 1998, Padmakara 1999a, and Padmakara 1999b, for a few examples of such efforts.
11 See Liland 2009: 56–58 and (for a synopsis of a teaching relating to the BCA by the Fourteenth Dalai Lama) pp. 59ff.
12 Gómez 1999: 266f. See also Viehbeck 2005: 5ff., for some examples of common approaches to the BCA.
13 Some details regarding the determination of Śāntideva’s precise dates are provided in Viehbeck 2005: 6. One should bear in mind that our knowledge of the details surrounding the composition of this work stands on very shaky ground, being based, most importantly, on the legendary material that has accompanied this text within its tradition of transmission. And while we tend to speak of the BCA as one text, attributed to a single author, one should realize that this again is a problematic assumption, as the existence of various, quite divergent versions of the work demonstrates. On the differences and relations between these versions, see Saito 1993.
An Indian Classic in 19th-Century Tibet

Along with the pan-Asian spread of Buddhism, this work was translated and adopted in various local contexts: it was translated into Tibetan for the first time as early as the beginning of the ninth century (by Ska ba Dpal brtsegs and Sarvajña/deva), into Chinese in the late tenth century (by Tiān Xīzāi), and into Mongolian in the early fourteenth century (by Nom-un gerel, Tib. Chos kyi ’od zer). While the BCA, as a late import from Buddhist India, did not attain to any major significance in China, and therefore not in the wider sphere of East Asian Buddhism either that developed from there, it became an extremely influential text in other local traditions, particularly in Tibet.

Its first translation into Tibetan by Ska ba Dpal brtsegs and Sarvajña/deva was found in Dunhuang, and has recently been made available to a wider audience through the research of Akira Saito. The text was then retranslated—on the basis of different manuscripts—by the trio of Dharmaśrībadhāra, Rin chen bzang po (958–1055), and Śākya blo gros, and revised a last time by Sumatikīrti and Rngog Blo ldan shes rab (1059–1109). Blo ldan shes rab not only created the final Tibetan rendering of the BCA that was included in the Bstan ’gyur—and which also formed the standard basis for Tibetan scholars’ engagement with this text—but he also augmented the Tibetan tradition of writing commentaries on the BCA. The enormous production of commentarial literature on this text indeed represents a good measure of its importance in Tibet and of the interest it triggered, beginning with the early Bka’ gdas pa masters and later spreading to all other Tibetan Buddhist traditions.

---

14 A list of these commentaries, ten in number, is provided in Dietz 1999: 35ff. Tibetan scholars even speak of over a hundred Indian commentaries on the BCA (see Kretschmar 2004: 11), a number that certainly must be taken figuratively.

15 See Liland 2009: 26ff., for an overview of the translation process in the respective contexts.

16 According to Liland (2009: 37ff.), the historical situation provides the most important reason for the lack of influence of this work in China. While many translation projects were carried out under governmental support during the Northern Sòng dynasty, these seem to have been politically motivated and had only little influence on Chinese Buddhism itself, which had already developed its own schools of Buddhist thought and practice. Another factor that is commonly mentioned is the poor quality of this particular translation of the BCA, see Gómez 1999: 263 and Nakamura 1996: 288.

18 For the translation history of the BCA in Tibet, see Saito 1993: 14ff.

19 The commentaries of several masters achieved the status of a standard reference for the respective scholastic traditions. Rdza Dpal sprul, for example, mentions Bsod nams rtse mo (1142–1182), Tsong kha pa (1357–1419), Rgyal tshab Dar ma rin chen (1364–1432), Dpa’ bo gtsug lag phreng ba (1504–1564/66), and Dngul chu Thogs med bzang po (1295–1369) as most influential (see Dpal sprul rnam thar 805.1–3). According to Kretschmar 2004 (pp. 22–24), the following scholars can be
One notable exception to this general pattern is the Rnying ma school, where increased interest in the text surfaced only in the nineteenth century. It is possible, as I will show in the following, to trace back this change essentially to the activities of a single religious figure, O rgyan 'jigs med chos kyi dbang po (1808–1887), a charismatic yogin and scholar, known better under his short title Rdza Dpal sprul.

The Bodhicaryāvatāra in the Rnying ma tradition

The argument for a considerable change in the significance ascribed to this work within the Rnying ma school can again be based on the observation of the production of—in a wide sense—“commentarial” literature. It is rather astonishing that there seems to be no commentarial work on the BCA written by a Rnying ma author prior to Dpal sprul. Even Dpal sprul himself produced no full-fledged commentary, but is acknowledged as the author of three rather short treatises on the BCA: Spyod 'jug brgyud 'debs (a supplication to the transmission lineage of the text), Spyod 'jug sa bcad (a detailed structural outline of the content of the BCA), and Spyod 'jug sgom rim (a short practice manual in which he picks out various contents of the BCA and arranges them into a set of contemplative exercises). 20 He further gave oral explanations of the text in various contexts, as will be elaborated below.

Two generations after Dpal sprul, this state of initial curiosity had changed completely. Students of Dpal sprul and their students in turn would go on to write a considerable number of commentaries on the BCA. Thereby they created an independent and compelling scholastic tradition relating to the text, which they were also willing to defend against differing interpretations. In my investigation of this development, I will start by drawing a precise picture of the textual production related to the BCA among Dpal sprul and his peers by

---

20 Critical editions of these texts along with English translations are provided in Viehbeck 2005.
addressing the individual works and their interrelations. In an attempt to explain this phenomenon, I will further include hagiographical material and consider some theoretical approaches to the investigation of intellectual development.

Textual production in the 19th century

That Dpal sprul’s teaching activity indeed sparked an avalanche of interest in the BCA can best be grasped by looking at the number of works that were produced in this period. To start with, there are the three short works that Dpal sprul himself composed on the BCA. Further, we have testimony of his teaching activity in the form of records that students produced on the basis of his oral explanations. The notes of his close disciple Mkhan po Kun dpal (1862–1943), for example, are preserved in a lengthy manuscript that is now kept at the Zhe chen Monastery in Kathmandu. Lecture notes were also taken on Dpal sprul’s explanations of the fourth chapter of the BCA by a certain ‘Jig med chos phel bzang po, apparently over a period of

---

21 In many cases, my analysis of the texts is limited to a close investigation of the colophons and introductory passages, and a cursory reading of selected passages from the texts; a detailed enquiry into the content and interrelations of individual works will have to come later, as a follow-up to these tentative remarks.

22 I will for the most part be considering the rnam thar of Dpal sprul written by his close disciple Mkhan po Kun dpal (see Dpal sprul rnam thar). For working with this source, the following two prints were used: the edition included in one version of the collected works of Dpal sprul (Dpal sprul bka’ bum), referred to as A, and the edition in the Gsung bum of Kun dpal (Kun dpal gsung bum), referred to as B. The default reference is according to edition A, whose readings I found in general more reliable, even if the print quality of B is better. Variants in reading are indicated by the respective abbreviations (A, B). Mention must be made of yet another block print of this text, contained in vol. 4, pp. 783–879 in another version of Dpal sprul’s collected works (Dpal sprul gsung bum), with the slightly misspelled title O rgyan ‘jigs med chos kyi dbang po’i rnam thar dad pa’i gsol smon bdud rtsi’i bum bcud. The precise textual relation of these three versions to one another needs to be investigated.

23 A list of these works is provided in the appendix; the relation of individual items to one another will be addressed in detail below.

24 I would like to thank Matthieu Ricard who provided me with a provisional transcript of this text in 2004, titled: Spyod ‘jug la dpal sprul rin po che’i zhal rgyun zin bris (see Kun dpal zin bris). It does not contain any details about the context of its composition, and later attempts to access the original manuscript (which was apparently written in Kun dpal’s own hand) were not successful. This text was printed by Yeshe De Dharma Publishing and distributed at a smon lam gathering, but unfortunately cannot be purchased from the publisher.
nine sittings. This text is included in one version of Dpal sprul’s collected words, but no further details are known about the note taker.

The most systematic continuation of Dpal sprul’s teaching tradition is probably found in Kun dpal’s extensive commentary on the entire BCA. The colophon of this text explicitly states the wish of the sponsors and the more immediate initiators of this composition, such as the third Kah thog Situ, Chos kyi rgya mtsho (1880–1923/25), that it should be written according to the “instructions of the Lama” (bla ma’i zhal rgyun), that is, Dpal sprul—a request that Kun dpal dutifully followed. Kun dpal writes that he based his commentary on notes that he took during lectures on the BCA and refers to one occasion when he received teachings from Dpal sprul over a period of six months at his religious centre in Dge gong, called Rig ’dzin ’chi med grub pa bshad sgrub dga’ tshal. He also mentions this event in the introduction to his commentary, where he points out that Dpal sprul was using the commentary of Dngul chu Thogs med bzang po (1295–1369), in such a way that it could be applied to personal practice and experience (nyams len). These explanations are of particular importance since they must be considered as Dpal sprul’s last major teaching activity. It is very likely that this is related to the notes that are preserved in the above-mentioned manuscript from Zhe chen

25 See Spyod ’jug le’u bzhi ma’i zin bris 179.3: mdo kham smad kyi pandita chen po dpa’i sprul ba’i sku rin po che’i zhal snga nas spyod ’jug gis khris lan grangs dgu tsam thob pa’i skabs [...].

26 Considering that the person in question received teachings from Dpal sprul so many times, it is quite surprising that he is not more commonly known. It could of course simply be a case of reference under a secondary name. The name that is provided is not found in common databases or the list of students provided in Kun dpal’s rnam thar. For bibliographical details, see Spyod ’jug le’u bzhi ma’i zin bris.

27 The colophon is included in the translation of the entire commentary published by the Padmakara Translation Group (Padmakara 2008). Translations of the first five chapters along with a detailed introduction have also been produced by Andreas Kretschmar and are openly available at his homepage http://www.kunpal.com (accessed October 29, 2015). For the Tibetan text of the colophon, see Kun dpal ’grel pa 813.10ff.

28 See Kretschmar 2004: 188f., for a translation as well as the Tibetan text.

29 Further details are provided in Kun dpal’s rnam thar, where it is stated that the teachings were given in an intimate setting with an audience of eight or nine monks, including Kun dpal and Tshe dbang grags pa, a son of the famous gter ston Mchog gyur gling pa. Instruction lasted for six months, beginning in the eighth Tibetan month and running up to the first Tibetan month of the Fire-Dog year 1885–86, just one year before Dpal sprul died; see Dpal sprul rnam thar 838.4–5: de skabs mchog gyur gling pa’i sras chung ba tshe dbang grags pa phebs nas | de dang mkhan kun dpal sogs grwa pa bryad dgu la thog ’grel steng nas spyod ’jug rgyas pa ston ’bring po nas me khyi zla ba dang po’i phyed kyi bar zla ngo drug tu gsungs.
Kun dpal took further notes during a forty-day series of lectures on the BCA given by Dbon rin po che O rgyan bstan ’dzin nor bu (b. 1851), another close disciple of Dpal sprul, which he was able to attend twice. In addition, Kun dpal’s commentary was also informed by notes and oral explanations provided by other close students of Dpal sprul. The fidelity of the student’s written notes to the master’s oral explanations can be seen by comparing the structural outline of Kun dpal’s commentary and Dpal sprul’s own sa bcad, which diverge only in minor details. To say that Kun dpal’s work provides the exact words of his master, however, would be jumping to conclusions, as an investigation of another commentary of one of his students will show.

’Ju Mi pham rgya mtsho (1846–1912), known as the foremost philosophical thinker of the Rnying ma tradition, and probably Dpal sprul’s most famous disciple, wrote a commentary on the ninth chapter of the BCA, a chapter that was particularly important for the development of Madhyamaka thought. As stated in its colophon, the work, completed on September 9, 1878, was composed not only after all available Indian and major Tibetan works on this topic had been consulted, but also after the oral teachings of Dpal sprul had been imbibed. A rnam thar of Mi pham specifies that he had received explanations of the text for a period of five days. In the years to follow, this commentary would become famous across Tibet for igniting disputes with several Dge lugs scholars—controversies that continued, through an exchange of polemical writings, until Mi pham’s death. While it is often commonly assumed that this commentary reflects his master’s reading of the ninth chapter, a comparison of structural frameworks may force a reconsideration of the matter. Mi pham deviates not only in the headings he gives to individual passages, but also, at least occasionally, in how the BCA is structured overall. His commentary must therefore be understood as an important inde-

---

30 See Kretschmar 2004: 40, 189, and 379. Given the precise dates of the teaching, it seems, however, Kretschmar’s interpretation of the textual sources must be corrected in its assumption that Mchog gyur gling pa was among the audience; rather, it is his son Tshe dbang grags pa, to whom Kun dpal is referring.
31 For Dpal sprul’s sa bcad, see Viehbeck 2005: 91–157; for the outline of Kun dpal’s commentary, see Kun dpal ’grel pa: 1–21.
32 Such an assumption, however conditionally phrased, is found, for instance, in Padmakara 2008 (xviii): “It could perhaps be said that The Nectar of Manjushri’s Speech is the commentary that Patrul Rinpoche so often gave by word of mouth but never actually wrote.”
33 See Nor bu ke ta ka 94.5ff.
35 For a detailed analysis of the historical development of these controversies and, specifically, the debate between Mi pham and one of his Dge lugs pa opponents, Dpa’ ris Rab gsal, see Viehbeck 2014b.
ependent work rather than as a record of his master’s words.\textsuperscript{36} In this regard it is interesting to see that Kun dpal seems to have chosen a middle way between his two predecessors. While he follows the sa bcad of Dpal sprul for, among others, the ninth chapter of the BCA, the actual phrasing is closely modelled after Mi pham’s explanations. Often the latter’s text is quoted almost verbatim without, however, including the idiosyncratic passages in Mi pham’s commentary that were important for delineating the boundaries of his specific Rnying ma outlook. Written in sharp contrast to the philosophical system of the Dge lugs school, these were heavily criticised by the latter. Kun dpal’s commentary lacks these scholastic edges and is more general in tone, and therefore also applicable to divergent scholastic traditions of Madhyamaka thought.\textsuperscript{37}

A more general approach is also taken in the commentary of another student of Dpal sprul, Gzhan phan chos kyi snang ba (1871–1927), known more widely under his short title Mkhan po Gzhan dga’. He became famous in particular for his composition of concise “annotation commentaries” (mchan ’grel) on a collection of thirteen Indian texts (gzhung chen bcu gsum) widely perceived as encapsulating the fundamentals of Buddhist doctrine. Along with his explanations, these texts have constituted the basis for the scholastic education purveyed in “commentarial institutions” (bshad grwa), which had sprung up by the middle of the nineteenth century as an alternative to the “debating institutions” (rtsod grwa) of the Dge lugs school.\textsuperscript{38} Gzhan dga’ was instrumental in this development, inasmuch as he was involved in the educational programme of several such institutions belonging to different schools of Tibetan Buddhism.\textsuperscript{39} His collection of core texts contains a commentary on the BCA, which is—like his other treatises—very general in nature and avoids specific

\textsuperscript{36} I have discussed the relation between Mi pham’s commentary and Dpal sprul’s explanations in more detail in previous writings; see Viehbeck 2009: 4 and Viehbeck 2014b: 31.

\textsuperscript{37} Viehbeck 2014b: 88f. describes in more detail how Kun dpal proceeded with regard to individual passages.

\textsuperscript{38} See Dreyfus 2003 on the differences between the two educational systems practised in the respective institutions, and Dreyfus 2005 on the origin of “commentarial institutions.” We will address this topic in more detail below.

\textsuperscript{39} Most famously, his collection of textbooks served as the basis for the curriculum of the bshad grwa at Rdzong (g)sar, opened in 1918—which later influenced other institutions. A brief overview of the history of this bshad grwa is given in Kretschmar 2004: 97ff. According to Kretschmar (2004: 99), Gzhan dga’ was also responsible for the educational programme at Śrī Simha bshad grwa at Rdzogs chen Monastery, taught at La si sgang in Sde dge, and founded bshad grwa at the Bka’ brgyud monastery of Dpal spungs and at Skye dgon don ‘grub gling, a monastery in the Sa skya tradition.
An Indian Classic in 19th-Century Tibet

topics that had interested the different scholastic traditions.\textsuperscript{40} As stated in its colophon, it is based primarily on Indian treatises, but he also makes explicit reference to the teachings he had received from Dpal sprul, whom he praises for diligently putting the content of the BCA into actual practice during his entire life.\textsuperscript{41}

As the example of Gzhan dga’s activities in institutions of the Rnying ma, Sa skya, and Bka’ brgyud traditions shows, Eastern Tibet in the nineteenth century was a network of close ties and interaction among the various religious traditions—a phenomenon that is often summed up by the expression “\textit{ris med} (‘non-sectarian’) movement.”\textsuperscript{42} It therefore ought not to seem very surprising that Mi nyag Thub bstan chos kyi grags pa (1823–1905), a scholar steeped in the Dge lugs tradition, was among Dpal sprul’s students who wrote important commentaries on the BCA. He was especially prolific and produced altogether three commentaries: a lengthy composition of 915 pages that deals in detail with the first eight chapters of the BCA and provides only the original text of the tenth chapter as a conclusion of the text, and two separate works—a detailed commentary and a work dealing with pertinent general issues (\textit{spyi don})—solely on the ninth chapter.\textsuperscript{43} The colophon of the first provides hardly any information about the details of composition, but in his introduction Thub bstan chos kyi grags pa clearly refers to Dpal sprul as his master, and we therefore can safely assume that the latter’s teachings must have been a significant source.\textsuperscript{44} The colophon of the general discussion (\textit{spyi don}) is more informative about sources. Thub bstan chos grags again makes direct reference to his master Dpal sprul,\textsuperscript{45} and notes that he had occasionally received two-month-long stretches of formal expla-

\begin{itemize}
\item While Gzhan dga’ certainly was aware of Mi pham’s interpretation and the discussions it had triggered, his explanations of crucial passages (see his commentary on BCA IX.1 or IX.2 in \textit{Gzhan dga’ mchan ‘grel} 411 and 412, respectively) show that he not only did not adopt the explanations of Mi pham, but that he generally seems to have attempted to present a non-controversial reading of the text, based on Indian material.
\item See \textit{Gzhan dga’ mchan ‘grel} 474.6f.: ‘phags pa’i yul gyi gnas lnga mthar son pa’i pan dispuspo rnam kyi legs par bshad pa la gzhi byas | sku tshe ril por byung chub sems dpav’i spyod ’jug gi nyan m len la brtson pas chos dang rang rgyud gcig tu’ dbes pa’i dge ba’i bshes gnyen dpal sprul chos kyi dbang po’i zhal rgyun drin can bl a ma [...].
\item A critical evaluation of this term will follow below; see note 74.
\item For bibliographical details, see \textit{Kun bsod sher le gzhung ‘grel}, and \textit{Kun bsod sher le spyi don}, respectively. A complete translation of the \textit{Kun bsod sher le gzhung ‘grel} is found in Padmakara 1999b.
\item See \textit{Kun bsod sher le spyi don} 5.2. Others who have followed in Dpal sprul’s teaching tradition point out the very close relationship here between student and master; see Kretschmar 2004: 24, 40, 127, 379. It seems rather surprising, then, that Thub bstan chos kyi grags pa is not mentioned in Kun dpal’s biography of Dpal sprul.
\item See \textit{Kun bsod sher le spyi don} 303.2.
\end{itemize}
nations of the text from him, and also had heard scattered teachings of it in other contexts. These teachings were based mainly on Thogs med bzang po’s commentary, and to lesser degrees on the work of other scholars—for example, the commentary of Rgyal tshab Dar ma rin chen (1364–1432) for the ninth chapter of the BCA. Accordingly, Thub bstan chos grags lists these and the famous Indian commentary of Prajñākaramati as his main sources. Several other Indian Madhyamaka works are mentioned as additional inspiration. Rgyal tshab’s commentary and certain “shorter and longer notes” are also mentioned as sources for his second work on the ninth chapter. While no explicit reference to Dpal sprul is made in the colophon, we can assume that this text, too, was written under the influence of his teachings. The exact relation between Dpal sprul’s teaching tradition as expressed in commentaries by other (non-Dge lugs) scholars and Thub bstan chos grags’s works still needs, however, closer investigation. This issue is especially important in the light of the differences between the Rnying ma and the Dge lugs traditions that surfaced in the debates between Mi pham and a number of Dge lugs scholars.

It seems that these very controversies sparked new interest in the BCA, especially when it came to explaining its ninth chapter. Several scholars with close ties to the scholastic circles surrounding Dpal sprul and his disciples engaged in building up a Rnying ma scholastic tradition of its own of explicating this important Madhyamaka

46 These details are provided in the colophon to his work; see Kun bsod sher le spyi don 304.1–5. Rgyal tshab Dar ma rin chen’s commentary draws heavily on previous notes made by his master Tsong kha pa and became the standard reference source for the BCA in the Dge lugs tradition. Prajñākaramati’s commentary is used widely by all Tibetan scholars as the most authoritative Indian commentary on Śāntideva’s work. The additional Madhyamaka works Thub bstan chos grags mentions are: the collection of logical works (rigs tshogs) of Nāgārjuna, such as his Mūlamadhyamakakārikā; further, Āryadeva’s Catuḥśataka, Śāntideva’s Śīkṣāsamuccaya, and Candrakīrti’s Madhyamakāvatāra.

47 See Kun bsod sher le gzhung ’grel 447.4ff. The text was composed at Bkra shis lha rtse at Rdzong (g)sar, at the request of Lung rtogs bstan pa’i nyi ma (1829–1901/02), one of the main students of Dpal sprul, and one frequently mentioned in Kun dpal’s rnam thar.

48 Interestingly, Mkhan po Bkra shis dpal Idan from Skyabs rje Monastery, as a member of Dpal sprul’s teaching tradition, explains the differences between Thub bstan chos grags on the one hand and Kun dpal and Mi pham on the other in terms of general styles that could be applied to approaching the content of the BCA. While the former favoured a “scholastic explanation style,” the latter two embody the “practice instruction style” (see Kretschmar 2004: 127ff.). Given, in turn, the differences in style between Kun dpal and Mi pham—the latter drawing much more on scholastic details than the former—we also need to consider the distinct scholastic backgrounds, especially when comparing Mi pham’s and Thub bstan chos grags’s work.
text. Glag bla Bsod nams chos 'grub (1862–1944), for example, wrote several works on the BCA, of which his commentary on the ninth chapter is the most extensive.\(^{49}\) His remarks in the author’s colophon seem to hint at a controversy in the interpretation of the BCA, and Mi pham, as the figurehead of tensions between Dge lugs and Rnying ma interpretations of the text, is mentioned explicitly in the printer’s colophon.\(^{50}\) Further, Zhe chen rgyal tshab Padma rnam rgyal (1871–1926), a student of both Dpal sprul and Mi pham, composed two separate commentaries on the ninth chapter. His “word-by-word commentary” (‘bru ’grel) is basically a subcommentary on Mi pham’s Nor bu ke ta ka,\(^{51}\) and his “annotation commentary” (mchan ’grel) also follows along the lines of this work. It places itself in a lineage of oral instructions of “knowledge holders of the Earlier Translation [tradition],” thus leaving no doubt that the increasing interest in teaching and debating this text contributed to developing a compelling scholastic identity of relating its content for Rnying ma pas.\(^{52}\) Another short text, composed by ‘Jigs med bstan pa’i nyi ma (1865–1926), the Third Rdo grub chen, who is also listed among Dpal sprul’s close students in Kun dpal’s rnam thar,\(^{53}\) follows this trend, addressing as it does fundamental doctrinal differences in the understanding of the ninth chapter of the BCA.\(^{54}\) This activity continued into the next generation of Rnying ma scholars, as aptly demonstrated by two brief works on the BCA by Thub bstan bshad sgrub rgya mtsho (1879–1961), another commentary on the ninth chapter by Blo gros rgya mtsho, the seventh abbot of Rdzong (gsar, and an extensive commentary on the entire work by ‘Jigs med rdo rje (1879–1940/41).\(^{55}\)

\(^{49}\) Besides his commentary on the ninth chapter (Bsod chos sher ’grel), he also wrote a text that brings together Indian sources that support the content of the BCA (Spyod ’jug lung btus), along with a brief explanation of the opening passage of the BCA (Spyod ’jug klad don) and a brief discussion of a thorny issue in the sixth chapter of the text (Bzod le dgag pa).

\(^{50}\) See Bsod chos sher ’grel 327.1–4.

\(^{51}\) This is very clear from comparing the actual content of the two works. Padma rnam rgyal expounds especially on points criticised by Dge lugs authors, and his efforts must obviously be seen as an attempt to defend the commentary of his master Mi pham, whom he addresses as a kun mkhyen bla ma, “omniscient teacher.” In the colophon (Rgyal tshab ’bru ’grel 704.2–5), he refers to the work of his master as Sher þka chen mo.

\(^{52}\) See Rgyal tshab mchan ’grel 825.2–4.

\(^{53}\) See Dpal sprul rnam thar 846.5.

\(^{54}\) See Spyod ’jug dka’ gnas gsal byed 311, where the differences among the Sa skya, Dge lugs, and Rnying ma traditions regarding how the selflessness of arhats is to be understood are discussed.

\(^{55}\) These texts are listed in the appendix below; bibliographical details are provided in the TBRC database.
While this list of works is only tentative and more works on the BCA were doubtless produced within the narrow confines of Dpal sprul’s sphere of influence (and may come to light eventually), these texts already are striking testimony to the enormous change the BCA underwent in this short period. What, then, are we to make of this development? How can we go about looking for explanations?

In the following, I will not propose a comprehensive theoretical framework for doing so, but merely hint at some issues that might be worth looking at if we conceive of the described interest in the BCA as an intellectual development that is shaped in social interaction. In doing so, I will draw in a very general sense from some notions that were highlighted by the American sociologist Randall Collins in his ambitious attempt to write a social history of global intellectual change.56

As Collins has noted, intellectual change and significance can be viewed as being created through processes of interaction between basically two different groups, a network of intellectually like-minded persons—students or disciples, so to speak—and a group of intellectual rivals. In both cases, interaction leads to increased public attention. This publicity is created in so-called “interaction rituals,” which may take the form of instructions or debate, depending on the principal intellectual identities and ties. Collins emphasises the performative power of personal encounters, but these are closely linked to the production of texts insofar as oral statements are meant to be seen as temporal and situational “embodiments” of contents preserved in written form.57

By compiling a list of commentarial works on the BCA produced by Dpal sprul’s peers (many of whom were his direct students), I had already adopted this perspective of looking for significance in the activities of a social network of allies. Once a broad impression is established of a network that emerged within a specific field of interest—in this case, texts relating to the BCA among a selected social group—we can proceed towards a more close-up perspective and try to specify the role that an individual—Dpal sprul—played in this development. And if references by students are accepted as one indi-

---

56 Collins 2002; I am indebted to Kurtis Schaeffer for pointing out Collins’s work.
57 As indicated above, here I am referring in a very general sense to Collins’s work, focusing on its theoretical considerations, esp. pp. 1–79. I do, however, agree with the assessment put forth by some of his critics that his approach—especially in its psychological dimensions—seems to be shaped heavily by present-day North American intellectual practice.
An Indian Classic in 19th-Century Tibet

cator of the significance of their master, it seems plausible that their image of him or the role they attributed to him, if ascertainable, would provide a reason for this significance.

Each of the individuals mentioned earlier certainly had his own particular story to tell of direct or second-hand contact with Dpal sprul, and hence of very personal ways of relating to him. It may be worthwhile, however, to provide only one, albeit particularly detailed and consequential, case as an example of how Dpal sprul’s engagement with the BCA was perceived by his students. In the following, then, I will present passages from the rnam thar of Mkhan po Kun dpal. And while Kun dpal’s account is very personal (I have made no attempt to validate individual assertions on the basis of independent sources), it offers at least one version of the historical background to Dpal sprul’s engagement with the BCA.

An account of Dpal sprul’s life

Mkhan po Kun dpal (1862–1943) was a close disciple of Dpal sprul and of the latter’s student Mi pham. As noted earlier, he was present at Dpal sprul’s last teachings of the BCA and contributed to a large extent—through the notes that he took on those occasions, his extensive commentary on the text, and his description of Dpal sprul’s ac-

58 Apart from an account of Dpal sprul’s life that was compiled only recently, on the basis of information supplied by Smyo shul Mkhan chen (1931–1999) (see Rnam thar nga rgyun ma), Kun dpal’s remains the most detailed report of these events, and is also heavily drawn on by Smyo shul Mkhan chen.

59 Texts of the rnam thar genre cast a very specific light on history, most importantly by drawing attention to their main subject. But given the fact that any historical account is determined by certain linguistic choices and conventions (as demonstrated most famously in Hayden White’s *Metahistory*; see White 1987), we should probably not be exceedingly suspicious in regard to the basic elements Kun dpal’s report includes. As Kun dpal explains in the colophon of his work, he based his account on the earlier notes taken by Grub chen Rin po che—most likely the Third Rdo grub chen ’Jigs med bstan pa’i nying ma (1865–1926)—and A mchod Bsod tse (Dpal sprul rnam thar 852.2f.), which he combined. The overall structure is modelled after an encomium of Dpal sprul by ’Jam dbyangs mkhyen brtse’i dbang po (1820–1892), which is attached at the end of the text and commented upon at the beginning of it. This encomium, Kun dpal emphasises, is “free from the faults of partiality [in the form of] exaggeration or depreciation, and therefore has become an object of well-founded trust” (Dpal sprul rnam thar 777.4: sgro skur phyogs zhen gyi nyes pa dang bral bas yid ches khungs btsun gya gnas su ’gyur phyir). Further, Kun dpal stresses that his report represents an “ordinary general rnam thar” (thun mongs spyi’i rnam thar) that describes common events as witnessed by Kun dpal himself and other students, in contrast to the extraordinary events that might be addressed in an “inner” (nang) or “secret” (gsang ba) rnam thar; see Dpal sprul rnam thar 848.6–849.4.
tivity in his *rnam thar*—to the preservation of his master’s legacy. In many details that Kun dpal reports about Dpal sprul’s engagement with the BCA in this last account, he leaves no doubt that this work was of special importance to his master. While it is repeatedly emphasised, for example, that Dpal sprul abstained from gathering any possessions and making provisions for the future, a copy of this text was among the very few things that he did in fact keep.60 Also, when Dpal sprul’s students inquired in an intimate moment about the character of their master, he referred to this text as the key shaper of his mental outlook and behaviour.61 And in the same way as the BCA was cherished by Dpal sprul, he in turn was vital to the text—that is, to its content being spread among the people: Kun dpal reports numerous occasions when Dpal sprul engaged in teaching the text, and indeed such activity led his contemporaries to believe that he actually had been Śāntideva himself in a previous life.62

While Kun dpal makes no attempt to be comprehensive in his listing of Dpal sprul’s teachings, his account is not only impressive for the sheer number of these events, but also revealing regarding the location, the audience, and the form of the teachings. As we are informed, Dpal sprul, rather than taking up the duties at his monastic seat Rdza skya dgon, where he was recognised as a “tulku” (*sprul sku*), opted for an unsettled lifestyle,63 roaming the land, studying, practising, and teaching at both secluded places and established monastic institutions. The geographical scope of his activity is therefore considerable: mainly he taught in the wider area of Rdza chu kha and Sde dge, ranging from places like Khri ’du in the north-east, to Gser thal in the west, and Kah thog in the south. And, in many cases, this included teachings of the BCA.64

---

60  See *Dpal sprul rnam thar* 814.2f.
61  See *Dpal sprul rnam thar* 824.5.
62  According to Kun dpal, such was also implied in predictions by ‘Jam dbyangs mkhyen brtse’i dbang po and the *gter ston* Bdud ‘dul rdo rje, see *Dpal sprul rnam thar* 786.2. The connection between Dpal sprul and Śāntideva is also highlighted in Mkhyen brtse’i dbang po’s prayer to Dpal sprul included in version B of the *rnam thar*, see *Dpal sprul rnam thar* (B) 480.2f.
63  See *Dpal sprul rnam thar* 792ff., for a description of the crucial situation when Dpal sprul decided to give up his position at Rdza skya dgon and abandoned all his possessions and responsibilities. It is this image of Dpal sprul as a wandering yogin that first will come to mind in later generations.
64  As tradition has it, Dpal sprul taught the text more than a hundred times (Kretschmar 2004: 2). Kun dpal’s *rnam thar* mentions concrete teaching situations in the following places and monasteries: Wa shul & Gser thal (p. 795.3f.), Dhi chung & A ri (p. 796.1), Rdo yul (p. 800.3f.), various places in the vicinity of Rdzogs chen such as Śrī sengha’i chos grwa, Padma’i thang, and Nags chung ma’i ri khrod (p. 800.4–801.1), Kah thog (p. 802.4), Ser shul dgon, La ba, Khri ’du,
Thus the settings and audiences of the teaching varied widely. These included intimate bestowals of the teachings upon single students, such as the telling episode when Dpal sprul spent a couple of months in the forest instructing his closest disciple Smyo shul Lung rtogs (1829–1901/02):65

Once both he (i.e., Dpal sprul) and Lung rtogs were residing in either Dhi chung forest or A ri forest. When it was time to eat, they would eat only a little from the bags of tsam pa they had, and then put the tsam pa bags up in a tree. [Then Dpal sprul] explained to him two four[-line] verses of the Bodhicaryāvatāra. With nothing to wear but a white woollen cape, [Dpal sprul] would take a stick and walk into the forest, bursting forth in loud laughter. Lung rtogs said that he did so also on the following days. Continuing on in this way for a couple of months, [Dpal sprul] was cheerful and said that this was what is meant in the words (of the BCA) “lonely and lovely forest spots.”66

But Dpal sprul also taught the BCA to huge gatherings. Kun dpal emphasises that even laypersons were drawn to these teachings, during which Dpal sprul managed to convey the basic core of Mahāyāna Buddhist thought to what can be assumed to have been a less receptive audience:67

Even laypersons, ordinary men and women, listened for a while to [his] explanations of the Bodhicaryāvatāra in the Dharma assembly. Hence they understood the [general] outlook that the lifeline of the Dharma of the Great Vehicle is a virtuous attitude, that is, bodhicitta.

Various scholars in Dpal sprul’s tradition stress this point and claim that Dpal sprul was indeed the first to open up this text to a non-

---

65 Dpal sprul rnam thar 796.1–4: dhi chung nags sam a ri’i nags su khong dang lung rtogs gnyis bzhugs skabs rtsam pa khug ma gang yod pa gsal tshigs dus cung zad gsal nas rtsam khug de shing la btags (A btegs) | khong la spyd ’jug tshig bzhhi re gnyis gsungs lwa ba dkar po zhig las mnabs rgyu med dbyug pa zhiig bsrams nas ha ha zhes pa’i ’ur sgra chen po mdzad de nags nang du byon bzhugs mdzad | yang phyi nyin de ltar mdzad par lung rtogs gsungs | de ’dra’i tshul gnyis zla ba kha shas bzhugs te | nags tshal sa phyogs dben zhin nyams dga’ dang zhes pa de ’di’ dra la zer ba yin zhes thugs spro nyams mdzad 1.

66 Here, Dpal sprul quotes a line of the third verse of the second chapter of the BCA, where the adept is encouraged to mentally gather everything pleasant imaginable, including a lovely and secluded piece of forest, and prepare these as a perfect offering to the Buddha, Dharma, and Saṅgha.

67 See Dpal sprul rnam thar 818.1-2: ’jig rten mi nag gi skye bo pho mo rnam pens kyang spyd ’jug bshad pa’i chos grwal du bug tsam re nyan pas theg pa chen po’i chos kyi srog rtsa bsam pa bzang po byang chub kyi sens yin pa’i ’gro phyogs shes shing 1.
monastic audience—an assumption that can only be confirmed by further study of the social history of this work. That these teachings did often attract a larger, more general audience can probably be concluded from the custom of propagating the text that Dpal sprul introduced: teachings were not just given once; rather, explanations and practical exercises were combined into a seminar devoted to the BCA conducted on an annual basis. Kun dpal mentions only three occasions when Dpal sprul established such a tradition: a twenty-day “Dharma session” (chos thun) at Ser shul dgon, a three-month seminar at Rdza dgon, and an unspecified “custom” (srol) relating to the BCA at Dge gong,

It is further stressed that Dpal sprul’s teaching was not confined to his own Rnying ma circles, but that it included institutions that belonged to other traditions of Tibetan Buddhism:

He went to many large and small monasteries of the Sa [skya], Dge [lugs], Bka’ [brgyud], and Rnying [ma traditions] and gave extended explanations of such [texts] as the Bodhicaryāvatāra and the Zhing sgrub. Most of these [teaching traditions] have continued on [there] unimpaired up to the present day.

This point appears to be particularly important, especially when we consider that in each of the major Tibetan schools specific scholastic traditions of explaining the text had developed, revolving around commentaries of earlier scholars of the respective traditions. The specific allure of Dpal sprul for Kun dpal was that he had managed to acquire not only the necessary prestige to be invited by institutions of other traditions, but also the knowledge and openness to see the benefit of these individual scholastic traditions and to model his teaching accordingly:

---

68 This point was stressed, for example, by Mkhan po A pad and Mkhan po Chos dga’, both of whom were interviewed by Andreas Kretschmar (Kretschmar 2004: 118 & 464).

69 See Dpal sprul rnam thar 804.3., 804.4, and 804.5, respectively.

70 Kretschmar mentions, for example, a three-month seminar that was established at Rdzogs chen (Kretschmar 2004: 39).

71 Dpal sprul rnam thar 803.5–6: sa dge bka’ rnying gi dgon sde che phra mang por byon nas | spyd ’jug dang zhing sgrub sogs kyi bshad pa rgya cher stsal ba phal cher da lha’i bar du ma nyams par gnas la 1.

72 This seems to be a work of the type that became popular in Tibet from the seventeenth century onward that deals with the attainment of rebirth in the realm of the Buddha Amitābha. For details of this development, see Kapstein 2004, esp. pp. 32ff.

73 Dpal sprul rnam thar 805.1–3: gsar rnying gi gzhung gang bshad thams cad de dag gi lugs ltar ma ‘dres par bshad pa dang | khyad par spyd ’jug ni | sa skya pa’i nang du rje btsun bsod nams rtse mo’i ’grel pa ltar dang | dge lugs pa la zin bris dang dar ṭika (A
All [his] explanations of scriptures of the Gsar [ma] and Rnying [ma traditions] were given according to the respective traditions, without mixing them. In particular, he (i.e., Dpal sprul) explained the Bodhicaryāvatāra according to the commentary of Bsod nams rtse mo among Sa skya pas, according to [Tsong kha pa’s] “notes” (zin bris) and the commentary of Dar [ma rin chen] for Dge lugs pas, according to the commentary of Dpa’ bo gtsug lag phreng ba for Bka’ rgyud pas, and according to the great commentary of Prajñākaramati and the commentary of [Dngul chu] Thogs [med] for Rnying ma.

It is this idea of tolerance and mutual respect that—under the ris med (“nonsectarian”) label—is sometimes and rather too simplistically identified as the unifying characteristic of a group of nineteenth-century Eastern Tibetan religious luminaries who are said to have exemplified it. Such an attitude, to be sure, seems to have been embraced by many scholars of that time and area, but we should be aware that these features were appreciated and propagated—as general qualities—by most Buddhist authors. And while there obviously was close interaction between scholars who belonged to different religious traditions, it seems to be more appropriate to think of them as a complex network of individuals with varying agendas than to postulate a conscious, well-defined, and unified ris med movement.74

More interestingly, the passage above shows that while the other schools had managed many centuries earlier to create a specific scholastic tradition of interpreting this text, such was not the case with the Rnying ma. Inspired by Dpal sprul’s teaching, however, his students would eventually close this gap: for generations of Rnying ma students of the BCA to come, Gzhan dga’s and Kun dpal’s commentaries will be used as a basic exposition of the whole text, while Mi pham’s commentary will be crucial for understanding its ninth chapter.75

74 In earlier writing, I have tried to bring more clarity to this issue by distinguishing ideological and sociological considerations; see Viehbeck 2014b: 68ff. Alexander Gardner has argued insightfully that the idea of a well-defined ris med movement is essentially a fantasy of Western scholars and translators (Gardner 2006: 112ff.). While I find that his discussion of the term and its development addresses many crucial aspects, I think that it will be fruitful for further research to consider more carefully the role that Tibetan scholars played in shaping its meaning—for example, the late Sde gzung rin po che (1906–1987), the teacher and a main source of information for Gene Smith, who in turn was among the first to introduce ris med as a topic to Western academia.

75 Such is evident, for example, in the educational training as described by different Rnying ma scholars in Kretschmar 2004 (pp. 59ff.), and corresponds with my own
For Kun dpal, Dpal sprul’s success depended of course on his skills as a commentator, but also on the qualities gained by him through spiritual practice. As the continuation of the previous quotation illustrates, one of these qualities is impartiality, which not only provides a reason for the status accorded to the commentaries of the other scholastic traditions, but which is also postulated and valued in Dpal sprul’s own engagement with the text:76

During the time of these [earlier scholars], too, there was no taking sides [for or against] the system of the Gsar [ma] and the Rnying [ma traditions], or empty talk of refutation and ascertainty, that is, [mere] self-praise or disparagement of others; and he (i.e., Dpal sprul) explained [the text] according to the tradition of [individual] “commentator-scholars” (’grel pa mkhan po), without mixing in even a bit of talk that would have caused attachment or anger in specific contexts. He clarified their respective positions in an honest way (kha gtsang) and aimed at a correct [representation]; he steered [explanations] towards the essential point, did not fall into the extremes of too extensive or too condensed [an explanation], and based [his] explanations on [first-hand] experience. Whence even many Rab ’byams pas77 from the prayer festival (smon lam) in Lhasa spread flowers of rejoicing and bowed down respectfully [before him].

In short, Dpal sprul is depicted as the ideal instructor. Not only did he know the different scholastic traditions and was able to present them faithfully, but he also was versed in putting the contents of the BCA into practice. This last aspect of Dpal sprul’s teaching is indeed often presented as his particular “style.”78 His practice-oriented inclination not only is stressed in remarks made by his contemporaries,79 but also comes out in Dpal sprul’s own writing. We should not forget, after all, that it is a practice manual that stands out among the short treatises Dpal sprul authored in regard to the BCA. His Spyod ‘jug sgom rim, a guide that proceeds through the original text step by step,
draws out individual elements, and arranges them into a set of spiritual exercises, must be clearly seen as an attempt to make the BCA’s content immediately relevant to personal religious practice, rather than establishing a specific scholastic tradition. And it is probably not too farfetched to assume that exercises similar to the ones described in the *Sgom rim* also featured in the aforementioned seminars on the BCA.

From what we can gather from Kun dpal’s account, it seems to be a combination of all these features that account for the enormous success of Dpal sprul’s teaching activity. His zeal in spreading the teachings of this particular text meant that Dpal sprul was confronted with a highly diverse audience—diverse in terms of geographical origin, social standing (of both monastics and laypersons), and scholastic orientation. This required him to be able to adapt to the immediate context, and to cultivate a method of teaching that could satisfy a wide range of expectations. By focusing on making the content of the BCA accessible through spiritual practice, Dpal sprul managed not only to avoid the controversies that had evolved in Tibetan scholastic history, but also to make the text relevant to a wider audience. It is thus, as his biographer describes in the following colourful quote, that he was able to arouse unprecedented interest:

At places other than the great dialectical institutions, only the names of [texts] like the *Bodhicaryāvatāra* were known in earlier times, much less [their] meaning. Even having a copy [of the texts] was rare. But later, through the kindness of this venerable lama (i.e., Dpal sprul) alone, the teaching and study of Madhyamaka, the [*Five* Dharmas of Maitreya], the *Bodhicaryāvatāra*, *Sdom gsun*, *Yon tan mdzod*, etc. spread to every single place (sa lang rdo lang) in all three [areas]—upper, lower, and central—and it happened many times that the throats of little monks, from the age of ten onwards, were embellished by [the sound of reciting] the *Bodhicaryāvatāra*.

---

80 See my recent article “Performing Text as Practice: Rdza Dpal sprul’s Practice Manual on the *Bodhi(sattva)caryāvatāra*” (Viehbeck 2014a) for an overview of the content of the *Sgom rim* and its approach of focusing on practice-related aspects of the BCA.

81 Such seems to be true at least of the seminars conducted at Rdzogs chen Monastery, as described in Kretschmar 2004: 39 & 48.

82 *Dpal sprul rnam thar* 817.1–3: sngon dus mtshan nyid kyi chos grwa che ba ’dra ma gtags (B gtag) gzhon du spyod ’jug sogs mtshan tsam las don shes pa lta ci | glegs bams ’chang ba tsam yang dkon pa las slad nas rje bla ma ’di kho na’i drin gwis stod smad bar gsun kun tu | dbu ma | byams chos | spyod ’jug | sdom gsun | yon tan mdzod sogs kyi ’chad nyan sa lang (B om. lang) rdo lang du dar zhung btsun chung lo bca’ bcu pa yan ’chad kyi nang na spyod ’jug gis mgrin pa brgyan pa ches mang du thon pa dang |.
Clearly, Kun dpal does not hold back when it comes to praising the achievements of his master. And while one may wonder about the historical accuracy of the details of his depiction (Were the BCA and other texts really not known at all? Is it justified to ascribe the change to the effort of one single person?, etc.), Kun dpal’s account provides striking testimony for the image Dpal sprul’s peers had of him, and this in turn can provide some idea of how important a force he was in the dissemination of the BCA in that particular time.

_Allies & others: Dpal sprul and his socio-religious context_

Up to now we have approached the increasing interest in the BCA as a process of rising significance that was produced in social interaction among Dpal sprul’s followers. We may, however, also direct our attention in the opposite direction, to see what kind of reaction this development evoked amongst adversaries, and thereby also to explore the socio-religious context in which his activity needs to be placed. To follow Kun dpal’s lead in this regard would be to believe that Dpal sprul simply had no opponents. While this, again, is not surprising in an account that generally emphasises the amicable character of its main protagonist, precisely such assurances may have have been a sign of possible opponents. At various places in his _rnam thar_, Kun dpal insists that Dpal sprul’s activities were appreciated by members not only of his own school, but also of other traditions. Here it is highly interesting that Kun dpal singles out the Dge lugs side to demonstrate just how universally accepted Dpal sprul was: when Kun dpal emphasises, for example, that Dpal sprul was generally venerated by people of various social status—scholars, lamas, tulkus, ordinary monks, and even laypersons—of both the Gsar ma and the Rnying ma traditions, he makes an extra effort to point out that this included members of the Dge lugs school. He provides concrete examples of a supposedly controversial explanation being accepted against all odds. When, for instance, Dpal sprul propounded his explanation of the _Uttaratantraśāstra (Rgyud bla ma)_ in front of an assembly of Dge lugs scholars, who took a different approach to explaining this text, his charisma led even the highest scholars of this tradition to succumb. Elsewhere, Kun dpal points out that the _Kun bzang bla ma’i zhal lung_—probably Dpal sprul’s most famous work,

---

83 See *Dpal sprul rnam thar* 834.3f. and 843.5.
84 This work is more commonly known under the Sanskrit title _Ratnagotravibhāga_ and is one of the core texts attributed to Maitreya, which explores the _tathāgata-garbha_ doctrine.
85 See *Dpal sprul rnam thar* 803.6–804.3.
which introduces adepts to the foundational practices of the Klong chen snying thig system—was also very popular among members of the Dge lugs tradition throughout Tibet, and many are said to have kept a copy of it and to have secretly practised it.\textsuperscript{86} And in an earlier quote we have already heard that such was also the case with Dpal sprul’s explanations of the BCA, when “[...] even many Rab ’byams pas from the prayer festival in Lhasa spread flowers of rejoicing and bowed down respectfully” under the sway of Dpal sprul’s qualities and his practice-oriented teaching style.

Clearly, these passages indicate that if one were to look for adversaries, then these would most likely have been found among members of the Dge lugs school. This point of view is hardly surprising if we consider the larger context of Dpal sprul’s endeavours. The increasing religious activity in the nineteenth century in Eastern Tibet, of which Dpal sprul and his teaching of the BCA formed such a significant part, points in various ways to an atmosphere of tension between the Dge lugs school and other traditions. Dpal sprul and his contemporaries tended to have close ties with traditions other than the Dge lugs pa, the school which had gained not only religious but also political dominance in Central Tibet, and in most other culturally Tibetan areas as well. As a social group, Dpal sprul, his peers, and royal supporters in Khams may therefore have appeared to be a threat to Dge lugs pa supremacy, especially after the former had started to explore new areas of religious interest. As George Dreyfus has pointed out,\textsuperscript{87} it is precisely in the middle of the nineteenth century in Khams that members of the non-Dge lugs traditions began to promote a new system of education in the form of institutionalised bshad grwa— institutions that focused on textual exegesis—to counter the predominance of the debate-based system practised in the Dge lugs tradition. These institutions admitted only monks, and hence started building up a stronger body of monastics in circles that had previously consisted to a large extent of non-ordained and less formally integrated tantric adepts—another point that could have been seen as a strategy to meet the Dge lugs school on its own terms (of “mass monasticism”). Beginning with the foundation of the Śrī Simha bshad grwa at Rdzogs chen Monastery in about 1848,\textsuperscript{88} this model was implemented at various religious centres of non-Dge lugs traditions—for example, at Kaḥ thog (1906), Rdzong (g)sar (1918), Dpal yul (1922), Zhe chen, and Dpal spungs.\textsuperscript{89} The scholastic curricula at

\textsuperscript{86} See Dpal sprul rnam thar 816.3–5.
\textsuperscript{87} See Dreyfus 2005, esp. pp. 286ff.
\textsuperscript{88} According to Dreyfus 2005: 288; Kretschmar 2004: 27 judges that the foundation occurred in about 1842.
\textsuperscript{89} See Kretschmar 2004: 27.
these institutions focused on varying sets of Indian Buddhist core texts, particularly on śūtra material, a field that previously had been perceived as the domain of the Dge lugs school, and certainly was not the traditional stronghold of the more tantric-orientated Rnying ma. And while figures like Mkhan po Gzhan dga’ and Mi pham are most famous for having provided the educational standards for later generations, we should not forget that Dpal sprul, too, was a luminary of such institutions,\footnote{Kun dpal mentions, for example, that Dpal sprul taught at the Śrī Simha bshad grwa at Rdzogs chen Monastery; see Dpal sprul rnam thar 800.4f.} his teaching skills being indeed reflected in his writing. Among his many works we find “structural outlines” (sa bcad)—tools that are commonly used to aid oral exposition of the contents of texts—of many Indian works that display a form of scholastic interest quite similar to the one cultivated in the Dge lugs tradition.\footnote{The second volume of his collected works (Dpal sprul gsung ’bum) contains sa bcads for Vasubandhu’s Abhidharmakośa, Nāgārjuna’s Mūlamadhyamakārikā, the Abhisamayālāṃkāra, Uttaratantrāśāstra, and Mahāyānasūtrālāṃkāra (all attributed to Maitreya), and Mnga’ ris Paṇ chen Padma rnam rgyal’s Sdom gsum rnam nges. Apart from the preference for works connected with the tathāgatagarbha doctrine and the neglect shown to logical works, these texts exhibit an interest that covers the same principal topics as in the Dge lugs school, which traditionally focuses on the “five great treatises” (gzung chen bka’ pod lnga): the Abhisamayālāṃkāra attributed to Maitreya, Candrabhūtī’s Madhyamakāvatāra, Dharmākūtī’s Pramāṇavārttika, Vasubandhu’s Abhidharmakośa, and Guṇaprabha’s Vinayasūtra (see Dreyfus 2005: 276f.).} In particular, Dpal sprul’s engagement with the BCA must be certainly seen in this light. After all, if Kun dpal’s depiction in a previous quote holds true, then this text was commonly studied only in the “great dialectical institutions,” that is, in the institutions of and within the educational system promoted by the Dge lugs tradition, and it was only through the effort of Dpal sprul that it became more widespread in other environments.

In the face of these larger institutional and political tensions, which the BCA as a core text of monastic culture was part of, we easily understand why Kun dpal emphasises that no major opposition to Dpal sprul had arisen. And again, the practical orientation of Dpal sprul’s teaching style may be seen as a plausible reason for that. Explanations in the form of contemplative exercises, as found in Dpal sprul’s Šgom rim, clearly aim not only at a wider, more general audience, but also place the text within the framework of personal practice, thus putting it to some extent beyond the reach of, or making it immune to, the complexities of a more scholastic-oriented discourse.

This situation changed completely in the next generation. Though inspired by Dpal sprul’s explanations, his student Mi pham wrote a detailed commentary on the ninth chapter of the text, in which he
touches upon many of the philosophical intricacies that had emerged in regard to this topic in the different scholastic traditions. He thereby developed a specific philosophical stance for his own tradition that is formulated often in sharp contrast to, and even with direct criticism of, the Dge lugs school. As one might expect, he was heavily criticised by various Dge lugs pa scholars, and a debate on this matter was conducted over a period of almost thirty years through the medium of critical treatises. These events certainly heightened the significance of the BCA, not simply within the two principal parties, but in the Tibetan intellectual world as a whole. In fact, the production of the many commentaries specifically on the ninth chapter of the BCA in this period must be seen as a direct result of the controversies, as an attempt, that is, of their various authors to contribute their fair share to the debate and help to defend their own scholastic traditions. And although Mi pham and other later scholars were the focal point of the controversies, these certainly added to the reputation of Dpal sprul, who was regarded as the principal initiator within the Rnying ma tradition of the increasing engagement with the BCA.

Concluding remarks: a “Rnying ma” Bodhicaryāvatāra for modern times?

To be clear, Rdza Dpal sprul was certainly not the first Rnying ma scholar to plumb the depths of the BCA. Given the broad Tibetan interest in this work, it is safe to say that the text must have earlier been taught in Rnying ma circles, at least to some extent. Indeed, in Kun dpal’s rnam thar, we are informed that Dpal sprul received explanations of this text from three different persons: Rdo bla ’Jigs med skal bzang, who had recognised the young Dpal sprul as the reincarnation of the previous lama of Dpal dge; ’Jigs med ngo mtshar, a direct student of ’Jigs med gling pa; and Gzhan phan mtha’ yas ’od zer (1800–1855). These last two are also mentioned in the transmission lineage that Dpal sprul lists in his Spyod ’jug brgyud ’debs. This supplicatory prayer, however, does not trace the transmission of the BCA back to the “earlier translation period” (snga dar) exclusively through Rnying ma scholars (such is only the case for the period of the seventeenth century onward), but is rather similar to a transmission lineage defined by Bu ston in the fourteenth centu-

92 See Dpal sprul rnam thar: 790.4f.
93 See Dpal sprul rnam thar: 788.6
94 For an edition and translation of this text, see Viehbeck 2005: 20ff. The text is included in the fifth volume of the Dpal sprul gsung ’bum; see Spyod ’jug brgyud ’debs.
This suggests that the BCA was only of marginal importance in Rnying ma circles—which, if true, must have permitted Dpal sprul considerable freedom in his engagement with the text. Dpal sprul’s decision to promote an approach that focuses on religious practice, however, is not an utter novelty. Even prior to Dpal sprul, practice-oriented texts on the BCA were frequently produced, and the whole genre of blo sbyong literature, too, draws heavily on the BCA. This native Tibetan genre gained importance in all Buddhist traditions on the plateau, and surely must be seen as a model for Dpal sprul’s Sgom rim. In his efforts, this practical focus proved particularly successful; it enabled him to spread the teachings of the BCA in a variety of contexts that included laypersons and monastics from different traditions alike. While he clearly must be placed in the general context of an increasing interest in the scholastic matters of his own tradition, the actual formulation of such intricacies remained the task of his disciple Mi pham. With him, the Rnying ma tradition found its way to a definitive philosophical stance vis-à-vis the BCA, and his commentary earned the right to be placed next to the corresponding works of the Sa skya, Dge lugs, and Bka’ brgyud traditions. While important as signature moulds of a school’s thought, these commentaries speak to a very narrow scholarly audience, within traditional

---

95 See Saito 1997 for a discussion of the lineage listed by Bu ston, and Kretschmar 2004: 48ff., for a discussion of various transmission lineages of the BCA.

96 There is only one sgom rim text that was written on the BCA prior to Dpal sprul. This work, by Rong ston Shes bya kun rig (1367–1449), is so different from Dpal sprul’s exegesis that a direct influence can be excluded; see Rong ston sgom rim. There are, however, many other works that relate to the BCA in a practice-oriented way, of which I will mention just two examples from Dpal sprul’s time, produced by adherents of the Dge lugs school. Dkon mchog bstan pa’i sgron me (1762–1823) composed a text on the practices of “exchanging oneself and others” (parātmaparivārtana) and training in “equality of oneself and others” (parātmasamatā), exercises that are described in the eighth chapter of the BCA—practices also central to Dpal sprul’s Sgom rim (see Bdag gzhan mnyam brje sgom tshul). Mkhyen rab Bstan pa chos ‘phel (1840–1907/8) wrote a text that incorporates chapters one to three along with the tenth chapter of the BCA into a meditation manual relating to deities of the Bka’ gdams tradition. The author acknowledges a certain Grub dbang Dpa’ dge rin po che for having inspired the composition (see Dngos grub yongs ‘du’i snye ma 592.1 & 631.2); according to the entry in the TBRC database, this is an allonym of Dpal sprul Rin po che, but this attribution seems to be doubtful.

97 A general introduction to the history and features of this genre is provided in Sweet 1996. As I have described elsewhere (Viehbeck 2014a: 563ff.), a close relation of Dpal sprul’s text to the blo sbyong genre is indicated not only by similarities in both style and concrete contents, but also by the text’s own self-presentation. Indeed, it is referred to explicitly as a blo sbyong text in the dkar chag of Dpal sprul’s gsung ’bum (see Dpal sprul gsung ’bum, vol. 1, p.17.4-5).
settings where the teachings of the BCA are transmitted, most prominently, in monastic institutions.

In the process of becoming a leading player on the stage of globalised religions in the twentieth century, however, Tibetan Buddhism was confronted with an audience that harboured radically divergent expectations. Consisting mostly of laypersons, these devotees responded more positively to practical instructions of use in daily life and personal spiritual practice than to lengthy scholastic studies. It is this state of affairs that needs to be considered as a further factor for the widespread and lasting fame that Dpal sprul achieved. Free from scholastic intricacies and rich in practical outlook, his teaching tradition caters very much to the needs of a modern audience, and it is hence not surprising when recent popularisers of the BCA like the Dalai Lama speak very highly of Dpal sprul, as we have seen at the beginning of this paper. The outstanding position and universal acceptance of Dpal sprul’s role in the dissemination of the BCA must therefore be seen not only as the outcome of his engagement with the text, but also of the temporal conditions surrounding it—those of the nineteenth, as well those of the twentieth century.

Red Faced Barbarians, Benign Despots and Drunken Masters: Khotan as a Mirror to Tibet

Sam van Schaik

1. The Buddha on the Silk Road

The way of the Mahāyāna has been sought by the accomplished in the auspicious places where our Teacher placed his feet, such as the Vajra Seat, the Vulture’s Peak, and the Shady Willow Grove of Khotan.²

From Nub Sangyé Yeshé’s Lamp for the Eyes of Contemplation (early 10th c.)

At the beginning of the tenth century, a chaotic time for Tibet, the scholar Nub Sangyé Yeshé wrote these lines on the sacred places visited by the Buddha. Two of them are well-known throughout the Buddhist world, but the third is a little more obscure. Is the Buddha really supposed to have visited the Silk Road city of Khotan? According to the Khotanese, he did indeed, and the fact that this was accepted without any need of explanation by an educated Tibetan writer like Sangyé Yeshé shows how far the Khotanese understanding of Buddhism had penetrated into Tibet at this time.³

³ The Shady (lit: “Dark Red”) Willow Grove of Khotan (li yul lcang ra smug po) appears in a few other later Tibetan sources, including a pilgrims’ guide to the Khadrug temple, which includes a story of how the temple’s statues were obtained from Khotan by the Tibetan army, during the reign of Songtsen Gampo. See Sørensen and Hazod 2005: 62–64. Later, when the real location of Khotan had been forgotten in Tibet, the “Shady Willow Grove of Khotan” came to be identified with one of the tantric holy sites known as pīṭha – associated with parts of the body and with pilgrimage sites in India, The site associated with Khotan was Gṛhadevatā, a problematic site unlocateable in India. On the divine body, Gṛhadevatā represented the anus, a rather ignominious development in the

Sam van Schaik, “Red Faced Barbarians, Benign Despots and Drunken Masters: Khotan as a Mirror to Tibet”, Revue d’Etudes Tibétaines, no. 36, October 2016, pp. 45-68.
Khotan was the most important kingdom on the southern Silk Route, situated between the Taklamakan desert and the Kunlun mountain range. Two rivers coming down from the mountains brought the water that allowed cultivation of the land, also bringing down jade, the stone prized by the Chinese and the source of much of Khotan’s wealth. Khotan was thus ideally placed to take advantage of east-west trade, becoming in the process open to influences from a variety of cultures. Indigenous legends of Khotan’s early history emphasise both the country’s cultural plurality and its allegiance to Buddhism.

These legends do indeed tell of the Buddha visiting Khotan. In one version, he flies over from Vulture’s Peak to hover above the lake that covered Khotan in ancient times, before descending to rest upon a lotus throne in the middle of the lake. Other legends also brought to Khotan the bodhisattva Avalokiteśvara and the protector deity Vaiśravaṇa. Re-imagining themselves as the centre of their religious world became a surprisingly consistent feature of Khotanese culture. When Aurel Stein visited Khotan at the turn of the twentieth century, he noted of the Muslim Khotanese: “Pious imagination of a remarkably luxuriant growth has transplanted into the region of Khotan the tombs of the twelve Imāms of orthodox Shiite creed, together with a host of other propagators of the faith whose names are known to local legend only.”

It may be true, as Stein suggested, that the people of Khotan are a gens religiosissima particularly given to pious invention, but a solid Buddhist sangha was resident in Khotan from at least the third century AD, when the Chinese translator Zhu Shixing went to Khotan to look for the 25,000 verse Prajñāpāramitā sūtra. Zhu Shixing found the sūtra, settled in Khotan and never returned to China, dying there at the age of 80. He did send the text back with his disciples, and it was taken to several cities before being translated by a Khotanese monk and a Sinicized Indian monk in 281. This translation, known as The Scripture of the Emission of Rays, became very popular in China at the time.

---

4 The Prophecy of Khotan; translation and Tibetan in Emmerick 1967: 8–9. See also Thomas 1935: 89–90.
5 Stein 1907: 140.
6 The Annals of Khotan state that Buddhism was adopted by a Khotanese king in 86 BC. This is not entirely unlikely, although the evidence throughout Central Asia suggests that an established Buddhist sangha was not present till the 2nd or 3rd century AD.
Discoveries of Khotanese manuscripts in archaeological sites in the areas once ruled by the kingdom have shown that the major Mahāyāna sūtras were all known in Khotan. These were first written in their original language, then after the fifth century increasingly translated into Khotanese. The Suvarṇaprabhāṣottama sūtra seems to have been particularly influential, informing the notion of Khotan as a Buddhist realm under the protection of bodhisattvas and divine kings. Alongside this Buddhist material are many examples of Khotan's literary tradition, stories on Indic themes, like the trials of Rāma, and poems on the ever-popular subjects of nature and love. One unique text, the so-called Book of Zambasta marries the Khotanese poetic tradition with Buddhist subject matters in a lengthy and wide-ranging survey of Buddhism.

During the seventh to the ninth centuries, the Tibetans were sporadically active in Central Asia, fighting the Chinese Tang empire over strategically situated and highly profitable Silk Route oasis cities. The Khotanese first encountered the Tibetans in the seventh century as one among many threatening barbarian armies. After a brief period of Tibetan occupation in the late seventh century, Khotan was returned to Chinese rule, to be conquered again by the Tibetans at the end of the eighth century. After the final fall of the Tibetan empire in the middle of the ninth century, Tibetans and Khotanese met in Silk Road towns like Dunhuang in the role of Buddhist teachers and disciples, sharing their knowledge, and translating each other's religious texts.

We are fortunate to have a number of Khotanese Buddhist texts that the Tibetans translated into their own language preserved in the Tibetan canon and among the manuscripts from the Dunhuang cave. In addition, the Khotanese manuscripts from Khotan and Dunhuang provide us with evidence of a close relationship between Tibetans and Khotanese during the second Tibetan occupation of Khotan in the late eighth to mid-ninth centuries, and later at Dunhuang in the tenth century. These sources display some very different perceptions of the Tibetans, and because some of these Khotanese works were known in Tibet, they came to inform the way later Tibetan Buddhists constructed their own identities, reconciling the two aspects of their imperial history: conquest and religion.

---

8 A thorough study of the Khotanese Suvarṇaprabhāṣottama sūtra is contained in Skjaervø 2004a.

2. The Red Faced Ones

There will come a time when the Red Faced Ones seize the country, destroying and burning monastic groves, temples and great stupas. They will form the perverse aspiration to annihilate my teachings, come what may.

The Buddha, speaking in the Enquiry of the Goddess Vimala (7th c.)

Tibetan histories usually present the Tibetans before their conversion to Buddhism as a crude and unlearned race, without writing, law or the civilizing effect of the dharma, and possessing a number of unsavoury customs, including blood sacrifices and painting their faces red with vermilion before going into battle. The description of the Tibetans as Red Faced Ones (gdong dmar can) came to be a signifier of all of this pre-Buddhist barbarity, and of the civilizing effects of Buddhism. In the early tenth century the Tibetan scholar mentioned at the beginning of this study, Nub Sangyé Yeshé, wrote of his country, “these kingdoms at the borderlands, these lands of the Tibetans, the red faced demons.”

The idea of the Tibetans as barbarians is part of the narrative of their conversion to Buddhism, which sees the transformation from the barbaric to the religious as predestined, foretold by the Buddha himself in these words: “Two thousand five hundred years after my parinirvāṇa, the true dharma will be propagated in the land of the Red Faced Ones.” This prophecy was cited in one the earliest surviving Tibetan histories of Buddhism, that of the Sakya patriarch Sōnam Tsemo. It was then reproduced in many later works, becoming a standard topos in the history of Buddhism in Tibet.

Yet the prophecy’s provenance is unclear. It is ascribed to a text called The Enquiry of the Goddess Vimala (Lha mo dri ma med pa’i zhus, Skt. *Devī-vimala-paripṛcchā), yet no text of that title appears in the Tibetan canon. We do, however, have a text called The Enquiry of Vimalaprabhā (Dri ma med pa’i ’od kyis zhus pa. Skt. *Vimalaprabhā-
Given that in this text the Vimalaprabhā of the title is indeed a goddess, it seems that two titles may refer to the same text. *The Enquiry of Vimalaprabhā* is indeed full of prophecies, some of which do speak of the Red Faced Ones, but none of them is the prophecy quoted above.

The *Enquiry of Vimalaprabhā* is a Khotanese work that was translated into Tibetan, and found its way into the Tibetan canon. Cast in the form of a prophecy, it deals with the fears of the Khotanese Buddhists under the onslaught of the Tibetan war machine, fears that the structures and institutions of the dharma will be destroyed by Tibet's barbaric and cruel Red Faced Ones. The text has a heroine, the goddess Vimalaprabhā, who takes rebirth as the Khotanese princess Praniyata in order to save Buddhism in Khotan. 15 F.W. Thomas somewhat whimsically suggested that the *Enquiry of Vimalaprabhā* was the Khotanese Romance of its age and that Praniyata was Khotan's Joan of Arc. 16 Closer to home, the text belongs with the late sūtra literature, being a mixture of narrative, prophecies, rituals and dhāraṇī spells. Interestingly, many of the rituals address female concerns, including women's illnesses and childbirth.

The historical sequence of events laid out in the text has the Tibetans battling the Khotanese in alliance with the Supīya people. 17 In this battle the Khotanese king Vijayavikrama is killed and his daughter, Praniyata, forced into exile. The new Khotanese king Vijayakīrti is disparaged in the text, presumably because of his weakness in the face of the invaders. The hopeful scenario laid out in the text is that a neighbouring prince, Vijayavarman, will come to Khotan with the funds to pay off the Tibetans and take the throne. For the future security of Khotan, hope is placed in the Chinese. This aspiration is summarized in the following prayer:

May we come together with one accord and consecrate Vijayavarman to be the king of Khotan. When the Red Faced Ones

---

14 Tib. *Dri ma med pa’i ’od kyis zhus pa*. Q.835.
15 The Sanskrit name Praniyata is a reconstruction from the Tibetan *rab nges*. Many Khotanese had Sanskrit names; however, there are other ways of reconstructing the Sanskrit.
16 Thomas 1935: 171. More recently, the *Enquiry of Vimalaprabhā* has been discussed by Eva Dargyay (1988: 109–12), who suggests that its structure provides the basis for the later Tibetan stories of the emperor Songtsen Gampo; see the following section where I discuss further parallels between Khotanese texts translated into Tibetan and the legends of Songtsen Gampo.
17 Along with Thomas (1935: 156–157) I read Tibetan *sum pa* as Supīya. Khotanese texts confirm that the Supīya were a threat concurrently with the Tibetans (see Skjaervø 2004).
and the Chinese battle each other, may Khotan not be destroyed. When monks come from other countries to Khotan, may they not be treated dishonourably. May those who flee here from other countries find a place to stay here, and help to rebuild the great stūpas and monastic estates that have been burned by the Red Faced Ones. In order that this happens, may [Vijayavarman] pay the ransom for Khotan and mutually exchange brides with the Chinese.18

Here and elsewhere in the *Enquiry of Vimalaprabhā* we are told that the Tibetan forces burned down Buddhist structures, making life very hard indeed for the Buddhists of Khotan. In the passage quoted at the beginning of this section, the Buddha himself castigates the Tibetans for harbouring the perverse aspiration to destroy his dharma. The Khotanese survival strategies expressed in the text are: (i) the defeat of the Tibetan forces by the Chinese, and (ii) to buy off the Tibetan forces with a ransom. There is certainly no suggestion of any recourse to the Tibetans as fellow Buddhists.

The text leaves the situation unresolved, and the threat of the Tibetans hangs over it, clearly still present at the time of composition. Thus it was probably written in the years immediately before the first Tibetan conquest of Khotan, which took place in the second half of the 660s. The year 665 was particularly marked by conflict, as Khotan attempted to defend itself from attacks by Turks, Kashgaris and Tibetans.19 Given the *Enquiry of Vimalaprabhā*’s obsession with contemporary events and plans for their resolution, it was probably composed in the midst of this turbulent period.

Given this date, the portrayal of a Tibetan army lacking any respect for Khotan’s Buddhist institutions in the *Enquiry of Vimalaprabhā* is credible. Though there may have been some Tibetan interest in, and patronage of, Buddhism in the mid-seventh century, any such interest would probably have been restricted to the court, and any Buddhist monks resident in Tibet would have been

---

18 Q.835: 271a: /bdag cag thams cad kyi rnam par rgyal ba’i go cha ni ci nas kyang li yul gyi rgyal por ‘gyur bar thams cad sems pa thun pas lhan cig tu dbang bskur bar bgyi’o/ /gang gi tshe gdong dmar dang brgya[=rgya] ’thab par ’gyur ba de’i tshe/ ci nas li yul ’jig par mi ’gyur ba dang/ gang gi tshe yul gzhan nas li yul du rab tu byung ba rnam s ’ongs pa na der ci nas rim ’gro med par mi ’gyur ba dang/ yul gzhan nas der sems can bros pa de dag der gnas ’thob par ’gyur zhing gdong dmar gyis bsregs pa gang yin pa’i mchod rten chen po de dag dang/ dge ’dun gyi kun dga’ rab dag[=kun dga’ rwa ba] mchos[=chos] pa’i gregs byed par ’gyur par bya ba’i phyir li yul gyi blud ’jal ba dang/ brgya[=rgya] dang phan tshun du bag ma btong ba dang/ len par byed do/. 19 Beckwith 1987: 34.
foreigners. The attacks and occupations inflicted upon Khotan by its enemies (among which the Tibetans are counted), and the threat to Buddhism constituted by these depredations, are a theme that reappears in Khotanese literature, including *The Book of Zambasta* which, like the *Enquiry of Vimalaprabhā*, characterizes these political enemies as enemies of Buddhism as well:

There are Māṃkuyas, Red Khocas and Hunas, Cimggas, Supīyas, who have harmed our Khotanese land. For a time we have not been angry about this. When he hears, “The Buddha does indeed exist”, the unbeliever is angry.21

An interesting reference in the *Annals of Khotan* suggests that once Khotan had come under Tibetan rule, Buddhist institutions were no longer endangered, and may even have been supported. The text records the construction of a major new monastery — the first to be built in four generations — during the reign of the Khotanese king Vijayakīrti. It adds: “This monastery was built at the time when Khotan, being attached to the old Tibetan dominions, was governed by the Gar councilor Tsenyen Gungtön.”22 The Gar clan effectively ran the Tibetan empire after the death of the emperor (*btsan po*) Songtsen Gampo in the middle of the seventh century. This particular official is also mentioned in the *Old Tibetan Annals*. Here the entry for the year 695/6 states that he was executed for disloyalty, a killing that marks the beginning of reassertion of authority by the Tibetan emperor.23 In any case, the construction of the monastery is said to have taken place while Gar Tsenyen Gungtön was the governor of Khotan, during the first Tibetan occupation of the city.24Thus the

---

20 The early reception of Buddhism at the Chinese court offers a useful analogy – see Zürcher 1959.
21 *The Book of Zambasta* has been translated by Ronald Emmerick (1968). In Emmerick’s opinion (1992: 40), this work could not have been composed before the seventh century. It may thus be roughly contemporaneous with the *Enquiry*. The lines of the invaders, including the Tibetans, are found at chapter 15, verse 9 (pp.228–229 of Emmerick’s edition):

Z Fol.271v, vv.9-10:

(9) māṃkuya rrollo īndā heinā kho—ca u hunā cimgga supīya kye nā hvatāna-kṣiru baju—ttānda ttu ju ye gāvu ne oysde .
(10) balysāṣai āṣtā cī pyūṣde . varī oysde aṣṭaddā cau ka—rma cu tā yide hayṣgu ku jso aṣṭā sśāru mā vaska

23 See Dotson 2009: 98–99. In the *Old Tibetan Annals* the name is spelled Mgar Btsan nyen gung rton. See also Beckwith 1987: 56.
24 Based on an identification of king Vijayakīrti with a Khotanese king mentioned in Chinese source as having fled Khotan in 674, Hill (2008: 181) dates the founding of this temple to the period 670–674.
panicky tone of the *Enquiry of Vimalaprabha* seems to have been somewhat premature. Buddhism in Khotan would survive for another three centuries, during which time its connections with Tibetan culture would become even stronger.\(^{25}\)

3. Subjects of the Bodhisattva King

“Then a bodhisattva will take birth as the king of the Red Faced Ones and the practice of the true dharma will come to the land of Tibet.”

From *The Prophecy of the Khotanese Arhat* (9th c.)

The idea of the Tibetan emperors as emanations of bodhisattvas is equally, if not more, important in the Tibetan construction of a Buddhist self-image than the motif of the red faced barbarians. The idea of the bodhisattva king came to be associated primarily with the first imperial ruler, Songtsen Gampo (ruled early to mid seventh century), but probably not until after the end of the Tibetan empire. And while there is some early evidence from Dunhuang manuscripts of the ninth or tenth century of the Tibetans viewing Songtsen Gampo as a Buddhist king, most references to a Tibetan Buddhist king in these sources are to Tri Songdetsen (ruled 756–c.800).\(^{26}\) When Tibetan historians of the eleventh and twelfth centuries came to formulate and defend the notion that Songtsen Gampo was a bodhisattva, they seem to have turned to the Khotanese records. In some of the earliest Tibetan histories (including *The Pillar Testament* and *The Testimony of Ba*), Songtsen Gampo’s status as an emanation of the bodhisattva Ávalokiteśvara is established through a story about Khotanese monks.

The story involves the visit of two Khotanese monks to Tibet. The monks hope to see Avalokiteśvara face to face, and have been told that they may do so by travelling to Tibet and looking upon Songtsen Gampo, who is in fact Avalokiteśvara in person. Upon their arrival in

\(^{25}\) For a recent survey of the Tibetan administration of Khotan, see Zhu Lishuang 2013.

\(^{26}\) For example, Pelliot tibétain 149 links the activities of Tri Songdetsen to the events of the *Gandhāryāha sūtra*. IOL Tib J 466/3 pays homage to Tri Songdetsen as a Buddhist king, and places him in the company of the Buddhist kings Aśoka, Kaniska and Harsha. A poem in another manuscript, IOL Tib J 370, probably dating to after the fall of the Tibetan empire, places Songtsen Gampo alongside Tri Songdetsen, designating him a Buddhist king but not identifying him as a bodhisattva. Kapstein 2000: 56–58 discusses this same process in terms of the gradual re-reading of the early legislation of the Tibetan empire in Buddhist terms.
Tibet, the monks are shocked to see the execution, imprisonment and corporal punishment of criminals. Thinking that the bodhisattva of compassion could never countenance such cruelty, they resolve to go back to Khotan immediately. However, Songtsen Gampo, hearing of this, has them brought to the palace and shows himself to them in the form of Avalokiteśvara. Speaking to them in Khotanese, the king assures the monks that the atrocities they witnessed were just magical illusions created by the king to ensure the rule of law in his land. The monks are filled with faith; they fall asleep in the palace and wake up back home in Khotan.  

This story addresses doubts regarding the compatibility of the king’s enforcement of Tibet’s laws with his identity as the bodhisattva of compassion, Avalokiteśvara, by employing the common topos of magical illusion. In some sources the barbaric nature of the Tibetans is invoked at this point to justify the king’s use of these violent illusions in enforcing the law, showing again the close link between the cultural emblems of the Red Faced Ones and the bodhisattva king. The prominence of this story in the histories does suggest that by the eleventh century there were some doubts among Tibetan Buddhists regarding the compatibility of the Tibetan kings’ status as bodhisattvas, and the violence required of them as imperial rulers.

The Pillar Testament attributes the story of the Khotanese monks to a Prophecy of Khotan. A text of this name is to be found in the Tibetan canon and the Dunhuang manuscripts. Like the Enquiry of Vimalaprabhā, it was probably translated into Tibetan from Khotanese. In the Dunhuang manuscript version, it has the longer

---

27 The version in The Testimony of Ba is briefer, though not necessarily earlier (see Wangdu and Diemberger 2000: 32–33). The version in The Pillar Testament (302–305) is more extensive and contains most of the details found in later versions. The different versions of the story are discussed in Sørensen 1994: 303, 584. See now also the discussion of these versions, and the different presentations of the story therein, in Mills 2012.

28 In the earlier version of The Testimony of Ba the magical illusion explanation is absent. If this is an earlier version, it may be that the king’s status as Avalokiteśvara was originally considered sufficient to allay doubts regarding his oppressive penal practices.

30 Kapstein 2000: 51–52 suggests that no such incompatibility was felt by Tibetans during the Buddhist period of the Tibetan empire. This may well be true, and the discomfort may be directly linked to the gradual elevation in Tibetan histories of Songtsen Gampo to the status of a personified bodhisattva of compassion.

31 The Pillar Testament (p.305.1–4) gives two sources, a Prophecy of Khotan (Li lung bstan) and a Prophecy Regarding the Great Compassionate One King Songtsen Gampo (Rgyal po srong bstan sgam po thugs rje chen po lung bstan pa). No text corresponding to the second title has been found.

32 See Appendix.
title *Prophecy of the Khotanese Arhat*. Yet the story of the Khotanese monks' encounter with Songtsen Gampo is not found in any of the versions of this text. Perhaps this is why many later Tibetan histories, following the *Testimony of Ba*, change the attribution of the story slightly to a *Great Prophecy of Khotan*. While there may have been a *Great Prophecy of Khotan*, now lost, it is perhaps more likely that the word *Great* was added to the title when it was realized that the story was not to be found in *The Prophecy of Khotan*.34

Yet the attribution of the story of the two Khotanese monks does have a parallel in the *Prophecy of the Khotanese Arhat*. The narrative of the prophecy is primarily concerned with the flight of a group of monks from Khotan to Tibet, where they are welcomed and supported by Tri Songdetsen's father Tri Detsugtsen (ruled 712–c.754), and in particular, by his Chinese queen, who may be identified as Jincheng Gongzhu 金城公主. The prophecy seems to have been written in response to a genuine calamity that forced a group of monks to seek refuge in Tibet. Adopting the narratives of the end of the dharma that are found in many earlier Indian sources, in particular the *Candragarbha sūtra*, the *Prophecy of the Khotanese Arhat* ties in this local calamity to the end of the dharma itself. 35

The *Prophecy of the Khotanese Arhat* credits the Chinese queen with building monasteries for the monks, who may well have constituted a genuine Buddhist sangha in Central Tibet for several years.36 It goes on to describe how this pleasant period came to an end when a disease killed the queen, along with many Tibetans. The epidemic was taken as a sign that the local deities were unhappy with the Buddhist presence in Tibet, and the foreign monks were expelled. The epidemic seems to be a genuine historical event, and the *Old Tibetan Annals* mentions the death of the queen in the year 739/40.37

This narrative appears in three overlapping texts (see Appendix) which differ in certain details, but agree in the broad outlines of the story. Modern scholarship has tended to take this narrative as derived from a genuine series of historical events. However, the

33 In *The Testimony of Ba* it is just *The Great Prophecy* (Lung bstan chen mo).
34 This is the conclusion that Per Sørensen arrived at (see Sørenson 1994: 584). Similarly, we find ‘great’ versions of several tantras that seem never to have existed as texts, but function as a notional repository and source of material not found in the extant tantra.
35 On the Kauśāmbī prophecy of the end of the dharma and its various versions, see Nattier 1991.
36 The *Testimony of Ba* also mentions the temples built by Gongzhu, but does not contain the narrative of the refugee monks. See Pasang and Diemberger 2000: 34–35.
37 See Dotson 2009: 121. Roberto Vitali (1990: 11) argues that death of the queen was not caused by epidemic, but by political intrigue.
assumption in recent studies of this episode that these were Khotanese monks has recently been questioned by Antonello Palumbo. This seems reasonable, given a close reading of the narratives. The *Prophecy of the Khotanese Arhat* implies that at least some of the monks were not Khotanese, referring to their arrival in Khotan from Anxi (‘an se) and Kashgar (shu lig). The *Religious Annals of Khotan* implies that all of the monks were foreign refugees, stating that they came to Khotan from the “four western garrisons” (*stod mkhar bzhi*).38

Two versions of the narrative state that the foreign monks stayed in Tibet for three or four years, which, given the death of the Chinese queen in 739/40 would place their arrival in Tibet in 736/37.39 As Palumbo points out, the year 736 also saw the expulsion of large numbers of foreign monks from China, at the order of the emperor Xuanzong 玄宗, apparently due to a suspicion that a foreign Buddhist monk had been involved in an attempted coup earlier in the same year. Those monks classified as foreigners were generally from Indo-Iranian backgrounds.40 The arrival of these monks in Khotan in 736/7, travelling from the east, may well be connected to this imperial edict. As Khotan was then under Chinese rule, the same edict would have applied there, precipitating their departure from the Tang empire to Tibet and elsewhere. It may be significant that the monks are described in some versions of the narrative as *lho bal*, a term equivalent, as R.A. Stein has shown, to the Chinese *fan* 番 “foreigner.”41

The *Prophecy of the Khotanese Arhat* also contains a passage about the Chinese emperor’s support of Daoism resulting in the immigration to Tibet of many monks from China.42 Xuanzong’s support for Daoism over Buddhism is well known; thus if this passage is not a further reference to the expelled foreign monks, it may suggest that a number of Chinese monks travelled separately to Tibet to enjoy the patronage of Gongzhu. In any case, for the Tibetans the arrival of these foreigners in the 730s was probably the largest

---

38 See Thomas 1935: 313. The Tibetan is *stod mkhar bzhi*. Thomas doubts that the phrase refers to the four garrisons, but only based on the preconception that this was a local Khotanese affair. Vitali (1990: 8) refers to this passage, but continues to refer to the refugee monks as Khotanese.

39 The event is discussed in detail in Kapstein 2000: 41–42.

40 I am grateful to Antonello Palumbo for sharing his unpublished work on this episode. Palumbo (forthcoming) also suggests that certain well-known monks who were close to the emperor, such as Amoghavajra, were temporarily exempted from this edict, but were nevertheless forced to leave by 741.

41 Stein 1983. See also *lho bal* see Vitali 1990: 7–8.

42 IOL Tib J 598, f.4b.1: kong co gdong dmar gyl yul du ’ongs pa’l ’og tu rgya’l rgyal pos de’u shl’i chos spyod pas rgya’l dge slong rII gdong dmar gyl yul du ’ong bar ’gyur ro/. Translation in Thomas 1931: 84.
single influx of Buddhist monks that the Tibetans had yet encountered. The impact of this movement on the development of Buddhism in Tibet was significant. After the epidemic, fears that the old gods of Tibet had been angered caused a suppression of Buddhism by the elite Tibetan clan leaders. Members of this elite also conspired to assassinate Tri Detsugtsen; so when his son Tri Songdetsen came to power, opposition to Buddhism was embodied in the same people who opposed his own royal line. Tri Songdetsen brought the centre of power in Tibet back to his own family line, and aligned himself with Buddhism, making it the official religion of Tibet.43

In the context of this narrative, and in contrast to the Enquiry of Vimalaprabhā, the Prophecy of the Khotanese Arhat presents the Red Faced Ones as idealized patrons of Buddhism.

At that time the king of the Red Faced Ones will use their great power and strength to seize and hold numerous countries belonging to others. Then a bodhisattva will take birth as the king of the Red Faced Ones and the practice of the true dharma will come to the land of Tibet. Scholars and the sūtric scriptures will be brought from other countries, and then temples and stūpas will be built and the two kinds of sangha established in the land of the Red Faced Ones. Then everyone, including the king and ministers, will practice the true dharma. Khotan too, under the power of the king of the Red Faced Ones, will work to spread the true dharma, and the property of the three jewels—the stūpas and so on—will be honoured, and be made to increase rather than diminish.44

The passage states clearly the concept of a bodhisattva (though which bodhisattva is not specified) manifesting as the king of Tibet. Here we have a link to the story in the Testimony of Ba, though neither the

43 The suppression of Buddhism is recounted in a pillar inscription by Tri Songdetsen. In the inscription, the ministers are said to have referred to Buddhism as the religion of ‘foreigners’ (lo bal). See Richardson 1998: 93, 97. Richardson’s translation of lo bal as “Nepal” here is almost certainly inaccurate.
44 IOL Tib J 598: 1b.5: de’i tsho gdong dmar gyI rgyal po dbang dang mthu [2a] che bas gzhan gyI yul khams mang po phrogs nas ’dzIn par ‘gyur ro/ /de’i dus su byang chub sems dpa’ gclg gdong dmar gyI rgyal por skye ba blangs nas/ bod khams du dam pa’I chos spyod par ‘gyur bas/ /rgyal khams gzhan nas chos kyi mkhan po dang gsung rab mdo sde la stogs pa spyan drangs nas/ gdong dmar gyI yul du gtsug lag khang dang mchod rten mang du brtsogs te/ /de’i dun sde gnlys btsugs nas/ rgyal po dang blon po la stogs pa khor ril kyi dam pa’I chos spyod par ‘gyur ro/ /li yul gyang=kyang] de’i tsho gdong dmar gyI rgyal po’i ris su dbang bar ‘gyur bar dam pa’I chos rgyas par spyod cing mchod rten la stogs pa dkon mchod gsum gyI mnga’ ris kyang myI dbrl ste rgyas par ’dzugs shing mchod par ‘gyur ro/. The translation here is my own, based on the oldest Dunhuang manuscript containing the text. See also Thomas 1935: 79.
The name of the Tibetan king nor the identity of the bodhisattva are stated. The passage is supposed to describe a king seven generations before Tri Detsugtsen. Some, pointing out that the number seven may be more a symbol than an exact calculation, have identified this bodhisattva king as Songtsen Gampo, the emperor who came to be seen as an emanation of Avalokiteśvara. In any case, we certainly have here one of the first literary examples of the movement toward the transformation of the figure of Songtsen Gampo into a bodhisattva king, which became fully expressed in the Testimony of Ba and the Pillar Testament.

Along with the literary sources, there are several Khotanese manuscripts dating from the second Tibetan occupation of Khotan in the first half of the ninth century which contain references to the Tibetan “masters” of Khotan. Some of these speak of the Tibetans in glowing terms. One such document concerns an invitation extended by the Khotanese king to two reverend monks, to stay for a year at a Buddhist temple at Mazar Tagh. It begins with a celebration of the king’s merits, stating:

There is abundance here in everything because of the merits of the king, as well as because of the Tibetan masters, who are guarding this land of Khotan.

Among the Tibetan manuscripts found at the sites of Endere and Mazar Tagh, there are several Buddhist texts and documents that deal with Buddhist matters. From Endere, we have a Mahāyāna prayer, fragments of the Śālistamba sūtra and a substantial manuscript of the Saddharmapuṇḍarīka sūtra. From Mazar Tagh we have more fragments of Buddhist texts, and also several wooden slips (usually used for brief communications) with messages involving monks and temples. These manuscripts suggest that when the Tibetans

45 The dates here are based on Beckwith 1987.
46 This is the tentative conclusion of Thomas (1935: 75) and Vitali (1990: 7). Vitali points out how often the number seven occurs in the text. In any case, the succession of the Tibetan monarchy went through a difficult period prior to and during the reign of Me Agtsom, which makes the reckoning of generations somewhat uncertain (see Beckwith 1983). Due to the eclipse of the Tibetan emperors during the second half of the seventh century, it would have been difficult for outsiders to calculate the generations between Songtsen Gampo and Tri Detsugtsen.
47 The king is named as Viśa Kīrta (Skt. Viśvakīrta), whose reign dates are reconstructed by Skjaervø as 692–706+.
49 The Śālistamba sūtra fragments are Or.8212/168 and Or.15000/271, 370, 434, 435, 436 and 437 (see catalogue entries and reproductions in Takeuchi 1998). The Saddharmapuṇḍarīka sūtra manuscript is in the National Museum of Stockholm,
returned to Khotan, a century after they had been forced out of the
previous occupation, their engagement in Buddhism and support of
Buddhist institutions led to their being lauded as enlightened
guardians by the local Buddhist sangha.

4. Wandering Buddhists

“Bring a bowl! The Tibetan teacher has become ill.”
From a Khotanese-Sanskrit colloquy (10th c.)

The final stage of cultural relations between the Khotanese and
Tibetan Buddhists can be traced through the manuscripts found in
the Dunhuang cave. A substantial Khotanese population was
resident in the Silk Route city of Dunhuang during the tenth century,
as were a number of Tibetans. The Sanskrit-Khotanese colloquy
from which the exclamation quote above is drawn is written on the
back of an official letter from Viśa Śūra, the king of Khotan, to his
maternal uncle in Shazhou (Dunhuang) dated to 970. Thus we can
date the colloquy to the years between 970 and the closing of the
library cave in the early eleventh century, as the letter occupies the
full length of the scroll and is clearly the primary text here.

The first conversation in the colloquy concerns pilgrimage; the
pilgrim being questioned is from India and has come via Khotan. His
destination would have been Wutaishan, famed throughout the
Buddhist world as the dwelling-place of Mañjuśrī. Later the
conversation moves on to the subject of a travelling Tibetan teacher:

A foreign monk has come.
Why has he come?
I don't know.

and has been studied in Karashima 2005. Buddhist fragments from Mazar-Tagh
include Or.8212/961, Or.8212/1911 and Or.15000/76. Wooden slip documents
mentioning monks or temples include IOL Tib N 1844, 1573, 1851, 1875, 1894.
Furthermore IOL Tib N 1647 contains a mantra, and IOL Tib N 2189 seems to
reference a Vajrayāna ritual.

50 On the Khotanese population at Dunhuang see Kumamoto 1996 and Takata 2000.
On the continuing influence of Tibetan language and Buddhism after the end of
Tibetan rule in Dunhuang, and into the tenth century, see Takeuchi 2012.

51 This bilingual text was translated and transcribed in Bailey 1938: 521–543. A more
recent study is Kumamoto 1988. The letter was first transcribed in and translated
129. While I have in the past referred to this text as a “phrasebook” I now prefer
to characterise it as a colloquy as its purpose is more likely to have been
educational. The Sanskrit of the colloquy is highly irregular, but remains closer to
Sanskrit than any known Prakrit.
What does he want.
It's a Tibetan monk.
Liar! I'll ask him.

Ask!

Many of the following lines concern some kind of strife. It seems that the Tibetan teacher may not be very well-behaved:

He is dear to many women.
He goes about a lot.
He makes love.
...
Bring a bowl! The Tibetan teacher has become ill.

It is probably unwise to try to extract a narrative from these disconnected phrases, but it is interesting that the Tibetan teacher is associated with making love to numerous women. In the genre of Buddhist tantra known as Mahāyoga, which is represented in many Tibetan manuscripts from Dunhuang, sexual practices are discussed under the euphemism ‘union’ (sbyor ba). One of these Mahāyoga manuscripts defines ‘union’ as sexual intercourse with many women, mentioning the need to avoid criticism by using coded language:

Indiscriminate [union] is the greatest path of the three reams. In this case, if one is engaging in union with all women in accordance with the ritual manuals, one should avoid criticism by using vajra speech.

Criticism of this kind of behaviour was a common theme in Tibetan writings by the late tenth century. For example, in a famous edict, the ruler of the kingdom of Gugé, in Western Tibet, wrote:

False mantras bearing the name of the Dharma have spread through Tibet,
Bringing disaster upon the kingdom in the following ways:
As ‘liberation’ spreads, goats and sheep are roped up and killed;

---

52 Pelliot 5538: (93) agaduka baikṣū agatta / ḍṇāvaka āśí a (94) kīma prratya agatta / āśta keṇa a (95) na ḍsanamī / na bva’i (96) kīma kṣamattī / āśtū-v-ai kṣamai (97) bauta baikṣū / ttāха́’hta āśī (98) mrraiśavadī / yālajsa (99) prraitsamī / pvaitsūmna (100) praitsa / pvaise.

53 Pelliot 5538: (107) prrabhūta nārī ṭrīya / pha’rāka maṇḍī brrai (108) prrabhatta attatṣamuttaṭa satsattī / pharāka hāṣṭa vāṣṭa jśevai (109) maithūṇadarma karaiyattī ... (117) kṣaṭa bajana anīya / hamāka vā bara (118) baṭa baikṣū rāga bābīya / ttāha’hta āśīchanai hamye.

54 Pelliot tibétain 656, ll.47–49: phyal ba ni khams gsum dag kyi lam mchog/ na/ bud myed ci snyed yod pa rnam/ thams cad cho ga bzhin sbyor na/ rdo rje gsung kyis myi smad do zhes ‘byung ba’o/
As ‘union’ spreads, the different classes of people are mixed up.55

The Khotanese colloquy certainly suggests that by this point in time itinerant Tibetan teachers had acquired something of a reputation. Yet not all Tibetan teachers attracted this kind of criticism. Another Khotanese manuscript from Dunhuang reflects, in much more positive terms, the fame of a Tibetan teacher:

To the great teacher, the eyes of the Buddha, who sees lowly ones like us with the eyes of wisdom. Although we do not share a language, and we are not skilled in the Tibetan language of the lords of the dharma, the local rulers, please do not break your commitments. This is addressed to the great master: I respectfully enquire whether you are well, and in particular whether your precious and noble body has become fatigued. We humble ones have ridden to see the face of the Noble Mañjuśrī and are returning to [the land of] Śākya, the god of gods. May we be permitted to come and make an offering to all who have seen the face of Mañjuśrī?56

The letter itself is in Tibetan transliterated into the Khotanese script. It was probably written by a Khotanese with an understanding of spoken Tibetan, but without ability in written Tibetan. The letter follows the polite conventions of that we see in other Tibetan letters of the tenth century. Given that this letter refers to Tibetan as the language of the Buddhist masters (chos rje) and secular rulers (sa bdag), the letter may have been intended for the Tibetan kingdoms to the southeast of Dunhuang.57 What we have here is probably a copy — it is appended to a long dhāraṇī text, written on the back of a

56 This translation is from Pelliot khotanais 2782 (ll.73–80). Note that my translation here differs greatly from the one in Bailey 1973. The following is my own reading of the Khotanese transliteration which in most places follows that of Ryotai Kaneko (which was published in Bailey 1973):

om slob dpon chen po la sangs rgyas kyi spyan bdag cag ngan pa spyan ras la mthong[/] skad myi ’thun yang chos rje dpal sa bdag bod kyi skad myi rtsal slob dpon thugs dang myi ’gal[/] slob dpon chen po yi zha snga nas[/] thugs bde ’am myi bde[/] khyad ’phags pa’i sku gces pa’i snyun nam gsol zhi’ng mchis[/] bdag cag ngan pa ’phags pa’jam dpal kyi zhal mthong du chibs las[/] shakya bla’i lha slar don mchis[/] ’phags pa’jam dpal gi zhal mthong kun phul du phyin bsnyal te chogs sam[/]

57 The most relevant group of letters are those written on behalf of a Chinese pilgrim visiting Tibetan monasteries in primarily Tibetophone areas of Hexi and Qinghai in the 960s. These are discussed in van Schaik and Galambos 2011. See also Takeuchi 1990.
Chinese sūtra scroll. This fascinating multilingual manuscript also contains a few lines of Uighur writing.

The Khotanese phrasebook and this letter suggest a milieu in which Khotanese and Tibetan Buddhists met frequently, and shared an interest in the Vajrayāna practices that were very popular during the tenth century. Further evidence of this shared interest is a series of manuscripts from Dunhuang written in Tibetan, but numbered in Khotanese; suggestive of a Khotanese scribe well-versed in Tibetan. These are IOL Tib J 338 (on stūpas), 340 (on water offerings), 423, 424, and 425 (on the homa ritual). The contents of these manuscripts indicate an interest in ritual and Vajrayāna, shared with the scribes of other Tibetan manuscripts dated to the tenth century.58

Finally, it is in this context that we should understand the apparent popularity of the Prophecy of the Khotanese Arhat at Dunhuang, where it is found in several manuscript versions. This work valorises both Khotan and Tibet as Buddhist chosen lands, and draws them together with the story of the refugee monks. It is quite likely that these texts were translated into Tibetan in Dunhuang, where Khotanese and Tibetan Buddhists mingled. The statement by Nub Sangyé Yeshé at the beginning of this article that the Buddha taught the Mahāyāna in Khotan is eloquent testament to the general acceptance among Tibetans at this time of Khotan’s central place in the Buddhist world. For Tibetans, Khotanese texts like the Enquiry of Vimalaprabhā and the Prophecy of the Khotanese Arhat were elements from which they could begin to form their own Buddhist identity, when they began to put together the first “histories of the dharma” (chos 'byung) in the eleventh century.59 In particular, the images of the barbaric Red Faced Ones and the subjects of the bodhisattva king become a fruitful symbolic realm in which Tibetan Buddhist historians could conceptualize the conversion of their own culture to Buddhism.

*  

58 The Khotanese numbers on these manuscripts are discussed in Maggi 1995. On the forensic analysis by which the manuscripts have been identified as being written by the same scribe, see Dalton, Davis and van Schaik 2007.

59 As well as the Prophecy of the Khotanese Arhat, some other early Buddhist historical works have been found in Dunhuang (see van Schaik and Iwao 2008; van Schaik and Doney 2007). These are the kind of texts that the first Tibetan Buddhist historians would have used to construct their narratives. The scribe who wrote the manuscript version of the Prophecy in IOL Tib J 597 also wrote other works of Buddhist history (see van Schaik and Doney 2007: 180–181).
APPENDIX I

The Enquiry of Vimalaprabhā, The Prophecy of the Khotanese Arhat, and related texts

1. The Enquiry of Vimalaprabhā (Dri ma med pa’i ’od kyis zhus pa) is found only in the Bka’ ’gyur (P.835). It was probably written in or near Khotan, around the time of the Tibetan conquest of Khotan in the late 660s. F.W. Thomas argued that the original was probably written in Sanskrit (Thomas 1935: 140–141). The date of its translation into Tibetan is not known, but may have been around the same time as The Prophecy of the Khotanese Arhat, during the first half of the ninth century.

2. The Prophecy of the Khotanese Arhat (Li yul gyi dgra bcom pas lun bstan pa) appears in several Dunhuang manuscripts:

   • IOL Tib J 597 (probably tenth century, copied from IOL Tib J 598).
   • IOL Tib J 598 (from the ninth or tenth century).
   • IOL Tib J 601 (perhaps from the ninth century).
   • Pelliot chinois 2139 (a Chinese translation made by Go Chödrup in 848).

Thomas believed that this text was composed in Dunhuang itself, probably in the Tibetan language (Thomas 1935: 42–43); this has been disputed by Jan Nattier who argues that it represents a translation from the Khotanese (1990: 189–190). R.A. Stein has argued that the presence of Chinese transcriptions and loan-words in the Tibetan text indicates that its redaction was based on the Chinese translation, done perhaps by Chödrup himself (Stein 1983: 217).

3. The Bka’ ’gyur contains a Prophecy of Khotan (P.5699: Li yul lung bstan pa), which includes the text of The Prophecy of the Khotanese Arhat, along with a history of Khotan; the latter part of the text is also known independently as The Annals of Khotan. There has been some disagreement about whether to view The Prophecy of the Khotanese Arhat and The Annals of Khotan as separate texts or a single entity. Thomas (1935: 73–74) considered them separate, while Emmerick (1967) presented them as a single text. Geza Uray, though originally of the same opinion as Emmerick, later came to agree with Thomas
I have followed Thomas's view here. There has also been some disagreement over whether the canonical versions represent different versions of the same text (Thomas 1935: 42, 59–51) or a different translation of the Khotanese original texts (Nattier 1991: 189). Working from the Bka’ ‘gyur texts without reference to the Dunhuang manuscript versions, John Hill (1988: 184–5) suggests that *The Prophecy of Khotan* was composed in 746, adding rather fancifully “quite likely by one of the monks who had fled to central India.” Hill suggests a similar dating for *The Prophecy of the Khotanese Arhat*.

4. The Bka’ ‘gyur also contains a text called *The Prophecy of the Arhat Saṃghavardana* (P.5698: Dgra bcom pa dge ‘dun ’phel gyis lung bstan pa), which is very similar to *The Prophecy of the Khotanese Arhat*, though the narrative of the monks’ stay in Tibet is somewhat expanded here. Thomas (1935: 42–43) argues that the *Prophecy of the Arhat Saṃghavardana* is far older than *The Prophecy of the Khotanese Arhat* because the title of the former appears in the *Enquiry of Vimalaprabhā*. However, the text as we have it seems more like a later, expanded version of the *The Prophecy of the Khotanese Arhat*, as Nattier has pointed out (1991: 194).

5. Finally, *The Religious Annals of Khotan*, found in the unique manuscript Pelliot tibétain 960, is another prophecy text, not identical nos.2–4 above, but overlapping with them in various places. The colophon states that this is a “new” translation by the mkhan po Mo gu bde shil. As Thomas (1935: 109–110) has noted, this name appears in the *Annals of Khotan*, where it is stated that respected ascetics are given the name Mo rgu de shi. Here also is given a popular Sanskrit etymology mārgadeśī. Nattier (1991: 199) prefers mārguapadesā. The text itself may have been redacted in Tibetan from other Khotanese and Tibetan versions of the story. Strikingly, it is the only version of this narrative that does not end with the destruction of the dharma, and Nattier (1991: 203–204) suggests that it may represent the latest version of the Kauśāmbi story, in which the sad tale of the destruction of the sangha is no longer presented as a prophecy, but as a limited cataclysm that happened in the past, and can be avoided in the future. Note however, that the handwriting style of Pelliot tibétain 960 resembles other Tibetan manuscripts from the first half of the ninth century, suggesting that this may be the oldest extant manuscript copy of any of the Khotanese prophecies. The manuscript has been proofread, and we also see at the end the

Women Returning from Death: The Gendered Nature of the Delog Role

by Alyson Prude
(Georgia Southern University)

This essay explores the relationship between delogs (‘das log) and women and reflects on what this connection adds to current understandings about gender stereotypes and religious roles available to Tibetan Buddhist women in the Himalayas.

But first, what is a delog? Delogs are typically defined as people who have died and returned to life. As opposed to a seconds or minutes-long near-death experience, delogs usually lie dead for several days, sometimes for a week or more. When they miraculously return to life, they report having toured the postmortem realms (bar do), witnessing the consequences of negative deeds and being charged with messages to deliver to the human world. Because scholarship to date has focused on textual narratives, delog “biographies” intended to inspire ethical behavior and devotion to the Buddhist Three Jewels, we currently know very little about the lives of these extraordinary people.\(^1\) Here I present results from an ethnographic study of contemporary delogs which reveals a markedly different picture from that found in textual sources. The fact that a delog’s first death experience often initiates a continuing series of otherworldly excursions, for example, has been noted by Pommaret in the case of Bhutanese delogs but has yet to be recognized as a common feature of delog practice.\(^2\) Studies of delogs that are based solely on written records also fail to recognize that the majority of delogs are women.

This research is based on fieldwork begun in 2004 and concentrated in north-central Nepal and the Sichuan and Qinghai Provinces of China between January 2008 and October 2009.\(^3\) During this time, I

---

2 Pommaret 1989.
3 I am grateful to the Fulbright-Hays, University of California Pacific Rim, and Council of American Overseas Research Centers programs for supporting this research.

was able to collect biographical information about twenty-four living or recently (within the past twenty years) deceased Tibetan and Nepali delogs. Among these, nineteen were female and five male. The remarkably high percentage of women in the delog role was reflected in popular perceptions of delogs. In Nepal, for example, a well-traveled Hyolmo trekking guide told me that Hyolmo Buddhists do not use the word ‘delog’; they always say ‘delogma’ (the ‘ma’ marking the noun as feminine) “because all delogs are women.” Likewise, in eastern Tibet, those who had met or heard of delogs agreed that delogs can be male as well as female, but few people with whom I spoke could cite examples of male delogs.

Women’s predominance as delogs is significant because there are few Tibetan Buddhist religious roles occupied solely or mainly by women. Yet since the delog role is not one that can be taken up at will but demands that a person die and return to life with information about other realms, all in the presence of witnesses for verification, how is it that Himalayan women undergo this extraordinary experience with greater frequency than men? The answer to the gender riddle does not seem to be a medical disorder to which the female body, as understood by modern Western medicine, is more susceptible. Literature about near-death experiences in Western and Japanese cultures indicates than women do not report near-death experiences more often than men. Neither are women more likely to suffer diseases that can cause delog-like symptoms, such as epilepsy or Klein-Levin syndrome (which mainly affects males). Instead, the connection between women and delogs lies in Himalayan Buddhist understandings of how and why a person returns from death, tantric ideas about male and female bodies, and the ways gender affects one’s social and religious possibilities in the Buddhist Himalayas.

Note: The following analysis treats women and men as homogenous groups, thus reifying categories that should be problematized. This is not oversight. Essentialized notions of women and the feminine persist in Himalayan Buddhist societies where biological sex and gender are viewed as inseparable. It is also important to note that the interpretations described here are largely male views, a fact that may be explained by the nature of the question. Examining the

---

4 Bhutanese delogs do not figure into these numbers. Pommaret (1989) reports a similar ratio of female to male delogs in Bhutan: four females and one male.
5 Bailey and Yates 1996; Carr 1993; Lundahl 1982; Osos and Haraldsson 1977; Sabom 1982.
7 As Gyatso and Havnevik point out, “Even a bare physical or anatomical definition of woman as a sex in Tibetan history, as contained in traditional medical descriptions, is pervaded by gender and other loaded conceptions” (2005: 4).
relationship between delogs and women demands critical thinking, theorizing, and speculation, activities in which Himalayan women demonstrate less confidence. As Makley noticed in Labrang, asking nuns to participate in taped interviews “clashed with nuns’ own sense of illegitimacy as authoritative exeges” and “challenged their ‘structural muteness.’” Makley sought to overcome this obstacle by soliciting stories and gossip from nuns, as opposed to philosophical explanations. Similarly, as opposed to issues of how and why, which women chose to avoid, the detailed delog life-stories that I collected, even those concerning men, were narrated to me, eagerly and enthusiastically, by women. (For their part, delogs were unconcerned with issues of sex and gender and did not speculate as to why there are more female than male delogs.)

_Gendered Personalities and Sexed Bodies_

Reporting on the Qinghai Tibetan region of China, Makley writes that “sex differences were seen to produce different mind-body relationships and to result in basic proclivities that differentiated male versus female abilities.” The perceived effects one’s biological sex has on one’s personality is perhaps the most straightforward emic explanation for the link between delogs and women. According to this line of thought, the personality and character traits a person must have in order to be sent back to life as a delog are linked to positive stereotypes of women.

Himalayan Buddhists share a widespread conviction that men and women “think differently.” A university professor in Xining cited this cognitive variation to explain the link between delogs and women. “Men are decisive,” he told me. “For men, whether or not to do something is simple. Comparatively, women’s minds are tranquil, and they take more time when considering what to do.” This disparity between men’s and women’s minds is said to entail gendered moral and spiritual aptitudes: women are patient, whereas men have short tempers and are quick to engage in violence. Other informants described women as sincere, spiritual, and having “pure hearts,” as opposed to men who do not engage as often in religious practices. Informants drew from these gender stereotypes to explain a person’s likelihood of becoming a delog. “Those who have great sins can’t be delogs,” the professor explained. “Women don’t usually

---

8 1999: 185.
9 2005: 269. See also Rajan 2015.
commit the five inexpiable sins. This is why delogs are usually women and rarely men."

Although it is rare for anyone, male or female, to murder a parent or harm a monk, reports of men killing or seriously injuring each other in drunken knife fights and stories of husbands abusing their wives are ubiquitous throughout Tibet and Nepal. Likewise, the observation that women are more dedicated to Buddhist practice than men has been well-documented by ethnographers of Himalayan societies, and the idea that women are more religiously minded than men finds evidence in contemporary behaviors. Among the group of Hyolmo Buddhists with whom I gathered one Sunday to read mani prayers, with one exception, all were middle-aged and older women. When we finished the recitations and the lama began to read the biography of delog Lhame Lhamchung (Lha mo lham gcung), nine women stayed to listen. The audience was thus entirely female, and the lama told me that it had been a group of women who commissioned and paid for the painting (thang ka) that he used to illustrate Lhame Lhamchung’s story. Men, on the other hand, are known for drinking and playing cards, and the task of butchering animals falls to men, saddling them with the negative karma that results from killing. This relates to delogs because it is a person’s positive karma and potential benefit to others that persuades the Lord of Death (Gshin rje chos rgyal) to dispatch him or her back to the human world. Because women are seen as maintaining a more positive karmic balance and engaging in more devotional activities than men, there is an expectation that women will more often be sent back to life as delogs.

Alongside the positive feminine qualities that the topic of delogs elicits is a belief that women are more sensitive and emotionally delicate than men. At a Hyolmo funeral in Kathmandu, I was sent away from the cremation site, along with the rest of the women and the children, before the lighting of the pyre. When I asked why women are not allowed to attend a cremation, a monk answered that unlike men, who are brave, “women might have nightmares.” Ironically, this perceived female weakness, namely, a tendency to succumb to one’s feelings, provides women with another advantage for acting as delogs. The responsibilities of a delog necessitate a capacity to feel deeply and a willingness to convey emotion. Effective delogs must be able to communicate not just the facts but the affective quality of

---

10 The five inexpiable sins (mtshams med pa lnga) are killing one’s father, killing one’s mother, killing an arhat, drawing blood from the body of a buddha with cruel intention, and causing a rift in the Sangha.

their experiences as they relay what they saw and heard during their journeys through the lands of the dead.

I came to appreciate the importance of empathy and expressiveness to successful delog practice when I met the delog Kunzang in Golok. Upon mention of her delog experiences, she burst out crying. Later, she explained her weeping as brought on by memories of the suffering she has witnessed on her tours of the intermediate state between death and rebirth. I was moved by her outburst, and as I reflected on the incident, I realized the significance of emotional displays to the authenticity of a delog’s tales as well as to the larger soteriological goal of discouraging people from evil and inciting them towards virtue. When I discussed the incident with my Tibetan assistants, they cited Kunzang’s tears as evidence that her words were true. In this case, the perceived masculine traits of controlling one’s feelings and always speaking rationally turn out to be hindrances to the delog’s task, leaving women, who are believed to “have more emotional energy than men,” to excel in the role of delog.

Along with the belief that the sex of one’s body influences one’s behaviors and inclination towards religious practice, Himalayan Buddhists speak of women being more “open” than men. In Kunzang’s case, this openness can be interpreted as her readiness to express her feelings. Other times, openness can refer to sharing power and information. According to the assessment of an educated and articulate Hyolmo monk, “If women were allowed to receive all of the [Buddhist] teachings like men, they would share them freely with everyone... and would not withhold them out of desire for power.” In a similar vein, scholar Tulku Thondup described women as “by nature... mentally and spiritually open” and related this unguardedness to the probability of their becoming delogs.

Yet another interpretation of women’s “openness” lies in sexed characteristics of the female subtle, or yogic, body. As women and men are endowed with different physical bodies, they are also said to possess different subtle bodies. In particular, the channels of a woman’s subtle body are said to be more open than those of a man’s, an idea that has a long history in Indian tantric traditions.

12 All names are pseudonyms.
13 Havnevik 1990: 148. In his biography of delog Dawa Drolma, Chagdud Tulku writes that her eyes overflowed with tears when she described the miseries of the lower realms (Dawa Drolma 1995: vii). I am not aware of accounts of male delogs that mention the delog crying or otherwise displaying strong emotion.
14 Personal communication, 11/16/2008.
15 Havnevik 2002: 280; Gyatso and Havnevik 2005: 21. Silburn summarizes the Kaśmirī Śaivite view: “A man’s nādi [channels] are narrow, rigid, and not easy to expand,” while “what characterizes woman is the expansion of the central way:
pathways through the subtle body are believed to facilitate meditation and make a person susceptible to spirit possession. Relevant to delogs, expanded channels make it easier for one’s consciousness to leave the body to journey in the intermediate state and to return to the body so that the delog revives. Female bodies, possessing open and expanded energy channels, are therefore more conducive to delog experiences than male bodies which have more constricted pathways.

A slightly different version of this idea was voiced by a Dzogchen practitioner-monk in Golok. He described the difference between men’s and women’s channels in terms of speed and then explicitly linked this to the facility with which the consciousness can exit and re-enter the body: “Women’s channels are very quick, very fast. For women, the consciousness (rnam shes) comes out easily; it’s easy for it to come out and for it to return... A man’s consciousness comes out more slowly. For men, it’s difficult.” To clarify, I asked him to characterize the channels of a delog’s subtle body. “A delog’s channels are quick,” he replied. This reference to speed is surprising unless we remember the limited time frame within which delog operate. Hyolmo Buddhists tell the tale of a well-known delog whose impatient son threw her body onto the funeral pyre too early. After her corpse started to burn, her voice cried out, scolding her son and lamenting that now she would be unable to return to her body and thus to life. As this story illustrates, to revive as a delog, one’s consciousness must re-enter the body “quickly,” or there may be no body to come back to.\(^\text{16}\)

The accounts of the relationship between delogs and women we have examined so far draw from relatively positive characterizations of women and the feminine. How can stereotypes that depict women as creating more good karma than men and being better suited to transmit messages that will encourage others towards virtue be reconciled with the unfavorable and condescending portrayals of women that are ubiquitous in studies of Buddhist women?\(^\text{17}\)

\(16\) See also the 17\(^{\text{th}}\) c. story of Sangye Chödzom (Pommaret 1989). The Hindu practice of cremating immediately after death is cited by Buddhists in Nepal as the reason there are no Hindu delogs.

\(17\) Aziz 1987; Gellner 1994; Gutschow 1998 and 2004; Havnevik 1990; Huber 1994; Makley 2002; Padma’thsö 2014; Reis 1983. In his interviews with Kathmandu Newars on the subject of witches and spirit-mediums, Gellner was told that women are morally weaker and have more negative karma than men (1994: 39).
likely values gender equality. While this may have influenced some people’s comments, I do not believe it was a significant factor in their responses. Most of the scholars who have recorded negative attitudes towards women have been female, and I routinely encountered disparaging comments about women during previous research on Buddhist nunneries in Nepal.

The reason I did not encounter disparaging views of women when asking about delogs more likely stems from the difference in subject matter. Many of the existing studies of Himalayan Buddhist women have been studies of female monastics. But a delog is a very different figure from a nun. Whereas nuns represent a challenge to the hegemony of male monasticism, delogs pose little threat to male control of institutions and practices. Furthermore, in criticizing nuns, people must reference their uniquely female characteristics or risk also disparaging monks and monasticism in general. Questions about delogs, on the other hand, are not unavoidably gendered. Because the delog role is not exclusive to women, people who are critical of delogs can express their skepticism without referencing gender. In fact, informants who were dismissive of delogs often ridiculed Nyingma and Dzogchen practices or areas of Tibet where the Nyingma and Dzogchen traditions predominate (i.e., Golok) instead of targeting women in their critiques. In addition, because delogs occur mostly in Nyingma and Dzogchen communities, those who knew the most about delogs and were thereby the principal informants of this study were Buddhists associated with Nyingma and Dzogchen teachings, teachings that maintain a relatively appreciative view of women and allow for greater female authority. In particular, the respected female figure of the khandroma (mkha’ ‘gro ma), prominent in Nyingma and Dzogchen practice communities, was frequently cited in discussions of delog and gender.

Delogs and Khandromas

Although Buddhists in Tibet and Nepal often cannot explain why most delogs are female, they are sure of the empirical fact. When pressed to come up with an explanation for women’s greater representation as delogs, the majority of informants referred to other gendered religious roles, specifically the male figure of the reincarnate lama (sprul sku) and the female figure of the khandroma. In the words of a young tour guide in Xining, “A khandroma is female, right? That
is why most *delogs* are female."18 The association between *delogs* and *khandromas* is so strong that when I encountered people who were unfamiliar with the term *delog*, the mention of *khandromas* would help them understand what I was asking about. The nature of the relationship between *delogs* and *khandromas* and the bearing that *khandromas* being female has on *delogs* being female, however, was a question informants struggled to articulate. As we will see, the connection is not straightforward, and the various parallels between *delogs* and *khandromas* reveal both positive and negative ideas about women and the feminine.

Like *delog*, *khandroma* (Sanskrit ḍākinī) is a somewhat indeterminate category that admits of various interpretations. In many cases, the title ‘*khandroma*’ indicates a woman who possesses some unusual quality or ability, such as access to information that ordinary people do not have. When I showed a young tour guide in Xining a photograph of a female *delog* wearing a burgundy robe and large amulet box and clutching a massive prayer wheel, he commented that she looked like a *khandroma*. “Is she? Maybe she does divination. Does she? Maybe she predicts the future by looking at a mirror. Maybe she reads the scriptures every day, more so than other people. Does she do that?” he asked before offering his own understanding of what defines a *khandroma*. “People come to her to ask something about the future, and what she says is reliable,” he explained, comparing *khandromas* to diviners. This understanding of *khandromas* is prevalent in Yushu where villagers consult the local *khandroma* about their deceased kin, a process known as “asking the door of rebirth” (*skyê sgo zhu*). In these cases, *khandromas* function like *delogs* in that they provide information about individuals’ rebirths.

Reporting the fate of the recently deceased is not, however, an exclusively female endeavor. Many male religious figures perform divination, and lamas are said to be able to utilize their clairvoyance to see people’s rebirths. In these cases, the ability to offer information about the deceased does not lead to comparisons with *delogs*. Why not? A young Nyingma monk answered this question in three words: unlike *delogs*, “lamas don’t travel.” *Khandromas*, on the other hand, do. This characteristic of *khandromas* is reflected in the literal meaning of the term ‘*khandroma*’: a female (*ma*) who goes or moves (*‘gro’*) through space (*‘mkha’*). According to this understanding of *khandromas*, like *delogs* who leave behind their physical bodies to embark on tours of the postmortem states, *khandromas* abandon their

---

18 Paul also reports an association between *delogs* and *khandromas* among Sherpas in Solu-Khumbu (1976: 143). As far as I know, there is no tradition of recognizing *khandromas* among Nepal’s Hyolmo or Tamang populations.
Women Returning from Death

corporeal forms to, according to the monk, “visit hell... [to] see who is suffering and bring back messages.” This surprising description of khandromas was echoed by a senior lama from Shachung Monastery who claimed that “a real khandroma will have the power to [die and] return to life.” It follows that, in a university-educated young man’s words, “delog is a kind of khandroma behavior”: both delogs and khandromas undertake extraordinary journeys to other realms and return to share their experiences.

Here is where we begin to understand the connection between delogs and khandromas and another reason delogs are expected to be female. In tantric Buddhism, relaying messages and acting as a go-between have long been depicted as tasks appropriate for women. In Indian tantric texts, the “celestial messenger” (Skt., dūtī) who brings inspiration and wisdom to her yogan partner is female. Likewise, in the Cakrasamvara Tantra, the yogi’s muse, his female consort, is alternately called khandroma, yoginī (rnal ’byor ma), and messenger (pho nya mo).19 The last title, “messenger,” is especially relevant to delogs because, as Kunzang pointed out, a delog is simply “a postal worker,” someone who delivers news.20 Likewise, in Tibetan tantric sources, we find women, both human and divine, serving as facilitators and “bridges” for male religious figures.21 When we consider what delogs (and many khandromas) do and realize that the task of relaying information from one party to another is gendered, the connection between women, delogs, and khandromas begins to make sense. Both delogs and khandromas share a predilection for journeying to other realms and they return with messages, a task associated with women.

---

19 See Wayman (1990) for a description of female messengers in Sanskrit and Tibetan-language Tantras.
20 Holmberg (1983) has argued that the function of the Tamang shaman (Tamang bompo) is feminine since it is a mediating function and the mediators in Tamang society are women. Relatedly, according to Diemberger (2005), all oracles in the Nepal Himalaya south of Dingri are women, and in this region, being an oracle is a female role. Anecdotally, the accounts I heard of someone becoming possessed by and thus serving as the mouthpiece of the spirit of a deceased person (shi ’dre) were all stories of women.
22 It is worth asking whether checking up on the dead, a form of continued caretaking, is also a feminine task? In terms of the delogs’ clientele, Pommaret (1989) noted that it was mainly women who attended the delogs she interviewed in Bhutan. Based on my fieldwork, among individuals who have personally consulted a delog, women outnumber men two to one. This ratio cannot be given too much weight, however, because in several cases the delog the patron consulted lived in a remote location, and women mobilized men to make the journey. It was therefore a man who met the delog and requested the information, but he was sent by and reported back to a woman. Since delogs are not the only reli-
In Golok, an outspoken lama lectured me about the gendered nature of Tibetan Buddhist religious roles when I asked him to explain why most delogs are female. “In order to understand why delogs are women… you have to understand method and wisdom,” he told me. “You have to understand the nature of assistance.” He illustrated these concepts by describing the relationship between khandromas and Treasure revealers (gter ston):

The men, the Treasure revealers, have the responsibility to bring forth the Dharma and reveal Treasures. They’re sent from a Pure Land with the responsibility to spread the Dharma and give blessings. The work of Treasure revealers is to spread and practice new Dharma... No lama can reveal a treasure by himself; he must rely on a khandroma or a nun. If a lama finds a Treasure, he won’t be able to retrieve it if he doesn’t have a khandroma or a nun to help him. Khandromas are caretakers (bdag gnyer) of the new and old Dharma. They have the special ability to protect the new and other Dharma. When lamas write Treasure texts, khandromas have the ability to help them complete their work. That’s the purpose of khandromas – to help, to support the Dharma.

The lama’s statement echoes a widespread Buddhist trend whereby men assume the active and creative tasks while women are assigned assistant, caretaking roles. Attempting to summarize the lama’s point, my assistant suggested: “A khandroma’s main power, her special task, is to support, not practice, the Dharma. In a similar way, delogs have power only to support the Dharma.”

Indeed, when we compare delogs to male figures, such as lamas, we notice the limits of a delog’s abilities. Lamas can rescue a consciousness from hell and deliver it to a Pure Land, but delogs are unable to help those whose sufferings they witness in the lower realms. According to Kunzang, when another local delog, who is also a lama, visits hell, “he sings mani. When he sings mani, the cauldron tips over. He transports [the beings in the cauldron].” She also tries to do...

---

23 Cf. the Fourteenth Dalai Lama’s statement that khandromas are “the female guardians of the Tantras” (Edou 1996: 103).
24 Faure 2003: 125; Makley 2005: 270. This gendered division of labor can be traced to exoteric Mahāyāna as well as Tantric Buddhist texts that depict wisdom and emptiness as feminine and compassion and skillful means as masculine.
something, striking the cauldron with her staff while her dog “runs around and barks.” Unlike the lama, she is unable to lead the suffering to liberation. She can only witness their misery and report back to the living. Looked at from this perspective, according to which delogs are powerless to alter the states of affairs they observe and can only relay information to support the activities of monks and lamas, the connection between delogs and women points towards limiting conceptions of women’s abilities.

When considered from another point of view, however, the link between delogs, khandromas, and women reflects more positive conceptions of women and the feminine. Most Tibetan Buddhist women who are known as khandromas are believed to possess above-average spiritual capacities. In these cases, ‘khandroma’ serves as a title and mark of respect. These khandromas are sometimes viewed as divine females or human women who “possess the consciousness of gods” (lha gyi rnam shes). As a university-educated man in Xining explained, it is the exceptional nature of a khandroma’s consciousness that enables her to send it out of her body at will to travel to other realms. Indeed, among modern Tibetan khandromas, a delog-like death experience sometime early in their life seems to be de rigueur. Sera Khandro (Se ra mkha’ gro, Kun bzang bde skyong dbang mo, 1892-1940), Dawa Drolma (Zla ba sgrol ma, 1908-1941), Sherab Zangmo (Shes rab bzang mo, b. 1932), and Palchen Lhamo (Dpal chen lha mo, b. 1960s) all report journeys to the intermediate state in their (auto)biographies. In fact, the expectation that powerful (Nyingma/Dzogchen) female religious figures will undergo a delog or delog-like experience is so prevalent that many Tibetans with whom I spoke insisted that the respected female teacher and khandroma, Tāre Lhamo (TA re lha mo, 1938-2002), had also been a delog.

In these cases, khandromas and delogs are related in that, according to a monk in Golok, “if a person has a normal human consciousness, she won’t be a delog. [A delog] must be someone who has the ability

---

25 Kunzang’s testimony contrasts with Pommaret’s (1989) report of Bhutan where a female delog told her that she could and did rescue beings from hell. I never met a delog who claimed to be able to do this and who was not also a (male) lama.

26 Sera Khandro’s account of the intermediate state is found in Kun bzang chos nyid dbang mo, n.d. I am grateful to Christine Monson for sharing this manuscript. Because Dawa Drolma was recognized as an emanation of White Tara and enjoyed widespread respect “for her extraordinary powers as a lama,” it seems her primary identity was that of khandroma (Dawa Drolma 1995: vii). Perhaps it is because “she was more famous for being a delog” that Chagdud Tulku chose the title Delog: Journey to Realms Beyond Death for her (auto)biography (Dawa Drolma 1995: vii). Sherab Zangmo’s multiple death experiences are reported in Tshangs dbang dge ‘dun bstan pa and Sku rgyab tshul khrims, n.d. I am grateful to Antonio Terrone for information about Palchen Lhamo.
to control her mind, to make it leave and return to her body.” The idea that delogs control their death journeys contradicts the widespread conception of a delog as an ordinary individual who, due to past karma, undergoes an involuntary and uncontrolled death and return to life. The monk’s description of a person who can eject his or her consciousness from the body at will coincides, instead, with Tibetan Buddhists’ beliefs about the extraordinary powers of yogis, reincarnate lamas, and some khandromas.

Not only do the life-stories of khandromas often include death experiences, the confusion between delogs and khandromas is furthered by the fact that female delogs may become known as khandromas if they are highly esteemed in their communities. When I questioned him about a local delog, a writer in Derge explained that she was known, not as “delog,” but as “khandroma”:

According to you, we should call her a delog. But out of respect, people always call her “khandroma.” First, she died and revived, [so she’s] a delog. But, because after she became a delog she knew a lot of things, people call her “khandroma.” When a delog knows everything, we call her “khandroma” out of respect, like we do for a lama’s wife. So sometimes delogs become [identified as] khandromas, due to people using a respectful word for them.

The life of a now-deceased delog in Amdo reflects this process. When I asked her grandson if she was called “khandroma” after her delog experience, he answered by commenting on khandromas in general: “After she had made herself a better person (sems pa de bzung btang nas), everyone called her the emanation of a khandroma.” We observe a similar process at work in the case of historical delogs. Lingza Chökyi (Gling za chos skyid) and Karma Wangdzin (Karma dbang ’dzin), two of Tibet’s most well-known delogs, neither of whom seems to have been considered extraordinary before her delog experience, are referred to as khandromas in some versions of their (auto)biographies.27

---

27 Ye-shes mkha’-gro gLing-za Chos-skyid kyi ‘das log sgrun yig: The Return from Death Experiences of gLing-bza’ Chos-skyid 1985 and Bya bral Kun dga’ rang grol. n.d.

When delogs are respected as khandromas, the two often share the further similarity of taking rebirth as part of incarnation lineages. Lingza Chökyi, for example, returned as Delog Kunzang Chökyi Drolma (d. 1958) who then reincarnated as another female delog who lives today in Golok. Lingza Chökyi is also believed to have taken rebirth in contemporary Bhutan as Delog Khandro Tayang, and Delog Karma Wangdzom (b. 1962) is believed to be the incarnation of the 17th century delog, Sangye Chödzom, herself the reincarnation of Karma Wangdzin (Pommaret 1989). In Kham, Delog Sherab Chödron is considered the incarnation of Delog Dawa Drolma.
The Status of Women and Delogs

In contrast to the emic explanations examined so far that present delog identity in largely positive terms, an etic analysis of women’s predominance as delogs points to the marginal status that delogs occupy within the Tibetan Buddhist religious world. According to this perspective, the peripheral nature of the delog role makes it especially appropriate for Himalayan women given their disadvantaged status vis-à-vis men.

Tibetan Buddhist societies have a long history of patriarchy and androcentrism. Perhaps as a result, scholarly literature amply documents that modern Himalayan women are less educated, less likely to occupy positions of power in their communities, and in many contexts, subservient to men. This general observation was supported by the explanation a Hyolmo mother gave for a line in her text of daily prayers. We were reading together when we came to a verse referencing a ‘skyes dman med pa’i khams,’ literally, a realm where there are no beings of low birth. The term skyes dman is also a common way of referring to women, and that is how my companion glossed it. “Somewhere that there are no women is a very happy place,” she explained. “Women have to take on everyone’s sins (Nepali pāp); they have to raise the children. This refers to a place where no one suffers as do women in this world.”

Like Tibetan Buddhist women who are said, even by men, to endure more hardship and misery than their male peers, acting as a delog is described as a bothersome as well as physically and emotionally difficult task. Due in part to the tortures they witness and the typically sorrowful news that they must convey to the living, delogs portray their death experiences as unpleasant and often painful. Likewise, they depict their human lives as filled with suffering. As Kunzang narrated the events of her life, she emphasized the motif of misfortune as she related a prophecy the local abbot made at her birth. “Poor thing,” he said. “Name her Kunzang. She will suffer greatly. She will suffer greatly, but she will benefit Tibetans.” Indeed, Kunzang faced daunting challenges in her early life, from

---

28 The logic of this argument has been used to account for the high proportion of female spirit mediums in the Himalayas as well as women’s prominence as shamans in South Korea and Buddhist-influenced regions of Siberia (Aziz 1978; Diemberger 1991, 2005; Hamayon 1994; Kim 2003; March 1979; Smith 2006). Havnevik 2002 argues against this view.

nearly starving to death to being imprisoned by Chinese authorities.30

When Himalayan women first begin speaking of their postmortem journeys and interactions with the dead, they are usually dismissed as “crazy” and pressured to stop their “babbling.” In an effort to prevent Drugmotso, a delog in Golok, from talking more about her experiences in the intermediate state, her family stuffed her mouth with rags. When she continued to speak, they tied her up in a wool bag and beat her such that she lost several of her front teeth. Even after a prestigious lama recognized her as a delog and commanded the family to stop their mistreatment, a man who was angry with an unfavorable report Drugmotso delivered about his father bound and drug her behind his horse. Similar stories of abuse are common across the Himalayas. Along with being verbally attacked, Hyolmo delog Evie recounted being branded with a hot iron. Circumstances supposedly got so bad for a Sherpa delog that she is said to have been “taken by God” when she was forty years old: “because she was mistreated, she didn’t come back [from her last delog journey]. She stayed up there; she didn’t return.”

The autobiographical accounts that Kunzang, Drugmotso, and Evie related were stories of social ostracism and physical abuse. When we take their communities’ skepticism and active discouragement into account, the path to recognition as and the role of delog is less than attractive. Himalayan women’s lives, however, are expected to be difficult. Stories of women’s suffering often begin with being sent away to a distant village to marry a stranger. In her new household, a woman labors for an unsympathetic mother-in-law and bears children for a husband who is not required to treat her kindly. For a woman seeking an alternative to the hardships of being a wife and mother, the options are extremely limited, and it is virtually unheard of for a single woman to live by herself unless she is a nun. Yet, because female delogs are expected to be celibate, recognition as a delog enables a woman to avoid marriage without having to live within the constraints of monastic life.31 In addition, it affords her a remarkable degree of independence as well as economic benefits otherwise difficult for Himalayan women to obtain.

30 For a summary account of Kunzang’s life, see Prude 2014.
31 Of the five female delogs whom I interviewed extensively, only one was a nun, but all five claimed to be celibate. In Nepal, Shantamāla swore that it was the Lord of Death himself who prohibited her, on penalty of rebirth in hell, from taking a husband. Such a threat, issued in the intermediate state by the one who would send her to her next rebirth, must have been difficult indeed for her parents to defy.
The social and economic benefits that women stand to gain by being recognized as delogs are one of the factors that accounts for the high proportion of women in the delog role. Among the delogs I encountered, all had benefited significantly from their status as delogs: in Golok, Kunzang lived independently in a small house with her teenage son. Due to her renown as a delog, Drugmotso had avoided marriage altogether and was able to support both herself and an attendant as she moved her nomad’s tent when and where she chose. At Yachen-gar, Sherab Chödron had her own room and a group of nuns who cooked and cared for her. She received teachings from the lamas that other nuns did not, and she had traveled to Chengdu and Beijing for medical treatment. In Nepal, Shantamāla had successfully eschewed being married and independently assumed possession of her parents’ home. Finally, in Hyolmo, Evie’s fellow villagers had built her a house and provided all her daily needs when they respected her as a delog. Since losing the confidence of her community, however, the stone and mud of her house had crumbled into ruins and she had been forced to rely on the reluctant hospitality of her nieces and nephews. Life was definitely better for her when she was regarded as a delog.

Drawing on Ortner’s argument that males can just as easily be excluded from positions of power and economic advantage as women, Cuevas objects to applying the “phenomenon of marginality” to account for female delogs.32 Certainly, men are not guaranteed power or privilege, and men do seek recognition as delogs. In Hyolmo, after growing up in a barn (Nep. goṭḥ) with parents too poor to feed him, a young Hyolmo man made the demeaning choice to search for work as a laborer in India. Several years later, as a result of a delog experience, he became famous throughout his community and was suddenly able to support himself, his wife, and their three children, albeit modestly, through his work as a delog and shaman (Hyolmo bonpo).

Yet, due to social realities in Himalayan societies, a disadvantaged man has more opportunities to better his situation than does a woman in the same position. When the Hyolmo delog left his wife and children in Nepal and took a dishwashing job in the U.S., his community in Nepal stopped respecting him as a delog. For him, however, life abroad and the potential to obtain a green card were more valuable than his delog status. In this example, we see that while both men and women may benefit from being recognized as delogs, be-

---

32 Cuevas 2008: 79. Based on his reading of literary delog accounts, Cuevas believes that female delogs were often from noble families and high social classes. This is not the case today.

See also Havnevik (2002: 281) who references Henrietta Moore in her parallel argument regarding women and oracle mediums.
cause Himalayan men have more avenues by which to gain respect and improve their economic standing, the opportunity to act as a delog is not as valuable to them. In other words, there may be fewer male delogs not because for physiological or ethical reasons men are less likely to die and return to life but because men are less interested in acting as delogs.

In fact, Tibetan Buddhists in Nepal say that delogs most often “appear” among the suffering and oppressed (Nep. dukhī mānche). This expectation is based on the fact that, because the delog experience is commonly understood to occur involuntarily, a delog’s access to extraordinary knowledge does not imply skill or special ability. As a result, the delog role is open to those who lack access to economic and educational resources. In their life narratives, Kunzang, Drugmotso, and Shantamāla all commented on their inability to write and their lack of religious education. Kunzang related how, as a young woman, she had begged her lama for teachings only to have him refuse. “Just meditate,” the lama told her and sealed her in a cave. Drugmotso professed to not even know how to meditate. “I don’t understand anything about the true nature or the inner meaning of the Dharma. I don’t even recite many prayers. I never stayed in a monastery to learn, and I haven’t studied the scriptures. I haven’t received a single instruction,” she lamented. Because acting as a delog requires neither religious training nor basic literacy, it is open to participation from people who have been unable to pursue education, notably women.

When this characteristic of delogs is taken into account, it becomes significant that the communications delogs relay are always someone else’s words. As she related her life story, Drugmotso described her first missives from the dead as “babble” (kha brla) and “random things I said” (kha nas ’dra mi ’dra cha ga yar mar ra bshad). She emphasized the absence of personal motive and volition by expressing surprise that her charges were accurate:

Once, we carried the dead body of an old monk to our local cremation ground, but the vultures didn’t eat it. People considered that old monk a pure and true renunciate (dge slong). At that time, I was saying various things [i.e., speaking as a delog], and I called that old monk a sinner. I said that he had murdered a person called such-and-such, and that it was impossible that his body would be eaten [by vultures]. Many lamas performed the ritual of consciousness transference (’pho ba) for the murdered person and then for that old monk. Afterwards, [it was discovered that] the things I said were true; it had happened like that.
In Drugmotso’s account, we see that even after her reports were corroborated, she distanced herself from the import of her testimonies.

A distancing strategy is typical of delog narratives. The autobiography of Sherab Chödron frames her words as direct quotes from the Lord of Death, his workers, or the dead themselves:

A frightening black boy, the very embodiment of non-virtue, laughed freely and stood up. Piling many black pebbles in front of the Dharma King, he said:

“Lord of Death, Precious Dharma King, I know about this person. When he was in the human realm, he accepted many offerings on behalf of the dead. Not mindful of the holy Dharma, he deceived many black-headed people. He stirred up trouble among monks and tantrikas and injured many living creatures. He made offerings of both meat and blood... Please send him to the lower realms.”

When [the boy] finished speaking and the workers of samsara measured [the dead person’s] virtue and non-virtue, the accumulation of black [pebbles] was greater [than the quantity of white pebbles]. The Dharma King said this:

“Dharmakāya, Kuntuzangpo, think of [these beings]! Look on these miserable beings, these old grandmothers, with your eye of compassion. May pitiful evildoers like these one day encounter the Dharma. [Until then, they] must experience the suffering of Wailing Hell.”

As soon as he said this, the workers of samsara [shouted] “Slay! Kill!” like the roar of a thousand thunderclaps and led [the deceased] to the lower realms.33

By portraying delogs as passive witnesses, written accounts thus deflect responsibility from delogs for the content of their messages.

Related to the lack of agency seen in delog accounts, it is common for contemporary delogs to remain able to recollect their death experiences for only limited periods of time. After having completely revived or having consumed food or drink, many delogs deny any recollection of their experience and the information they delivered as they regained consciousness. A lifelong series of delog journeys, therefore, does not serve as an experiential education in the law of karma or Buddhist cosmology. Most delogs retain their sense of ignorance and inferiority, even in matters related to religion, throughout their lives.

At this point we must ask if the large number of female delogs is a recent historical development, a result of Himalayan societies’ transition to modernity and the gender-biased nature of new economic

33 Shes rab chos sgron n.d.: fol. 16-17.
opportunities? Pommaret reports that over the past two decades there are fewer and fewer delogs in Bhutan and acting as a delog is seen as a “backwards job” only worth pursuing to the most disenfranchised Bhutanese.\textsuperscript{34} Per this line of thought, the high proportion of contemporary female delogs could be a result of recent cultural and economic changes which have given men, to a greater extent than women, new avenues to education, wealth, and power. As evidenced by the male Hyolmo delog who took a job in New York City, men have taken advantage of new opportunities and left traditional religious practices, like that of delog, to women. Relatedly, Cuevas found that pre-modern textual accounts of delogs can be divided equally in terms of male and female (six and seven respectively). He concludes that in the past, the delog role was not gendered.\textsuperscript{35}

The question of historical gender balance is one that cannot currently be answered, but evidence suggests that the delog role has long been associated with women. First, it is significant that many of the most well-known delog accounts, those of Karma Wangdzin and Lingza Chôkhyi in Tibet and Lhame Lhamchung in Nepal, are stories of women. In addition, the “original” and “best” delog, whether a historical person or not, is generally said to be Nangsá Òbum (Snang sa ‘od ‘bum). Second, assuming that textual evidence accurately reflects historical reality is problematic. Scholars are well-aware that men are more likely than women to have their lives and experiences recorded in writing. Equivalent numbers of male and female delog texts, therefore, does not entail that historically there were equal numbers of

\textsuperscript{34} Personal communication, 8/17/2010.

These types of lists are problematic because the inclusion or omission of an individual depends on the compiler’s definition of delog. For example, Shugseb Jet-sun Lochen (Rje btsun blo chen, 1853/65-1950/51/53), included here, is not typically cited as a delog, but she reports undergoing several delog experiences in her autobiography (see Havnevik 1999). Padma Trinley (Padma ‘phrin las), also included here, is called Delog in his (auto)biography, but his visions of the intermediate state occurred during meditation (“Das log dkar chags blang dor ‘byed pa’i lde mig” n.d.).
male and female delogs. Furthermore, if one chooses to read delog literature as history, one must consider all the individuals mentioned in the narratives when making claims about gender. In Karma Wangdzin’s account, for example, when the Lord of Death sends her back to the human world, he sends two other people at the same time. Like Karma Wangdzin, both of these people are female.\(^{36}\) When seventeenth-century delog Sangye Chödzom (Sangs rgyas chos ‘dzom) arrives in the court of the Lord of Death, another woman who had previously been sent back to life is there as well.\(^{37}\) The inclusion of all delogs mentioned in delog texts could thus alter the gender balance reflected in pre-modern delog literature.

**Conclusion**

To become a delog, one must undergo an incredible death experience and return to life to tell about it. Since both men and women die and a person’s sex is irrelevant when facing the Lord of Death, it is possible for both men and women to become delogs. Nevertheless, the majority of delogs are female.

Emic explanations for the connection between delogs and women explain why women are more likely to die and return to life. According to Himalayan Buddhist beliefs about men’s and women’s personalities, men are quick to anger and prone to violence whereas women are patient and devote more time to religious practice. As a result, a woman is more liable to maintain the positive karmic balance necessary for returning as a delog. From a tantric perspective, on the other hand, the channels of a woman’s subtle body are “open” and “quick” and therefore more conducive to the out-of-body experiences that delogs undergo. Yet another point of view relies on the similarities delogs share with the female figure of the khandroma: a predilection for undertaking extraordinary journeys to other realms, an ability to provide information about the deceased, and often the possession of divine attributes. Tibetan Buddhist ideas about sex and gender that link women to the delog role thus point to what Gyatso and Havnevik have described as a “homology” between gender stereotypes and certain religious functions.\(^{38}\)

Based on sociological considerations, it is also possible that women who have a delog experience are more eager than men to assume identity as delogs. This theory speaks to the observation that in Him-

\(^{36}\) Pommaret 1989: 75.

\(^{38}\) 2005: 19.
layan Buddhist societies, women are structurally inferior to men. It follows that women do not necessarily experience death journeys more often than men but when they do, women more frequently adopt ‘delog’ as a title and vocation because, due to the smaller number and limited desirability of alternatives available to them, recognition as a delog is a relatively attractive option. Gyatso and Havnevik argue that jobs viewed as insignificant or demeaning are particularly welcoming of women’s participation. According to this argument, we should see peripheral religious roles, like those of diviner, oracle-medium, and delog, often filled by women, and indeed this is the case.

In the end, our gender analysis is unavoidably circular, reflecting Bourdieu’s observation that social structures and strategies tend to reproduce themselves to the point that “the body is in the social world but the social world is also in the body.” Attention to Himalayan Buddhists’ theories regarding the connection between delogs and women reveals contradictory beliefs about both the status of delogs and women’s talents and shortcomings. For someone who has respect for delogs and views their activities as authentic and important, the fact that most delogs are female can be evidence of women’s competency and merits. Those who question the possibility of returning from death and are skeptical of delogs’ claims can explain women’s disproportionate participation as delogs’ marginal standing vis-à-vis the institutions of Tibetan Buddhism and women’s inferior place in Himalayan social hierarchies. In this way, an investigation of the link between delogs and women highlights the inseparability of religion and culture in Tibetan Buddhist societies whereby the adoption of delog identity allows women an opportunity to participate in religious authority while simultaneously reiterating gender stereotypes.

In the Bosom of Khotan?
A Dialogue between Image and Text

Yannick LAURENT
(Wolfson College, Oxford) ¹

Amongst the wondrous metal images of the Berti Aschmann Collection of Tibetan Art preserved in the Rietberg Museum stands a unique statue ‘Bodhisattva with gadā’ (fig.1). The unidentified Bodhisattva has been attributed to Kashmir and dated from the ninth to tenth century.² However, a Tibetan inscription engraved on the top of the lotus base has seemingly gone unnoticed. The reading of the inscription not only allows for the identification of this figure, but also raises the question of its place of production and workmanship. The inscription on the pedestal reads as follows (fig.2):³

14 nub li’i byang chub seMd’ rdo rgyal mtshan
“14 The Bodhisattva Vajradhvaja of Western Li”

The inscription opens with a number fourteen written in Tibetan numerals. A small gap separates this number from the first word of the inscription. At the outset, it would seem to suggest that this statue was initially part of a set of images. Alternatively, the statue would have been engraved and listed alongside other miscellaneous religious articles belonging to a particular place. I will return to this point later.

Two words of the inscription are clearly abbreviated. The last two syllables of the Buddhist word byang chub sens dpa’ (Skt. bodhisattva) are cut short. A dot above the term sens indicates that the third syllable is shortened by means of an anusvāra (Tib. rjes su nga ro). The last syllable dpa’ is equally abridged. Second, the name rDo rje rgyal mtshan (Skt. Vajradhvaja) is abridged, too. Here, the second syllable of the noun rdo rje (Skt. vajra) is omitted. The use of abbreviated nouns is common practice in Tibetan epigraphic writing, usually because of

space, sometimes for technical reasons. In the present context, the identification of Bodhisattva Vajradhvaja does not pose any problems and is further confirmed by the iconography, as I intend to show.

There is every reason to think that the expression *nub li* might also be an abbreviation of some sort. Therefore, the genitive case suffixed to the word *li* has been provisionally translated ‘of’. It could also be rendered as ‘from’, ‘in’, or as a clause introduced by ‘that’, depending upon our reading of the expression ‘Western *li*’.

**Some remarks on the term ‘li’ and its derivatives**

Dictionaries usually define the word *li* as ‘bronze’ or ‘metal bell’. This term is also used to mean a unit of distance of approximately one third of a meter. The latter can easily be ruled out as far as the inscription is concerned. Moreover, the term *li* is often found in compound nouns pertaining to metal casting (Tib. *li ma*), the oasis of Khotan (Tib. *li yul*), or an artistic style (Tib. *li lugs*) related to Central Asia.

In the context of traditional metalwork, the word *li* is used somewhat loosely by Tibetan authors. It is generally admitted that *li* is employed to designate different types of alloys. Tibetan texts discussing casting and metallurgy speak of red *li* (Tib. *li dmar*), white *li* (Tib. *li dkar*), reddish brown *li* (Tib. *smug li*), or even iridescent *li* (Tib. *li khra*). Overall, these terms seem to reflect the hues of different types of copper alloys that assumed a dominant position in Tibetan and Himalayan metalwork. Incidentally, Pad-ma dkar-po (1527 – 1592) reported in his work on metal images that red *li* and white *li* were found in the hills of Khotan (Tib. *li yul*). They were both regarded as the finest alloys for having been blessed by four different Buddhas.

In some cases, the word *li ma* is used instead of *li*. It introduces a small distinction between metal alloys and metal objects, which is not strictly followed by all Tibetan authors, in particular with regard to sculpture. A chapel inside the Potala Palace in Lhasa, for instance, bears the name of *Li ma lha khang*. It is renowned for housing about eight hundred metal images (Tib. *li ma*) of divine figures (Tib. *lha sku*). Tibetan historian and lexicographer Dung-dkar blo-bzang

In the Bosom of Khotan?

'phrin-las (1927 – 1997) listed a whole variety of mediums, periods, and provenances for these images. In addition to various types of li alloys, he noted that Tibetan statues produced during the imperial period were called chos rgyal li ma. He also explained that sculptures of Indian origin are classified according to their place of production. Hence, the Li ma lha khang contains statues made in Magadha in the heartland of India (Tib. rgya gar yul dbus ma gha dha). Other metal images manufactured in East India are commonly referred to as Eastern li (Tib. shar li), whilst sculptures created in West India are called Western li (Tib. nub li). In addition, this classification of Indian metal images also includes statues produced in Nepal (Tib. bal po'i li ma), Kashmir (Tib. kha che'i li ma), and in Khotan (Tib. li yul gyi li ma).

In light of the literary tradition, however, the geographical distribution and stylistic development of early metal images is not always recognised unequivocally. This situation is particularly relevant when it comes to Kashmir and Khotan, two springboards for the development of Buddhist figurative art in Tibet. According to Tāranātha (1575 – 1634), who included a chapter about artistic production in his History of Buddhism in India, the early formative influences on Kashmiri art came from Central and Western India.8 Pad-ma dkar-po, for his part, gave a long description of stylistic features found in images produced in the ‘Land of Kashmir in Western India’.9

Likewise, the Country of Li (i.e. Khotan) in the deserts of Central Asia was also accepted as being part of a larger Indian geography. Located to the north-west of the Tibetan plateau, it is not clear as to why this region came to be known as such in early Tibetan sources. Notwithstanding the homonymic relationship between the term li, ‘bronze’, and the name of the country, Khotan has long had a reputation for its artistic influence in Tibet. The literary tradition recalls, for instance, the episode in which King Srong-btsan sgam-po (r. c. 605 – 650) and his army set off to ‘Khotan in India’ (Tib. rgya gar li yul) to assume ownership of sacred statues in order to install them inside the royal temple of Khra-brug.10 Similarly, one of the most famous metal sculptures of the Kadampa tradition (Tib. bka’ gdam li ma) preserved in Tibet is a forty-five centimetre-tall representation of Mañjuvajra (Tib. ’jam dpal rdo rje),11 which is said to have been brought from Kho-
In the Bosom of Khotan?

tan to the Land of Snows as part of a civilizing enterprise. A stylistic
analysis of these images, when they exist, would certainly be useful
to evaluate the historical dimension of these Buddhist narratives. In
any case, we are repeatedly told that metal sculptures attributed,
whether rightly or wrongly, to Khotanese workmanship were held in
great esteem. When Tsong-kha-pa (1357 – 1419) officially declined an
invitation made by the Yongle Emperor (1360 – 1424) in 1408, the
Tibetan master dispatched sumptuous presents to the Chinese em-
peror amongst which a ‘statue of Avalokiteśvara brought from Kho-
tan’.13

Eventually, the term li, as in the expression li lugs, came to convey
a certain Khotanese artistic influence on the art and architecture of
the imperial period in Tibet. It is found, for example, in reference to
the monastery of bSam-yas that was founded around 780 CE. If Ti-
betan sources generally agree that the main three-tiered temple (Tib.
dbu rtse) had been erected following three artistic styles (i.e. Tibetan,
Indian, and Chinese), they are yet at variance when it comes to the exact sequence and the style of at least one of these floors.\(^{14}\) In a text ascribed to the fourteenth century, it is stressed that the upper floor of the main temple of the monastery of bSam-yas had been built in Khotanese style (Tib. li lugs).\(^{15}\)

The possibility of a direct influence from Central Asia on Tibetan visual art took a new turn when the term li lugs was found by the Italian polymath Giuseppe Tucci on the walls of a chapel at g.Ye dmar in Tibet.\(^ {16}\) At the time, his misreading of the inscription supported the idea that the painted representation of Tathágatas was following a Khotanese style. More recently, art historian and Tibetologist Amy Heller has argued that the syntax of the inscription indicates the exact opposite, pointing at paintings that, in fact, did not conform to Khotanese style.\(^ {17}\) Based on stylistic evidence and comparative analyses, it was eventually proposed that the expression li lugs should not be taken too literally but rather be understood as ‘Central Asian style’.\(^ {18}\)

To compound the matter further, Amy Heller has also remarked that technical terms such as li lugs and li ma lugs are also being used by Tibetan artists today in reference to a style of depiction, in both painting and sculpture, based on the tradition of metal images, as the

\(^{14}\) Anne Chayet drew attention to the fact that it is difficult to speak of different architectural styles and stylistic characteristics related to the artwork of these storeys as the building underwent important damage and renovation phases. She suggested that the three types of floor (Tib. rigs gsum) mentioned in Tibetan sources might, in fact, reflect construction techniques rather than artistic trends: with a ground floor made of stone, a middle floor made of bricks, and an upper floor constructed in wood; see Anne Chayet, “Le monastère de bSam-yas: sources architecturales”, Arts asiatiques, 43 (1988): 19-29. The use of three distinct building materials for each storey is further attested in Tibetan sources; see bSod-nams rgyal-mtshan, rGyal rabs gsal ba’i me long (Beijing: Mi rigs dpe skrun khang, 1981), 18, 209.

\(^{15}\) dbu rtse rigs gsum bkod pa’i khyad par ni ’og khang rgya nag bar khang rgya gar lugs \(\text{\textquotedblleft} \text{As for the structural characteristics of the three-tiered dBu rtse [temple]: the ground floor is Chinese; the middle floor is in Indian style; the upper floor is built in Khotanese/Central Asian style\textquotedblright} ;\) U-rgyan gling-pa, Pad ma bka’ thang (Chengdu : Si khron mi rigs dpe skrun khang, 1987), 508.

\(^{17}\) bde bar gshegs ’ bri ba’ li lugs mi mthun; “the painted Tathágata do not conform to the style of li”; Amy Heller, circular note (Nyon: 1996), 1-3.

phrase ‘the monastic robe in the style of Indian metal images’ (Tib. *rgya gar li ma lugs kyi chos gos*) would tend to indicate.19

What are we to conclude from this brief review with regard to the expression ‘western *li’* engraved on the pedestal of the Rietberg Bodhisattva? In light of the above, three main lines of enquiry can be pursued here, namely: (i) *li* as a medium, (ii) *nub li* (*ma*) as a place of provenance, and (iii) *nub li* (*ma lugs*) as stylistic tradition. As a medium, the inscription would simply state that the Bodhisattva represented was made of a type of alloy ubiquitous in the West, in the same way that some statues are said to be made of gold (Tib. *ser gyi sku*) or silver (Tib. *ngul gyi sku*). This interpretation would accord well with the use of the genitive case (i.e. *li’i*) but is not very probative as far as the geographical reference is concerned. In a less restrictive sense, the term *nub li* could be interpreted as a metal image of Indian origin (Tib. *rgya gar li ma*), which was produced in West India (Tib. *nub li*), as opposed to statues cast in central or East India.20 We have seen, however, that Tibetans have a rather inclusive understanding of Indian geography vis-à-vis casting and metallurgy. As a result, the traditional classification of Indian metal images and the origin of sculptures produced in the western margins of the Tibetan plateau can be somewhat conflated. A statue manufactured in Kashmir, Swat, Gilgit, or Khotan could still potentially be described as a Western metal image. This leads to the final point where the term ‘Western *li’* encapsulates artistic elements representative of images from Western India. This expression would thus suggest a mode of representation, as in *li lugs* or even *li ma lugs*, where artists replicated stylistic elements that were typical of metal images produced from within an Indic-influenced cultural environment. Whatever approach is adopted, a description of the Rietberg Bodhisattva is now in order.

*Iconographic and stylistic comments*

The ‘Bodhisattva with *gada*’ from the Berti Aschmann collection measures 13.5 centimetres (fig.1). It is likely cast in one piece with a partly hollow pedestal.21 In the absence of a composition analysis, it is reasonable to assume a copper alloy. A separately cast halo is now lost. The figure is seated in *sattvaparyāṅkāsana* on a single lotus base,

---

20 The term *nub li* would hence stand for longer sentences such as: *rgya gar nub phyogs kyi li ma* or *rgya gar nub phyogs nas yin pa’i li ma* (i.e. a metal image from Western India).
21 A piece of metal fixed to the statue inside the lotus base suggests the presence of a possible tenon.
with his right leg over his left leg. Unlike other seated Buddhist images, the right knee does not rest on the pedestal but is being held in mid-air. The left hand is placed on the hip. The right hand holds the staff of a banner (Skt. dhvaja, ketu) – broken off above the hand – that was likely topped by a cintāmani. The deity wears a dhotī-like garment decorated with deeply incised flower patterns tied around the hips with a beaded girdle; traces of red pigment are visible on the right thigh, left calf, and buttocks. A swirling ribbon-like scarf placed over the shoulders is broken off in several places. Silver and copper inlays were used to embellish body parts and jewellery. The eyes and the ārṇā, for instance, are made of silver, whilst the nipples are inlaid with copper. The figure wears bejewelled adornments, namely a necklace with multi-coloured pendants, similarly inlaid bracelets on the upper arms, and a pair of circular earrings. Beaded bracelets are also visible around the wrists and the right ankle, along with a sacred thread (Skt. yajñopavīta) over his left shoulder. Finally, an upswept hairstyle – damaged in its upper section – is surmounted by an elaborate crown composed of a beaded headband with flowers on the sides and a central round jewel, three large flower blossoms and crescent moons, from which two long strands of hair fall to his shoulders. Traces of blue paint in the hair and remnants of cold gold are still visible on the face and neck, attesting that the statue was preserved in a Tibetan Buddhist context.

Overall, the iconographic composition of this image exhibits the general iconographic features of a seated Bodhisattva. Moreover, the position of the left hand and the remaining part of the attribute in the right hand (Tib. phyag mtshan) are well-suited to support the identification of this statue as Bodhisattva Vajradhvaja, as suggested by the inscription.23

The artistic depiction of this Vajradhvaja can be compared to at least two other known metal images (fig.3-4).24 These sculptures

22 Similar flowers can be seen on the dhotī of a standing Mañjuśrī attributed to Kashmir schools in Western Tibet in the eleventh century; see Ulrich von Schroeder, Buddhist Sculptures in Tibet (Hong Kong: Visual Dharma, 2001) 1, 152, 40A-C.

23 This Bodhisattva is often known under the name Vajraketu. For a review of Vajradhvaja-Vajraketu’s iconography; see Lokesh Chandra, Dictionary of Buddhist Iconography (New Delhi: International Academy of Indian Culture and Aditya Prakashan, 1999) 13, 3974-3979; Shashibala, Comparative Iconography of the Vajradhātu-Mandala and the Tattva-Saṅgraha (New Delhi: Sharadi Rani, 1986) 164-168; Marie-Thérèse De Mallmann, Introduction à l’iconographie du tāntrisme bouddhique (Paris: Librairie Adrien-Maisonneuve, 1975) 1, 397.

24 For a general description of figure 3; see Ulrich von Schroeder, Buddhist Sculptures, 1, 190, 57A. For a general description of figure 4; see Von Schroeder, Buddhist Sculptures, 1, 190-191, 57B.
show two seated figures whose body proportions, modelling, clothing, and ornaments are strikingly similar to the stylistic features of the Rietberg Bodhisattva. They have been identified as the goddess Mālā (Tib. ’phreng ba ma) and a form of Bodhisattva Mañjuśrī (Tib. ‘jam dpal) by Ulrich Von Schroeder who attributed these images to Kashmiri workmanship – or schools – in Western Tibet around the eleventh century. These three sculptures represent a closely related corpus of sculptures and point towards a similar artistic tradition or workshop.

Within this group of sculptures, the Rietberg Bodhisattva and the goddess Mālā display strong stylistic similarities. Notwithstanding their respective iconography, the two images are similar in nearly all respects as far as the description and photographic documentation allow us to judge. The goddess from the Li ma lha khang in Lhasa measures 13.7 centimetres, as against 13.5 for Vajradhvaja. It is cast in one piece with a hollow pedestal. Both figures had separately cast aureoles. The goddess Mālā is also seated in the noble attitude on a single lotus base, which is the perfect replica of Vajradhvaja’s pedestal; here again, a distinctive feature is the fact that the right knee does not touch the ground. The relief work of her garment follows the same fashion, with stripes of eight-petalled flowers outlined in black and the presence of a similar roundel motif on the left knee, whilst traces of red pigment are also visible in the inner thighs. Unlike Vajradhvaja’s, Mālā’s ribbon-like scarf is not broken off but swirls around her arms, with similar beaded fringes, and two large fork-tailed ends at the level of her shoulders; an interesting element is the later addition of a small thread with a wafer seal attached to the lower left loop of the scarf. The most salient elements for a comparison between these two images are the ornaments; with the major exception, however, that the use of inlays has not been reported in the description of the second image. They include a beaded girdle with a yet slightly different central buckle-like ornament, beaded bracelets and anklets, identical circular earrings clipped onto the earlobes, and

25 Von Schroeder, *Buddhist Sculptures*, 1, 190, 57A-57B. The identification of Mālā is congruent with the iconography of the goddess. The image, however, seems to lack female body forms. Alternatively, this statue could be related to the depiction of vajra-bodhisattvas such as Vajrahāsa, Vajrarakṣa, or Vajrayakṣa, who also hold their hands in front of the chest in a similar fashion.

26 The face of Mālā was later on covered in cold gold and her hair painted in blue according to a Tibetan fashion and religious praxis. The difference of patina between the two images can be imputed to various reasons; including an exposition to the smoke and soot of butter lamps in a traditional Tibetan shrine for Mālā; anti-tarnish cleaning and polishing in the case of Vajradhvaja as remnants of cold gold can attest; and the conditions in which the photographs were taken.

27 Von Schroeder, *Buddhist Sculptures*, 1, 190, 57A.
a similar headdress. The angle of the photography and the use of cold
gold on Mālā’s chest does not allow for a clear view of her necklace.
The central arrow-like pendant with roundel, however, is reminiscent
of the one on Vajradhvaja’s neck. Finally, the very distinctive pair of
beaded bracelets on the upper arms of these figures, with three dangle-
ging ornaments and stylised fleurs-de-lys on top, are identical in all
aspects.

In light of the great similarities between these two metal images, it
is tempting to reconsider their stylistic provenance. As a reminder,
the Rietberg Bodhisattva has been ascribed to ninth-tenth century
Kashmir, whilst the goddess Mālā has been attributed to Kashimiri
schools in Western Tibet around the eleventh century. There are
grounds, I will argue, to refute the first provenance and to question
the second attribution.

To begin with, the body proportions of these two figures differ
considerably from ninth-tenth century Kashmiri metal images. In
particular, the elongated torsos, well-proportioned chests, and lean
shoulders do not accord well with the triangular upper body, broad
chests, and rounded shoulders of many metal sculptures from Kas-
him. In fact, the manner in which the tripartite trunk (i.e. developed
chest, slender wasp waist, and pronounced cruciform abdomen) is
modelled relate these two sculptures to a Western Indo-Tibetan style.
But yet again, the Rietberg Bodhisattva and the goddess from the Li
ma lha khang differ quite significantly from eleventh-century bronzes
from Western Tibet, with their general stiffness and often dispropor-
tionate body parts.

Likewise, the facial features of these images seem to defy easy
classification, whilst retaining un-je-ne-sais-quoi familiar to both
Kashmiri statues and metal images from Western Tibet produced
between the tenth and eleventh centuries. Stylistically, their heads are
rather well-proportioned, avoiding the round and full faces with
fleshy cheeks of most Kashmiri images, and the slightly oversized
heads with oval faces of later Western Tibetan copies altogether. It
combines the heavy upper eyelids with high bow-like brows of tradi-
tional Kashmiri works, yet avoids the low foreheads of the latter. In
particular, the position of the protruding ūrṇā in the middle of the
forehead does not accord well with Kashmiri metal images – pro-
duced in Kashmir or by Kashmiri artists – in which the tuft of hair is
more often than not positioned between the converging lines of the
upper eyebrows, almost at the root of the nose. Finally, I see no visual
parameters to evaluate with any degree of certainty the nose, mouth,
and gently marked chin; while evading the large nose with rounded
ridge of early pieces, these features do not seem to conform to the
mannerism of Western Tibetan images based on Kashmiri models either.

Another stylistic feature can be raised against a Kashmiri provenance or Kashmiri workmanship in Western Tibet. The depiction of the *yajñopavīta* of the Rietberg Bodhisattva, as well as to a large extent that of the goddess Mālā, is of dubious appearance. In both cases, the sacred thread runs down the left side of the body and joins the girdle or, more likely, disappears below the dhotī-like garment. Furthermore, the initiation thread does not resurface on the right side of the body, and was clearly not represented on Bodhisattva Vajradhvaja’s back. According to art historian and Tibetologist Christian Luczanits it could suggest that the depiction of the *yajñopavīta* was an artistic and iconographical convention no longer clearly understood by craftsmen. This would exclude, in theory, the hand of a Kashmiri master who must have been accustomed to the religious meaning of the *yajñopavīta* and its cultural significance within a Buddhist context. As a result, the simplification of the thread would indicate that the image was, perhaps, made by a foreign artist, either trained in Kashmir or trained by a Kashmiri master.

The possibility that we are dealing here with foreign craftsmanship in a Western Indo-Tibetan idiom becomes particularly interesting when looking at Vajradhvaja and Mālā’s pedestals. As noted earlier, the fluted moon disc atop a lotus flower, with a single row of downward-pointing broad lotus petals, double-lobed elements, and alternate sharped-edged petal tips, is the same in both images. The treatment of these petals is generally absent from the art of Greater Kashmir and Western Tibet. It differs substantially from the long, broad, and plain lotus petals that are often associated with the Swat Valley, and which came to influence west Kashmir and Gilgit. One must acknowledge that in a small number of cases, however, the lotus seat of sculptures related to Kashmir and Western Tibetan bear

28 Compare with the depiction of the sacred thread in the front and back of figure 4 where it has been stylized; see Von Schroeder, *Buddhist Sculptures*, 1, 190-191, 57B-C.
29 In the case of the example discussed by Luczanits, the geographical provenance of the artist is attributed to the Western Himalayas. I see no reason to limit the sphere of Kashmiri influence to the East and exclude the possibility of artists from regions to the north and northeast of Kashmir to be included here; see Christian Luczanits, “From Kashmir to Western Tibet: The Many Faces of a Regional Style”, Rob Linrothe, *Collecting Paradise: Buddhist Art of Kashmir and Its Legacies* (New York: Rubin Museum of Art, Evanston: Northwestern University, Mary and Leigh Block Museum of Art), 111, 119.
some resemblance with the rows of lotus petals described above, suggesting perhaps a regional variation of the same theme (fig.5-6).30 A good example of this is found at Dras in Lower Ladakh where a stone sculpture representing Bodhisattva Maitreya offers the closest depiction of these lotus petals for the Western Himalayan region (fig.7). The life-size sculpture is dated to the seventh-eighth century by art historian Rob Linrothe who analyses several stone images as part of a wider artistic movement in Zangskar and Ladakh which he assimilates to a ‘Kashmiricisation’.31 Linrothe does not discuss the pedestal of the Maitreya image but notes how the Bodhisattva’s vase (Skt. kundika) in the lower left hand is curiously reminiscent of Sogdian and Tang Chinese ewers. With the stone sculpture in Dras, we are certainly reminded of extensive cultural contacts between Kashmir and Ladakh, through which pilgrims, merchants, and artists would often travel to Yarkand or Kothan in Central Asia after the fifth century.32 In this respect, the lotus base of the Rietberg image would seem to attest to an artistic trend well established further East.

This type of lotus seat appears in Buddhist imagery as early as the sixth century. It is seen in stone and metal sculptures produced in China from the Northern Wei Dynasty (535 – 557) all the way through the Tang Dynasty (618 – 907) (fig.8).33 Furthermore, sculptures retrieved from the Tarim Basin underscore the long history and popularity of this type of lotus representations in Central Asia. Three

---

30 Figure 5 shows a seated Buddha from the O.C. Sud Collection in Shimla, India, dated from the eleventh century. Compared to the lotus leaves under review, the heart-shaped central part of the petal is yet quite different with the absence of bulging elements. Image taken from Deborah Klimburg-Salter, Tabo, a Lamp for the Kingdom: Early Indo-Tibetan Buddhist Art in the Western Himalayas (Milan, Skira, 1997), 170. As for Figure 6, it shows a seated Buddha Maitreya from the Nyinjei Lam Collection, currently on display at the Rubin Museum of Art, New-York, USA. This metal image is attributed to Kashmir and dated from the late eighth-ninth century. Here, the lotus petals are more closely related to our images. They still differ considerably in shape, design, and arrangement, with the main petals being positioned largely apart from one another, leaving space for a second row of alternate petals. Image from Rob Linrothe, Collecting Paradise: Buddhist Art of Kashmir and Its Legacies (New York: Rubin Museum of Art, Evanston: Northwestern University, Mary and Leigh Block Museum of Art), 68.

33 Figure 8 shows a seated Bodhisattva in a pensive pose measuring 54.4 centimetres and dated 544 CE based on a dedicatory inscription; see 金申, 海外及港台藏历代佛像珍品纪年图鉴 (山西出版集团.山西人民出版社: 2007), 121.
images deserve further considerations here. The first image shows a stucco relief fragment that served to decorate Buddhist monuments. The artefact was brought back from Khotan by the Ōtani expedition team and is currently kept in the National Museum of Korea (fig.9). It shows a Buddha in dhyanamudrā seated on a lotus seat seen from above. The double-lobed lotus petals are slightly more elongated, yet, they generally conform to the style of petals discussed here above. Other stucco reliefs with similar petals were also retrieved from the site of Dandān-oiliq to the north-west of Khotan (fig. 10). Finally, a fragment of a wooden panel from Khotan dated to the seventh-eighth century features a seated Buddha flanked by a standing Bodhisattva (fig.11). Notwithstanding its rough cut appearance, the Khotanese version of the Buddha’s seat closely resembles the lotus base of the Rietberg Bodhisattva, with its moon disc atop a row of downward-facing lotus petals, double humps, and lower leaf tips.

Discussion

An impressive corpus of Buddhist metal images attributed to North-Western India, Greater Kashmir, Western Tibet and beyond has found its way into museums, private collections, auction catalogues, and academic publications in the last twenty years or so. Although these sculptures seem to form a coherent whole, art historians are often at loss when it comes to locating the exact geographical production of these works. Moreover, very few of them appear to be securely datable objects and the bulk of metal images from these regions are usually attributed quite loosely to the tenth and eleventh centuries. Therefore, it is generally believed that a multitude of small and independent metal workshops developed by the end of the first millennium; usually on the basis of stylistic similarities observed in groups of images, rather than based on archaeological data, epigraphic evidence, and literary testimonies. As a result, these metal statues regularly fall under convenient yet rather imprecise labels such as ‘Western Tibet’, ‘Kashmiri style in Western Tibet’, ‘Western Himalayas’, ‘Western Trans-Himalayas’, or even ‘Kashmiri style in Central Asia’.

34 It is believed that these ornamental motifs adorned larger statues dated from the Tang Dynasty; see 金申, 海外及港台藏历代佛像精品年图鉴, 580.
36 A sixth-seventh century date is generally given for the wood carving preserved in the National Museum in New Delhi. For a later date adopted here; see Linrothe, Collecting Paradise, 33.
It is interesting to note that the complexity of this situation may have been experienced in Tibet as well, conceivably as early as the fourteenth-fifteenth centuries. Judging from a literary genre dedicated to metallurgy and casting (Tib. _li ma brtag pa_), metal images were identified and grouped under four distinct headings: Indian, Tibetan, Mongolian, and Chinese. In the case of statues made in Indian style, sculptures were then classified according to their provenance, with further distinctions between images ascribed to Central, Eastern, Western, Southern, or Northern India. It is in this context that the term ‘Western _li_’, which came to be incised on the lotus base of the Rietberg Bodhisattva, must be considered. But as we have seen, Western metal images cast in Indian style could easily include a variety of sculptures produced in North-Western India, Kashmir, or even Central Asia. 

Whilst caution may be appropriate with regard to the Tibetan classification of Indian metal images, the question remains as to whether Tibetan Buddhist masters, artists, and craftsmen were able to clearly identify the provenance and artistic trend of sculptures sometimes produced centuries before them.

In this regard, the inscription on the Rietberg Bodhisattva is unique. First of all, it does not seem to have any equivalence with other known bronzes bearing meritorious or devotional inscriptions. Secondly, Tibetan inscriptions engraved on metal sculptures from Kashmir in the eleventh century offer the means for a palaeographic analysis. A comparison of the headed script (Tib. _dbu can_) used to inscribe these statues reveals that the engraving of the Rietberg Bodhisattva can hardly be attributed to that period. 

---

37 In a recent article about the collection of metal sculptures kept in the _Li ma lha khang_ in Lhasa, a Tibetan researcher from the Potala Palace notes that Western Indian images include statues from Kashmir (Tib. _kasmir_), _Ti li dza_ (?), and Xinjiang (Tib. _yu gur_); see bDe-skyid, “Pho brang po tA la’i li ma lha khang gi li ma’i sku bnyan skor cung zad geng ba”, _Pho brang po tA la_, 1, 2012, 45-49.

38 Meritorious inscriptions usually bear the name of a donor and the reason for its commissioning (e.g. the death of a relative). Conversely, a devotional inscription may simply give the name of the figure portrayed but would usually be accompanied with expressions such as ‘I bow down’ (Tib. _phyag ’tshal lo_) and ‘homage to’ (Tib. _la na mo_).

39 The writing style of the inscription on the Rietberg Bodhisattva differs significantly from Tibetan inscriptions datable to the eleventh century with their rounded letters /la/ and /’a/, stretched vowel _gi gu_, and typical subjoined _ya_. For example, the Kamru Avalokiteśvara bearing the name of the eleventh century translator Viryabhadra (Tib. _Byi rya ba dra_); see Amy Heller, “Observations on an 11th century Tibetan inscription on a statue of Avalokiteśvara”, _Revue d’Études Tibétaines_, 14 (2008): 107-116; many engraved sculptures in the possession of members of the royal family of Guge, such as the Buddha from Dangkhar offered to Lha bla-ma Zhi-ba’od; see Lobsang Nyima (Yannick) Laurent, “Lha bla ma Zhi ba ’od’s Eighth Century Bronze from Gilgit”, _Revue d’Études Tibétaines_, 26 (2013): 195-214; a statue of a Buddha in Kashmiri style acquired by King rTse-lde;
text, the singularity of the formula supports the assumption that Tibetans were aware of metal sculptures of non-Tibetan origin—possibly even workmanship—either past or present. This would explain, perhaps, why it was felt necessary to label both the identity and artistic affiliation of this image. With his face painted in cold gold, it is reasonable to believe that the Bodhisattva image was worshipped and preserved alongside other Buddhist memorabilia and curiosities of a distant past, which so often fill up Tibetan shrines.

In the same way, the goddess Mālā in Lhasa was equally revered as a ‘religious artefact’. As most sacred metal images in the hands of the Tibetans, her hair was painted blue, her face covered with gold, and her facial features redrawn out of devotion. But this image had also been a gift before being installed in the Li ma lha khang. The wafer seal attached to her scarf attests to a tradition of gift giving whereby religious hierarchs or rulers would generally bestow sculptures of spiritual significance; due to their symbolic value, provenance, or history. A small thread was then attached with the personal seal of the donor—whose identity is now lost in the case of Mālā—and sometimes even listed in an official document dispatched along with other presents.  

As memorabilia and Buddhist relics, Bodhisattva Vajradhvaja and the goddess Mālā ended up in Tibet at a time that can no longer be specified. Nonetheless, their identical size and stylistic resemblance call attention to a similar artistic trend and even workshop production. More importantly, these elements strongly suggest that the two

Amy Heller, “Indian Style, Kashmiri Style: Aesthetic of Choice in Eleventh Century Tibet”, *Orientations*, 32, 10 (2011): 18-23; and also sculptures belonging to the royal prince Nāgarāja (Tib. Na gar a dza) amongst which the standing Buddha from the Cleveland Museum of Art; see Deborah E. Klimburg-Salter, *The Silk Route and the Diamond Path: Esoteric Buddhism Art on the Trans-Himalayan Trade Route* (Los Angeles: UCLA Art Council: 1982), 103. I am grateful to Amy Heller for sharing the visual material needed for these comparisons.  

On the general practice of precious gifts, including old gilded statues; see Emma Martin, “Fit for a King? The Significance of Gift Exchange between the Thirteenth Dalai Lama and King George V”, *Journal of the Royal Asiatic Society*, 25, 1 (2014): 71-98. A well-documented case is the famous Buddha image offered by the Thirteenth Dalai Lama to Russian explorer and agent Pyotr Kuzmich Kozlov (1863 – 1935). The body of the statue was wrapped, sealed, and marked with the message “To be offered to Kozlov” (Tib. kho dzo lob par sprod rgyu). The sacred image was then entrusted to Agvan Dorzhiev (1854 – 1938) with a letter from the Dalai Lama in which the religious monarch requested his emissary to ensure that the statue would arrive according to the attached list of gifts (Tib. ‘bul rgyu tho). For a photograph of this Buddha; see Yulia I. Elikhina, *Abode of Charity: Tibetan Buddhist Art* (Saint Petersburg: The State Hermitage Publishers, 2015), 120. For the Thirteenth Dalai Lama’s letter; see Jampa Samten & Nikolay Tsyrenpilov, *From Tibet Confidentially: Secret correspondence of the Thirteenth Dalai Lama to Agvan Dorzhiev, 1911 – 1925* (New Delhi: Library of Tibetan Works & Archives), 52, 89, 121.
pieces were initially part of a set of images. In this respect, it is worth pointing out that these two figures are not the most common deities of the Buddhist pantheon, nor do they figure prominently in popular Buddhist imagery. It seems only reasonable to locate the production of these two sculptures within the sphere of higher esoteric Buddhist praxis. In fact, there is little doubt that they had once belonged to the same ritualistic context before being scattered to the four winds.

In effect, these two metal figures would not have had much of a presence outside a three-dimensional maṇḍala. It is generally believed that such meditational supports – and the esoteric texts that accompanied them – were available in North-Western India, Kashmir, and Central Asia by the tenth century, if not earlier. Series of individually cast deities of small sizes, which are usually ascribed to the broad category of Western Indo-Tibetan images, highlight the development of three-dimensional arrangements of particular maṇḍalas during the following centuries.41 If the textual tradition suggests the use of a large array of root texts and esoteric imagery, an important number of artistic depictions known to us today points to the visual representations of Buddha Vairocana’s maṇḍala.

The rise of Buddha Vairocana from the mid-sixth century onwards did not only turn him into an iconic figure in China and Central Asia, but also contributed to promoting the royal cult of the Tibetan Tsanpo (Tib. btsan po) in Tibet by the eighth century.42 The rapid visual transformation of Vairocana, linked to the development of esoteric literature, eventually culminated in a distinctive period of architectural and artistic expression during which Vairocana’s maṇḍalas gained popularity in Central and then West Tibet.43 Not so surpris-

41 For an example of free-standing figures of a three-dimensional maṇḍala, see four of the sixteen vajra-bodhisattvas attributed by Ulrich von Schroeder to Kashmir schools in Western Tibet. These images measure between 17-18 centimetres and date from the eleventh century; see Von Schroeder, Buddhist Sculptures, 1, 170-171, 49B-E.

43 A relevant evidence from Central Tibet is provided by the main temple of bSam yas monastery. According to the description in the rGyal rabs gsal ba’i me long, it is recalled that the principal image of the third floor is Sarvavid Vairocana hence attesting to a general depiction of a vajrādhvajamaṇḍala. It is worthy of note that the sixteen vajra-bodhisattvas of his retinue are all subsumed under the mention of Vajrādhvaja; steng khang gi gtso bo sngags rgyas rnam par snang mdzad kun tu zhal re re la ’khor gnys re\r byang chub sens dpa’ rje ba’i sras brgyad \nang gi lha byang chub sens dpa’ rdo rje rgyal mthshan la sogs pa sphyogs bcu’i sngags rgyas byang sems\l khro bo mi g.yo ba dang sphyag na rdo rje\l bzo rgya gar gyi lugs su bzhengs\l; “In the upper chapel, the main [image] is Buddha Sarvavid Vairocana – each head having two retinues –, the eight close sons, the inner deities [of the maṇḍala] Vajrādhvaja and
ingly perhaps, Bodhisattva Vajradhvaja and the goddess Mālā feature amongst the core assembly of this deity.

According to prescriptive expositions found in tantric literature, the root mandala of Vairocana known as vajradhātumanḍala is usually composed of thirty-seven deities, namely five tathāgatas or jinas, sixteen vajra-bodhisattvas, eight offering goddesses, and four gatekeepers. Within this arrangement, Vajradhvaja features as one of the sixteen vajra-bodhisattvas, whilst Mālā with her garland is usually depicted as one of the eight offering goddesses. Traditionally, they both reside in the southern quarter of the vajradhātumanḍala. The question therefore arises whether the number fourteen in the inscription could refer to a set of free-standing images and their position within this specific mandala. From a simple structural arrangement, whereby each tathāgata is surrounded by four vajra-bodhisattvas, Vajradhvaja would indeed occupy the fourteenth position as part of Ratnasambhava’s retinue. But in some Tibetan painted representations his position is swapped with Bodhisattva Vajrabhāṣa’s (Tib. rdo rje bzhad pa) and thus Vajradhvaja comes fifteenth. This way of counting the deities of the vajradhātumanḍala does not conform, however, to the textual traditions established in Tibet. In the Sarvatathāgata Tattvasamgrahanām Mahāyānasūtra (Tib. de bzhiin gshegs pa thams cdad kyi de kha na nyid bsdu pa zhes bya ba theg pa chen po'i mdo) Bodhisattva Vajradhvaja is listed sixteenth. Likewise, if we follow Ānandagarbha’s commentary, the list of deities exactly coincides with the Tibetan ritual practice of Kun rig rnam par snang mdzad (Skt. sarvavid vairocana). Here again, Vajradhvaja occupies the sixteenth position.

This last arrangement, for instance, served as the basis for the iconographic programme of the main temple at Tabo in 1042. It replicated a three-dimensional architectural and artistic expression of the vajradhātumanḍala of Sarvavid Vairocana. It is worth noting some iconographic divergences between our metal images and the clay

so forth, the Buddhas and Bodhisattvas of the ten directions, the wrathful Acala and Vajrapāṇi, the workmanship of which is in Indian style”; bSod-nams rgyal-mtshan, rGyal rabs, 21, 208.

44 She may also appear under the form of Vajramālā, for instance in the Sarvatathāgatatattvasamgrahatantra; see Shashibala, Comparative Iconography, 1986, 37-38.

45 The four vajra-bodhisattvas surrounding each tathāgata are represented clockwise, starting with tathāgata Vairocana in the centre, Akṣobhya in the East, Ratnasambhava in the South, Amitābha in the West, and Amoghasiddhi in the North.

47 I am grateful to dKa’chen bLo-bzang dus-’khor from Tashi Lhunpo Monastery in India for confirming the exact sequence of the thirty-seven deities of Kun rig.

48 Klimburg-Salter, Tabo, 1997, 100-103.
sculptures in Tabo, particularly in the ritualistic hand gestures (Skt. mudrā). If it is difficult to say whether these iconographical departures are based on different textual traditions or due to regional and artistic variations, they raise once again the knotty problem of the provenance of our images.

In the course of this paper, several pieces of evidence challenge the view that the ‘Bodhisattva with gadā’ in the Rietberg Museum should be attributed to Kashmir or to Kashmiri workmanship in Western Tibet. The presence of a closely related bronze in Lhasa shows that both images were likely to belong to a same set of free-standing metal sculptures used to provide visual support for the visualisation of a vajradhātu-maṇḍala. This type of artistic expedient, as we have seen, is linked to the rise of esoteric literature and the representations of maṇḍalas. The production of these two metal images is thus in line with religious praxis and artistic depictions well-established in the tenth and eleventh centuries.

From a stylistic point of view, the Rietberg Bodhisattva and the goddess Mālā generally conform to a trend of metal images datable to the turn of the first millennium. As expressed earlier, a series of stylistic features are however at variance with well-known examples of sculptures produced in Kashmir and Western Tibet around that time. In particular, the exceptionally fine depiction of Bodhisattva Vajradhvaja displays bodily proportions and facial features that cannot be easily categorised. Furthermore, the oversimplification of the sacred thread on both images raises justifiable doubts as to the Kashmiri origin of these statues. Finally, and to compound matters, the uniqueness of these metal works is further emphasised by a choice of lotus seats quite unusual for the regions of Kashmir and Western Tibet, although largely attested in Central Asia and China.

What is certain, however, is that the Rietberg Bodhisattva was acquired by Tibetans in later times as the writing style of the inscription cannot be attributed to the eleventh century. They correctly identified the bronze as Bodhisattva Vajradhvaja, which suggests that the banner in his right hand was not broken when they engraved his name, and recognised the foreign provenance of this image. His face and neck were covered with gold, his hair painted blue. It was probably installed on a shrine and the number fourteen was assigned to him, perhaps as part of a list of religious items (Tib. brten deb) belonging to a particular chapel or monastery. I am of the view that the unusual inscription incised at the feet of Vajradhvaja eventually operated as

49 In the case of Mālā’s hands, they are turned towards her chest in the metal image from Lhasa, whilst they used to hold the garland outwards in Tabo. Likewise, the left hand of the Rietberg Bodhisattva rests on the upper thigh, whilst Vajradhvaja/Vajraketu’s left fist is held upside-down at the thigh in Tabo.
the caption of a museum showcase. It helped pilgrims and non-
monastics to identify a rather secondary deity.\textsuperscript{50} Most importantly, it
drew attention to its foreign workmanship production, highlighting
its sacred and most revered origin as a metal image from West India.

Combining stylistic observations with a review of the term ‘Western
\textit{li}’, we cannot exclude the possibility that the Rietberg Bodhisatt-
va and the goddess Mālā in Lhasa were produced further East, in
regions that once fell under the general conception of Western India.
The actual presence of copper ore deposits located north of the Kun-
lun Mountains between Yarkand and Khotan,\textsuperscript{51} the recurring ac-
counts of Khotanese artistic influence in Tibetan sources, and the
long political history and cultural connections between Tibet and the
ancient Buddhist kingdom of Khotan provide a valid contextual
framework to locate the production of these images. As we have
seen, Tsong-kha-pa’s gift to the Yongle emperor underlines the fact
that Khotanese sculptures were still familiar in Tibet in the fifteenth
century. Together with those from Kashmir and North-western India,
Khotanese statues were soon to be categorised as \textit{nub li} in specific
Tibetan texts discussing the metal casting of images.

Notwithstanding a dearth of material vestiges and artefacts at-
tributed to the latter phase of Khotanese Buddhist art, from the
eight to the beginning of the eleventh century, Khotan had long
been a pilgrimage destination and transit point for the spread of
Buddhism between India and China.\textsuperscript{52} Luxury goods, Buddhist texts,
and devotional objects circulated through the southern and northern
routes of the Silk Road along with traders, monks, and pilgrims.
Portable shrines and statues retrieved from Khotan demonstrate in-
teractions between Kashmir, Gilgit, and surrounding cultures. A
Kashmiri statue of a seated Buddha excavated in Domoko, for in-
estance, bears witness to the vitality of cultural exchanges in the re-
gion, prefiguring perhaps for their Tibetan neighbours competing
aesthetic trends.

It is equally noteworthy that in a few cases Bodhisattva Vajra-
dhvaja appears in literary texts related to Khotan. He is mentioned,

\textsuperscript{50} The labelling of deities and religious figures – in particular statues – for the sake
of pilgrims and worshippers is still a current practice inside Tibetan chapels and
temples today. Their names are usually handwritten or printed out on paper and
these modern captions are variously fixed, taped, or glued to the religious imag-

for instance, with other great Bodhisattvas of the bhadrakalpa in a Khotanese translation of the Sumukhasūtra commissioned in 943.\textsuperscript{54} More significantly, he grants protection against the red-faced Tibetans by pronouncing a dhāraṇī for the safeguard of Khotan in the Tibetan recension of a text known as the Vimalaprabhāparipṛcchāsūtra.\textsuperscript{55} Despite these brief literary occurrences, the statue of Bodhisattva Vajradhvaja in the Rietberg Museum should likely be connected to the development of esoteric literature and the figure of Vairocana, as we have seen.

The cult of Buddha Vairocana had strong roots in Central Asia and China even before the emergence of tantric literature. As a Buddha of cosmic dimensions he features prominently in the Avatamsakasūtra literature, a corpus of Mahāyāna texts fully translated into Chinese by the Indian monk Buddhhabhadra (359 – 429) from an original Sanskrit version acquired in Khotan in the fifth century. In it, the Gaṇḍavyūhasūtra already announced in essence the doctrinal concept of dharmadhātu. With these texts, images of Vairocana started to circulate by the mid-sixth century. The cosmic Buddha thus became an important theme in Khotanese and Central Asian paintings where he is depicted as the source of all existing phenomena in the universe.\textsuperscript{56} Whilst painted representations of maṇḍalas have not been found amongst Khotanese vestiges, minor iconographic themes suggest that the ancient Buddhist kingdom acted as “a transitional stage in the evolution of the art of Vajrayāna”.\textsuperscript{57} However, there is material evidence of representations of vajradhātumanḍalas produced under the Tang in the late eighth and ninth centuries. Esoteric Buddhist art at Dunhuang, where the activity of Khotanese Buddhist patrons is largely attested in the tenth century,\textsuperscript{58} underscores “a unique blend of cross-cultural iconographical themes and styles (… ) that are often

\textsuperscript{56} For example, the mural fragment of a Cosmic Vairocana from Khotan preserved in the National Museum in Delhi; see Joanna Williams, “The Iconography of Khotanese Painting”, East and West, 23, 1-2 (1973): 117-118, 131. Also, a painting of Buddha Vairocana in Cave 13 at Kizil in the ancient kingdom of Kucha; see Denise Patry Leidy, The Art of Buddhism: An introduction to its history and meaning (Boston-London: Shambhala, 2008), 70.

strongly informed and influenced by those of India, Tibet, and the Uighur kingdom in Turfan”. The Islamic takeover of Khotan by the Qarakhanids around 1006 likely prevented an artistic expansion of some of the most sophisticated forms of esoteric imagery, which were to flourish in Western Tibet in the following centuries.

As a result of these epigraphic and stylistic considerations, I propose to read the inscription engraved on the statue of the Berti Aschmann collection as follows: “A metal image of Bodhisattva Vajradhvaja from Western [India]”. The singularity of this formulaic phrase confirms the great mobility of religious objects within the Buddhist world. It underscores the Tibetans’ fascination for Buddhist images from the holy land of India, a geographical notion that was extended to the Buddhist kingdoms of the Silk Road. By exhibiting a combination of features reminiscent of the art of Western Tibet and the art of the Tarim Basin, the Rietberg Bodhisattva reminds us of the complex artistic interplays at work by the turn of the first millennium. Last but not least, it recalls once again the important role attributed to Khotanese imagery and artists in the Tibetan literary tradition, a recurring trope that still awaits more tangible evidence.

Acknowledgement

This research paper has benefitted from several discussions and inputs. I would like to extend my gratitude to Tsering Gonkatsang, Amy Heller, Shawo Khacham, Christian Luczanits, and Alexandra Von Przychowski. I would also like to thank Azaher Miah and Robert Sherman for their careful proofreading. Last but not least, I sincerely thank Ulrike Roesler for her meticulous reading and Yury Khokhlov for his relentless support and suggestions.

In May of 1906, on his way to Khotan, Aurel Stein traveled through what is now the Afghanistan portion of Wakhan. Stein entered Wakhan from the south via the Broghil pass, followed the main trail along the north bank of the Wakhan river to the Pamir, and exited Wakhan via the Wakhjir pass. Snow covered much of the higher elevation terrain at that time of year (Stein 1912, p. 72). He visited the massive fort of Kansir above Korkut village on the south bank of the Wakhan river on the morning of May 21, returned to his camp at Sarhad\(^1\) that afternoon and the next morning departed for the Pamir (see Fig. 1).

---

\(^1\) Sarhad, also known as Sarhad-e Broghil, is the highest elevation permanent settlement area in Afghanistan Wakhan.

Stein’s understanding of Wakhan’s history was “derived solely” from Édouard Chavannes’ French translation of the Tang dynasty annals (Stein 1922, p.133; Chavannes 1903/2006a). Recent scholarship has contributed substantially to our understanding of the history of Wakhan and the Pamir region in the 7th-9th centuries CE. The Tang dynasty annals have been reexamined and compared with other important Chinese sources, the Old Tibetan Annals, the Old Tibetan Chronicle, Old Turkic inscriptions, and Arabic sources.²

Stein’s main interest in Wakhan was the Chinese campaign of 747 CE, in which General Kao Hsien-chih led an army of 10,000 cavalry and infantry across the Pamir and defeated a Tibetan army at LIEN-YIIN, a fortified place close to present-day Sarhad-e Broghil. Stein noted that a principal Chinese objective in the Pamir was “control of the great Central Asian trade route” (Stein 1922, p. 114), and Kao Hsien-chih’s military campaign was the culmination of decades of struggle with the Tibetan empire for control of the Pamir route(s).

The Tang court maintained diplomatic relations with the independent kingdoms of Wakhan, Balur/Palola, ³ Chitral and Kashmir, which sent emissaries bearing tribute to the court. Despite these trade and diplomatic missions to the Tang court and the Chinese granting official decrees awarding royal titles to the kings, the Tibetans continued to pass through Balur and Wakhan.⁴ In 722 CE, the Tibetan army occupied Little Balur, provoking a military response from the Chinese,⁵ who defeated the Tibetans in Balur the same year (Beckwith 1987, p. 95). The Tibetans, however, did not go away and in 730 CE the king of Wakhan fled to Chinese territory where he requested military aid to counter Tibetan influence (Beckwith 1987, p. 111). Finally, in 737 CE, the Tibetan army captured the king of Little Balur, the entire Pamir region came under the control of Tibet, and all tribute to the Tang court ceased (Beckwith 1987, p. 116).

² The ground-breaking study is Beckwith 1987. See also recent scholarship by Denwood (2007, 2008, 2009), which proposes new interpretations, and Zeisler (2009) which reviews and discusses the scholarship and sources. Dotson (2009) has provided a new and annotated translation of the Old Tibetan Annals.
³ von Hinüber (2004, p. 7) notes that Palola is also a geographic name.
⁴ Balur and Wakhan, along with neighboring Chitral, Uddyana and Kashmir, remained aligned with China, notwithstanding significant Tibetan influence in the region (Beckwith 1987, p. 87-89; Denwood 2009, p. 152). The Tang court even sent an ambassador to Little Balur in 720 CE to confer the title of king on Su-lin-loi-chih (Surendraditya) (Chavannes 2006b, p. 42).
⁵ On learning of the Tibetan occupation of Balur, the Chinese Imperial Commissioner said: “Balur is the western gate of Tang; if Balur is lost, then the lands of the West will become all Tibetan” (Chavannes 2006a, p. 182, n. 5, my translation).
The kings of Balur/Palola, the Palola Shahis, were wealthy patrons of Buddhism, commissioning sumptuous bronze Buddha images and copying and preserving important Buddhist texts – the famous Gilgit manuscripts. Their “astonishing rich and flourishing Buddhist culture” (von Hinüber 2003, p. 35) also left a legacy of inscriptions and Buddhist art on numerous large rocks throughout the Gilgit region. Their remarkable bronzes present not only a central Buddha image, but in several cases also depict a Palola Shahi king, queen and minister as donors, all of whom are identified in dated inscriptions on the bronzes (see Fig. 2).

Fig. 2 - Palola Shahi Bronze of Nandivikramadityanandi, 715 CE

---

6 In addition to the discussion of the Palola Shahi rock inscriptions in von Hinüber 2004, see also the wider discussion of rock art and inscriptions in Jettmar 1989.

Although the Palola Shahi dynasty was “unknown to ancient Indian historiography” (von Hinüber 2003, p. 36), the cultural and political significance of Balur for the Tang court seems undeniable. Nor could the strategic importance of Balur, the “western gate of Tang” be underestimated. Therefore, it is not surprising that when, in 740 CE, the king of Little Balur married a Tibetan princess and the Tang Imperial Commissioner’s fears of losing the western regions to Tibet were realized, the Tang court sent an army of 10,000 to re-take Little Balur.

Tang China’s Campaign of 747 CE

The campaign, led by general Kao Hsien-chih, is recorded in his biography. Appointed by the Tang court as envoy in charge of administration of the army and cavalry of the Four Garrisons, Kao Hsien-chih was ordered by the Emperor to attack the Tibetans. The army, in which the infantry also brought their own horses, marched from Kucha to Kashgar to Tashkurgan. From there, more than twenty days marching brought them to the valley of Po-mi, identified by Chavannes (2006a, p. 85) as the Pamir. After more than twenty additional days marching, the army arrived in the Te-le-man valley, which is equated with the kingdom of the five She-ni, identified by Chavannes as Shughnan (2006a, p. 85). The area of Shughnan in present-day Tajikistan has five main valleys whose rivers arise in the Pamir and descend to join the Panj river (whose name itself means ‘five’). The place Te-le-man, 特勒滿 in Chinese, has an alternative reading of Te-ge-man, which corresponds with Tegeman Su, a valley in the extreme northeast of Afghanistan’s Little Pamir that feeds into the Aksu river near Shaymak in Tajikistan. It can be reached from Tashkurgan via either the Neza Tash pass (4476m) or the Beik pass (4662m).

---

8 The Lady Khri ma lod was married to the Bruzha rje, or Lord of Bruzha, the title the Tibetans conferred on him. Such marriages resulted in zhang dbon relationships, in which the Tibetan king was zhang or uncle, and the local king who married the princess was dbon or nephew (Richardson 1998a, p. 16, Dotson 2009, pp. 31-37).
9 Found in Chiu T’ang Shu, chapter 104, which was translated into French by É. Chavannes (Chavannes 2006a, pp. 185-189). Stein 1922 interprets the narrative in conjunction with his (Stein’s) 1906 visit to Wakhan. Beckwith (1987, pp. 130-133) offers a revised reading of the original biographic narrative.
10 From north to south, the Vanch, Yazgulem, Bartang, Gund, and Shakhdara rivers.
11 I am grateful to Dr. David Keenan, Chinese scholar and colleague at the University of California, Santa Cruz, for bringing this to my attention.
At this place Te-le-man/Te-ge-man, Kao Hsien-chih divided his army into three. His strategic aim was to attack the Tibetan-occupied fort at Lien-Yün, near present-day Sarhad-e Broghil in Wakhan. Kao Hsien-chih sent three thousand horsemen by the “northern gorge”; a second group went by the “Red Buddha Hall Road”; and the general himself and the Imperial Commissioner went via the “kingdom of Hou-mi”, which Chavannes identified as the kingdom of Wakhan. The plan was for the three groups to meet “about three days after their departure” (Beckwith 1987, p. 132) “on the thirteenth day of the seventh month between seven and nine in the morning at the Tibetan fortress of Lien-Yün” (Chavannes 2006a, p. 186), a date which Beckwith identifies as August 11, 747 CE.

The distances and terrain that would have to be traversed to arrive at Sarhad are such that the three groups would not be able to depart at the same time and arrive at Sarhad at the same time no matter where they started from; the distances and routes through the Wakhan mountains are too varied to allow for that. However, leaving aside the question of whether the times given in Kao Hsien-chih’s biography are entirely accurate, or what the actual place was where the army separated into three groups, the general description of the three routes converging on Sarhad appears sound.

The “Northern Gorge” Route

Stein supposed that the “northern gorge” route crossed the Pamir Range south-east of Lake Victoria (now known as Zor Kul) via a pass and then descended “into one of the gorges which debouch east of Sarhad” (Stein 1922, p. 118). Stein was able to confirm the existence of such a route on his third Central Asian expedition in 1915, although only through information from two Kirghiz men traveling with him and from looking though his binoculars at the Pamir Range in Afghanistan from the northern shore of Zor Kul (Stein 1916, p. 216). The actual pass, known locally as Kotal-e Shaur (4890m), is used today by Tajik traders visiting Kirghiz camps in the Great Pamir. From Sarhad, the route leads due north over a pass to the Wakhi pasture areas known as Chap Dara, which are on a western tributary of the main

---

12 Stein dealt with this difficulty by proposing that the army must have proceeded “in three columns moving up from Kashgar in successive stages” (Stein 1922, p. 118). But this conflicts with the Tang Annals version which has the army dividing at Te-le-man. Nor does Beckwith’s statement that the three groups converged at Sarhad “about three days after their departure” from Te-le-man fit either with Stein’s interpretation or with the actual ground to be covered.
Shaor stream.\textsuperscript{13}

In the Chap Dara area, high on a spur ridge with excellent views of the entire valley, is a ruined structure constructed of flat stones placed on top of each other (see Fig. 3).

![Fig. 3 – ruined structure in Chap Dara](image)

It has been dismantled and dug by “illegal excavators”, according to Wakhi herders. This structure matches the locational and structural parameters for a hill-station (Tib. \textit{ri-zug}) used for signaling with fire or smoke to raise the alarm if enemies approached.\textsuperscript{14}

Numerous rock carvings and inscriptions near this ruined stone structure demonstrate substantial human occupation of the site over many years. The oldest rock carvings\textsuperscript{15} depict ibex, argali sheep, yaks,

\textsuperscript{13} When Kimberley O’Neil and I explored this area in 2005 and 2007, we were unaware of any other non-local persons having visited the area. We subsequently learned that the Japanese medical doctor Go Hirai explored this route and identified it as the “Northern Gorge” route in 2001 (Hirai 2002).

\textsuperscript{14} Stein (1912, pp. 152-153) described these at Miran. Takeuchi studied them in detail and suggested they may have also existed along the southern route of the Silk Road including “Little and Great Balur … and the Pamirs” (2004, p. 55). Mu Shunying mentions Han and Tang dynasty beacon towers along the northern and southern routes of the Silk Road (1984, p. 65). Dotson links the Tibetan hill-stations with “red fire raising stations” that are mentioned in the Old Tibetan Annals (2009, pp. 56-57).

\textsuperscript{15} For a thorough discussion of Central Asian rock art see Tashbayeva 2001, especially the section on Petroglyphs of Tadjikistan (Tashbayeva 2001, pp. 122-148),
and humans holding spears or bows. Such rock art hunting scenes are widely found throughout Central Asia and were likely related to ritual practices that ensured hunting success (Dodykhudoeva 2004, pp. 151-152; Hauptmann 2007, pp. 24-25, Bellezza 2008, p. 173). The spiritual dimension of the rock art at this site is demonstrated in one panel which shows a hunter holding a spear, several ibex, a yak, and a large ibex with exaggeratedly long curving horns (see Fig. 4). The excessively large size of this ibex with a reverse (counter-clockwise) swastika above and a crescent moon beneath suggests a ritual function for the art.16 (Also published as Fig. 16 and Plate IVb in Mock 2013c).

Fig. 4 - large ibex with reverse swastika and crescent moon

There are nine chorten (Tib. mchod-rten) or chorten-like structures17 (see

---

16 These symbols have been associated with Bon traditions. See Hoffman 1969 for a discussion of Bon religion and Bru-sha, the Tibetan name for Burusho people speaking Burushaski language (presently in Hunza and Yasin valleys of Pakistan). See Bellezza 2010, 2016a, 2016b for examples from Upper Tibet.

17 Ceremonial structures depicted on rocks likely served as a locus of ritual practice for not only Buddhist tradition. They are stepped and usually have a mast or fi-
Six have Old Tibetan epigraphs associated with them. Three of the epigraphs are legible and are discussed below. Two of them name the donors of the chorten and one of those epigraphs has a date in the twelve-year cycle. The third epigraph gives what appears to be a name, but whether it is a donor and whether the structure depicted is a Buddhist chorten or other ceremonial structure is undetermined.

In addition to the epigraphs associated with the chorten, there are eight additional Old Tibetan inscriptions. Most of them are quite weathered and difficult to read. One readable epigraph, discussed below, is not associated with a chorten and gives a date in the twelve-year cycle. Another is the unique Tibetan toponym for Wakhan, discussed in Mock 2013a. The other seven inscriptions are difficult to read, due to weathering and/or lichen growth on the rock. These inscriptions are on horizontal rocks, where snow and rain accumulate and weathering tends to be more pronounced.

The variety of rock art, including hunting scenes, animals, shrine structures, and Tibetan inscriptions indicate significant human use of

---

18 Space constraints preclude discussion of all of the ceremonial structures depicted. A full-length treatment of the site, following additional field work in 2016, is planned.

19 For discussion of the paleography of inscriptions, see Takeuchi 2013a and van Schaik 2014.

20 Two inscriptions appear to begin with a year, byi ba lo’i, and end with bris, suggesting they follow a formula of date – name – inscribed, as discussed in Takeuchi 2013b, pp. 29-30.
the site over time. The site today does not hold any cultural significance and is not associated with any legends for the Wakhi inhabitants of Wakhi, who told me that they were “made by fereshta” (“angel” or “fairy” in Persian).  

The Old Tibetan inscriptions and associated chorten structures are relevant to the history of the Tibetan empire in Wakhan. If this site was on the “northern gorge” route taken by the three-thousand horsemen of the Chinese army in 747 CE, why was it not mentioned in Kao Hsien-chih’s biography or elsewhere in Tang records? Although absence of evidence does not equal evidence of absence, the lack of any mention of Chinese forces encountering Tibetans or of a Tibetan-occupied site in the detailed narrative of Kao Hsien-chih’s biography would seem a significant omission had Tibetans been at the Chap Dara site. The simplest explanation is that Tibetans did not occupy the site at that time. Perhaps only after the successful Chinese expedition of 747 CE did the Tibetans, who reasserted their influence in Wakhan in 756 CE (Beckwith 1987, pp. 144-145; Denwood 2009, p. 156), station forces at the site to guard against enemies approaching via the “northern gorge” route.

One structure depicted at the site is not a typical Buddhist chorten (chorten design is further discussed below), but rather may depict a shrine for a local deity (see Fig. 6). The cross-like shape of the shrine is unusual and is different from what Francke (1928, p. 1051) termed “cross-like stupas”. The two conical side members are not typical chorten elements. The central part of this structure bears some similarity to a Nestorian cross, but the inscription does not support such affiliation.

Although no human agency is attributed to the rock carvings, the attribution of a supernatural agency matches beliefs in the Pamir of supernatural female beings (peri) who are the owners of the wild sheep and goats. For a discussion of these concepts and their cultural significance in Wakhi areas of Pakistan, see Mock 1998, pp. 375-388.

However, two Palola Shahi bronzes, (Plate 22A in von Schroeder 2001 and Plate 63 in Pal 2003) have central Buddha figures flanked by a pair of conical tower stupas. von Schroeder (2001, p. 115) remarks “the shape of the two stupas appears to follow an architectural type based on the Kanishka-stupa”. Davidson (2002, p. 15) notes that “the Kanishka stupa in Peshawar served as a focal point for Buddhists and merchants in the Gandhara/Karakorum/Indus river corridor, and … informs the stupa plaques, casts, and petroglyphs from Harwan and Chilas to Hunza, the Tarim Basin, and beyond”, which opens the possibility that this shrine figure may be an example of such wide-spread influence.

Nestorian crosses are “depicted in four equal branches … narrow at the crossing point and larger at the extremity” (Bressan 1993, p. 272). For more on Tibet and Nestorianism, see Uray 1983, esp. pp. 404-407.
On the top cross piece the inscription reads 'jang lha, which may refer to a local deity of the place (yul lha). On the base, the inscription reads 'phan gyl yon. The phrase gyl yon is a typical offering phrase in which the possessive/genitive case marker gyl and the noun yon ("gift") follow a name (Karmay 1998, pp. 327, 330). The name in this inscription, 'phan, is attested in Richardson’s list of titles (Tib. mkhan) (Richardson 1998a, p. 20) and Denwood notes it was “frequent in Central Asia”, citing an example from Dunhuang (Denwood 1980b, p. 162). Perhaps a local person who was a native of Wakhan or Bru-sha serving with the Tibetans offered this shrine composition and

---

24 Yul lha, “deities of the local territory” are mountain deities. The term yul lha is attested in the Dunhuang manuscript PT 1047 (Karmay 1998, pp. 432, 442). The ancient tradition of mountain deities is authochthonous and specific to a particular place and community (Karmay 2005, p. 33), consistent with the hypothesis that 'jang lha may be a deity of this class.

25 The reversed gi-gu (transliterated with I) is an archaic orthographic variant that was common in Dunhuang manuscripts but gradually fell out of use by the 12th century (Denwood 1980b, p. 161; van Schaik 2014).
had a literate individual incise the inscription.\footnote{Or perhaps the inscriber was not Tibetan but was literate in Tibetan. Scribes from Khotan wrote in Tibetan at Dunhuang (Dalton 2007) and Central Asian people under the Tibetan Empire acquired Literary Tibetan (Takeuchi 2013a, pp. 6-7).}

\begin{figure}[h]
\centering
\includegraphics[width=0.5\textwidth]{fig7.png}
\caption{Nam bshud’s inscription}
\end{figure}

On the lower left corner of the same rock panel is an inscription reading:

\textit{spre’u’i lo’i ston nam bshud rtsa rtse sa bris}

Tsuguhito Takeuchi (pers. com.) kindly pointed out that \textit{rtse sa} may be read as \textit{tse}, giving:

\textit{spre’u’i lo’i ston nam bshud rtsa tses bris}

which he notes follows an inscription formula frequently found in Ladakh.\footnote{Published examples from the ruined fort (\textit{mkhar ’gog}) on the left bank of the Indus near Saspol on the road to Alchi are found in Denwood 1980b, Francke and Jina 2003, and Takeuchi 2013b. Orofino 1990 has examples from beyond Alchi.} Accordingly, an English rendition could be, “In autumn of the monkey year, Nam bshud rtsa tses inscribed (this)”. Above the inscription on a separate layer of rock is a weathered syllable that may be ‘brug or sbrul. \textit{Nam bshud} does not seem to be a known clan name or a title and may be a non-Tibetan, local name. The inscription provides a date in the twelve-year cycle, naming the autumn season (\textit{ston}) but not the month (first, middle or last) of the season (Francke 1914, p. 48).

Another chorten offering on a separate rock face provides a much more precise date (see Fig. 8).
The inscription reads:

bru gi lo’i ston sla bring po
tshes nyi shu la zhengs (zhengs is inscribed on the other side of
the chorten)
khyung po rgyal
tsug gyi yon

This inscription identifies the dragon year (bru gi lo), the middle
month of autumn (ston sla bring-po), the twentieth day, and the meri-
tious donor Khyung-po Rgyal-tslug.

The Old Tibetan year was divided into four seasons, each of which
had three months (Dotson 2009, p. 12). Although it is not clear how
many days were in each month, the middle autumn month corre-
sponds roughly to September. The Tang calendar and the Old Tibet-
an calendar did not coincide, but comparative dating using the Chi-
nese calendar (Hsueh 1940; Tibetan Medical & Astrological Institute
1998) show that the twentieth day of the middle autumn month of
the dragon years between 764 CE and 848 CE\textsuperscript{29} fell between 12 September and 7 October. For an elevation of over 4000m, such dates would be near the end of the season when the site might be occupied, although certainly plausible for occupation.\textsuperscript{30}

The name given in the inscription, Khyung-po, is an Old Tibetan clan name. Typically, clan names (Tib. rus) precede personal names (Tib. mying) in such inscriptions (Francke 1928, p. 1050; Richardson 1998a, p. 18; Takeuchi pers. com.). Richardson’s list (1998a, p. 18) of mying does not include Rgyal-tsug, but does have Rgyal-kong, Rgyal-sum-gzigs and Rgyal-slebs.

This Old Tibetan name and Old Tibetan date accompany an archaic chorten. It has a base with three diminishing stages, a tall middle section and upper projecting stages topped by a small dome, a mast and ‘horned sun’ (or crescent moon and sun) finial. Denwood noted that this design, typical of the western Himalaya and Karakoram, was termed “cross-shaped” by Francke who saw “a fancied resemblance to a Christian cross” (Denwood 2007, p. 45), and that Jettmar considered the design to be an innovation made during the time of imperial Tibetan rule in the region. Denwood published a similar design from near Alchi in Ladakh (Denwood 2007, p. 52, fig. 5). Tucci photographed similar designs near Alchi and at Khalatse (Orofino 1990, figs. 17, 18, 30, 39, 40) and Jettmar and Sagaster (1993) published a similar design from Gakuch in present-day Pakistan. Denwood described the sun and crescent moon finial as a distinctive Bon-po element (Denwood 1980a, p. 176). This Bon-po aspect, along with the previously mentioned hunting ritual rock art panel containing symbols associated with Bon (Fig. 4 above), suggests a continuation of beliefs and practices from pre-Tibetan to Tibetan times.\textsuperscript{31}

\textsuperscript{29} Tibetan control of Wakhan appears to have resumed in 756 CE and lasted until the mid or late 9th century CE, which serves as a terminus ante quem for the Tibetan inscriptions. Tibetan control of Dunhuang lasted from 781-848 CE (Dalton 2007, p. 18; but see Horlemann 2000 for an earlier date of in the 760s, which parallels dates for Wakhan). Although an Arab army defeated Wakhan in 814-15 (Beckwith 1987, pp. 160-162), Tibetan control soon returned. However, by the end of the ninth century, the high water mark of Buddhism in the Hindukush and Pamir had receded, the Tibetan empire no longer reached to Wakhan, and the region was increasingly influenced by Islam (Beckwith 1987, p. 172; Denwood 2008, p. 157; Hauptmann 2007, p. 32).

\textsuperscript{30} Early autumn, as we understand the modern autumn season, at 4035m in the Pamir, has relatively light snowfall and rivers are low and easier to cross. Winter brings heavy snow, which lingers through spring, when there is substantial avalanche danger and movement is difficult. Summer is the main pasturing season, but rivers are at their peak and difficult to cross.

\textsuperscript{31} Fussman (1986, p. 47, n. 40) mentions a similar sun-moon finial on a rock carving of a stupa from Chilas I in the Indus valley, and notes that although such finials are typically identified as Tibetan, the example from Chilas is Indian and “is cer-
Another *chorten* on a separate rock at the site is not so finely inscribed (see Fig. 9). It has a three-stage base, but the central column is not as tall and it has only a single projecting upper stage. The mast is shorter, but does appear to be topped by the horn-like crescent moon and orb symbol. The rock on which this *chorten* is inscribed does not have a smooth, varnished surface, but rather a rougher texture, with much lichen present.\(^{32}\)

![Fig. 9 – btsan la gzigs’ chorten offering](image)

The inscription reads: *rMe-'or btsan la gzigs gyI [x]*, conforming to the formula where final *yon* (“gift”) would be expected but in this inscription is not legible. The name *btsan* was known as a ministerial...
title for a person descended from the royal family of Ladakh (Francke 1914, p. 51) and bTsan-gzigs appears on Francke’s list of names (Francke 1914, p. 40). Richardson includes Btsan-zigs in his list of mkhan, a term which he says “seems to signify some sort of title” in Old Tibetan (Richardson 1998a, pp. 17-20). This seems to be an Old Tibetan name or title, perhaps that of a person who had come from the Ladakh area.

The clan name rMe-'or is also relevant to historical questions. Although not appearing in any known lists, this same clan name does appear in the Darkot pass inscription accompanying a chorten of similar design (see Mock 2013b for the photo and discussion). The Darkot chorten has the same “cross-shaped” design, with a two-stage base, a tall central pillar, and two projecting stages below a more oval dome. It has a double mast structure, with a horn-like finial and a more complex central orb on a cross-shape staff. But the general design of the chorten, the inscription formula, the identical clan name, the physical proximity of the Darkot pass to Wakhan and the Tang Annals documentation of the Darkot pass as a route to Wakhan all link the Darkot chorten to this Wakhan chorten and site. Following the previously stated hypothesis that the extensive Wakhan site could not have gone unmentioned in the Tang account of the events of 747 CE, the dating of the Darkot inscription to the same period, when the otherwise unknown rMe-'or clan must have held some prominence, seems reasonable.

Conclusion

Further study of the Wakhan site and translation of all the Tibetan inscriptions there will help us to better understand the site and its relation to the religious and historical context of the 8th-9th centuries CE. But certainly we now have evidence of the western Himalayan chorten style further north than previously known. The material demonstrates a deeper Tibetan involvement in Wakhan in the 8th and 9th centuries CE and provides significant information about the events of 747 CE, when a Chinese army defeated Tibetan forces at Lien-yün. The material, in conjunction with textual evidence and analysis of the topographic realities on the ground enables identifica-

33 Ladakh was clearly under Tibetan control by 719 CE, when Tibet conducted a census there (Denwood 2009, p. 43).

34 Takeuchi (2011, p. 55) notes that the Darkot inscription and others in present-day Gilgit-Baltistan date from the late 8th-early 9th c. CE, which was the only time when Tibetan imperial power reached as far north-west as Gilgit (and Wakhan).
tion of the “northern gorge” route taken by Chinese forces. Exploration of the “northern gorge” route has identified a significant Tibetan site, with what appears to be important pre-Tibetan mytho-religious symbolism forming an earlier locus of activity at the site. Textual evidence from the Tang Annals and the Old Tibetan Annals offers a basis to assume the site was occupied by Tibetans only after 747 CE and most probably after 756 CE. The site and other monuments discovered in Afghanistan support the existence of a network of watch towers and signaling towers in Wakhan. An inscription at the “northern gorge” site links it to the well-known Darkot inscription and provide a context for more closely dating that inscription. Stylistic elements of the chorten carvings in Wakhan, along with onomastic elements of the inscriptions, offer evidence of links with Gandharan-influenced traditions from Balur, with the Ladakh region, and with as yet unidentified local or regional traditions, which may include the indigenous Brusha or other Central Asian groups allied with the Tibetan empire.

The Nechung Record

Christopher Bell
(Stetson University)

Despite the encroaching Lhasa suburb that now surrounds Nechung Monastery (Gnas chung dgon pa; lit. “Small Abode Monastery”), it is still an imposing structure that greets the visitor on the way up Mount Gepel (Dge ‘phel) toward Drepung Monastery (‘Bras spungs dgon pa). Once inside Nechung’s expansive courtyard, one encounters a vast chain of murals along the gallery wall depicting wrathful protector deities, skinned humans and animals, and oceans of blood. This is the retinue and divine realm of the Dharma protector Pehar (Pe har) and his team of spirits, collectively called the Five Sovereign Spirits (Rgyal po sku lnga). This unique gallery has been noted by many and discussed in great detail by Franco Ricca,1 but what is often ignored is the lengthy inscription painted on the south wall of the courtyard (see the figure below). This inscription is the Nechung Record (Gnas chung dkar chag), and as a dkar chag it includes a great deal of information on the monastery’s founding and contents. Dan Martin succinctly defines the dkar chag as “a text describing the construction and/or content of items which the Tibetan Buddhist traditions consider holy and capable of bestowing blessings (byin brlabs).”2 Considering Nechung Monastery’s importance to the lineage of the Dalai Lamas, from the Great Fifth to the present Fourteenth, what follows is the first complete translation and transcription of the Nechung Record.

The Nechung Record is a detailed list of the sacred items, texts, and relics that were stored at Nechung Monastery after its renovation and expansion in 1682. Yet as with most monastic records, this work also

---

1 See Ricca 1999, pp. 93-146.
includes praises to and descriptions of the monastery’s central deities, details behind its mythic founding, and lists of the workers who effected its expansion. The Nechung Record was coauthored by the Fifth Dalai Lama (1617-1682) and his final regent Sangyé Gyatso (1653-1705) and is 75 lines long, with the first 37 lines consisting of the Fifth Dalai Lama’s contribution and the remaining 38 lines composed by Sangyé Gyatso. While the wall inscription of the Nechung Record was badly damaged during the Cultural Revolution, most of it is still legible today. The text of the inscription is written in the drutsa (‘bru tsha) Tibetan script. It is presented over a grayed background framed by regal red and gold borders on the left and right, flowing red and gold embellishments on top, and multicolored lotus petals along the bottom. Between the left border and a bare yellow strip next to the text, there is a vertical line of Tibetan written in the Mongolian script (hor yig).

There have been two previous attempts to transcribe and publish the record’s contents in Tibetan. The first is a complete transcription produced by a Tibetan scholar named Lingön Padma Kelsang (Gling dbon Pad ma skal bzang) in the mid-1980s. At this time, a team of Tibetan scholars conducted an extensive survey of Drepung Monastery for the purposes of textual preservation. This included transcribing the records of the monastery’s colleges, often inscribed on the walls of their porticos, as well as documenting their histories, abbatial lineages, and sacred contents. Nechung Monastery was included in this endeavor due to its close historical ties with, and physical proximity to, Drepung. The monastery’s information was collected by Lingön Padma Kelsang, who transcribed all its wall inscriptions including the Nechung Record. All of this material pertaining to Drepung has been collected in the Stainless and Clear Crystal Mirror: A Record of Glorious Drepung Monastery.³

The second transcription of the Nechung Record is a partial copy; it consists of a 13-folio block-print manuscript (dpe cha) edition of Sangyé Gyatso’s portion of the record. Although its publication date and location are unknown, this edition is presented as a distinct text entitled, Roar that Shakes the Three Realms: the Record of the Pehar Chapel

³ Dpal ldan ’bras spungs dgon gyi dkar chag dri med dwangs gsal shel gyi me long; see Tibetan Academy of Social Sciences 2009. I am grateful to the irreplaceable Tsering Gyalbo for drawing my attention to this work and for generously providing me with a copy.
Nechung, which is Exalted by Eight Unprecedented Kinds of Craftworks — Rāvaṇa’s Palace Transferred to Earth, where Offerings and Praises are Joyfully Performed [for] the Churning Whirlpool of the Host of Haughty Spirits and the Ocean of Oath-Bound [Guardians]. While Lingön Padma Kelsang copied the Fifth Dalai Lama’s portion of the Nechung Record from the wall inscription itself, it is clear from the philological idiosyncrasies and word choices that he transcribed Sangyé Gyatso’s portion from this manuscript instead of the wall. The Tibetan scholar Dobis Tsering Gyal has likewise published a typed transcription of this manuscript.

Lingön Padma Kelsang’s transcription has until now been the only full copy of the Nechung Record. However, there are notable differences between the wall inscription of the record and Lingön Padma Kelsang’s edition. Unfortunately, whether during transcribing or typing the record, a number of errors crept into Lingön Padma Kelsang’s text. These errors include minor typographical mistakes as well as major issues, like misplacing or omitting entire lines of verse. Understandably, Lingön Padma Kelsang also grammatically corrected the original Tibetan text in a number of places, since the wall inscription is rife with distinctive or erroneous spellings. While this is admirable, and even helpful, it ultimately does damage to the original text, the errors and unique spelling of which contain valuable historical data. Nevertheless, Lingön Padma Kelsang’s transcription has proven indispensable, since it was recorded thirty years ago when the record was less decayed and more legible than it is today.

For this reason, in transcribing the Nechung Record anew, I have relied on Lingön Padma Kelsang’s text as a base. I then used high definition photographs of the wall inscription taken in situ to make any necessary changes in order to produce an accurate facsimile of the

4 Mchod bstod dregs pa’i lha tshogs rba klong ’khrug cing dam can rgya mtsho dgyes par spyod pa’i mgrün bcu’i pho brang sa la ‘phos pa sngon med bzo sna brgyad kyis ’phags pa’i gnas chung pe har lcog gi dkar chag sa gsum g.yo ba’i nga ro; see Sangs rgyas rgya mtsho n.da.
6 See Tibetan Academy of Social Sciences 2009, pp. 470-488. There are three other shorter records found on various walls within Nechung Monastery, which Lingön Padma Kelsang also transcribed (see ibid, pp. 489-498); however, it is clear that this record is the oldest and most significant.
inscription. I also referred to the *Roar that Shakes the Three Realms* manuscript, as well as Dobis Tsering Gyal’s transcription, in order to aid understanding; differences between the wall inscription and the other editions are provided in the footnotes of my transcription. One distinction in the edition below is that abbreviated Tibetan words (*bskungs yig*) found in the wall inscription are spelled in full in my transcription. I have also separated poetic verses by meter in order to highlight their syllabic differences. These differences make the below transcription a semi-diplomatic edition. Otherwise, this edition is as accurate a copy of the original wall inscription as is possible given its deterioration. For my translation of the wall inscription, I used my transcription while taking advantage of the occasional differences in orthography visible in the other editions. Finally, the wall inscription of the *Nechung Record* does not have a distinct title, nor does it distinguish between the Fifth Dalai Lama’s section and Sangyé Gyatso’s section beyond starting the latter on a new line. Lingön Padma Kelsang’s transcription provides a title for each of the two portions, which I include in my translation for ease of reference.

In terms of structure and content, the *Nechung Record* is very well organized. The first half of the record, composed by the Fifth Dalai Lama, begins with a series of poetic quatrains. The meter length of these verses diminishes gradually in odd numbers—the first quatrain has 19 vowels per line, while the final quatrains have 7 vowels. The contents of these quatrains match the contraction in meter, since the first verses concern the grand Buddhist cosmos while the final verses condense into the specific historical context of the Five Sovereign Spirits, the central protectors of the monastery, as well as Nechung’s lineage. It is a beautifully and evocatively rendered mythos. After this panegyric introduction, the prose of the record begins with a detailed doctrinal and philosophical argument for why it is appropriate to venerate protector deities, and why the Five Sovereign Spirits are the best protectors to revere. This is followed by a brief outline of Pehar’s past lives, his arrival at Samyé Monastery (*Bsam yas dgon*

---

7 I am grateful to Cecilia Haynes for diligently photographing the numerous quatrants of the *Nechung Record* wall inscription using her Nikon D7000 DSLR camera and 18-55 mm lens. These photographs provided me with detailed images of the entire record, line-by-line, from which I could accurately transcribe its legible contents. I am also grateful to Mikmar Tsering, who likewise provided me with detailed photographs of the record.
pa), and his eventual ties to Drepung. The record then discusses Nechung Monastery’s expansion, as well as its religious contents and the main tantras and ritual texts of its deity cult. The Fifth Dalai Lama’s section concludes with more poetic verses praising Nechung and the Five Sovereign Spirits, tying them back to the Tibetan dynasty. The section ends with a colophon.

The second half of the Nechung Record, composed by the regent Sangyé Gyatso, likewise begins with poetic quatrains. These stanzas also descend in meter length, though more simply—from 15-syllable verses straight to 9-syllable verses. Along with this simplicity, there is a noticeable contraction of focus in these verses. The prose of the section follows, and it begins with a much more detailed treatise on the metaphysical importance of the Five Sovereign Spirits. The record then continues Pehar’s history where the Fifth Dalai Lama left off, explaining the deity’s migration to Tsel Yangön Monastery (Tshal yang dgon dgon pa) southeast of Lhasa and his eventual arrival at Nechung northwest of the city. A stronger connection is made in this portion of the text between Pehar and the lineage of the Dalai Lamas, since their special relationship is consistently emphasized. The next section is the lengthiest as it details the workers and craftsmen involved in Nechung Monastery’s 1682 expansion and renovation. After the temporary consecration ceremony is described, the last section concerns the eight different craftworks that make the monastery unique. As with the first half, the second half of the record concludes with poetic stanzas and a colophon. An outline of the record’s contents is as follows:

I. Fifth Dalai Lama’s Section

1) Panegyric verses describing the Buddhist cosmos, Tibetan religious history, and the Five Sovereign Spirits (ll.1-5)
2) Doctrinal argument legitimizing protector deities in general and the Five Sovereign Spirits specifically (ll.5-12)
3) Pehar’s mythic background and role in Tibet (ll.12-17)
4) Nechung Monastery’s expansion, sacred contents, and religious texts (ll.17-32)
5) Concluding poetic verses on the Five Sovereign Spirits and colophon (ll.33-37)
II. Sangyé Gyatso’s Section

1) Panegyric verses describing the Fifth Dalai Lama and the Five Sovereign Spirits (ll.38-39)
2) Metaphysical importance and ultimate enlightened nature of the Five Sovereign Spirits (ll.39-42)
3) Continuing mythic history of Pehar from Samyé to Nechung (ll.42-48)
4) List of workers and craftsmen involved in Nechung’s 1682 expansion and renovation, as well as a description of the monastery’s sacred contents (ll.49-65)
5) Description of the temporary consecration ceremony and the eight types of craftwork that characterize the monastery (ll.65-73)
6) Concluding poetic verses on Nechung, the Fifth Dalai Lama, and the Five Sovereign Spirits, as well as the colophon (ll.73-75)

Another text warrants mentioning, given its intertextual significance to the Nechung Record. This is the Summary of the Hagiography of Jokpa Jangchup Pendenpa along with the Origins of the Great Dharma Protector. This work is a short 18-folio biography of Jokpa Jangchup Penden, the founder and first abbot of Deyang College (Bde yangs grwa tshang) at Drepung Monastery, as well as the original founder of Nechung when it was a smaller chapel. According to Per Sørensen and Guntram Hazod, this text was composed by the regent Sangyé Gyatso. However, this is questionable because the text contradicts a claim made in the portion of the Nechung Record also composed by Sangyé Gyatso, which states that the deity Pehar left Tsel Yangön Monastery with the Second Dalai Lama. The text itself does not explain its authorship; however, it was composed within a century after Nechung Monastery’s seventeenth-century expansion. The hagiography quotes heavily from the Nechung Record, placing it after 1682, and was in turn quoted in the Gung thang dkar chag, placing it before the latter

8 Lcog pa byang chub dpal ldan pa’i rnam thar rags bsdus chos skyong chen po’i ‘byung khungs dang bcas pa. See Sangs rgyas rgya mtsho n.db. I refer to this text in abbreviation as the Hagiography of Jokpa Jangchup Penden.
9 Lcog pa Byang chub dpal ldan, 1404/1464-1471/1531.
text’s publication in 1782. Since the text quotes the *Nechung Record*, it has proven useful for confirming some of the content of the wall inscription that is now too damaged or obscured with age to be legible.

The following translation and transcription are color-coded and organized in various ways. The page numbers for Lingön Padma Kelsang’s transcription have been included for cross-referencing purposes and are maroon in color, while the line numbers for the wall inscription are blue. Due to unavoidable variations in Tibetan and English word order, the page numbers as listed in the below translation are approximate. Parenthetical words and phrases within the text represent Lingön Padma Kelsang’s original correction or interpolation while bracketed words and phrases are my own. I have also maintained the red coloring of key words and phrases found in the text of the wall inscription, used to highlight significant names and terms. As noted above, I have divided the verses of poetry into stanzas to act as an immediate visual cue, separating the framing panegyrics from the enclosed exposition. It is with these changes and emendations that I hope to provide an improved and more reliable transcription of the *Nechung Record*, as well as its preceding translation. I also hope that this translation and transcription vividly illustrate the need to give greater attention to wall inscription records, given the diverse and extensive content they possess as concrete records from the past. While the other wall inscriptions at Nechung and Drepung have been successfully recorded, others visible at important centers like Samyé, Tsel Yangön, and Meru Nyingpa (*Rme ru snying pa*) have not. In the case of the *Nechung Record*, it clearly memorializes just how the monastery, its central deities, and its famous renovators were involved in a robust and extensive world-building project of mythic proportions.

The Nechung Record
Composed by the Great Fifth Dalai Lama

(1) The immutable Dharma body, the great primordial [XX] bliss, appears undifferentiated, limitless, and all-pervading. The perfect enjoyment body, more resplendent than a thousand lotuses XX, is Mighty Hayagriva...XXXXX. The auspicious manifold display of emanation bodies, which are exceedingly difficult to count X[X], are [all ultimately] the lord who holds five kinds of white lotuses. As I bow the top of my head in the dust at the feet of these three inseparable bodies, may they bestow [on me] the great blessing of ordinary and extraordinary accomplishments!

(2) Amid five-colored rainbows and countless peaceful and wrathful deities—which were spontaneously produced from within luminous emptiness and [inseparable] space and awareness—the vajra-holding all-pervading lord Tötreng Tsel [Padmasambhava] emanates XXXXXXXXXXXXXX as one. I entreat him to come once again to aid this snowy land [Tibet] and act [as] our most supreme kinsman for the benefit and wellbeing of the Buddha’s teachings and sentient beings!

The lord of Dharma masters, [with] your magical net of the three embodiments—wisdom, benevolence, and spir-

---

12 Lingön Padma Kelzang: The numbers given below indicate the lines of the original text, and the X marks represent unclear syllables. As noted, Lingön Padma Kelzang uses X marks to signify syllables that have been obscured by damage. X marks within brackets (e.g., [X]) are my own interpolations based on my observations of the original inscription.

13 Tib. pad dkar rigs lnga ‘chang ba’i gtso. This clearly refers to Padmapāṇi (Tib. Pad dkar ‘chang), an epithet for Avalokiteśvara.

14 While a number of the words that make up this poem are missing because of damage to the original inscription, enough has been salvaged that the overall meaning is clear. This is a prayer to the three bodies (Tib. sku gsum; Skt. trikāya), particularly of the Lotus Family (Tib. pad ma rigs; Skt. padmakula), that they might bestow accomplishments (Tib. dngos grub; Skt. siddhi) on the composer.
piritual power—conquered the dark and perverted views of this land and completely endowed it with virtue, pervading [it like] a roaring [wind]. (3) Tsongkhapa,¹⁵ the omnipresent Vajradhara,¹⁶ the Dharma king of the three worlds, by means of several emanations, sentient beings XXXXXXXX glorious.

Like a luminous five-colored rainbow in the expanse of the sky, the Five Dharma Kings¹⁷—who emanate [as] body, speech, mind, good qualities, and activities—auspiciously appear in order to accomplish each and every pacifying, augmenting, subjugating, and destructive activity. They produce a powerful emanating army of brigadiers, servants, and an ocean of oath-bound protectors.

Tsokyé Dorjé [Padmasambhava] invested the lord of all chiefs¹⁸ with authority, placed a vajra [on his head], (4) gave him the immortal amṛta [nectar] to drink in full, and proclaimed the solemn samaya vow. Never forget the oath that was entrusted [to your] care! Increase the well-being of the Buddha’s teachings as well as [all] sentient beings in Tibet!¹⁹

[You] were made a servant within the palace of the great manḍala of the root and lineage lamas—XXXXX-kyi Wangchuk and so forth.²⁰ Reflect here

---

¹⁵ Tsong kha pa Blo bzang grags pa, 1357-1419; this is the renowned founder of the Geluk sect.
¹⁶ Tib. kha sbyor bdun ldan; lit. “endowed with the seven attributes of union.” This is an epithet for Vajradhara.
¹⁷ Tib. Chos rgyal sku lnga; this refers to the Five Sovereign Spirits presided over by Pehar.
¹⁸ Tib. sde dpon yongs kyi rje bo; given the context, this clearly refers to Pehar.
¹⁹ The last two imperative sentences are directed at the deity Pehar, who was the recipient of Padmasambhava’s samaya vow in this verse.
²⁰ Tib. XXXX kyi dbang phyug. I speculate that the figure mentioned here is the treasure-revealer Guru Chökyi Wangchuk (Gu ru Chos kyi dbang phyug, 1212-
and now on [your] promise to accomplish all activities without obstruction!

[You are] the supreme savior who has served and protected in a timely manner the communities of Gendün Gyatso,\(^{21}\) the embodiment of all the Buddhas, and Sönam Gyatso,\(^{22}\) the crown ornament respected by all—[both of whom] generally and specifically represented the lineage of the Victorious Ones.

There is a great palace displaying terrifying charnel grounds (5) that is completely and constantly filled with riches, such as piles of treasure and clouds of outer, inner, and secret offerings. I offer these in abundance through meditation, \textit{mantras}, and \textit{mudras}.

After beckoning [you] with the yoga of single-minded concentration for a full day and night,\(^{23}\) we [hung] colored flags, shouted appeals [to you], played instruments, chanted ritual songs, built up dense clouds of smoke [from] burnt offerings, and sprinkled the \textit{argham} [oblation]. Since we did this, come here [quick] as lightning and sit on your lotus, moon, and sun [throne]!

---

1270). The rest of his name would fill in three of the five missing syllables, while the first two are likely \textit{gter ston} (treasure-revealer) or another honorific title.

\(^{21}\) Dge ’dun rgya mtsho, 1476-1542; the Second Dalai Lama.

\(^{22}\) Bsod nams rgya mtsho, 1543-1588; the Third Dalai Lama.

\(^{23}\) Tib. \textit{nyin mchog dus drug}; lit. “the six times of the day and night.” This refers to how a 24-hour day was divided into six 4-hour parts in the ancient Indian system.
The teachings, debates, and writings of the disciplined community that upholds and protects the precious teachings of the Buddha—the roots and branches of which [instill] happiness and well-being—overflow like a lake [in the] summer. Because of this all dharmic activities wax like the moon!

Regarding these [verses], (6) [it is stated] within the [Door that Leads to Wisdom]:

The holy ones who composed the commentaries wrote praises to the Buddha. Since they expanded the teachings, they perceived these pure words properly and sincerely.

Accordingly, following the example of the excellent hagiographies of past [masters], I performed plentiful offerings and praises and embraced their perspective. The reason—which is not motivated by jealousy toward others—[is as follows]:

In the Praise Exceeding that of the Gods [it is stated], “I am not partial to the Buddha, nor do I hate [the followers of] Kapila and the

---

24 Tib. Mkhas ’jug. This is an abbreviation of Mkhas pa ‘jug pa’i sgo, a famous treatise on Buddhist scholasticism composed by Sakya Paṇḍita Künga Gyentsen (Sa skya Paṇḍita Kun dga’ rgyal mshan, 1182-1251), one of the five great forefathers of the Sakya sect. See Sa skya Paṇḍita 1967, p. 6.9-11.

25 Tib. mchod brjod; lit. “offering verses.” This term specifically refers to the prefatory stanzas written in honor of the Buddha or deities at the beginning of commentaries.

26 Tib. Lha las phul byung gi bstod pa; Skt. Devātiśayastotra. This brief text was composed by Śaṅkarapati and found in the commentarial collection of the Tibetan Buddhist canon (Tengyur; Tib. Bstan ’gyur); see Śaṅkarapati 1982, f.44v.6.

27 An important Vedic sage, the followers of whom generally represent the Hindu opponents of Buddhism.
like. I will only accept he whose words are logical as a teacher.”\(^{28}\) Also, the Lord of Knowledge [Dharmakīrti] \(^{29}\) said, (7) “Since [the Buddha’s teachings] are infallible with regard to the primary subjects, we can subsequently infer that [the same is the case] for other [secondary] subjects.”\(^{30}\)

Regarding the need to enter onto the path that ensures the highest rebirths to be attained and the most transcendent state [of enlightenment], the omniscient [Tsongkhapa] Lobzang Drakpa said, “The stages of the path of the great and glorious Vajradhara thoroughly differentiated the essential points of all secrets.” Accordingly, it is said that our Teacher Śākyamuni guided sentient beings onto the sublime path\(^{31}\) based on what [teachings] accorded with the capabilities of superior, intermediate, and inferior disciples. Therefore, he taught whatever sections of the Dharma were suitable.

In the *Sūtra which Gathers All Intentions*\(^{32}\) [it is stated]:

“If [you], the Conqueror,\(^{33}\) definitively taught the three pure guid-

\(^{28}\) My translation of this stanza is indebted to Geshe Wangyal (1986, pp. 64-65).

\(^{29}\) Tib. *rig pa’i dbang phyug*. While this epithet is too generic to give any indication as to whom it refers, it is clear from the quoted verse that the great Buddhist sage Dharmakīrti is intended.

\(^{30}\) See Dharmakīrti 1986, pp. 204.7-205.1 for the original verse. I am indebted to Engle (2009, pp. 85-86) for providing the original context and understanding of this verse.

\(^{31}\) Tib. *ma dag pa’i lam*; given the obscurity of the original text here, I am reading this as *yang dag pa’i lam*.

\(^{32}\) Tib. *Mdo dgongs pa’ dus pa*. This is the principal text of the Anuyoga Tantras. It can be found in volume 97 (ff.110r-314r) of the Dergé (Tib. Sde dge) edition of the *Tengyur* under its longer title, *De bzhin gshegs pa thams cad kyi thugs gsang ba’i ye shes don gyi snying po rdo rje bkod pa’i rgyud m’al byor grub pa’i lung kun ’dus rig pa’i mdo theg pa chen po ning po rtogs pa chos kyi rnam grangs rnam par bkod pa zhes bya ba’i mdo*. The colorful history of this important text is discussed in Dudjom Rinpoche 1991, Section 1, pp. 597-739. See also ibid, pp. 911-913.

\(^{33}\) Tib. *bcom ldan*; Skt. *bhagavat*; this is a common epithet for the Buddha.
ing vehicles,\textsuperscript{34} (8) [why did you] not teach the one definitive vehicle that spontaneously accomplishes [the doctrines of] causality without seeking enlightenment from others?” [The Buddha] replied, “Since I thoroughly turned the wheels of the causal Dharma [for] those who practice the causal [vehicles],\textsuperscript{35} (the short path) [of] the Diamond Vehicle will appear in the future.”\textsuperscript{36}

[The Buddha] turned the wheels of the causal Dharma for those with intermediate capabilities and below. He taught the Diamond Vehicle of Secret \textit{Mantras} to those with superior [capabilities]. The multitude of fortunate disciples does not need to rely on many eons; they can achieve enlightenment in the middle or at the end of this lifetime, in seven lifetimes, sixteen lifetimes, etc. It is said that in order to overcome the temporary obstacles and discordant factors [encountered] in this method, (9) [one must] entrust activities to, and depend on, powerful Dharma protectors.

In the \textit{Tantras} [it is stated].\textsuperscript{37}

---

\textsuperscript{34} Tib. ’dren pa’i theg pa gsum po. According to Rangjung Yeshe, this term is synonymous with \textit{mtshan nyid kyi theg pa gsum}, the ‘three vehicles of characteristics.’ These are (1) the Vehicle of those who Heard [the Buddha] (Tib. \textit{nyan thos kyi theg pa}; Skt. \textit{śrāvakāyāna}), who achieve enlightenment as \textit{arhats}; (2) the Vehicle of Solitary Buddhas (Tib. \textit{rang sangs rgyas kyi theg pa}; Skt. \textit{pratyekabuddhayāna}), who achieve enlightenment on their own yet do not teach others; and (3) the Vehicle of Bodhisattvas (Tib. \textit{byang chub sems dpa’i thegs pa}; Skt. \textit{bodhisattvayāna}), who take the \textit{bodhisattva} vow. The last vehicle is synonymous with the Great Vehicle (Tib. \textit{theg pa chen po}; Skt. \textit{mahāyāna}).

\textsuperscript{35} This refers to the three vehicles discussed in the previous note.

\textsuperscript{36} This dialogue is fully quoted in the \textit{Blue Annals} (see Roerich 1996, p. 158); see also Karmay 1998, pp. 84-85, n. 34, for an updated translation.

\textsuperscript{37} Tib. \textit{rgyud las}; the text does not specify from which \textit{tantra} the following quote is derived.
Many transcendent beings manifest as emanations that naturally arise from the wisdom of the Victorious One. [According to] the ultimate [truth, they] are understood\(^{38}\) to be singularly nondualistic [and are part of] the spontaneously present \(\text{maṇḍala}.\)\(^{39}\)

Accordingly, the Great Sovereign Spirit Pekar\(^{40}\) and his retinue are included in such \(\text{maṇḍalas}\) as that of the great Eight Sādhana Deities, and are none other than manifestations of the Supreme Heruka.\(^{41}\) They are [found] among the haughty spirits of [mundane] offerings and praise, and appear in whatever form is appropriate to guide disciples. Because of this, their extraordinary methods (10) are compatible with the essential intention of all the \(\text{tantras}.\)

Moreover, in accordance with the generation stage of the Mahāyoga [\(\text{tantras}\)], the Five Sovereign Spirits, their consorts, emanations, and ministers, along with their brigadiers, (emanate) from the radiance of the one hundred supreme peaceful and wrathful deities. XX As such, [Padmasambhava’s] mind emanation, Ngari [Paṇchen] Padma Wangyel,\(^{42}\) said:

The Five Great Sovereign Spirits—as well as their five self-appearing consorts, such as ChenXX,\(^{43}\) male and fe-

---

\(^{38}\) I am translating the term \(\text{rtogs}\) here rather than \(\text{rdzogs},\) as per Lingön Padma Kelzang’s emendation.

\(^{39}\) Tib. \(\text{lhun gyis grub pa’i dkyil ’khor}.\) This likely refers to one of the three main Anuyoga \(\text{maṇḍalas}\) called \(\text{rang bzhin lhun grub kyi dkyil ’khor},\) which is a Samantabhadra \(\text{maṇḍala}.\)

\(^{40}\) A variant spelling for Pehar.

\(^{41}\) Tib. Che mchog He ru ka; Skt. Mahottara Heruka. This is the central deity of the Eight Sādhana Deities, sometimes considered synonymous with Vajrāmṛta, the deity of good qualities.

\(^{42}\) Mnga’ ris Padma dbang rgyal, 1487-1542; see Ahmad 1999, pp. 164-170.

\(^{43}\) Tib. Spyan XX. The inscription is too obscure to make a clear identification of this deity. The \(\text{Hagiography of Jokpa Jangchup Penden}\) (Sangs rgyas rgya mtsho n.db., f.5b.6) reiterates this portion of the text and has the name Chenmala (Tib. Spyan ma la) here, though this does not accord with any of the common names for the Five Sovereign Spirits’ consorts.
male bodhisattvas, [472] which are the very essence of the six sense objects, and their cabinet ministers, shadröl, ky-idröl, 44 and external ministers—assemble [from the] natural manifestations of the Five [Buddha] Families.

[He also] said, “The Great Sovereign Spirits, who are endowed with destructive powers, assemble from the unproduced self-manifestations45 [of] the peaceful and wrathful Herukas46 and their consorts.”

In the scriptural transmission of the Anuyoga, [these deities] are the essence of the right, left, and middle [channels],47 (11) as well as the male, female, and androgynous haughty spirits.

In the Atiyoga, they must be understood as the very nature of the union of appearance and emptiness. [Padmasambhava’s] good qualities emanation, the Dharma King Wangpo Dé,48 said:

Summon the assembly of male and female haughty spirits, [who represent] the inseparability of appearance and emptiness, from the expanse of nonduality [in order to perform] the enlightened work of the four activities.

All those [deities are] the conceptualizations [of] one’s own mind; free from conceptual elaboration, they are actually the single seminal

44 Tib. sha grol kyi grol; the exact meaning of these two works is difficult to ascertain, though it is clear from the context that they refer to groups that help make up Pehar’s retinue.
45 The Hagiography of Jokpa Jangchup Penden (Sangs rgyas rgya mtsho n.db., f.6a.2) has rtsal las at this point, while Lingön Padma Kelzang suggests mal las. My translation is based on the Hagiography reading.
47 Tib. ro rkyang dbu gsum. This refers to the three channels (Tib. rtsa; Skt. nādi) of the subtle body in yogic metaphysics.
drop of the Heruka’s wisdom, which manifests out of ultimate reality on its own.

In the Three Households [it is stated]:

Rikpé Gyelpo Jangchupsem [said,] “The intrinsic nature of all things is one. Thus, it is certainly the case that the gods and spirits of the phenomenal world are inseparable from one’s own mind. Because of this, once one purifies the mind itself, the gods and spirits of the phenomenal world effortlessly appear.”

While one remains firm within the [meditative] states of bliss, clarity, and nonthought, (12) [the Five Sovereign Spirits] effortlessly appear as the five—body, speech, mind, good qualities, and activities. They arise without limitations for the benefit [of all] beings.

---

49 The Hagiography of Jokpa Jangchup Penden (Sangs rgyas rgya mtsho n.db., f.6a.6) has he ru ka at this point. In lieu of the obscure word here, I have chosen to use this reading rather than the inscription’s X Ḥ.  
50 Tib. khyim gsun du; given the above pattern this appears to be a text, though which text is being referenced is unknown.  
51 This refers to Jokpa Jangchup Penden, in whose biography it is explained that he received the full ordination name of Rig pa’i rgyal po byang chub [sems] (Sangs rgyas rgya mtsho n.db., f.4a.2-3). The sems that I provide as a part of the name immediately follows the byang chub. However, there is some confusion over its placement between the texts. The hagiography places the sems at the start of the next line, making it appear that it is not part of Jokpa Jangchup Penden’s ordination name. The wall inscription, by contrast, has the sems immediately follow the byang chub and leaves a noticeable space between it and the next verse. Since this is a translation of the wall inscription, and since the inscription spacing follows a seven-syllable meter structure, I have chosen to understand the sems as part of Jokpa Jangchup Penden’s name. It merits noting that the Stainless and Clear Crystal Mirror (Tibetan Academy of Social Sciences 2009, p. 343) summarizes the biographical contents of the Hagiography of Jokpa Jangchup Penden in its chapter on Deyang College, and so it renders his name Rig pa’i rgyal po byang chub.
In a conventional sense, throughout King Pekar’s [past] lives, the Lord of Secrets [Vajrapâṇi] commanded [him to relinquish his life essence]. Countless eons ago, there was a devout king named Mahâbuta and a monk [named] Lekden Nakpo, who became his minister. At this time, they were ordained under the abbot Daö Dünting. The king’s ordination name was Daö Zhonnu and the minister’s was Dünting Nakpo. Then, at the Temple where Nine Evil Spirits Gathered, Daö Zhonnu and a Brahmin woman made love, then he gave a prayer of aspiration, and so forth. Because of this, he was successively reborn as the butcher Ragochen.

---

52 Tib. [bka’] stsal.

53 Such details of Pehar’s involvement with Vajrapâṇi can be found in a seventeenth-century text on Samyé Monastery’s history composed by the Sakya hierarch Amézhab Ngawang Kunga Sönam (A myes zhab Ngag dbang kun dga’ bsod nams, 1597-1659) entitled the Symphony of the Captivating Gods that Grants all Desires and Makes the Wish-fulfilling Dharma Protectors Rejoice: A Good Explanation for the Origins of the Great Monastery of Glorious and Spontaneously Present Samyé and its Guardians of the Teachings (Dpal bsam yas lhun gyi grub pa’i gtsug lhag khang chen po bka’ srung dang bcas pa’i byon tshul legs par bshad pa chos skyon yid bzhin nor bu dges par byed pa’i yid ’phrog lha’i rol mo dgos ’dod kun ’byung); see A myes zhab 2000, p. 405.

54 Tib. Ma ha abu ta. The ma ha here is too damaged in the original inscription to verify. A later source (Sle lung rje drung 1979, p. 36) gives the name of this king who would become Pehar as Dharmajvala. This is clearly not the name here, so for now Lingön Padma Kelzang’s suggestion stands. In the quote of this line found within the Hagiography of Jokpa Jangchup Penden (Sangs rgyas rgya mtsho n.db., f.7b.1), the king’s name is Dharmaśāja.

55 Tib. Legs ldan nag po; lit. “Excellent Black One.”

56 This differs from Sle lung rje drung (1979, p. 36), who says that this figure is the minister’s son, not the minister himself.

57 Tib. Zla ’od dun ting; lit. “Moonlight Diligent Samâdhi.”

58 Tib. Zla ’od gzhon nu; lit. “Young Moonlight.”

59 Tib. Dun nag po; lit. “Black Diligent One.” Sle lung rje drung (1979, p. 36) gives his name as Dünting Nakpo (Tib. Dun ting nag po; lit. Black Diligent Samâdhi). The original inscription is too damaged to confirm that this was the minister’s ordination name here, but it is likely so.

60 A significant portion of the story is missing here. However, we can fill in the gaps by drawing on Sle lung rje drung 1979, pp. 36-37. The king preferred exposition (Tib. bshad pa), while the minister enjoyed meditation (Tib. sgom pa), and the two friends grew apart and started practicing separately. The king’s loneliness no doubt paved the way for what follows, which is a heavily summarized account of Pehar’s past lives.

61 Tib. Ra mgo can; lit. “Goat-headed One.”
Jangchupbar, Lenmi Jangchupô, and a marmot. After such lives as these, there was the father Mujé Tsenpo and the mother Düza Minkarma, [who had the following children:] Yapjé Lamé, Tramtok Nyampajé, Mudü Dramkarjé, Tramtok Barwajé, and Dünak Tongjé. Of these five siblings, [Pehar] became the middle named one, Mudü Dramkarjé. At this time, he enslaved all of the eight classes of gods and spirits of phenomenal appearance, such as the gods of the sky, and so forth. He ate small stars for food, all female Hindering Spirits and striking the chests [of] sentient beings. [He performed] a variety of malicious acts, such as eating a hundred men for food every day, a hundred women every

---

62 Tib. Chu mi byang chub 'bar; this is an alternative form of Chu mig byang chub 'bar (see Sle lung rje drung 1979, p. 38), a literal translation of which is, “Blazing Enlightenment Spring.”

63 Tib. Glan mi byang chub ’od; lit. “the Dumb Man Enlightened Light.” Sle lung rje drung (1979, p. 38) explains that this version of the name is given in a non-extant text entitled the Gathering of Black Clouds (Tib. Sprin nag ’khrigs pa), while the White Crystal Rosary Tantra (Tib. Shel phreng dkar po’i rgyud) has the alternative, Glan mi dbang phyug ’bar.

64 Tib. ’phyi ba. Drawing on Sle lung rje drung (1979, p. 38), this refers to a story where Pehar, in one of his former lives, transformed into a marmot in order to harass his old friend, Dünting Nakpo, while he was meditating. He was summarily subdued by Vajrapāṇi.

65 Tib. Rmu rje btsan po; lit. “Emperor Lord of the Savage Spirits.”

67 Tib. Yab rje bla med; lit. “Unsurpassed Lord Father.”

69 Tib. Smu bdud khram dkar rje; an alternative form of this name is Dmu bdud brang dkar (see Sle lung rje drung 1979, p. 39), a literal translation of which is, “the Savage-Hindering Spirit White Chest.”

70 Tib. Khram thogs ’bar ba rje; lit. “Lord Blazing Obstructing Charlatan.”

71 Tib. Bdud nag stong chen; drawing on Sle lung rje drung (1979, p. 39), I strongly suspect that this deity’s name is actually Bdud nag stong rje, a literal translation of which is, “Lord of a Thousand Black Hindering Spirits.” This would also coincide well with the rje found in the names of the four preceding deities, as well as their father.

72 For a descriptive list of this category of beings, see Nebesky-Wojkowitz 1998, pp. 264-266, as well as the surrounding chapter.

73 Several words are missing from this section; however, according to Sle lung rje drung (1979, p. 40), after enslaving the minor gods, Mudü Tramkarjé ate small stars, bound the sun and the moon to his crown, and tormented all living beings. There is no mention of female Hindering Spirits, so their purpose here remains a mystery.
evening, and a hundred children every morning. (14) [He successively transformed into] a powerful black scorpion surrounded by a thousand scorpion offspring, an eight-year-old child [that appeared] from the sky above, and a white lion. [Padmasambhava] remained firm in AṂ XXXX. [As a lion, Pehar] glared [at the master], ears upraised and [about] to pounce. [In the] form of an ugly black monk, [he threw down on Padmasambhava’s head] a white meteorite (about the size of) a sheep XXXX. He transformed into a handsome young layman holding a 108[-bead] crystal rosary in his hand. He then displayed magical emanations with an inconceivable number of weapons, as well as innumerable ministers. At that time, XXXX Dorjé and the great master Padma Tötreng Tsel, at places such as the Wish-Fulfilling Crystal Cave, conferred empowerments on [Pehar] and (15) bound him under oath. [Pehar then] offered his radiant life essence in supplication, and he promised to protect the precious teachings of the Buddha.

74 At this point we are aided by A myes zhabs 2000, p. 412, where the story picks up here.

75 Due to the missing words, the action here is unclear. However, by relying on Sle lung rje drung (1979, p. 43) and A myes zhabs (2000, p. 412)—both of which draw on the White Crystal Rosary Tantra—we can infer what is happening at this moment. At this point in the story Pehar encounters Padmasambhava and mischievously attempts to distract the master from meditating. He transforms into a white lion and disturbs the master’s maṇḍala configuration, making the threatening gestures that follow. The meaning of aṂ tshugs here is difficult to ascertain without the remaining words in the line; Sle lung rje drung (ibid) does not mention it, while A myes zhabs (ibid) has khyi tshugs ma byas, which is itself difficult to understand in context.

76 See Sle lung rje drung, ibid, and A myes zhabs, ibid.

77 Lingön Padma Kelzang interpolates this as Garap Dorjé (Tib. Dga’ rab rdo rje; Skt. Vajraprahe), who first transmitted the Dzogchen system after divinely receiving it; see Germano 1992, p. 43. However, I have no confidence in this reading, since no other known account corroborates it. Every account has Padmasambhava meditating alone; the one exception is an account cited by Sle lung rje drung (1979, p. 49), where Padmasambhava is accompanied by his consort, presumably Yeshé Tsogyal (Tib. Ye shes mtsho rgyal). My own suspicion is that this name refers to Vajrapāṇi (Tib. Phyag na rdo rje), who has also subjugated and bound Pehar to oath in the course of his lives (see Sle lung rje drung 1979, p. 41). However, in lieu of stronger evidence, I have chosen to ignore the interpolation provided and leave the name a mystery.
Nowadays, this snowy land [of Tibet] is described as Noble Avalokiteśvara’s realm of conversion. Accordingly, [473] it is said that [the Tibetan kings,] from Lord Nyatri Tsenpo78 down to the divine ruler Trisong Deutsen, propagated and expanded the Holy Dharma. [During King Trisong Deutsen’s time,] Master Śāntarakṣita,79 who adhered to the Sarvāstivāda tradition, was invited [to Tibet], where he established a system that was in accordance with the 18 elements80 and the 10 virtuous actions.81 He did not allow the gods and spirits to do XXXXXX.82 According to what Master [Padmasambhava] prophesied, in Jambudvipa83 XXXX.84 Master (16) Padmasambhava was invited [to Tibet], where he erected many [sacred sites], such as Changeless and Spontaneously Present Samyé Monastery, and translated countless [texts of] the Holy Dharma. He nominated the Serpent Spirit Zurpü Ngapa85 [to act] as protector of [Samyé] Monastery. [However, Zurpü Ngapa] explained that XXX there was a nephew of the Serpent Spirits who [could] (track) riches the size of a small needle, traveling [in one day] the distance a vulture covers in eighteen.86 In accordance with this, Prince Muruk Tsenpo87 invited Pekar

---

78 This is the first semi-mythical ruler of Tibet.
79 This famous eighth-century Indian Buddhist monk is responsible for inaugurating the Sarvāstivādin lineage of monastic ordination in Tibet.
80 Tib. khams bco brgyad; these are the six sense powers (Tib. rten gyi khams drug; sight, smell, touch, taste, hearing, and thinking), their objects (Tib. dmigs pa’i khams drug; image, scent, texture, flavor, sound, and idea), and the conscious awareness of each one (Tib. brten pa’i khams drug).
81 Tib. dge bcu las; alternatively, dge bcu’i las. These are (1) abandoning the destruction of life (Tib. srog gcod pa spong ba); (2) abandoning the taking of what was not given (Tib. ma byin par len pa spong ba); (3) abandoning improper sexual practices (Tib. ’dod pas log par g.yem pa spong ba); (4) abandoning the telling of lies (Tib. brdzun du smra ba spong ba); (5) abandoning abusive language (Tib. tshig rtsub po smra ba spong ba); (6) abandoning slander (Tib. phra mar smra ba spong ba); (7) abandoning gossip (Tib. tshig bkyal ba smra ba spong ba); (8) abandoning covetousness (Tib. brnaab sens spong ba); (9) abandoning malice (Tib. gnod sens spong ba); and (10) abandoning wrong views (Tib. log par lta ba spong ba).
82 There are too many obscure words to determine the meaning of this segment.
83 Tib. ‘Dzam bu gling; lit. “Rose Apple Continent.” In ancient Indian cosmology, this was the name of the southern continent of the world and refers to the Indian subcontinent; it is also a synonym for the world in general.
84 Once again, the details of this passage are unfortunately obscured.
85 Tib. Zur phud Inga pa; lit. “[The One with] Five Locks of Hair.”
86 Tib. klu tsha nor rgya khab tsam gyi (rjes su) rgod po’i nyin lam bco brgyad ’gro ba’i de nyid. To clarify this sentence I relied on an extended version of it provided by the
and his supporting elements from the land of Drugu,\textsuperscript{88} and appointed him master of the entire treasury. Likewise, as the principal local guardian of the great Dharma center Glorious Drepung, (17) [Pekar] was asked by the omniscient [Second Dalai Lama] Gendün Gyatso—who upheld the immaculate tradition of the Dharma King Shar Tsongkhapa Lozang Drakpé Pel, the embodiment of the power of the wisdom and compassion of all Buddhas—to eternally adhere to past aspirations, to a mind [focused] on enlightenment, and to the unsurpassed general and specific teachings [of the Buddha]. Moreover, in accordance with the awesome samaya vow that was fully proclaimed by the Great Master [Padmasambhava], the Dalai Lamas from [the Third,] Sönam Gyatso, and on have worshipped the lord of all the guardians of the [Buddha’s] teachings, who more and more supports the excellent virtuous deeds of the religious and secular [government].\textsuperscript{89}

Since\textsuperscript{90} all the activities of [such worship] had been increasing, there was also a desire to make his temple abode much larger by expanding it beyond its former [size]. Because of this, the gathering [of] masters also called for it. (18) Likewise, Regent Sangyé Gyatso, who has passed through successive [human] bodies,\textsuperscript{91} remembered his past aspirations and accordingly built an extensive divine mansion.\textsuperscript{92} He had murals [of] lamas, buddhas, bodhisattvas, peaceful and wrathful tutelary deities, \textit{ḍākinīs}, and Dharma protectors [painted] inside a sixteen-pillared assembly hall\textsuperscript{93} that is like no other. In the courtyard

\textsuperscript{87}One of Trisong Deutsen’s sons.
\textsuperscript{88}This refers to an ancient kingdom north of Tibet that once existed in the vicinity of modern-day Xinjiang Province and Qinghai Lake, Qinghai Province, China.
\textsuperscript{89}Tib. \textit{chos srid}; here this is an abbreviation for \textit{chos srid lugs gnyis}, the Tibetan government that combined religious and secular systems.
\textsuperscript{90}Tib. \textit{rten}; read as \textit{brten}.
\textsuperscript{91}Tib. \textit{rin lus su song ba}; this is an obscure epithet, but it appears to be a complimentary one. Given Sangyé Gyatso’s series of human lives preceding him (see Lobzang Tondan 1983, vol. 1, pp. 5-11), I am reading this epithet as one honoring a consistently human succession of lives, which is highly prized in Buddhism and a mark of one’s wealth of merit.
\textsuperscript{92}Tib. \textit{zhing bskod pa}; lit. “established a divine realm.”
\textsuperscript{93}Tib. \textit{gtsang khang}; while this term usually refers to shrines, it is clear that the Nechung assembly hall is meant, which still has sixteen pillars today.
[there are murals of] the retinue, the army of the haughty spirits of phenomenal existence. In the XX chapel, there are bas-relief statues of the 18 deities. In the top-floor chamber, there are images of Master [Padmasambhava] and his 25 disciples on the right as well as on the left, and all the implements, such as offering materials and wrathful gifts, are inconceivable [in number]. [This] was spontaneously accomplished regardless of difficulties. In particular, during an exhortation that arose from the force of a detailed analysis of the outer, inner, and secret sacred objects of just the retinue, (19) it was said:

You, [who are] presently the king of all Tibetans, emanate five beings with your pure aspiration prayer.

In the great assembly hall, [there are as follows: the text of] the subjugation of the Five Dharma Kings and their retinue, which comes from the profound treasure text of Nyang Nyima Özer—the body emanation of Master Padmakara [Padmasambhava] and the lord of men Trisong Deutsen; [the corpus of] the principal deity and his retinue [equaling] seventeen, such as the wrathful king Hayagrīva, from the Guru Guhyasamāja, the profound teaching of Guru Chökyi Wangchuk—the speech emanation [of Padmasambhava and King Trisong Deutsen]—which [was drawn from] the belly of a Serpent-Hindering Spirit; [statues of] the Great Dharma protector and his retinue, which came from a hidden [source]; and a mustard seed-sized relic of the completely and perfectly [enlightened] Buddha,

---

94 Unfortunately, the original inscription is too damaged here to know which chapel in Nechung this is.
95 Tib. lha tshogs bco brgyad; I am uncertain to which deities this refers.
96 Tib. zhib mol; read as zhib mo’i, as per Lingön Padma Kelzang’s understanding.
97 Tib. mgo nag; lit. “Black-headed [Ones].” This is an epithet for Tibetans.
98 Tib. Chos rgyal sde lnga; in this context, this is an epithet for the Five Sovereign Spirits.
99 This likely refers to the White Crystal Rosary Tantra, which was composed by Nyangral Nyima Özer (Nyang ral Nyi ma ‘od zer, 1124-1192). Copies of this text are extant at both the historic Nechung Monastery on the outskirts of Lhasa and the new Nechung Monastery established in Dharamsala; however, these copies are off limits to the uninitiated.
100 Tib. gtso ’khor bcu bdun; it is unclear which group of deities this is.
which was an heirloom of King Ajāṭaśatru. These were taken from among the sacred objects of Nakartse and from the dark treasury of Tselagang.

Regarding body and clothing relics, [Nechung Monastery houses the following:] the hair of Masters Garap Dorjé and Śrī Siṃha; a great XX rosary [made] of some of the white and red bodhicitta [produced] by Padma Tötreng Tsel [Padmasambhava] and his consort, [along with their] body and clothing relics; relics of Arsadhara, the King of Zahor; flesh from a seventh-born Brahmin; Indian manuscripts of the Great Translator Vairocana; the crown of Lhalung Pelgyi Dorjé; the relics, hat, divan, hand, and clay miniature of Lord Atiśa; the bodily, tooth, hair, and divan of Dromtönpa; the clothing of the uncle and nephew translators of Ngok and of the translator of Khutön; the relics, heart, and monastic robes of Potowa; the relics and hair of Jadül (21) the relics and hair of

---

101 Tib. Rgyal po Ma skyes dgra; Ajāṭaśatru (ruled 491-461 BCE) was king of the ancient Indian Magadha empire and contemporary of the Buddha.

102 Tib. Sna dkar rtse; this is a county southwest of Lhasa.

103 Tib. mdzod nag. Dark treasury refers to texts that are kept hidden from the public; see Roberts 2007, p. 31.

104 Tib. Rtse la sgang; this is an area in Kongpo (Tib. Kong po), southeast of Lhasa.

105 Tib. Shri Senge; like Garap Dorjé, Śrī Siṃha is another important semi-mythical Dzogchen master.

106 The inscription is difficult to read here, with the transcription being X cig; however, I am reading it as kha cig.

107 Tib. byang sms dkar dmär; this refers to the drops of male semen and female blood produced and united during tantric sexual yoga.

108 Tib. bram ze skye ba bdun pa; this is an individual who has been reborn as a Brahmin seven times in a row, signifying their holiness.

109 Tib. Lha lung Dpal gyi rdo rje; this is the famous monk who assassinated the last Tibetan King, Lang Darma.

110 This is Atiśa Dipamkarasrijñāna (980–1054), the great 11th-century reformer of Buddhism in Tibet.

111 This is Dromtönpa Gyewé Jungné (’Brom ston pa Rgyal ba’i byung gnas, 1005–1064), Atiśa’s main disciple.

112 Tib. Rngok lo khu dbon; this refers to the lesser translator of Ngok, Lekpé Sherap (Rngog lo chung Legs pa’i shes rab, b.10th century) and his nephew, the great translator of Ngok, Loden Sherap (Rngog lo chen Blo Idan shes rab, 1059-1109).

113 This refers to Khutön Tsöndrü Yungdrung (Khu ston Brtson ’grus g.yung drung, 1011-1075), one of Atiśa’s students.

114 This is Potowa Rinchensel (Po to ba Rin chen gsal, 1027-1105), a Kadampa master.
Lord Neuzurpa;\textsuperscript{116} the relics of the Spiritual Guide Drepa; the blood of Sharawa;\textsuperscript{117} the relics and clothing of Zhangkamawa;\textsuperscript{118} a small piece of Khampa Lungpa;\textsuperscript{119} the hair and mantle of the Arhat of Pelti; the relics of Chim Namkhdrak;\textsuperscript{120} the blood, tooth, hair, hat, urine, mantle, monastic robes, belt, divan, and cushion of the Dharma King Great Tsongkhapa; a finger of the Great Saint Lekyi Dorjé;\textsuperscript{121} the relics of the Realized Yogi Jamyang Gyalto; the hair of the seven abbots of Ganden Monastery after Tsongkhapa;\textsuperscript{122} the relics of the Omniscient Scholar;\textsuperscript{123} a tooth and the monastic robes of the Omniscient Gendún Drupa;\textsuperscript{124} (22) the blood, hair, and belt of the Omniscient Gendün Gyalto;\textsuperscript{125} the clothing of Lord Dungtsepa; the hair of the Scholar Norzang Gyalto;\textsuperscript{126} the mantle of Jamyang Lekchöpa;\textsuperscript{127} the relics and hair of Paṇchen Sönam Drakpa;\textsuperscript{128} the relics of Lord Dewachenpa;\textsuperscript{129} the brains, flesh, relic pills of pus, urine, death shroud, monastic robes, belt, cup, assembly garments, and shoes of the Omniscient

\textsuperscript{115} This is Jadülzin Tsöndrübar (Bya ’dul ’dzin Btson ‘grus ’bar, 1091-1166), an important transmitter of the Vinaya in Tibet.

\textsuperscript{116} This is Neuzurpa Yeshebar (Sne’u zur pa Ye shes ‘bar, 1042-1118), a Kadampa master.

\textsuperscript{117} This is Sharawa Yöntandrak (Sha ra ba Yon tan grags, 1070-1141), another Kadampa master.

\textsuperscript{118} This is Zhangkamapa Sherapō (Zhang ka ma pa Shes rab ’od, 1057-1131).

\textsuperscript{119} This is Khampa Lungpa Śākya Yöntan (Khams pa lung pa Shākya yon tan, 1023-1115), a Kadampa master.

\textsuperscript{120} Mchims Nam mkha’ grags, 1210-1285; this is an important Kadampa scholar.

\textsuperscript{121} Grub chen Las kyi rdo rje, 1326-1401; this is the first Lelung Jedrung (Sle lung rje drung) incarnation.

\textsuperscript{122} Tib. ‘Jam dbyangs gtsang pa bdun brcyud; lit. “Lineage of the Seven Men of Tsang who are [like] Mañjughoṣa [Tsongkhapa].”

\textsuperscript{123} Mkhas grub Thams cad mkhyen pa; this likely refers to the first Paṇchen Lama, the Scholarly Lord Gelek Pelzang (Mkhas grub rje Dge legs dpal bzang, 1385-1438), who was Tsongkhapa’s other heart disciple alongside the first Dalai Lama.

\textsuperscript{124} Dge ’dun grub pa, 1391-1474; the first Dalai Lama.

\textsuperscript{125} The second Dalai Lama.

\textsuperscript{126} Nor bzang rgya mtsho, 1423-1513; this was a student of the first Dalai Lama and teacher of the second.

\textsuperscript{127} ‘Jam dbyangs legs chos pa, b.15th century.

\textsuperscript{128} Paṇchen Bsod nams grags pa, 1478-1554; this is a famous Geluk master who was Ganden Monastery’s fifteenth abbot, and also served as abbot at Drepung and Sera monasteries.

\textsuperscript{129} This like refers to Dewachenpa Gelek Pelzang (Bde ba can pa Dge legs dpal bzang, 1505-1567), the 21st abbot of Ganden Monastery.
Sönam Gyatso; the hair of Pañchen Lozang Chökyi Gyentsen; the hair of the Omniscient Yöntan Gyatso; the hair of the Precious Abbot Könchok Chöpel; as well as my own hair, blood, puss, and medicinal pills [that I produced with] the vase consecration of the lama’s three bodies.

Within the Sovereign Spirit’s red protector chapel, [there are:] (23) a heap of black barley and portions of new and old sacred substances, medicinal pills, sacred supporting items, and such; relics of the Dharma body; many lotus dhāraṇīs [from] all over Tibet; a special [image of] Hayagriva as well as a statue of Padma Tongdröl [Padmasambhava] that arose from Myang[ral Nyima Özer]’s treasure texts; my own yellow hat and official seal; a XX ritual dagger made from a cutch tree [struck?] by a barbaric black mule in a dark pungent charnel ground; the life force cakra for the Hayagriva accomplishment and the cakra for subduing harmful [forces], which were revealed at Zambulung [and derived from] a section concealed within the 108 treasures bestowed by the Great Master [Padmasambhava]; as well as each and every life force cakra of body, speech, and mind, and subjugation cakras.

In general, although there are numerous tantras for Pekar, the root tantras that are indispensable to the practitioner are: the 32-chaptered Wealth God’s Tantra, within which there is a general summary as well as individual outer, inner, and secret (24) accomplishment practices; the seven-chaptered Blue Turquoise Rosary Tantra, within which there

---

130 The third Dalai Lama.
131 Pañchen Blo bzang chos kyi rgyal mtshan, 1570-1662; the fourth Pañchen Lama.
132 Yöntan rgyal mtshan, 1589-1616; the fourth Dalai Lama.
133 Khri rin po che Dkon mchog chos ’phel, 1573-1644; this is the 35th abbot of Ganden Monastery.
134 Tib. dbu [sic: dbus] dang stod smad bar gsum; lit. “the central as well as the three—upper, lower, and middle [parts of Tibet].”
135 Tib. Padma mthong grol; lit. “the Lotus that Liberates upon Seeing it."
136 Tib. sbugs; read as an abbreviation of sbug dam.
138 Tib. ’khor [lo]; in this context, cakras refer to ritual circles of protection. For vivid examples of such cakras, drawn from the Fifth Dalai Lama’s own work, see relevant images in Karmay 1988, pp. 80-173. See also Skorupski 2009, pp. 53-119.
139 Tib. Zab [sic: zam] bu lung; a holy place in Gtsang.
The Nechung Record

is the heart practice; the 20-chaptered *White Crystal Rosary* explanatory *tantra*, within which are the approach, accomplishment, and application of activities; the *Black Iron Rosary Tantra*, [475] within which there is the practice of the one-eyed black Hindering Spirit XXX; the *Tantra that Harms Pekar*, within which are the outer practice and the excellent practice; the *Tantra [of] the XX Lion-masked Corpse*, within which there is the secret practice; the *Tantra of the Nepalese Woman’s Dialogue*, within which there is the practice of the Hindering Spirit Yapsher;¹⁴⁰ the *Tantra of the Sovereign Spirit Life Force and Karma*, within which there is the method for subduing the [Sovereign Spirit’s] life force; the 108-chaptered *Life Force Cakra* and the *Tantra of Bestowing the Heart Citta*, within which there is the [method for] pressing to death; the *Tantra of the Sovereign Spirit’s Karma*, within which there is the inner augmentation [practice]; the ninth chapter of the *Tantra of the Great Servant Kuchok Marpo*, within which there is the method for subduing royal ghosts;¹⁴¹ as well as the *Oral Tantra of Hayagrīva*, within which there is the method for mending [the *samaya* vow of] the Sovereign Spirits.

(25) Regarding the manner in which to implement these teachings: having received them with proper conviction, adhere to them just as the Lord, his ministers, and his subjects do. Regarding also the system of practice: perform the pacifying, augmenting, subjugating, and destructive [actions, as well as] the outer, inner, and secret body, speech, mind, qualities, and activities, of Pekar, the Capricious Spirits, the Savior Spirits, the single male skeleton dancers, the single female skeleton dancers, the lone XX, and their retinue according to [the system of] the butchers, the Three Razor Brothers.¹⁴² Once you have thoroughly assembled all the items for the individual practices, you must unerringly construct such things as the *Matraṃ maṇḍala*. Having forcefully bound [Pekar] with the approach and accomplishment practices, [as well as] the offerings, amendment rites, and oblations, rely on him like you would a father, control him like you would a son, associate with him like you would a friend, employ him like you would a servant, overpower him like you would an enemy, treasure

¹⁴⁰ Tib. *Yab sher*; lit. “Father Confronter.”
¹⁴¹ Tib. *rgyal ’gong*; in this context this likely refers to Pehar and his ilk.
¹⁴² Tib. *Spu gri mched gsum*; the identity of these three deities is unclear, though they appear to be forms of the transcendent protector Mahākāla.
him like you would riches, receive him like you would a king, sic\textsuperscript{143} him [on enemies] like you would a dog, and so forth. [After] omens that the three [acts]—summoning, dispatching, and slaying\textsuperscript{144}—of the preceding eight methods for cultivating [a relationship with the deity were successful] appear, subjugate him, integrate your oaths, \textsuperscript{(26)} bind him to his \textit{samaya} vow, and invest him with authority. Then apply the activities; if they are counteracted, suppress the countermeasures and praise and invoke [the deity]. Through such [methods], offer your enemies [to the deity] as food, cut off [all] errors in increasing the conquering of misfortune, and press intently XX. To conclude the principal protector’s [rites], you must end with the three actions of crushing, burning, and blowing away [your enemies]. Thus, [there are] the four essences of the general weapons, the six essences of the \textit{tormas}, and the nine essences of the \textit{cakras} that eliminate the ten defects [of recitation]. If the Sovereign Spirit would harm you, [keep] the life force \textit{cakra} that suppresses misfortune\textsuperscript{145} [at] your heart; if he is delayed, keep [the text] on your body. If he runs away, overpower him with the life force \textit{cakra} and fierce \textit{mantras}. If there is internal strife, [use] the wheel of death. If he is hostile toward the Wisdom Being, [perform] the meditative stabilization of Hayagrīva. [Within] the crossed \textit{maṇḍala} of Matraṃ [Rudra],\textsuperscript{146} in front of the yogin, there is the \textit{cakra} of \textit{Overcoming the Serated Razor}\textsuperscript{147} at the center of the united Father and Mother [deities]. Separately, there is the \textit{cakra} of suppressing misfortune \textsuperscript{(27)} at the yogin’s navel. This completes the crucial practice that increases the conquering of misfortune, as well as the \textit{cakra} of full confidence.

In all [of this], the yogins, sponsors, patrons, subjects, and so forth, keep the Five Sovereign Spirits—along with their messengers and servants—close to their hearts and are inseparable from them. In particular, there is the life force \textit{cakra} for each of the five emanating dharma kings, their five great consorts, and their five ministers individually; the life force \textit{cakra} that dispels malice, which came from the

\textsuperscript{143} Tib. \textit{rbud}; read as \textit{rbod}.
\textsuperscript{144} Tib. \textit{bod} [sic: \textit{bod} \textit{rbad bsad gsum}.
\textsuperscript{145} Tib. \textit{log mnon} [sic: \textit{gnon}].
\textsuperscript{146} Tib. \textit{ma traṃ zhal ’khor bsol ma}; the meaning of this line is uncertain.
\textsuperscript{147} Tib. \textit{Spu gri so brgal}; this refers to the \textit{tantra} entitled \textit{Dpal lha mo spu gri so rgal gyi rgyud}, found in vol. 42 of the \textit{Rnying ma rgyud ‘bum}. 
oral instructions of XX Lama Dogupa; and the life force cakra that unites the mother and son\textsuperscript{148} XX for each X [of] the Five Sovereign Spirits generally.

Regarding [practices for] the great emanating Dharma protector Dorjé Drakden, which the omniscient [Third Dalai Lama] Sönam Gyatso beheld in a vision [during] meditation: in addition to the three above life force cakras, there is my own waistcoat; the cycle of methods for increasing family, wealth, and possessions, which is explained within the Gathering of Black Clouds Śādhana, (28) as well as the life force cakra for augmenting life and merit; the cakra of the Great Outer Tantra that Averts Malevolent Influences, [possessing] such [content] as Buddhist, Tantrika, and Bönpo spells, [found within] the profound treasures of Künkyong Lingpa;\textsuperscript{149} the protective cakra that is the object of practice for Uṣṇīṣasī asitātapatra;\textsuperscript{150} [476] and the life cakra of Norbu Petreng\textsuperscript{151} and [Vajrā]ṛtakuṇḍali.\textsuperscript{152}

The body support itself is the [Nechung] medium, as well as the XX images and sword of the great Sovereign Spirit with whom he is associated, which were bestowed as items for him to infuse. The speech support is the entire yellow scroll of Myangral’s treasure text, the Great Compassionate Wish-Fulfilling Jewel that Tames [All] Beings.\textsuperscript{153} The mind support is the Blazing Brilliance of the Adamantine Meteor,\textsuperscript{154} which is from that very [same] treasure cycle.

\textsuperscript{148} Tib. ma bu sbyor ba; this is a Dzogchen phrase referring to when the primordial state (the mother) and knowledge (the son) are united in non-duality; see Reynolds 1996, p. 166.

\textsuperscript{149} Kun skyong gling pa, 1396-1477.

\textsuperscript{150} This is an important Buddhist goddess.

\textsuperscript{151} Tib. Nor bu pad phreng; lit. “Jewel and Lotus Garland.” Given that this phrase is paired with a deity, it is likely the name of a deity itself; however, it is unclear which deity is being reference. The jewel and lotus motif suggest a form of Avalokiteśvara.

\textsuperscript{152} Tib. [Rdo rje] bdud rtsi ’khyil ba; lit. “[Adamantine] Nectar Swirler.”

\textsuperscript{153} Tib. Thugs rje chen po ’gro ’dul yid bzhin nor bu. This cycle of treasure texts is available in the Rin chen gter mdzod chen mo; see ’Jam mgon kong sprul 1976, pp. 1-275.

\textsuperscript{154} Tib. Gnam lcags rdo rje gzi byin ’bar ba; this line suggests that this is a text drawn from the above-mentioned treasure cycle by Nyangral Nyima Özer; however, a cursory perusal of this cycle reveals no text by this name. Given that this is the mind support, which is usually a reliquary, this may be the name of said reli-
The reincarnate scholar Gökyi Demtruchen\textsuperscript{155} gave a sword that he revealed from the Northern Iron Treasury to the Teacher of the Se clan, Nyima Zangpo,\textsuperscript{156} [who is] among the seven meritorious sons. Then [you, Gökyi Demtruchen,] and your disciple (29) bestowed [it] as a weapon that liberates [through destruction] the personal enemies of the kings of Ngari, Gungtang, and so forth—the enemies and obstructing spirits in which the ten defects are complete.

Regarding a reliance on the Sovereign Spirit of Activities [Pehar]: there is the \textit{Adamantine Meteor that Overpowers the Army of Hindering Spirits}, a treasure text rediscovered by Ratna Lingpa;\textsuperscript{157} iron swords, thigh swords, and barberry daggers, respectively; \textit{mantra} manuals for summoning, dispatching, and slaying; \textit{linga} emblems; and various soils and stones from India, Nepal, Tibet, and so forth. Moreover, occasionally there are bundles of fragrant saffron, as well as measures of various clothes, silks, grains, medicines, teas, lumber, foods, and fruits. These completely fill a secluded storehouse, with nothing left out, such as yellow silks. Similarly, the principal [items are] my own images and individual relics—these being [my] monastic robes and hair; [and] the relics of the lord of the Buddhas of the three times [Padmasambhava]—these being his shawl and hair. Other [items] for the principal deity and the entire retinue [include] the holy relics\textsuperscript{158} of the Indian and Tibetan root and lineage lamas, as well as \textit{dhāraṇīs} and \textit{mantras}, which were mentioned above. (30)

Regarding the life tree of the \textit{gañjira} [spire] on top [of the monastery, there are:] extraordinary \textit{dhāraṇīs} and \textit{mantras} placed within it and along the outside of it, written without adding or omitting anything; as well as the accomplishment ritual from the \textit{Spotless Rays of Light}.\textsuperscript{159} At its peak there are X relics:\textsuperscript{160} my own hair, \textit{dhāraṇī} and \textit{mantras}, as

---

\textsuperscript{155} Tib. Sprul sku rigs ‘dzin Rgod kyi ldem phru can, 1337-1409; the founder of the Northern Treasures tradition (Tib. Byang gter lugs) of the Nyingma school.

\textsuperscript{156} Tib. Se ston Nyi ma bzang po, b.14th century.

\textsuperscript{157} Tib. Ratna gling pa, 1403-1479; an important Nyingma treasure-revealer.

\textsuperscript{158} Tib. \textit{byin rten}; lit. “blessing support.”

\textsuperscript{159} Tib. ‘Od zer dri med; this is a \textit{tantra} from the Kriyayoga system.

\textsuperscript{160} Tib. X \textit{gdung}; the first syllable is illegible; however, given the context, this word is most likely \textit{sku gdung} or \textit{’phel gdung}. 
well as the relics mentioned above. In particular, these were arranged above, below, and in-between an image of [Uṣṇīṣa]sitāpatra, [as were] protective [amulets] for the country and for one’s object of practice; flawless images and mañḍalas; the most secret protection and aversion rites, as well as rituals for [sexual] union, respectively; life cakras from the Norbu Petreng [cycle] and new treasure texts; Guru Jotsé’s rite for overpowering [spirits]; a protective [amulet] by Nyangrel and one from the Great Almighty [treasure text rediscovered] by [Padma] Lendretsel; as well as a rite for averting armies by Tseten Gyentsen. For the victory banners that have, [respectively,] tiger-, wolf-, vulture-, and monkey-[headed tips, as well as] silk brocade, the establishing ritual was based on the Uṣṇiṣa sitāpatra cycle. For the supporting banners, [there are:] (31) support items of the body, speech, mind, good qualities, and activities for the seven—the Five [Sovereign Spirits], Dorjé Drakden, and [Dorjé] Drakgyelma—as well as a rooftop ornament ritual that accordingly came from oral instructions.

There are also many kinds of [items], such as thread-cross [structures] for mending, averting, and slaying, as well as supports that [compel] the deities to always remain, which were constructed in secret. Over the course of one week, the mantric scholar Lozang Kyechokchen, along with a number of monks, powerfully completed [these, as well as] rituals for thoroughly establishing such [offerings] as continuous tormas, immediately-offered tormas, daily tormas, offering materials, and deity gifts; along with life force cakras, flawless support objects, and so forth, which were composed by such figures as Zur Agur. I consecrated [these objects] and recited the benedictions myself.

Regarding the appearance and establishment of the Sovereign Spirits, if concealed spirits were not overpowered then they were not successful. Therefore, overpower concealed spirits with the sādhana of

---

161 Tib. Gu ru Jo rtse; this figure appears to be a prominent Bönpo treasure-revealer; see Bellezza 2005, p. 97.
162 Las 'brel rtsal, b.1248.
163 Tib. chag pa; read as chugs pa.
the enemy[-defeating] god Khyungchen Ludruk dul\textsuperscript{164} and the exposition within the *Razor [that Cuts] the Life of the Capricious Spirits*. (\textsuperscript{32})\textsuperscript{477} Press down beneath the threshold thirteen masks of such [spirits] as the Nine Spirit Brothers, transgressor spirits, royal ghosts, and ghosts, which harm countries in general and Tibet in particular. For the realization of the Sovereign Spirits, it is explained that you must apprehend [these] indispensable spells that liberate [through destruction], as well as the material supports and soul stones; protect the *samaya* vow; and overpower the concealed spirits and cut off their heads.\textsuperscript{165}

Regarding such things as the essential nature of the outer, inner, and secret symbols, they arose from all the detailed ritual practices [and] the undefiled intended meaning of the *tantras* and oral instructions. Accordingly, these were arranged by myself, the thread-cross [structures] and *tormas* were created by the shrine-keeper Ngawang Sherapchen, and the *cakras* and so forth were commissioned by the monk Jamyang Drakpa. Everything was agreeable and of excellent quality. Most importantly, the place, time, and all the outer and inner [ritual] necessities were thoroughly established to the highest degree.

(33) Even though they arise from the Five [Buddha] Families [that emanate from] Samantabhadra—from whom the maṇḍala of the peaceful and wrathful [deities] emanates and is absorbed—the Five Sovereign Spirits, who thoroughly protect the teachings of the Dharma, [take on] wrathful, ferocious, and repulsive forms in order to cure communities of their wrong views.

\textsuperscript{164} Tib. Dgra lha Khyung chen Klu 'brug 'dul; lit. “Great Garuḍa, Subduer of Serpent Spirits and Dragons;” a variant of this is Rdo rje Khyung chen Klu 'brug 'dul. This is Pehar’s secret initiation name, bestowed upon him when he was subdued by Padmasambhava; see A myes zhabs 2000, p. 413.

\textsuperscript{165} Tib. 'gren bcad; Lingön Padma Kelzang has *mгрin bcad*, which literally means, “to cut off from the neck.” I am translating this phrase as such since ‘gren is not a known Tibetan word. It is possible that ‘gren is an abbreviation (Tib. bskungs yig); however, if so, I am uncertain of what words it is meant to condense.
In order to accomplish their activities, [the Five Sovereign Spirits’] emanations, consorts, and ministers each take a side, and their armies of right, left, front, and back brigadiers, as well as emissaries and secondary emanations, have the power to completely fill the three worlds.

Within [this] great palace—the outside of which is made from materials precious to gods and humans [and] the inside of which displays charnel grounds—the assembly of the three divine roots densely gathers like clouds; it is like passing into the pure land of the Lotus Light [Palace].

The oath-bound guardians accompany them like a shadow follows a body. The outer supports are beautiful white animals; the inner supports are seven-line [supplications written with] wild bamboo, five victory banners, eight auspicious [pillar ornaments], large arrows, and black silks hanging on vulture feathers.

(34) The secret supports are images, various thread-crosses, tormas, and such. These plentiful clouds of offerings [that fill] the whole sky, high and low, completely open the one hundred doors of the Sky Treasury and fulfill the awesome samaya vow.

\[166\] Tib. Padma 'od; this refers to the palace in Padmasambhava’s pure land.

\[167\] Tib. legs brgyad; read as an abbreviation of ka ’phun che legs brgyad.
In the presence of the Abbot [Śāntarakṣita], the Master [Padmasambhava], and the Dharma King [Trisong Deutsen], Prince [Muné Tsenpo made] prayers of aspiration to act for the happiness and welfare of Tibet. The fruit [of these prayers] has ripened today [in the form of Regent] Sangyé Gyatso. The haughty one that challenged his abilities and power was appointed\(^{168}\) [as a guardian] and joined to Brahma.

The stainless tradition of Tsongkhapa, who illuminated the Buddha’s teachings like the sun, consequently spread throughout the expanse of the world. The multitudes of great men who more and more support the religious and secular [government] expand its dominion.

[In this] degenerate age, may the government of the great palace possessing the superior joy and happiness of the four [abundances]\(^{169}\) — the thousand-spoked wheel of virtuous actions and merit, which is completely exalted throughout the heavens without obstruction—grow like the waxing moon.

---

\(^{168}\) Tib. ’tshol ba; read as ’chol ba. I would like to thank Cameron Bailey for suggesting this reading.

\(^{169}\) Tib. sde bzhi; read as an abbreviation of phun tshogs sde bzhi. The four abundances are (1) spreading the Buddhadharma (Tib. sangs rgyas kyi chos dar ba); (2) possessing wealth (Tib. nor longs spyod dang ldan pa); (3) enjoying the five sense pleasures (Tib. ’dod yon lnga la spyod pa); and (4) achieving the level of liberation (Tib. thar pa myang ’das kyi go ’phang ’thob pa). As the red coloring in the original Tibetan text reveals, this line actually gives the name of the Tibetan government, the Ganden Podrang (Tib. Dga’ ldan pho brang).
The blessings of the root and lineage lamas gather like clouds [and] the peaceful and wrathful tutelary deities shower down accomplishments [upon us] like rain. May the [Five] Dharma Kings and their retinue spontaneously accomplish the desired activities, which would be [like] enjoying fully ripened fruit.

Although Regent Trinlé Gyatso—who wanted to expand Nechung Chapel long before [now]—finished laying its foundation, the Great Dharma Protector said, “A tantric house must be built within my estate.” He also prophesied that it would arise accordingly in the future. Moreover, Padma Tötreng Tsel prophesied:

A great minister who is an emanation of Mutri [Tsenpo], possessing a regal manner [and] the name of ‘Buddha,’ will become the magistrate.

He also [prophesied]:

An emanation of Muné Tsenpo, possessing the name of ‘Jewel,’ will be born in a fire year in a part of the Ü region.

---

170 Tib. ’Phrin las rgya mtsho, d.1667.
171 Tib. Chos skyong chen po; in this context this epithet refers to the Nechung Oracle.
172 Tib. Mu khri. This refers to the second Tibetan King Mutri Tsenpo (Mu khri btsan po), who was the son of the first Tibetan King Nyatri Tsenpo (Tib. Gnya’ khri btsan po); see Haarh 1969, pp. 34-35.
173 The belief is that this prophecy refers to Sangyé Gyatso, whose name ‘Sangyé’ means Buddha, and who was believed to be an emanation of Mutri Tsenpo; see Lobzang Tondan 1983, vol.1, p. 7.
174 Tib. Mu ni [sic: ne]. This refers to the 39th Tibetan King Muné Tsenpo (Tib. Mu ne btsan po), who was the son of Trisong Deutsen; see Haarh 1969, pp. 56-57.
175 This prophesy also appears to refer to Sangyé Gyatso, who was believed to have also been an emanation of Muné Tsenpo; see Lobzang Tondan 1983, vol.1, p. 8. Moreover, his personal name was Könchok Dondrup (Dkon mchog don grub)—Könchok means ‘jewel.’ However, the fire-year birth is an inconsistency, since
In order to protect against interfering Hindering Spirits, [478] this very [person] will entrust [the deities] as guardians and have them protect and avert [misfortune] again and again. (36)

Accordingly, three sons were born to the Dharma King Trisong Deutsen. The eldest, Muné Tsenpo, protected the two traditions, [spiritual and temporal,] here in this Land of Snows. Being as impartial as timely rainfall, he acted for the happiness and well-being of all people and cattle. He even established this chapel for the Great Dharma Protector. In [this] beautiful, majestic, and sublime [chapel] that is superior to others, the three precious supports—and in particular, a wealth of necessities exemplified by countless outer, inner, and secret supports and offering substances for the protector deities that naturally assemble [here]—were [all] piled up. When [Nechung Monastery] XX, along with the gifts for the deities, were completely established and [we] were about to enjoy the celebration of the consecration banquet, Regent Sangyé Gyatso urged [me to write] a record. Accordingly, [I], the Monk of Zahor, Zilnön Zhepatsel, composed [this record]. The scribe was (37) the dance master, monk Ngawang Könchok.

May [all accomplishments] be bestowed!177

---

176 Tib. Zil gnon bzhad pa rtsal; this is the Fifth Dalai Lama’s secret initiation name.
177 Tib. pra yatstshantu; Skt. prayacchantu. This is the imperative third person plural for the Sanskrit pryaṃ/prayacchatī, meaning “to bestow, send forth, produce.” I would like to thank Kathleen Erndl for providing me with the root and grammatical details of this word (personal correspondence, August 21, 2012).
Although he is the father of all Victorious Ones, he [takes on] the appearance of the Bodhisattva Padma Karpo. Although he—the vast treasure of compassion—was instantaneously liberated, he firmly upholds all beings with compassion. Although he makes offerings of the four [actions] in abundance, he conquers samsāra and nirvāṇa in all their glory. May the Omniscience [Fifth Dalai] Lama Lozang Gyatso look after [us] until we reach enlightenment!

[Like] the brilliance of a powerful sun blazing with the natural sunlight of pure wisdom, he directly manifests within the castle of the Haughty Spirits and annihilates the darkness of the demon horde. This self-produced universal monarch who bears the gnostic mantras [is] named Padma Gyelpo [Padmasambhava]. He is wreathed in [the light of] the 100,000 suns of samsāra and nirvāṇa. May he expand the lotus garden of virtue and auspiciousness!

He fully comprehends the vast wisdom that illuminates all that can be known with the strength [of] the garuḍa. Therefore, just like gooseberries thoroughly spread across the palm of one’s hand, he completely perceives and analyzes all phenomena unadorned as they are. We

---

178 As with the description and title at the start of the Fifth Dalai Lama’s portion, this title was added by Lingön Padma Kelsang and is not part of the original Nechung Record wall inscription.

179 Beginning here, the inscription numbering reverts from parenthetical to bracketed representations because Lingön Padma Kelsang ceases to record line numbers in his transcription, instead drawing his content from the Roar that Shakes the Three Realms manuscript.

180 Tib. Padma dkar po; Skt. Puṇḍarīka; lit. “White Lotus.” This is an epithet for the Bodhisattva Avalokiteśvara, but refers here to the Dalai Lama.
permanently pay homage to this Dharma King with five topknots, Jampel Nyingpo!

He conquered the great manḍala of the Haughty Spirits and, with a neighing roar, ate the host of spirits [throughout] the three worlds. May he, Hayagrīva — who is incredibly red, like a Mount Meru[-sized heap] of naturally radiant coral — protect us!

They [produce] unimpeded various miraculous emanations from the pure expanse, just like the [multiple] reflections of the moon in water, and with a fierce manner they watch after the [Buddha’s] teachings. May these Dharma protectors, the Five Sovereign Spirits, delightfully play!

I fully composed a wreath of stanzas [to decorate] the head [of this work] and placed this melodious chant possessing the eight qualities of poetry in the lines above. As for the present matter, the precious record composed by the unrivaled savior of all sentient beings, including gods, is given above. [40] I offer this minor [work] as a detailed addendum.

The precious teachings of the Buddha spread, flourished, and have dwelled in the world for a long time. They rely solely on the empowering conditions of the holy ones who uphold the teachings. Moreover, they rely on the compassion of the Highly-Exalted Omniscient Lord of the Victorious Ones — who is the secret body, speech, and

181 Tib. Zur phud lnga ldan. This is an epithet for the Bodhisattva Mañjuśrī, of whom Tsongkhapa is believed to be an emanation.
182 Tib. 'Jam dpal snying po. This is an epithet for Tsongkhapa, specifically in reference to his name in Tuṣita heaven.
183 Tib. rgod; read as 'god.
184 This refers to the Fifth Dalai Lama.
mind of the Buddhas and Bodhisattvas, the magical emanation of inconceivable wisdom, the one who manifests as the very embodiment of compassion, [479] and the one who is Padmapāṇi himself in the form of a tantric master. I will ever remain at the lotus feet of this savior for one-hundred eons. I will properly complete all activities that he desires and clear away discordant conditions.

Ordered [to perform] activities that accumulate and augment concordant conditions without hesitation, bearing on their heads a vajra crown, never transgressing the oath to which they were bound [by] the awesome seal [41] — the worldly and transcendental adamantine protectors are inconceivable [in number]. However, among these, the ones that quickly [accomplish] the most activities, and who are the most fiercely powerful, are the Great Sovereign Spirits that Protect the Dharma. Furthermore, they are the essence of all the qualities of the wisdom and compassion of the primordial Buddha Samantabhadra. Complete enjoyment bodies that are the unhindered inherent radiance of he who is the universal splendor of all saṃsāra and nirvāṇa arose as the five [Buddha] families. From these, in response to the wicked tamable beings that must be wrathfully subdued, the five [appeared]: the central Sovereign Spirit of the mind [Gyajin], who is an emanation of Vairocana — the essence of the wisdom of the Dharmadhātu, the purification of hatred; the eastern Sovereign Spirit of the body [Mōnbuputra], who is an emanation of Vajrasattva — the essence of mirror-like wisdom, the purification of ignorance; [42] the southern Sovereign Spirit of good qualities [Shingja-chen], who is an emanation of Ratnasambhava — the essence of impartial wisdom, the purification of pride; the western Sovereign

188 Tib. Brgya byin.
189 Tib. Rnam par snang mdzad. Vairocana is the head of the Buddha family and takes the central position.
190 Tib. Mon bu pu tra.
191 Tib. Rdo rje sms dpa’. Vajrasattva is a form of Akṣobhya (Tib. Mi bskyod pa), who is more generally considered the head of the Vajra family in the east.
192 Tib. Shing bya can.
193 Tib. Rin chen ’byung gnas. Ratnasambhava is the head of the Ratna family in the south.
Spirit of speech [Kyechik Marpo], who is an emanation of Amitābha—the essence of the wisdom of discriminating awareness, the purification of desire; and the northern Sovereign Spirit of activities [Pehar], who is an emanation of Amoghasiddhi—the essence of all-accomplishing wisdom, the purification of envy. They are accompanied by many primary, secondary, and tertiary emanations, such as five consorts that instill delight and are the inherent nature of wisdom, five emanations that are protective and perform many kinds of activities, five ministers that accomplish [their assigned] activities, lion-masked dancers that entertain, and the four great brigadiers of the right, left, front, and back sides. By relying on them, they accomplish all pacifying, enriching, conquering, and destructive activities. They have great power, are loyal, and are easy to invoke.

Consequently, long ago the great Dharma-protecting King Trisong Deutsen constructed the great Changeless and Spontaneously Present Three-styled [Samyé] Monastery, together with its temples and sacred images. When the Abbot Śāntarakṣita, the Master Padmasambhava, and the Dharma King Trisong Deutsen were discussing how they would appoint a protector [for the monastery], the Abbot said, “the Hindering Spirits enjoy killing, the Planetary Spirits are vicious, the Serpent Spirits are noxious, the Imperial Spirits are harmful [and cause] pain, the Savage Spirits are too gentle, and the Maternal Spirits are terrifying. None of them [will do], so who is suitable?” The Second Buddha, Great Master Padmasambhava said:

The tutelary deity of Mongolia is Namlha Jangchub. Once we invite this Sovereign Spirit Shingjachen [here], we will entrust the monastery to him and it

194 Tib. Skyes gcig dmar po.
195 Tib. Snang ba mtha’ yas. Amitābha is the head of the Padma family in the west.
196 Tib. Don yod grub pa. Amoghasiddhi is the head of the Karma family in the north.
197 Tib. zan g.yang; read as zan yang. This refers to the three styles that make up Samyé Monastery’s central temple, each story of which was designed in a different cultural style: Indian, Chinese, and Khotanese, traditionally.
198 Tib. pho lha. This usually refers to one of the five personal protector deities (Tib. ‘go ba’i lha lnga) that are attached to an individual from birth; see Jovic 2010.
will be indestructible. If we conquer the meditation center of Bhatahor, Pekar will follow after his possessions and come [here]. I will establish his supports at Pekarling.¹⁹⁹

Likewise, [the others said,] “the Sovereign Spirit Pekar, the treasure guardian from the Bhatahor meditation center, is suitable.” And so, they conquered the Mongolian meditation center. Along with Dharma-pāla of the Zahor royal line, as well as many [of the deity’s] possessions—such as a turquoise Buddha [statue] and a conch-shell lion [statue]—[Pekar] was invited [to Tibet] and [44] installed as the guardian of the entire Dharma center [of Samyé]. [480] His outer and inner supports were also established. [Pekar] was entrusted to protect the life pillar of the Buddha’s teachings and promised to do so. However, all five great Sovereign Spirits successively came to reside and remain at many such monasteries. Thus, this Great Dharma King [Pekar went] to reside at Yangön Monastery, in the central region to the north. One day during the lifetime of the Omniscient [Second Dalai Lama] Gendün Gyatso, though he was uninvited, [Pekar and the Dalai Lama] met at that place [Yangön] in accordance with the [Buddha’s] teachings. This was a sign that [the deity] would not transgress his awesome and delightful adamantine oath. Accordingly, [the Second Dalai Lama] spread the Gelukpa²⁰⁰ teachings and, together with the protector of this great Dharma center, he left Yangön by way of a coracle.²⁰¹ Because [he] offered [Pekar] prayers, offerings,

¹⁹⁹ Tib. Pe kar gling; this is a condensed form of Pe kar dkon mdzod gling, the monastic treasury. This exchange is summarized and quoted from the 63rd chapter of the Padma bka’ thang; see Orgyan gling pa 1996, pp. 384-385.

²⁰⁰ Tib. žhwa ser cod pa’ ’chang ba; lit. “the bearers of the yellow hat.”

²⁰¹ Tib. rta mgo; read as rta mgo can. I would like to thank Bryan Cuevas for suggesting this reading (personal correspondence, October 8, 2012). This segment of the Nechung Record concerning Yangön is summarized in the Gung thang dkar chag; see Sørensen, Hazod, and Tsering Gyalbo 2007, p. 216. However, since this segment in the latter text is a summary, it is missing some important details that have affected how Sørensen and Hazod translate this event. Their interpretation is that Pehar left Yangön alone in the form of Hayagriva, translating rta mgo as such. Yet the full text of the Nechung Record suggests rather that the Second Dalai Lama himself came to Yangön, befriended Pehar, and left with him.
and entrusted actions, [the deity] accomplished the actions that the Omniscient one [requested] without obstruction.

A summary record of [Pekar’s] coming here [is as follows]: Moreover, when he was close to being born in the direction of Tölung Tsega for the benefit of all beings, [the Dalai Lama] was slightly delayed by a hindrance. [45] At this time, he deliberately went to the glorious Copper-colored Mountain because he was exhausted from benefiting beings. When [he arrived], the great master was teaching the profound Dharma to an assembly of knowledge-bearing ċākas and ċākinīs. There were two protector deities—one large and one small—in front of where he was sitting. The [large] one had a black body and white plaited locks of hair, and held a sword and a blood-filled skull-cup. The [small] one had a red body and wore leather armor and a leather helmet, the top of which was adorned with silk ribbons. He brandished in his hands a red spear and a lasso. He possessed a tiger-skin quiver and a leopard-skin bow case, and wore red leather boots. The [two deities] stood as such with Padmasambhava above and behind them. [The Dalai Lama] asked the great master Padma[sambhava], “Who are these two protectors?” [He replied,] “These two are my attendants and they will accompany [you] as companions. Go to Tibet in order to benefit the [Buddha’s] teachings and sentient beings!” Accordingly, they were entrusted as [the Dalai Lama’s] servants to accomplish all [desired] activities. [46] As requested, [the Dalai Lama,] together with the two protectors, came to this land in order to benefit [all] tamable beings.206 Later, [after he

202 Tib. Stod lung rtse dga’. The full name of the Third Dalai Lama’s birth place is Stod lung rtse dga’ khang gsar, located in the Töling valley just west of Lhasa.

203 Tib. Zangs mdog dpal ri; this is Padmasambhava’s pure land.

204 Tib. thor lcog; read as thor cog.

205 Tib. ldem phru; read as ldem ’phru.

206 This encounter with Padmasambhava and the two protectors, which is said to have taken place in the intermediate state between the death of the Second Dalai Lama and the rebirth of the Third, was drawn almost verbatim from the biography of the Third Dalai Lama composed by the Great Fifth; see Ta la’i bla ma 05 1982, pp. 16-17. Amy Heller (1992b, pp. 223-225) discusses this event in detail. She explains that the identification of the smaller red deity is ambiguous in this account; however, given its placement at this point in the Nechung Record, it seems that Sangyé Gyatso is making the argument that it is Pehar or one of his emanations. For a larger discussion of the identity conflict between the deity Begtse and Pehar’s emanation Dorjé Drakden, see Heller 1992a.
was born], the great omniscient one Sönam Gyatso was placed\(^{207}\) on the great Dharma throne at Glorious Drepung Monastery. Not long after, this great Dharma protector [the red guardian] possessed the human body\(^{208}\) [of the Nechung Oracle]. In this manner, and expressing [himself] here\(^{209}\) [like] Sarasvatī [did when she] vividly revealed herself, he said, “Through the interdependent connections of [our] extensive and unhindered activities that benefit [all] tamable beings, [may] the incarnate one [the Third Dalai Lama] behold me!”\(^{210}\) The image was drawn [as such]:

Regarding the way to make the tangka display,\(^{211}\) however large [you want] the cotton canvas is

---

\(^{207}\) Tib. zhabs zung rnam par bkod; lit. “his two feet were fully established.”  
\(^{208}\) Tib. khog; lit. “the trunk of the body.”  
\(^{209}\) Tib. ’drir; read as ’dir.  
\(^{210}\) This and the following verses greatly summarize an encounter between the Third Dalai Lama and Pehar—in possession of the Nechung Oracle—recorded in the Third Dalai Lama’s biography. This event, recorded here in a piecemeal and disjointed way, occurred around the turn of 1589, shortly after the Third Dalai Lama was appointed abbot of Sera Monastery. For the full account, see Ta la’i bla ma 05 1982, pp. 116.3-126.4; see also Department of Religion and Culture 2004, pp. 29-37. Here, the two deliberate on the commissioning of a biographical tangka for the Dalai Lama before the oracle gives iconographic instructions to the painter, Trengkhawa Penden Lodrö Zangpo (’Phreng kha ba Dpal ldan blo gros bzang po, b.16th cent.). This specific quote does not appear to be verbatim, since it paraphrases two disparate elements. The first element is earlier in the exchange and concerns the activities of the Dalai Lama and Pehar working in tandem. This exchange is quoted verbatim below; see Ta la’i bla ma 05 1982, p. 121.3-4. The second element is at the end of the account and makes mention of the goddess Sarasvatī (Tib. Dbyangs can lha mo; var. Dbyangs can ma). The Nechung Oracle explains that when Trengkhawa was beginning to paint a tangka of Sarasvati, he had doubts about the iconography. In response, the goddess appeared to the Third Dalai Lama in a vision and said, “Behold me, incarnate one!” In similar fashion, when painting the tangka of the Third Dalai Lama’s biography, which includes a detailed image of the Sovereign Spirit, the Nechung Oracle says that he proclaimed the same thing; see Ta la’i bla ma 05 1982, p. 126.3-4. The next few lines of verse are quoted verbatim and describe iconographic elements given to Trengkhawa by the Nechung Oracle. Macdonald (1978, pp. 1140-1141) also briefly discusses this event.  
\(^{211}\) Tib. thang ga’i ljags bkod gnang ba’i tshul; unlike the following verses, this line does not appear to be drawn verbatim from the Third Dalai Lama’s biography. It does not precede the next line in that text.
fine.\textsuperscript{212} In the middle of those [images] or on one side,\textsuperscript{213} the form of the western Sovereign Spirit of speech. He rides a black mule with white heels and is majestic.\textsuperscript{214} Countless emanations that look like [the Sovereign Spirit] radiate [from him], even more than all of these beings.\textsuperscript{215} The emanations of the Sovereign Spirit Pekar are many—even more than the hairs on a tawny horse’s [body].\textsuperscript{[47]} Moreover, a description is for small-minded people [while] this image is [for] you—a great mind, worthy and expansive…\textsuperscript{216}

[The Nechung Oracle further] said:\textsuperscript{217}

In general, even though all phenomena do not truly exist, they appear true in a conventional [sense]. With respect to this, in the center of the lotus at the heart of the 1002 Buddhas there is Padmasambhava. When [we] were in the Lotus Light Palace at the peak of the glorious copper-colored mountain, Padmasambhava in-

\textsuperscript{212} For this line, see Ta la’i bla ma 05 1982, p. 124.3.
\textsuperscript{213} This positioning is explained in greater detail in the Third Dalai Lama’s biography. The Nechung Oracle expounds on the proper iconography for the \textit{tangka}; immediately before this line he states that there should be a monastery in the corner under the Dalai Lama’s right knee and a Savior Spirit under his left knee. The oracle then explains that the image of one of the Five Sovereign Spirits should go in-between these two images.
\textsuperscript{214} See Ta la’i bla ma 05 1982, p. 124.5.
\textsuperscript{215} This line is preceded by a detailed description of the entities that make up the Five Sovereign Spirits’ retinue.
\textsuperscript{216} See Ta la’i bla ma 05 1982, p. 125.3-4.
\textsuperscript{217} The below lengthy quote is also found in the Third Dalai Lama’s biography; see Ta la’i bla ma 05 1982, pp. 121.2-122.1. This prose was spoken by the Nechung Oracle to the Third Dalai Lama while the former was possessed by Pehar.
structed [us] to act for the improvement of the Buddha’s teachings. That is to say, the Incarnate One Meaningful to Behold, through pacifying and augmentative means, performs activities that protect those who bear the [Buddha’s] teachings; while I, the Sovereign Spirit Pekar, through subjugating and destructive means, accomplish activities that clear away discordant conditions and that bring about concordant conditions for him. Accordingly, both [of us] must also act for the improvement of the [Buddha’s] teachings. Please consider this! In particular, Padmasambhava gave the enemies’ flesh, blood, life essence, and life breath to me as food rations. For my allotted work, he entrusted me with protecting the [Buddha’s] teachings, as well as the bearers of those teachings. Because of this, I have also never transgressed Padmasambhava’s commands in the past. Again and again I have not transgressed [his commands]. So if there are obstacles to the activities that the One Meaningful to Behold performs in his lifetime, I will clear them away. I will accomplish all the concordant conditions! If there are harmful demons and obstructing spirits, human beings and inhuman spirits are not suitable [for dealing with them] unless they are included among the Haughty Spirits, the eight classes of gods and spirits of the phenomenal world. I am the overlord of all eight classes, the king who is the embodiment of the Haughty Spirits. What demons and obstructing spirits are able to transgress my command? Therefore, [your] entreaty is not insignificant. There is no need to act humble!

Accordingly, this great Dharma protector ultimately [acts] as the guardian of the life stages of the great Omniscient King of the Victorious Ones, as well as the guardian of all the teachings of the great

---

218 Tib. Sprul sku Mthong ba don Idan. This is an epithet for the Dalai Lamas often used by the Nechung Oracle.

219 Tib. Rgyal dbang Thams cad mkhyen pa; in this context this appellation is an epithet for the Dalai Lamas.
[and] incomparable Tsongkhapa; he is like a rampart for the great Dharma center Glorious Drepung [Monastery]. [However,] this [deity] did not have a natural and spontaneously present abode where he could live. Nevertheless, he generated one through meditation and [then], together with his emanations, created a real one. The manager of Glorious Drepung [Monastery] also requested that this new dwelling place, Nechung Pekar Chapel, [be built]. Consequently, by means of the earlier request and through great effort, [construction] began in the Iron-Female-Bird year [1681], in the third month, which celebrates when the Buddha turned the Dharma wheel of the Kālacakra at the great reliquary of Glorious Dhānyakaṭa.\footnote{Tib. Dpal ldan 'bras spungs; this site is located in Amaravati, Andhra Pradesh, India and is the place after which Drepung Monastery in Tibet was named.} First, I myself made an arrangement of multicolored papers and various [other things]. The area [of the site] was cleared and marked out by the cords of the serpent.\footnote{Tib. lto 'phye'i thig. This refers to the practice of using cords to divide the site space into a chessboard-like configuration. This iconometry then determines the location of the serpent-like Lord of the Soil (Tib. sa bdag) underneath the ground, to whom offerings must be made before he will grant permission to dig the foundation.} [50] The Mantrika of Chongyé, Ngawang, performed the methods for subjugating [the Lord of the Soil, interpreted] the planets and stars, and so forth; these are explained in the [geomantic and astrological] literature. On the day when the ground was dug up, there was a dust storm and the sky was turbulent.

There were 22 supervisors. The two chiefs were Kyitöpa Tenpé Gyentsen and Pulungpa Püntsok Pelzang. [Other supervisors included] Chungpa Raptang Marmowa, Rongrang Chönpa, Sawa Druppa, Nang Jungpa, Kartsowa, Gadong Zhidewa, Sharpa Rapsel, Chölung Zhungkar, Kangsar Rapten, Polhawa, the Five folks from Rong, Sönam Dargyé, and Zimchungpa. There were 127 carpenters. Their chief craftsmen were Nesarwa Jamyang and Drachi Gögö, their medium craftsman was Lhasa Lamnyé, and their lesser craftsman was Büdé Mendrup Lingpa; their remaining [craftsmen included] Zadam Tsewang. There were 93 masons. Their chief craftsmen were Drigung Samdrup Tseten and Gyamön Dargyé,\footnote{[482] There were 7 bricklayers. Their chief craftsman was} and their lesser craftsman was Chukpo Tashi; their remaining [craftsmen included] Madro Menchok.
Epa Tsenden and the remaining [craftsmen included] Jamyang. There were 44 [other workers] such as roofers, transporters, leathersmiths, and builders from Môn. When both Sŏnam Pel and Zangpo acted as supervisors, they gathered stone collectors for corvée labor. In this they followed in the footsteps of the story of Samyé Monastery being built by the Dharma King Trisong Deutsen: [at that time] the gods and spirits gathered a mountain of stones for all to see, regardless of whether it was day or night. There was a great output [of work] and a great number of corvée laborers—nearly 5000. Prior to that, other than one or two bad omens—like Sovereign Spirit diseases—there had been no illnesses and the builders were exceptionally wonderful.

For the murals, there is the great incomparable Tsongkhapa [52], the First Pāṇchen Lama, and the First Dalai Lama; [as well as] the Lineage of the Seven Men of Tsang who are [like] Mañjughoṣa; the five successive bodies of the great All-Knowing, All-Seeing Lord of the Victorious Ones, the crown jewel of the five hundred [bodhisattvas?]; the great master of Glorious Uḍḍiyāṇa; the Eight Śādhanā Deities; the great Five Sovereign Spirits, their five consorts, and five ministers; the Seven Wild Imperial Spirit Riders; and, in particular, the two physical expressions of this great Dharma King [Pehar]. For the murals in the courtyard, there is the retinue: the 30 chiefs of the Haughty Spirits, the 75 glorious protectors, and the horde of the eight classes [of gods and spirits].

Arranged according to the explanations within the tantras, the interstices [of the walls] have innumerable servants and various kinds of wild animals: the outer supports consist of vultures, monkeys, and parrots; the inner supports consist of dogs; and the secret supports

---

222 Tib. lugs gsum mi ’gyur lhun grub kyi gtsug lag khang; lit. “the changeless and spontaneously present monastery of three styles.”

223 Tib. rgyal zer; read as rgyal gzer.

224 Tib. ’jam dbyangs gtsang pa bdun rgyud; this refers to the first seven abbots of Ganden Monastery who followed after Tsongkhapa.

225 This refers to the first five Dalai Lamas.

226 Tib. sku’i rnam ’gyur rnam gnyis; this refers to the two forms, peaceful and wrathful, of the central deity.

227 This likely refers to the many tantras that concern Pehar, which were listed above in the Fifth Dalai Lama’s section, lines 23-24.
consist of silk brocade. The supports that summon the butchers are the victory banners [topped with the heads of] tigers, wolves, [etc.] There is an eight-year-old crystal child with turquoise eyebrows who bares his conch-shell fangs, brandishes a razor in his hand, and rides a white lion. [53] [He is flanked by] a one-eyed black monkey holding an iron knife in his hand and riding a small mule, and a white enemy-[defeating] god wearing a nine-layered robe, holding a flaming razor, and riding a lion. There are 100 arhats on their right, 100 armored [soldiers] on their left, 100 women in front of them, and 100 monks riding black mules [behind them]. [There are also] 100 black Indian Mön dancers holding mendicant staffs in their hands, and 7 black women wearing skull-garlands. There is the butcher [Jatri] Mikchikpu\textsuperscript{228} wearing a turban of black serpents and riding a blue horse with a black bottom; Putra Nakpo\textsuperscript{229} riding a small mule; an arhat wearing a wooden summer hat and riding a camel;\textsuperscript{230} and Jagö Tangnak\textsuperscript{231} throwing a vajra.\textsuperscript{232} There are great skeleton servants—100 of which are holding aloft victory banners [topped with the heads] of vultures, and 100 of which are holding aloft victory banners [topped with the heads] of lions. There are Lords of Life—100 of which are holding aloft flaming [military] standards, and 100 of which are holding aloft silk ribbons and victory banners. There are 100 armored Lords of Life and great skeleton servants. [54] There are 100 quarreling\textsuperscript{233} white lions and 100 racing blue wolves. There are 100 black female Hindering-Planetary Spirits holding aloft victory banners [topped with the heads] of peacocks. There are 100 packs of black horses, black mules, and black dogs. There are 100 camels loaded

\textsuperscript{228} This is Mönbuputra’s minister.
\textsuperscript{229} Tib. Spu gri [sic: tra] nag po; I have incorporated Lingön Padma Kelzang’s correction here, since the context indicates that this refers to Pehar’s minister, who also rides a mule.
\textsuperscript{230} This refers to Kyechik Marpo’s minister, Dorjé Drakden, in his original form.
\textsuperscript{231} This is Shingjachen’s minister.
\textsuperscript{232} Gyajin’s minister, Jarawa (Tib. Bya ra ba), is oddly absent from this list.
\textsuperscript{233} Tib. ‘khrab mo byed pa. Lingön Padma Kelzang considers the first word of this phrase to be a misspelling of khrab, making its meaning somehow relate to armor; however, I propose that it is a phonetic misspelling of ‘thab mo byed pa, meaning to quarrel or fight. The trend of the next clause appears to agree with this interpretation.
with notched wooden plates\textsuperscript{234} that [summon] Hindering Spirits. There are 100 emissaries\textsuperscript{235} mounted on white horses and 100 black Môn. Of those emanations that have a variety of repulsive forms, 100 devas hold aloft silk victory banners; 100 asuras hold aloft victory banners [topped with the heads] of tigers; 100 rāks asas hold aloft victory banners [topped with the heads] of wolves; and 100 gandhar-vas hold aloft victory banners [topped with the heads] of vultures. There are 100 [deities] holding aloft victory banners [topped with the heads] of mongooses and peacocks. [Lastly,] there are 100 [deities] holding aloft victory banners [topped with the heads] of monkeys and cats.

\textsuperscript{234} Tib. \textit{krham shing}; this refers to wooden boards with crosses notched into them that are used in Tibetan sorcery to summon malicious spirits.

\textsuperscript{235} Tib. \textit{kingka ra}; Skt. \textit{kiṃkara}; the common Tibetan abbreviation for this word, encountered above, is \textit{ging}.

\textsuperscript{236} Many of these names are given a toponym or clan affiliation in the \textit{Roar that Shakes the Three Realms} manuscript; I include these added names in parentheses.

For the bas relief statues, [57] as stated above, there is Hayagrīva and his consort in accordance with the Guru Guhyasamāja [cycle]; the Five Sovereign Spirits, along with their consorts and ministers; Dorjé Drakden as envisioned by the Omniscient [Third Dalai Lama] Sönam Gyatso, which was mixed with the clay of an ancient statue; a miraculous Dorjé Drakden wearing the garments of the Imperial Spirits, as secretly envisioned by the Incomparable Sovereign, the Supreme Savior [Fifth Dalai Lama];237 as well as Dorjé Drakgyelma. In the Birch Tree Chapel, there is the venerable Lord of the Victorious Ones, the great Ominiscient One [the Fifth Dalai Lama] Ngagi Wangchuk Lobzang Gyatso, which is the chief [statue]; [there are also] the four successive bodies of the Eminent One;238 the great Victorious One Tsongkhapa; Padmasambhava and his two consorts;239 the Eight Manifestations of Guru [Padmasambhava]; as well as the guardian of the [Buddha’s] teachings, Dorjé Drakgyelma. In the four-pillared right upper chapel, there is the Lord of the Victorious Ones, the Omniscient [Fifth Dalai Lama] Lobzang Gyatso, which is the chief [statue]; the great venerable Tsongkhapa; Jamyang Chöjé;240 the Eight Medicine Buddhas; [58] Nāgeśvararāja; 241 Roaring Lion Avalokiteśvara;242 White Tārā; Tārā of the Acacia Forest;243 Tārā who Protects against the Eight Fears;244 Turquoise [Vajra]vidāraṇa; as well as

237 This may refer to the vision the Fifth Dalai Lama had of Dorjé Drakden in 1653; see Karmay 1988, p. 35.
238 This refers to the four previous Dalai Lamas.
239 Tib. O rgyan yab yum gsum; Padmasambhava’s two consorts are Yeshé Tsogyel and Mandarava.
240 Tib. ‘Jam dbyangs chos rje Bkra shis dpal ldan, 1379-1449. This is the founder of Drepung Monastery.
241 Tib. Klu dbang gi rgyal po; lit. “Mighty King of the Serpent Spirits.” This figure is the head of the system of 35 Confessional Buddhas (Tib. Ltung bshags sangs rgyas so Inga) developed by Tsongkhapa.
242 Tib. Spyan ras gzig seng ge sgra; Skt. Siṃhanāda Avalokiteśvara. This form of Avalokiteśvara rides a lion.
243 Tib. Seng ldeng nags sgrol; Skt. Khadirāṇa Tārā.
244 Tib. Sgrol ma ’jigs pa brgyad skyabs [sic: skyobb]; Skt. Aṣṭamahābhaya Tārā.
Pratisarā. In the four-pillared left [upper chapel], there are the Buddhas of the Three Times; the 16 Noble Sthaviras; Dharmatala; the Four Great Kings; and Hwasshang [Mahāyāna].

The sculptors who built such images [are as follows]: [the chief craftsmen] were Epa Umzé Bakdro and Chöpel, and the lesser craftman was Pelzin. The remaining [craftsmen included] Tsön-chung, Lobzang Tenkyong, Orgyan Gönpo, Gyelwar Dargyé, Dzomtruk, Lobzang, Yutruk, Sōnam Tsering, Sumga, Tenpel, Jamyang Dargyé, Awar, Norbu Tsering, Döndrup, Horgyel, Sumpel, Lobzang Norbu, and Norbu Dargyé. Their main supervisors were Lodrö Gyentsen, the high monk of Kabok, [59] as well as Chungwa Kyidrung Drapön and Gyeltse Chokbukpa. The supervisors for the corvée laborers were Changra Sōnam and Zadam Tsering Döndrup.

The central deities of these paintings and statues were designed according to the instructions and supplemental [texts] explained above, as well as the astrological works; [however,] I did amend them. Prior to doing this, from blessing the craftsmen, tools, and life tree,²⁴⁵ to [writing] the guide book, consecrating [the site], and opening the eyes [of the images], the monk Jamyang Drakpa ordered such activities, which were [discussed] above, and I placed my head at his feet.

The Great Holy Savior of all beings, including gods, [the Fifth Dalai Lama] gave instructions for the silk thread-cross mansions of various Haughty Spirits—such as the Five Sovereign Spirits, their consorts and ministers, as well as Dorjé Drakden—and, similarly, for the abundant torma materials. The shrine master Ngawang Sherap acted as the supervisor [for this].

²⁴⁵ Tib. srog shing; this does not refer to Pehar’s soul tree, but rather to the central beam or axis that is placed at the sacred center of all monasteries, statues, and reliquaries—the axis mundi of such a site or object.

²⁴⁶ The original wall inscription has Rdo rje grags rgyal ma, while the Roar that Shakes the Three Realms manuscript amends this to Rdo rje grags ldan; see Sangs rgyas rgya mtsho n.da., f.8a.1. The manuscript also adds bstan srung (“Protector of the [Buddha’s] Teachings”) before the name. Given the context, I am interpreting the emendation to be correct. Nonetheless, that one deity is confused for another carries interesting implications.
Each monk in the college made an effort and they made wonderful things, [such as] victory banners made of embroidered silk, which were topped with banners and included canopies. Their supervisors were Jagowa Lobzang Wangchuk, Peldor, Tashi Kapa, and the head tailor Ratse Shakpa Sönam. The remaining 32 [craftsmen] included (Gongkar) Ngayak.

Along with the images, inside [the monastery] there is, chiefly, the renowned body support [the Nechung Oracle]; consecration supports, represented by the four kinds of relics; as well as the outer, inner, secret, innermost secret, and supplemental life force cakras. For the attachment supports, there are three things [that hold the deity’s] soul syllables: [1] a [piece of] coral about the length of the Sovereign Spirit’s hand, which gathers against his will whatever great power of his is not suitable or desired; [2] an immaculate square of white crystal [the size of] a single finger, which appeared within phenomenal existence [and] which makes it so that, even if the Sovereign Spirit is entrusted with infinite activities, there is no way he will not do them without obstruction; and [3] a complete shell of mother of pearl, [which makes it so] that the Sovereign Spirit will not turn against oneself, the object of accomplishment, or the master with his disciples and attendants, and that there is no way [the deity] will not accompany us like a shadow follows a body. Such [items] originated from the tantras.

Furthermore, [regarding other] precious and high-quality [possessions]: there was a horse in China that would startle whenever it was turned; for this reason, when this would happen, it would need to be [carefully] supervised. This year, the proper karmic connections were right and the horse was presented [to the monastery] by the Dharma Lord Dungé. The horse’s features and color were excellent and it had an agreeable disposition. Headed by this, there was the best in the world of the jewels of the gods, Serpent Spirits, and humans, such as, chiefly, silver ingots the size of bird’s eggs, as well as [chunks of] cor-

---

248 Tib. *glo ba tsam pa*; this is read as a variant of *blo dang ’tsham pa*. 
al the size of fresh peaches, [pieces of] soul-turquoise the size of goose eggs, pearls, lapis lazuli, copper, and iron; riches, garments, silks, and fabrics; ripened grains like buckwheat and mustard seeds; as well as fruits like mangoes and jujubes. There was [also] a variety of medicinal pills [made from] different medicines—chiefly, white and red sandalwood that was neither poisonous nor fetid—and various kinds of food and drink, like the three whites and three sweets. Each and every one of the items of these final supports, as well as the images, thread-cross mansions, and tormas, were complete.

[62] Each day, barley was [ceremoniously] scattered and there were consecrations, as explained earlier, such as with the cakra sections. Moreover, during the main instructions, the monk Jamyang Drakpa acted as the supervisor for the recitations. Ngawang Trinlé, Ngawang Gyatso, Lekden Wangyel, the Tantric scholar Lobzang Kyechok, and the Dharma Lord Zilnön Dorjechen transcribed [the recitations]; the monk Jamyang Drakpa also completed [them]. At the time of the offerings, along with Miklha, the shrine master Ngawang Sherap, the monk Jamyang Drakpa, and the Tantric scholar Lobzang Kyechok-chen acted according to the oral instructions.

When the dhāraṇīs were being inserted [into the statues], the Nechung Oracle’s sword and wooden placard needed to be placed within the statue of [the Third Dalai Lama] Lord Sönam Gyatso’s vision [of the deity]. The young monks know this, and now King Pekar and his retinue truly do come [here]. [However], on that day, those who inserted the dhāraṇīs were deceitful, so the known omens did not appear. [63] Then, from that night on, the sculptors from Epa were disturbed by ominous dreams and there were very bad signs. Because of this, they needed to receive blessings, ask the Nechung Oracle for advice, and so forth. These strange [events] took place over several days.

---

249 Tib. min pa; this is read as a misspelling of smin pa.
250 Tib. dkar gsum mingar gsum. The three whites are curds, milk, and butter, and the three sweets are sugar, molasses, and honey.
On the roof [of the monastery], inside the gañjira spire made from 2,000 zho of refined gold, blessed supports—chiefly, relics as small as mustard seeds—[were placed]. In order to bring good fortune to the region, an extraordinary circle of protection for pacifying, enriching, conquering, and destroying [was also placed inside the spire]. [There is also] a tuk support for Dorjé Drakden on the right [of the spire] and [Dorjé] Drakgyelma on the left. In the northern area each of the Five Sovereign Spirits were placed in the four cardinal directions, with the Sovereign Spirit of the mind [Gyajin] in the center. On [the roof of] the middle floor, for the support materials, there are victory banners of the four animals as well as silk. On the bottom [roof], the tuks of the five consorts [of the Sovereign Spirits] were placed. A circle of protection was also made in accordance with the oral instructions for each of them, decorated with their support materials. Various aristocratic victory banners, tuk, and silken ribbons were also established. When the gañjira was finished, the consecration was performed by the monk Jamyang Drakpachen and the tuk rituals were performed by the Tantric scholar Lobzang Kyechokchen.

The [iron] door bands are also decorated with various kinds of images of support materials and offerings. The supervisors for this were Zhika Nyingnying, Laok Tashi, and Lhomö Künga Dorjé. There were 32 blacksmiths. Their lesser craftsman was Otsangpa; the remaining [craftsmen included] Serzhu Kyikyak. There were 52 goldsmiths. Their head craftsmen were Tsechen Sönam Dargyé and Panam Gönpo; the remaining [craftsmen included] Ramgang Norbu. There were 15 silversmiths, such as Orgyan. There were 57 wool-spinners, such as Purtsa. They were supervised by Pari Tenzin and Drachi Norbu Döndrup. There were four dyers [for the wool]: Nyemo Kar-

---

Tib. zho; this is a traditional Tibetan measurement. One zho equals approximately one-tenth an ounce of gold or silver; ten zho equals one srang, or approximately one ounce of gold or silver; see French 2002, p. 127.

Tib. thug. This refers to a type of cylindrical banner found on the roofs of Tibetan monasteries, generally covered with black yak or horse hair; see Alexander 2005, p. 115.

Four of these victory banners are topped with the heads of a tiger, wolf, vulture, and monkey, respectively, while the fifth is silk; see line 30 above.

To see the orientation of the gañjira and these victory banners on the various levels of Nechung Monastery, see Ricca 1999, pp. 48-50.
ma, Tönpa Tsewang Sitar, the leathersmith Tsewang Dorjé, and the drum-maker Trawa Gopachen. The four acrostic poems\(^\text{255}\) on both sides of the [monastery’s] entrances [were composed by] [\text{65}] Darlo Ngawang Püntsok Lhündrup and Namling Pañchen Könchok Chödral. The Indian and Tibetan letters [surrounding the poems] were painted [on the walls] by Gyantsé Jamyang Wangpo and Paksam Tsering. Those who gave the necessary salaries and such were Geshé Dargen and Busangpa Tsewang Tashi.

In the bird year [1681], the heads of Zangri, Neudong, Dratsang, Drongmé, and Drepung, the [Nechung] medium, the monks of Lose-ling, Gomang, Deyang, and the Tantric College, [\text{486}] as well as Geshé Dargen, Tardongpa, and Busangpa conducted the construction feast. In the dog year [1682], the heads of Drepung, monks from Drongmé and Deyang College, the [Nechung] medium, Geshé Dargen, and Busangpa conducted the craftswork feast. [After] such things, the [monastery’s] possessions and ancient images were properly established at the beginning of the 9\(^{\text{th}}\) month of the Water-Dog year [1682]. When these were transferred [to the monastery] on the 8\(^{\text{th}}\) day of the month—an auspicious [configuration of] planets and stars—various wondrous omens appeared. [\text{66}] Preparations were made for the temporary consecration on the 13\(^{\text{th}}\) day [of the month]. On the 14\(^{\text{th}}\) [day], the Dalai Lama\(^\text{256}\) [ceremoniously] scattered barley and meditated on the \textit{maṇḍala} of the fierce blood-drinker Vajrakumāra, the great Glorious One. He completed the approach, accomplishment, and activities of the peaceful and wrathful tutelary deities that insatiably drink the nectar of the glorious and holy lama’s speech. The tantric master endowed with the three [wisdoms], the monk Jamyang Drakpa, acted as the \textit{vajra} master [for the temporary consecration].

Subjugating external [forces] does not contradict enlightened conduct even for an instant. And so, the monastic assembly of Namgyel Mon-

\(^{255}\) Tib. \textit{kun ’khor}; these Nechung acrostics have been transcribed in Tibetan Academy of Social Sciences 2009, pp. 660-669.

\(^{256}\) Tib. \textit{gong sa mchog}; lit. “Supreme Sovereign.” This is a common epithet for the Dalai Lama. Given that this portion of the record was composed after the Great Fifth’s death, it would seem Sangyü Gyatso is keeping up the appearance of the Dalai Lama’s continued existence in official documentation for all to see.
— which abides in the profound yoga of the inner deity, mantra, and wisdom—directly inserted the Wisdom Being into the Samsāya Being and consecrated [the monastery]; [as a result,] a rain of flowers fell.

When that happened, the forces that obstructed the preparations were driven out; then the untimely storms were expelled and [the Nechung deity] was invited. At that time, a storm came from the direction of upper Dambak and Drepung, and the whole of Nechung disappeared. From the life tree blessing to the consecration, dhāraṇī-insertion, and so forth, there was snow and rain by turns. Now, there are cloudless skies one day after another. During the consecration, concluding feast, and such, there was a snowstorm. In particular, although there was no [storm] whatsoever around Kyishö, it stayed swirling over the hill behind Nechung and everybody saw it. From that day on, the magical effigies would suddenly become heavier and heavier, and the carriers realized this. [Also,] Epa Umzé Bakdro had a portentous dream [that concerned him] going to see many monks in the Central Chapel; they squeezed [together] the forces obstructing the statues and were absorbed into the statue of the central Sovereign Spirit [Gyajin]. Furthermore, the monks of the college, the lay government officials, and others each had visions or [portentious] dreams. These abundant omens appeared, [showing] that great

---

257 Tib. Rnam par rgyal ba'i phan bde legs bshad gling; lit. “Palace that Elegantly Teaches the Happiness and Well-Being that Conquers All.”
258 See Bentor 1996, pp. xix-xx.
259 Tib. Skyid shod; lit. “Lower Kyi[chu Valley].” This term generally refers to the area around the Kyichu River, including Lhasa; see Sørensen, Hazod, and Tsering Gyalbo 2007, pp. 17-27. In this context, it refers especially to the area just below Nechung at the base of the mountain.
260 Tib. sku gsob 'phrul ma. It is unclear to what this refers, though it is likely the various statues that were carried to and installed at the monastery.
261 Tib. chag dogs byed pa; this is read as a misspelling of chags thugs byed pa.
troublesome Haughty Spirits did actually live [around Nechung].

On the 15th day, an auspicious day for planets and stars—the favorable conjunction of Venus and Zeta Piscium—the great Dharma Protector descended into the body of the [Nechung] medium, Tse-wang Pelwar, and arranged the inauguration ceremony; this produced much delight. [The deity] is inseparably united with and resides within his abode; he is the attentive sentinel of the [Buddha’s] teachings and sentient beings, and has promised to effortlessly accomplish the four activities.

Regarding the sublime completion of these wondrous things, this monastery and abode is distinguished by eight kinds of craftwork. The first distinguished craftwork is endowed with the following special qualities: the characteristics of the soul stones and life force cakras mentioned above are not found anywhere else. In addition to this, even the paintings and sculptures look as if they were produced by the immortal craftsmen of the gods in human form; the appearance of these exceptional works is enchanting. The manufacturers are also visualized as deities, and the paint pigments, tools, and such are likewise consecrated and completely filled with blessings. In short, if those with eye disease do nothing more than see the basic form of these paintings and sculptures, they will spontaneously achieve the primordial nature of ultimate reality. Then the ocean of the oath-bound Haughty Spirits of phenomenal existence will assemble in reality, rolling without interruption like rainclouds gathering [in the sky], and perform the actions [entrusted to them].

The second distinguished craftwork is as follows: this Dharma Protector consumes an arrangement of whatever life breath [of] mortal

---

262 This paragraph is a significant portion of text that is found in the Roar that Shakes the Three Realms manuscript, as well as in the transcriptions by Lingön Padma Kelzang and Dobis Tsering Gyal; see Sangs rgyas rgya mtsho n.da., ff.10a.3-10b.1. Although this additional information is not present in the wall inscription of the Nechung Record and was clearly added later to the manuscript, it provides greater detail on the events surrounding Nechung Monastery’s 1682 consecration. I include this material in the body of the text as a block quote, in a smaller font, and bolded to distinguish it from the content of the wall inscription proper.
beings he catches through countless manifestations. Even though he is like this, because it is the emanation [most] suitable for subjugating anyone, he appeared as a physical manifestation [of] overwhelming splendor, [who came] by way of a coracle decorated with red turquoise jewels. He then dissolved into this birch Aśoka tree\textsuperscript{263} endowed with a marvelous fragrance and abundant flowers and fruits—as the support that delights [this] manifestation—and abides in such a manner. Accordingly, this palace that delights the oath-bound [guardian deities] \textsuperscript{[69]} was blessed with the great power that is the manifestation of the deity, \textit{mantra}, and wisdom of the profound \textit{Vajra Yoga} by the successive incarnations of the form that is meaningful to behold, who emanated supremely from the center of the lotus that is the heart of all the \textbf{Victorious Ones} of the Three Times—like the 2000 Buddhas of the good eon.\textsuperscript{264} The \textbf{great Dharma Protector}, with great delight, also became inseparable from this divine mansion that is adorned with many gifts and material offerings; the supports remain unimpaired in the assembly hall. These [supports] are like the life tree of this place—they are the essence of the supreme supports that delight [the deity]. Subsequently, in order to instill delight and [have the deity] protect the [Buddha’s] teachings unimpaired, gifts, clouds of ever-excellent offerings, and all the wealth of the gods and humans are together spread out [over] the measureless shrine\textsuperscript{265} where the real [offerings] are arranged; [the offerings] are dispersed in this way one after the other. These became the outer and inner supports and thus are \textbf{distinguishing}.

The \textbf{third [distinguishing craftwork} is as follows]: \textsuperscript{[70]} even if one [just] looks at the beam and rafter junctures at the edges of the Central Chapel, it can make the heart tremble and cause [them] to flee. There are human skins, snakes endowed with the qualities of the five [Buddha] families, razors, knives, and swords, as well as lightning and hail being vomited from the mouths of thunder [dragons]. These \textbf{superior works of art} are terrifying and [make people] shudder in fear.

\textsuperscript{263} \textit{Tib. mya ngan med pa’i ljon shing}; lit. “sorrowless tree.” This tree’s taxonomic name is Saraca asoca.

\textsuperscript{264} This lengthy epithet refers to the Dalai Lama.

\textsuperscript{265} \textit{Tib. gzhal yas}; this term here refers to a large shrine dedicated to the deities where their offerings are displayed.
The fourth [distinguished craftwork is as follows]: the internal doors appear as the three bodies [of the Buddha] within the state of the three doors of liberation.266 Beyond this, there are the five doors that represent the Five Great Sovereign Spirits [who are] the self-manifestations of the Five Wisdoms.267 These [five doors] are incredibly vast; they are so wide that even if all the living beings in the three worlds were to enter them at the same time, they would [still] fit through them without a doubt. Even the façades268 [of the doors] reach the pinnacle of existence. [The doors] are regarded as [a sign that] the palace and courtyard of the pair of five necks269 have been accepted into this savage land. Thus, these are special [doors] endowed with magnificence.

The fifth [distinguished craftwork is as follows]: the threshold door frames are fully established with dangling ornaments fastened by the self-existing [forms] of snakes hanging from the mouths of corpse heads. [71] These marvelous [door frames] can cause even an intelligent person’s heart to jump up into their throat.

The sixth [distinguished craftwork is as follows]: on the peak [of the monastery, the spire with] the nature of refined gold can block out the splendor of a hundred thousand suns. This great gañjira was established to complete the body, speech, and mind supports, together with the outer, inner, and most profound [supports], in order for the leader of the Haughty Spirits and his retinue to accomplish the four activities without obstruction. This [spire] is a special work of art, such that it rivals the top story of a Flesh-Eating Spirit’s palace, where the oath-bound [guardians] are naturally gathered and the garlands of golden roof ornaments270 and garlands of dried human heads are arranged in order by appearance.

---

266 Tib. rnam thar sgo gsum. Symbolically, this refers to the three approaches to liberation: [1] emptiness (Tib. stong pa nyid), [2] aspirationlessness (Tib. smon pa med pa), and [3] attributelessness (Tib. mtshan nyid med pa). Here this term refers to the three doors that lead into the Central Chapel at the back of the assembly hall.

267 These are the five doors that lead into the assembly hall from the courtyard.

268 Tib. babs gdong; lit. “surface condition.” The meaning of this term is difficult to fully ascertain; however, the context suggests that it pertains to the nature and size of the doors.

269 Tib. mgrin pa lnga zung; this refers to the Five Sovereign Spirits and their consorts.

270 Tib. gser phru’i sba phreng; the specific meaning of this term is difficult to ascertain.
The seventh [distinguished craftwork is as follows]: on the outside, this abode for the Haughty Spirits was actually established [with] the attributes of a maṇḍala. In the east, south, west, and north [of the monastery], respectively, there is a gate that accords with a color of the four activities, a stylobate sitting on the ground, and an archway supported by pillars; these complete the faultless appearance of the divine mansion. [72] The parapet balustrades on the roofs and the garlands of dried skulls on the ruby-colored friezes radiate light in a hundred directions; therefore, the opportunities for darkness [to take over the ten] directions are diminished. These eight parts represent the eight great planets; such is the special quality [of these structures].

The eighth [distinguished craftwork is as follows]: the wall plaster of blood that liberates [those suffering from] the ten defects is completely stirred [with] bubbling garlands of fat and brains, thus actualizing the house of [Yama,] the Lord of Death. [This blood] is seething and churning like clouds close to pouring down a deluge of rain. Furthermore, [the monastery’s] sixteen pillars represent the sixteen [deities]—the fifteen Dharma protectors and the kimnaras. This design is [truly] distinguished!

---

271 These colors are white for pacifying activities, yellow for augmenting activities, red for subjugating activities, and black for destructive activities.

273 Tib. khrag gi zhal ba; this refers to the ocean of blood painted on the lower register of all the murals along the entrance, courtyard, and assembly hall.

274 Tib. nam mkha’i glang po; lit. “the bull of the sky.”

275 It is unclear to which fifteen Dharma protectors this refers. Given that this concerns the assembly hall, it could be 15 of its 18 murals, sans the two images of the Nechung Oracle and a painting of Padmasambhava. This could also refer to the Five Sovereign Spirits along with each of their consorts and ministers.

276 Tib. mi’am ci; this refers to the animal-headed attendants of the Dharma protectors.
The roars of the terrifying ones, [the Five Sovereign Spirits] who strike and kill, resound like a thousand thunder claps rumbling simultaneously. Accompanying [them], all the Haughty Spirits [of] the eight classes of gods and spirits attached to the field of imputations gather automatically, like bees swarming over piles of utterly fetid rotten meat or carnivorous beasts in charnel grounds trotting and running toward the steaming odor of warm flesh and blood. [73] The heaps of their outer, inner, and secret support objects, gifts, and clouds of offerings are piled up throughout heaven and earth without interruption; they are [fully] contained within this great palace for the eight classes of Haughty Spirits.

The great Dharma center [Drepung]—where the ethical monastic community lives—upholds, preserves, and spreads the tradition of the Gentle Savior lama [Tsongkhapa], the immaculate teachings of the Buddha, and is like an overflowing pile of the wise arhat’s white rice. [Located among] its foothills—

This abode, where the eight classes of Haughty Spirits automatically gather, is not small; it can hold the vast expanse [of] existence. This grove that pleases the emanating Sovereign Spirit Pekar, his consort, and minister is a marvelous chapel that is distinguished by eight kinds of craftworks.

---

277 Tib. brtag chags kyi lha ma sрин sde brgyad; this is read as a variant of btags s̱hing chags pa’i lha s린 sde brgyad.

278 When combined, the two red words in this last clause cleverly spell out Drepung.

279 Referring to the fourth distinguished craftwork, this line interprets the monastery’s name ironically. Despite being called “Small Abode,” it is considered a sacred realm vast enough to hold all of existence.

280 As with the previous verse, when the red words of this stanza are combined they spell out “Nechung Pekar Chapel” (Tib. Gnas chung pe kar lcog).
[Nechung] was begun in the Iron-Bird year [1681] and thoroughly established in the third-eon year [called] ‘Splendor of Melted Beryl’ [1682?].\(^{281}\) This amazing monastery, erected with the efforts [of] body, speech, and mind, is marvelous!

[74] Such efforts were necessary; \(^{282}\) now the teachings of those who wear the yellow hats [the Gelukpa] have utterly reached, without obstruction, the pinnacle of existence. The religious and secular [government] of the joyous all-victorious palace pervades everything like the light of the sun and the moon. May the lotus feet of the Omniscient Vajra-Holder, the Universal Lord of the One Hundred [Buddha] Families [the Dalai Lama], remain steadfast for innumerable eons!\(^{283}\) May the actions he desires [be performed] without delay! May a Dharma banquet always be held [here]!

[The Five Sovereign Spirits] successfully accomplish the [four] activities that pacify, subjugate, destroy, and augment [against] all the diseases, negative influences, and obstacles for those who perform [the above rites]. Mongolian script line: May auspiciousness and the flames of Glorious [Heruka] come to [this] ornament of the world, an immeasurable mansion where the oceanic sangha gathers! May it be virtuous!

---

284 Tib. rta bdun dbang po; lit. “Lord of Seven Horses;” this is an epithet for the Indian sun god Sūrya. This line illustrates the depth of Sangyé Gyatso’s poetic knowledge; he was quite skilled at filling the meter with an impressive array of idioms and epithets, as the third quatrain above also illustrates.

285 Tib. chang bstam; it is unclear whether this is a name or a job title.

286 Tib. rnga chen gyi lo; lit. “year of the large drum.” This is the Water-Dog year.

287 Tib. dza yantu; Skt. jayantu.

288 Skt. śubhamastusarvajagatam.

289 Tib. ʼdzam gling; this transliterates and contracts the Sanskrit word Jambudvīpa, which is the continent south of Mount Meru in traditional Buddhist cosmology. This term is often poetically used to refer to the world as a whole.

290 Tib. dge ’dun rgya mtsho ’du ba’i gzhal yas khang; this phrase is an entendre and can also be translated as, ‘an immeasurable mansion where Gendün Gyatso [the Second Dalai Lama] gathered.’ The term gzhal yas khang is an ambivalent reading, as the inscription is vague and idiosyncratic at this point.

291 Tib. dgeun [dge ’dun] rgya mtsho ’du ba’i gzhal yas khang bkra shis dpal ’bar ʼdzam gling rgyan du byon dge’o/.
Along the top of the record, before the text proper, there is a Sanskrit prayer given first in Rañjanā (Tib. lanydza) script and then transliterated into Tibetan letters. Both lines are so obscured by damage to the wall that they are almost completely unreadable, which may explain why Lingön Padma Kelzang did not transcribe them. I do not include these lines in my transcription for the same reason. Presumably, the first stanza of the text given here is the Tibetan translation of this prayer.

It is unclear how many syllables are actually missing between the second and third verses of this stanza, since damage to the inscription has obscured the line breaks as well as an unknown number of syllables. However, the trend of this prefatory poem is that each stanza diminishes in syllable count by odd numbers. The second stanza possesses 17-syllable lines, the third stanza has 15-syllable lines, and so on. The last line of this first stanza is definitively 19 syllables long, making the first three lines likely 19 syllables long as well. Lingön Padma Kelzang gives the first line 17 syllables, though it appears that he missed two syllables at the beginning due to the damage.

Given the surrounding stanza of 17-syllable lines, this line is most likely missing 14 syllables.

297 Instead of X’s, Lingön Padma Kelzang adds the following parenthetical note here:
(འདིའི་བར་ཚིག་འབྲུ་བརྒྱད་མི་གསལ་); trans. eight syllables are unclear here.
298 Lingön Padma Kelzang: ཤད་; corrected to ཤོད་.
299 Lingön Padma Kelzang: ཤེ་; corrected to ཤེ་.
The lines in these 5 stanzas are all 9 syllables long.

Lingön Padma Kelzang: བདག་ནི་སངས་རྒྱས་ཕོགས་རྩོད་ (ཅིང་།)X The stanza being cited, as the text itself makes clear, is from the Lha las phul du byung bar bstod pa. After referring to the text directly, and conferring with other texts that cite this stanza separately (see Gung thang 03 2000, p. 352, and Khri byang 03 199?, p. 462), I have concluded that the last two syllables of this verse are actually མི་འཛིན་. See note 26 for details on this text.

The lines in these two stanzas are all 7 syllables long.
མདོ་དགོངས་པ་འདུས་པར།

པར་བཤད་པས།

303 Lingön Padma Kelzang: མ་; corrected to མི་.
304 Lingön Padma Kelzang: བཟོ; corrected to བ蚌.
305 Lingön Padma Kelzang: གེ; corrected to གསུ་.
306 Lingön Padma Kelzang: ཚུ་; corrected to འོ་.
307 Lingön Padma Kelzang: དུ་; corrected to མི་.
308 Lingön Padma Kelzang: ང་; corrected to ངཚ་.
Lingön Padma Kelzang adds a པ after the གིས that is not found in the wall inscription. The space is too small to allow for a syllable, but there is the hint of a shad. Moreover, this reading makes the next verse 9 syllables long, which is the same length as the three verses that follow it, creating one uniform quatrain.

Lingön Padma Kelzang: X. In the wall inscription there is a clear shad line here and the syllable ཇན is visible.

Lingön Padma Kelzang: omitted. In the wall inscription two syllables, དུས, are visible before the དབུས.

Lingön Padma Kelzang adds an extra unnecessary X here.

Lingön Padma Kelzang: མེད; corrected to མེན་པོ་.

Lingön Padma Kelzang adds a ངེ after the ངེ that is not found in the wall inscription.

Lingön Padma Kelzang: བོར་དང་. In the wall inscription it appears that both characters in these spaces are colored red to distinguish them from the surrounding words. Moreover, the second character is a partially visible ངེ that clearly ends in a visarga (ḥ). Since this second character is most likely ངེ, the first, more obscure character is also possibly a mantric seed syllable, though the damage is too severe to make a confident reading. Regardless, Lingön Padma Kelzang’s suggestion appears to be false.
ཁྱིམ་གསུམ་དུ། རིག་པའི་རྒྱལ་པོ་བང་ཆུབ་སེམས།

316 Lingön Padma Kelzang: ཉ; corrected to གསུམ་
317 Lingön Padma Kelzang: XXXXXX(ཤིང་འབུད་)
318 Lingön Padma Kelzang adds བདེ་ here rather than a shad and space.
319 Lingön Padma Kelzang: XX.
320 My understanding of these verses and their content is aided by the Hagiography of Jokpa Jangchup Penden (Sangs rgyas rgya mtsho n.db., f.4a.3-4), which provides an approximation of these lines that is closer to the wall inscription than Lingön Padma Kelzang’s interpolations.
321 Lingön Padma Kelzang: དུ་; corrected to དུན་
322 Lingön Padma Kelzang: བོ; corrected to བོར་
323 Lingön Padma Kelzang: བོ; corrected to བོར་
324 Compare with Sangs rgyas rgya mtsho n.db., f.7b.1.
325 Lingön Padma Kelzang: བོ; corrected to བོ.
326 Lingön Padma Kelzang: བོ; corrected to བོ.
327 Lingön Padma Kelzang: བོ; corrected to བོ.
328 In the Lingön Padma Kelzang transcription, this large section of obscure words has been reduced to XXXXཇུ་ and misplaced 18 syllables back, following ང་ཇི་. I present here the placement according to the wall inscription. Compare with Sangs rgyas rgya mtsho n.db., f.7b.3-4.
329 The inscription is damaged here, but drawing on Sle lung rje drung 1979, p. 38, as well as Sangs rgyas rgya mtsho n.db., f.7b.6, this name is clearly བཤན་པ་ར་མགོ་ཅན་པ་སེ་.
330 Lingön Padma Kelzang: སེ; corrected to སེ་.
Lingön Padma Kelzang: རེ། (བདུད་)X. Lingön Padma Kelzang’s transcription is erroneously convoluted here.

331 Lingön Padma Kelzang: རེ། (བདུད་)X. Lingön Padma Kelzang’s transcription is erroneously convoluted here.
332 Lingön Padma Kelzang: རེ།; corrected to རེ།.
333 Lingön Padma Kelzang: རེ།; corrected to རེ།.
334 The syllable looks like ལོ།; however, the following two syllables are too obscure to make a confident reading.
335 Lingön Padma Kelzang: རེ།; corrected to རེ།.
336 Lingön Padma Kelzang: རེ།; corrected to རེ།.
337 Lingön Padma Kelzang: རེ།; corrected to རེ།.
338 This is Lingön Padma Kelzang’s transcription. I suspect it is: རེ།X; but the inscription is too damaged to confirm.
339 See note 336 above.
340 Lingön Padma Kelzang: རེ།; corrected to རེ།.
341 Lingön Padma Kelzang: རེ།; corrected to རེ།.
342 Lingön Padma Kelzang: རེ།; corrected to རེ།.
343 Lingön Padma Kelzang: རེ།; here I interpolate what is the most likely word, རེ།.
344 Lingön Padma Kelzang: XXX; corrected to X.
345 Lingön Padma Kelzang: རེ།; corrected to རེ།.
346 Lingön Padma Kelzang: omitted.
347 Lingön Padma Kelzang: རེ།; corrected to རེ།.
348 Lingön Padma Kelzang: རེ།; corrected to རེ།.
349 Lingön Padma Kelzang: རེ།; corrected to རེ།.

This final Sanskrit prayer is presented in the Vartu script in the inscription, and is given here in a Devanāgarī font. It is transliterated as follows: śubhamastusarva-jagatalam. The Tibetan equivalent is: ང་བོ་མ་བོད་ལ་གྱི་ཡི་གེའི་ལས་བས་ཏེ་རྔཆེན་གི་ལོར་བྲིས་པ་ﺽ་ཡན་ཏུ། དེ་ལགས་སུག་བིས་དང་གཞན་མ་ཆང་བསན་ག཈ིས་ཀིས་ཡི་གེའི་ལས་བས་ཏེ་རྔཆེན་གི་ལོར་བྲིས་པ་ϑ་ཡན་ཏུ། ཅི་འབོད་དེ་ཟིང་བུ་གྱུར་ཅིག འི་འགོ་ཐམས་ཅད་བདེ་བར་གྱུར་ཅིག. I am grateful to Daisy Cheung for her assistance in deciphering the faded and difficult letters of this concluding phrase; personal communication, December 27, 2012.

This is the line of Tibetan written in the vertical Mongolian script (hor yig) along the left side of the entire inscription. This text is presented here sideways and in a font approximate to the inscription. In the Tibetan head script (dbu can) the line is as follows: ང་བོ་མ་བོད་ལ་གྱི་ཡི་གེའི་ལས་བས་ཏེ་རྔཆེན་གི་ལོར་བྲིས་པ་ϑ་ཡན་ཏུ། དེ་ལགས་སུག་བིས་དང་གཞན་མ་ཆང་བསན་ག཈ིས་ཀིས་ཡི་གེའི་ལས་བས་ཏེ་རྔཆེན་གི་ལོར་བྲིས་པ་ϑ་ཡན་ཏུ། ཅི་འབོད་དེ་ཟིང་བུ་གྱུར་ཅིགོ.

Only once in a great while does a scholarly work manage to grab the general public’s interest in linguistics with such a high degree of scientific rigor and humanistic spirit. This book excels in its scope of investigation, dealing with a vast variety of linguistic families, Indo- and non-Indo-European alike. The author demonstrates an impressive ability in working across a constellation of sources, all of which are duly annotated. As a renowned polyglot, Nicolas Tournadre’s linguistic expertise is all the more commendable given that he often carries out his analyses in plain French prose accessible even by those not trained in the relevant fields of academia. Moreover, it is readily evident that the abundance of first-hand examples supplied in this book are the fruits of years of field study in targeted communities where the peculiarities of relevant languages are to be encountered. Clearly, it is the author’s willingness to immerse himself in the culture of others, however much it may be considered marginal or insignificant, and his eagerness to interact with people via their own modes of communication that form the humanistic bedrock of *Le Prisme des Langues*.

Not surprisingly, Tournadre’s approach to the diversity of languages differs in many regards from Noam Chomsky’s universal grammar, which tends to homogenize our perception of languages. As the book’s provocative title indicates, Tournadre appears to espouse a weaker form of linguistic relativity by mounting an apology for the metaphoric “prism” that each language is supposed to carry. The book opens with an anecdote: by quoting Chomsky’s own words, the author separates the linguists who just “like languages” from those “veritable humanist polyglots” who “love languages.” In so doing, he also quite smartly debunks the popular misconception of linguists as invariably “humanistic” polyglots, while crediting the latter with the virtue of “falling in love” with the singularity of languages and not merely seeing linguistic activity as a universal human function (pp. 13-14). This differentiation, albeit methodological per
Indeed, by tracing the pros and cons surrounding the famous Sapir-Whorf hypothesis, Tournadre defines himself as belonging to that cohort of neo-relativists represented by A. Wierzbicka, G. Deutscher, and quite expectably C. Hagège. In support of Wierzbicka’s assumption that languages express their areas of special interest not only through vocabulary but through grammar as well, the author turns to Tibetan for some of the most compelling examples one may find in the book. For instance, if both English and French distinguish volitional from non-volitional verbs, as evidenced by the opposition between *regarder* and *voir* in French and that between “to slide” and “to slip” in English, in Tibetan this differentiation of intentionality affects not just the lexicon but also the syntax (p. 201). Such, for instance, is the case with *ngas sha bzas-bzhag* (I ate some meat without knowing it and I finally realized what I did) and *ngas sha bzas-paying* (I ate some meat in an intentional, controllable way). Although *za* (to eat) or *bzas* (the inflected form of *za* in the past tense) is used mostly as a volitional verb and thus should be followed in Tibetan by volitional auxiliaries such as *giyod*, *giying*, or *paying* (assuming a first-person subject), under certain circumstances it can also be paired with the inferential and non-intentional auxiliary *bzhag*, albeit with a differing shade of meaning (p. 202).

This syntactic need to specify the intentionality of actions doubtlessly sets Tibetan apart from many other languages. That said, from a lexical point of view there might be even more dissimilarities to take into account. The author reminds of the myriad of words in Italian describing the different types of pastas as well as the multiplicity of Chinese terms referring to kinship (pp. 207-208). Likewise, one may expect Tibetans to develop a rich vocabulary for yaks (p. 210), yet their relative paucity of terms for types of fish is less well-known. In this respect, Tournadre argues that compared with Chinese people, who are keen to eat both fresh- and saltwater fishes, Tibetans do not seem to share this gastronomic appetite on both geographic and religious grounds (pp. 208-209). Indeed, a noticeable originality of Tournadre’s analysis is his systematic recourse to comparative perspectives when demonstrating linguistic relativity as an indisputable

---

1. One may argue that the opposition between “to slide” (intentional) and “to slip” (non-intentional) here is somewhat problematic since we often hear news reporters say “shares slid to an all-time low,” which no one would understand as “the stock market intentionally plummeted to an all-time low.” Idem for the verb “to slip”: although generally non-intentional, it is frequently used as an intentional verb in sentences like “he slipped a note under the door” or, more figuratively, “she slipped some bad jokes into her boring and interminable speech.”
universal phenomenon. Moreover, he not only emphasizes the gaps between Western and non-Western languages in their respective perceptions of the world, but also draws our attention to some previously understudied discrepancies between non-Indo-European languages per se, particularly those between Chinese and Tibetan. It is no exaggeration that this comparative approach often provides surprising results, not only for specialists of linguistic typology but for tibetologists and sinologists as well.

One example may suffice here. The author points out that among the four most commonly used methods of lexical construction—unité lexicale non-analysable (non-analyzable lexical unity), la dérivation (derivation), la composition (composition), and l’emprunt (borrowing)—la composition is “perhaps the most economic and easiest to assimilate” (pp. 273-274). He then illustrates this privileged status of composition by providing a list of catchy compounds in English, followed by a list in Chinese and one in Tibetan (pp. 274-275). Interestingly, it so happens that seven of the twelve Tibetan compounds listed by Tournadre are morphologically analogous to their Chinese equivalents, which are also compounds. This is the case with mig-lpags (Ch: “眼皮” yanpi, eyelid; literally, eye skin), shing-lpags (Ch: “树皮” shupi, bark; literally, tree skin), chu-mig (Ch: “泉眼” quanyan, the mouth of a spring; literally, spring eye), mig-shel (Ch: “眼镜” yanjing, eyeglasses; literally, eye glasses), lha-khang (Ch: “神堂” shentang, shrine; literally, gods’ house), dngul-khang (Ch: “银行” yinhang, bank; literally, silver house), and tshong-khang (Ch: “商店” shangdian, shop; literally, business house) (p. 275). Although similar morphology might have arisen in both languages independently, we are still tempted to wonder whether some of these Tibetan compounds are in reality calques of Chinese terms that have appeared in great numbers since the 1950s. If so, they cannot be simply and indiscriminately considered neologisms issuing from an indigenous process of lexicon elaboration. And the odds are particularly high regarding some newly-coined technical terms such as mig-shel (eyeglasses) and dngul-khang (bank), to which we may also add glog-klad (computer), 'khyag-sgam (refrigerator), and me-'khor (train), which are respectively modeled on the Chinese words “电脑” diannao (literally, electronic brain), “冰箱” binxiang (literally, ice box), and “火车” huoche (literally, fire vehicle). These loanwords are viewed poorly by some purists in the Tibetan diaspora for political reasons, but the difficulty of removing them from the daily

---

2 This convergence, however, seems to have gone unnoticed.

3 Interestingly, English has the word icebox as well, though the term has fallen out of use. In fact, iceboxes predated refrigerators and in this respect the Chinese compound binxiang could be a calque from English.
vocabulary of Tibetans in exile may in turn simply confirm Tournadre’s thesis that composition is perhaps the most economic method of lexical construction and easiest to assimilate, and consequently the hardest to cast off.

Indeed, Tournadre is well cognizant of the ideological considerations affecting lexical borrowing between languages. To illustrate such effects, he underscores the don-sgyur (sense-for-sense translation) method adopted by Tibetan translators of the Buddhist canon who chose to render Sanskrit terms such as Buddha and bodhisattva respectively as sangs-rgyas (literally, purified and developed) and byang-chub-sems-dpa’ (literally, pure spirit hero) based on their meaning in the source language. By contrast, many other Asian languages, including Chinese, Japanese, Korean, Burmese, and Vietnamese, favored phonetic transliteration over semantic interpretation of Buddhist terminology (p. 127). But Tibetan translators were unwilling to assimilate Sanskrit terms phonetically, which would have left these dictions semantically alien. This domesticating translatorial stance contrasts with the prevalence of the so-called ra-ma-lug skad (Tibetan-Chinese mixed speech; literally, speaking half-goat half-sheep) widely spoken by the current generation of Tibetan city dwellers in Tibet. Tournadre has already made thorough study of ra-ma-lug skad in his oft-cited article, “The Dynamics of Tibetan-Chinese Bilingualism.” Yet in Le Prisme des Langues, he goes further by situating this linguistic phenomenon within a larger picture. He notes that besides Chinese, Tibetans have also borrowed from Hindi and English, depending on their place of residence (p. 128). This form of hybrid speech, characterized by its constant inter-lingual code switching and linguistic instabilities, bears some resemblance to the Arabic-French mixed speech used by Maghreb immigrants in France, as well as to the English-influenced Spanish spoken by Latino communities in North America (p. 123).

Despite this succinct note, one may regret that Tournadre does not tap more deeply into the forms of ra-ma-lug skad employed by Tibetans living outside Tibet. Yet we may hope that the author, who surely has the ability and interest, will pursue this matter further. In the meantime, I would like to suggest a few hints in that direction based on the linguistic data I collected during a recent field trip to North India.

Ra-ma-lug skad, also referred to as sbrags-skad (mixed language) in the Tibetan diaspora, is a form of Tibetan-Hindi-English hybrid speech that appears to be widely used in the Mcleod Ganj suburb of

---

Dharamsala. It tends to affect more the gzhis-chags phru-gu (literally, kids of the settlements), who are in fact the second or third generation of Tibetan exiles born and raised in India or Nepal. But gsar-byor-ba (new arrivers) escaping Tibet as adults may also quickly pick up this form of hybrid speech after spending some time in India. Like the ra-ma-lug skad spoken in Tibet,\(^5\) lexical borrowings primarily concern substantives. For example, most of my interlocutors understood perfectly the English words for university degrees such as B.A, M.A, and Ph.D, but only a few knew the equivalents of these terms in Tibetan, which are rig-gnas rabs-byams-pa, gtsug-lag rab-byams-pa, and 'bum-rams-pa. Leaving aside the relatively elevated vocabulary, youngsters also have a tendency to mix Tibetan with English even when speaking so-called za-skad ’thung-skad (speech for eating and drinking), a case in which the need for lexical borrowing seems less justifiable. For example, I once overheard a Tibetan gentleman tell his friend, Sunday la ngas khyed-rang la invite gcig byed giyin (I will invite you on Sunday). The insertion of two English dictons here, namely “Sunday” and “invite,” is not very necessary. The speaker could, moreover, have avoided this blend of linguistic codes by reformulating his sentence either as gza’-nyi-ma la ngas khyed-rang la mgron-'bod byed giyin (ordinary register) or as gza’-nyi-ma la ngas khyed-rang sku-mgron la gdan-'dren zhu giyin (honorific register). As far as Hindi is concerned, we may cite aaloo “आलू” (potato), which commonly replaces the Tibetan word for potato, zhog-khog. Likewise, it is not uncommon to hear people supplant tshes (date) and bdun-phrag (week) with the Hindi words taareekh (तारीख) and haphta (हफ्ता). In addition to nouns, sbrags-skad also involves adverbs and adjectives. Such is the case with the Hindi adverb pura (पूरा), which occasionally replaces tshang-ma (all) in a sentence like nga-tsho pura dpe skyid-po byung (all of us had a lot of fun), but which should be corrected as nga-tsho tshang-ma dpe skyid-po byung if mixed speech is to be avoided. Equally popular is the Nepali adverb pani पनि (also), which would appear in a sentence like nga pani ’gro giyin (I am also going there), whereas an unalloyed way to express the same idea would be nga yang ’gro giyin.

When asked why they would speak “half-goat half-sheep,” most of my Tibetan interlocutors replied that the usage of hybrid speech is somewhat dpe-gsar ’dra-po (literally, fashion-like). Yet all of them admitted at the same time that it was a very bad “fashion.” This ambivalent attitude is noteworthy since it indicates that the ground-gaining sbrags-skad (Tibetan-Hindi-English hybrid speech) used by Tibetan

\(^5\) Ibid., 30-36.
residents in the Mcleod Ganj district reflects more a personal and voluntary choice than the necessity of coping with a political or economic urgency. It is also no exaggeration to say that the speakers of sbrags-skad are also running against the ideological pressure exerted by advocates of the pha-skad gtsang-ma (literally, pure Father Tongue) movement who strive to preserve the linguistic identity of Tibetans living in and outside Tibet.

The dynamics of bilingualism can at times take subtler forms than mixed speech. In this respect, Tournadre notes the sinicization of several Tibetan toponyms such as smed-ba and dar-tse-mdo, which were respectively replaced by Hongyuan (红原) and Kangding (康定) (p. 120). Certainly, Hongyuan (literally, red plain) evokes the Red Army that marched through the region in the 1930s, while Kangding (literally, Kham pacified) conjures up the quelling of Tibetan rebellions in the Kham region by the Qing general Zhao Erfeng. Although Tournadre quite rightly recalls the ideological considerations lurking behind re-naming tactics, it is a pity he does not mention how Tibetans have reacted, from the side of the ruled, to the Chinese neologisms imposed on them. In fact, Tibetans tend to have systematic recourse to satirizing adaptations in response to political use of the language endorsed by the Chinese government, and they are keen to play the game. Once again, Tournadre certainly has the expertise and interest to delve more deeply into the subject; in addition to his excellent analysis of ra-ma-lug skad, a glance into the linguistic resistance of the Tibetan populace to the Chinese official language would considerably enrich our understanding of the dynamics of Sino-Tibetan bilingualism. Here I would like to offer a few hints for their heuristic value only.

First, we may cite the Tibetan nickname for Bayi zhen “八一镇” (Bayi sub-district), which is the urban center of the Nyin khri prefecture (Chinese: Linzhi diqu 林芝地区; Tibetan: Nyin-khri sa-khul) in the Tibetan Autonomous Region. This town was baptized Bayi “八一” (literally, eight one) mainly because its name purveyor intended to pay homage to the birthday of the Communist army on August 1, 1927. Tibetan word-meisters, however, have paraphrased Bayi into a witty catchphrase: gya-mi brgyad bod-pa gcig (literally, eight Han Chinese and one Tibetan). Undoubtedly, this new epithet quite aptly reflects the demographic reality of the urban centers of the Nyin khri prefecture, where currently Han Chinese form the absolute majority of the local population.

The ridicule of the ideological fiction induced by the official Chinese language can at times acquire a harsher tone, such as in the case of Tibetan writer Tsering Woeser, who intentionally and phonetically “translated” the Tibetan term for the Cultural Revolution—Rig-gnas
gsar-brje—back into Chinese as renlei shajie (人类杀劫), literally meaning in Chinese “the deadly calamity of humanity.”6 Indubitably, in a society where the pressure of censorship persists, wordplays as an outlet of discontent often take the form of coded terms. For instance, during my stay in Lhasa in 2012 I recorded the odd formulae tsha-lu-ma la ngal-gso rgyag-pa (literally, to take a rest in tangerines). In Tibetan, this phrase rolls off the tongue and gives an air of playfulness, yet in reality it conceals a deeper sense. More precisely, the Tibetan word tsha-lu-ma (literally, tangerine) refers not to the fruit tangerine as it may appear but to police stations, since the Chinese words for “tangerine” (juzi, 桔子) and “police station” (juzi, 局子) are homophones. And so the hidden meaning of this phrase is “to get arrested by the police”! Indeed, this veiled lexical reference to Chinese appears to craft a political euphemism that turns unpleasant experiences into picturesque abstractions. Interestingly, this wizardly wittedness in forging puns based on intra-lingual homophony or inter-lingual phonetic closeness is also shared by Tibetans living in the diaspora. One may cite, for example, the sarcastic epithet for New York City. More precisely, the English “New York City” has been playfully transliterated into mi’i-gyog grong-khyer, literally meaning “the city of people’s servants.” In fact, many Tibetans who immigrated to New York City from the diaspora ended up finding low-paying jobs either in Asian restaurants or as baby-sitters, certainly giving them a frustrated sense of being servants in that city.

Since his analysis of political incursion forms the thrust of Tournadre’s well-rounded argumentation, he should be wholeheartedly thanked for mapping out the extreme diversity of ideological contexts at play in inter-lingual lexical borrowing and eventually in the making of mixed languages. Accordingly, it seems quite logical that he would display a sense of misgiving vis-à-vis the homogenizing definition of Creole languages, as he clarifies that this linguistic phenomenon is deeply embedded in the historical circumstances of the slave trade and plantation economy (p. 128). For Tournadre, all languages are creolized to some point, yet it would be of little interest to overgeneralize the notion of créolité or “Creoleness.” From that he further points out that real Creole languages are often typologically heterogeneous, allowing no mutual understanding, and are all in all “numerically scarce on the scale of world languages” (p. 129).

This line drawn by the author between mixed speeches such as rama-lug skad and Creole languages is doubtlessly sensible and scientifically grounded. Indeed, nowadays the notion of créolité tends to be

---

6 Cf: Tsering Woeser, Shājié - Forbidden memory. Tibet during the Cultural Revolution, Taiwan, Dakuai wenhua, 2006.
misused, if not abused, by postcolonial critics who at times appear to lack the positive competence in dealing rigorously with this question of linguistic hybridity. To some extent, this notion of créolité acquires so much ideological positivity that it ends up eliding some glaring differences between hybrid languages respecting their generative contexts. In this regard, Tournadre’s note on the Creole language goes far beyond the sole domain of typology, as it elicits reflections on issues of such seemingly irrelevant areas as ethnography or literary criticism. As far as the latter is concerned, we may rethink the universal applicability of this post-colonial, one-size-fits-all cultural hybridity based on the Antilles model. We may also wonder whether this ecstatic vision of créolité or antillanité is too narrow to apply to other geographical contexts such as East Asia, where nationalism has always maintained its ideological currency. In other words, if some Francophone theoreticians of post-colonialism tend to enshrine hybridity as the cultural “norm,” would their Tibetan counterparts perceive this much-cherished créolité in the same affirmative way? Needless to say, such correlation would be aberrant since any form of integration and assimilation, including a linguistic one, would seriously endanger the national identity of diasporic Tibetans and consequently undermine their hopes of self-determination.

Given the myriad of linguistic data treated by Tournadre and his admirable erudition, a reviewer, even himself a polyglot, might feel obliged to focus only on certain aspects of this learned work. Meanwhile, it goes without saying that even someone who knows nothing about linguistic typology could benefit greatly from the author’s analytic insightfulness. In short, Tournadre should be wholeheartedly thanked for this vulgarized yet encyclopedic book, born out of a scholarly commitment that has prompted him to travel tirelessly around the world and work over a veritable tsunami of materials with such painstaking care. Certainly, the scientific rigor, humanistic spirit, and easy accessibility of Le Prisme des Langues makes it a must read for all those who find themselves dazzled by the complexity and beauty of the languages of our world.

Timotheus Adrianus Bodt
(Bern University, Switzerland / Tezpur University, India)

As a linguist, it is always encouraging and enriching to come across publications on poorly described languages by local authors. Lopon P. Ogyan Tanzin’s “tshangs-lha-hi tshig-mdzod¹ - Tshanglha dictionary” is a recent example of this. The hefty volume, 713 pages plus a CD-ROM, is a valuable source of information for the approximately 200,000 Tshangla speakers in India, Bhutan, Tibet and elsewhere, and a potentially welcome contribution to Tibetology and Tibeto-Burman linguistics.

The dictionary is a description of the Padma-bkod-pa Pemaköpa variety of Tshangla, spoken in the Yarlung Tsangpo gorge from Payi and Tongjuk in Kongpo on the Tibetan plateau till Tuting just across the border in the Indian state of Arunachal Pradesh. This variety is very close to, and mutually intelligible with, standard Tshangla as spoken in eastern Bhutan, but not mutually intelligible with any other language, including the varieties of Tibetan. The Pemakö Tshangla speakers migrated to this area in successive waves from their Eastern Bhutanese homeland between the late 17th and mid 20th centuries.

On the back cover, the dictionary is called a ‘landmark contribution to the documentation of the Tibeto-Burman languages’. This is surely the case, as there have been no previously published dictionaries of Tshangla beyond a few incomplete wordlists in, among others, Hoffrenning (1959), Das Gupta (1968), Sūn et al. (1980), Zhāng

¹ As per the journal’s guidelines, the review generally confirms to the Wylie method of transcription of ‘Ucen orthography from the dictionary. However, without dwelling further on the discussion about the exact phonetic value of the ‘Ucen letter ṣ, following the suggestion by van Driem (2001: xiii) it is here represented by an ḥ and not an apostrophe. The ḥ is also preferred over Hill’s 2005 choice to use the symbol v, common in Chinese transcriptions of Tibetan, although in later publications, probably to conform to editorial guidelines, Hill also employs the orthographies ṣ and ḥ. All dictionary entries are represented by a Wylie transcription of the ‘Ucen Tshangla, the Roman Tshangla entry in cursive, and an English translation. Wherever possible, the English translation follows the Tibetan of the dictionary, however, sometimes improvisation based on either the sample sentence or the reviewer’s knowledge of Tshangla was necessary.
Revue d’Etudes Tibétaines

260

(Hoshi (1987) and Egli-Roduner (1987). The lack of publications on Tshangla is strange for a language with a relatively large speaker population and geographical spread, and a dictionary has been long awaited and is certainly welcomed.

The dictionary comes with a CD-ROM that contains 13 mp3 sound files with a total length of 5 hours and 45 minutes. The sound files, read by the author himself, contain all the Tshangla lexical entries as well as the Tshangla example sentences. The quality of the recordings is good, and phonetic analysis remains a possibility. Without having been able to listen to the entire CD, it is observed that for example the entries on page three were omitted. Hopefully, this is not repeated throughout the recordings. The religiously educated background of the speaker is rather prominent, for example, in the usage of the rounded vowels [y] and [ø] in lexemes where the author’s choice of ’Ucen orthography triggers their realisation according to Tibetan pronunciation rules. However, most Tshangla speakers would pronounce the unrounded vowels [i] and [e] instead. Nevertheless, both for people who want to learn Tshangla and for linguists who want to analyse the sound system of the language, the CD-ROM is a valuable addition and a good use of the opportunities that modern technology provides.

The introduction of the dictionary contains a short overview of Tshangla and its relation to other languages, particularly Tibetan (i-vii), an overview of the spelling of Tshangla vis-a-vis the spelling of Tibetan (vii-xi), a short overview of the morphophonemic rules followed and the function of several suffixes and particles (xi-xix) and a description of the way of arranging the entries and the need for adding Roman transcriptions in the dictionary (xix-xxii). After the foreword by the translator and the acknowledgements by the author follows an index with all the head glosses. This is followed by the main body of the dictionary, containing head glosses, sub-entries, and example sentences in Tshangla with Roman transcription and Tibetan translation and definition.

The decision to call the language Tshang-lha Tshanglha seems to be based on the purported descent of the Tshangla people from Lha Tshangs-pa Lha Tshangpa, the Tibetan Buddhist name for the Hindu deity Brahma (Bodt 2012: 180-181 and the dictionary entry brah+mA+desh Brahmadesh under entry ḥbar-ma Barma ‘Myanmar’, p. 427). To date, however, I have not met any Tshangla speakers who pronounce their ethnicity, nor their language as [ʦʰaŋla], rather it is pronounced as [ʦʰaŋla ~ ṭaŋla], with most uneducated Tshangla speakers realising even Tibetan lha ‘deity’ as [la], with a lateral approximant rather than a lateral fricative. As earlier reported (Bodt
Comptes-rendus 2012: 178-179; 2014: 393) tshangla [tʰaŋla] is still retained in archaic Bhutan Tshangla varieties as the word for ‘human being, man, person’ and thus reminds us of the reconstructed Proto-Lolo-Burmese root *san₁ PERSON (Matisoff 2003: 265), cf. also Bisu [tʰaŋ³⁵] (Xu 2001: 240) and Anong [tˢʰaŋ³¹] (Sun and Liu 2009: 363). Other possible etymologies and references to the name can be found in Bodt (2012: 178-181). The author mentions a possible relation between the ‘indigenous’ language of Tibet, whatever that may be, and Tshangla, and therefore the importance of Tshangla for the understanding of Tibetan (page vii). Interesting is also the affiliation suggested by the author between Tshangla and the language of Manipur (Meiteilon, page vi).

The role of the translator, Dylan Esler of the Institut Orientaliste, Université Catholique de Louvain, appears to remain limited to concisely translating the last concluding paragraph of the 23 pages of the introduction, and writing a foreword to the dictionary. That is a pity, as it is the introduction that provides meaningful and important insights in the orthographic choices made by the author.

This review has been written keeping three main points in mind: the intended audience of the dictionary; the background of the author; and the aims of the author. After discussing these, I will focus on the benefits and drawbacks of the dictionary, shortly describe some of the main orthographic choices the author has made, and finally pose several recommendations how to improve the dictionary in what hopefully will be an expanded second edition.

The intended audience

The intended audience of the dictionary is a local, Pemaköpa and Tibetan audience, among whom the author wants to promote the language (p. iv-vii). The author’s targeted audience does not specifically include Tibeto-Burman linguists or Tibetologists, although the value of the dictionary for these people is tacitly presumed by the translator (p. iv-v).

The author’s background

The author has a background in both a religious education, including an MA in Tibetan Nyingma Philosophy, and an MA in Tibetan Language and Literature. This educational background pervades throughout the dictionary, with considerable focus on religious aspects of the lives of the Tshangla people and a clear focus on trying to harmonise Tshangla spelling with that of Tibetan.
The author’s aims

From the introduction, it becomes clear that the major aim of the author has been to record the Tshangla language in an effort to preserve and promote it among the Tshangla speakers and the wider Tibetan public (in diaspora). A second aim is to illustrate his idea that the Tshangla language and its pronunciation closely reflect the Tibetan language as it was spoken at the moment that Tibetan was committed to writing: Tshangla is considered to have preserved an archaic, conservative pronunciation whereas the pronunciation of Tibetan has undergone much more phonological change. Following these two major aims, we would expect a dictionary that is complete as to content, with as many Tshangla terms recorded as possible; exhaustive in explanatory detail, with detailed and clear but nonetheless to the point descriptions; convenient and easy in its usage; and providing etymologies for both loans from, and cognates with, (written) Tibetan. The first two points will be discussed separately, the latter two points will be discussed in relation to the orthographical choices of the author.

The coverage of the dictionary

As any language, Tshangla is very rich in expressing the world of the people that speak it, and a dictionary of Tshangla would have to reflect that richness. That much said, we cannot expect a 200,000+ main entry dictionary like the Oxford English dictionaries’ second edition. With around 2,150 main entries, this Tshangla dictionary is of a medium-sized coverage, for comparison, a standard Bhutan Tshangla dictionary that has been in preparation by the reviewer contains over 3,150 main entries.

One of the major strengths of the dictionary is the wealth of sociolinguistic, ethnobotanic, socioeconomic, cultural and historical information, applicable to the Pemakö area itself and the Tshangla homeland in eastern Bhutan. Much of this information and knowledge is rapidly disappearing and the descriptions in this dictionary are a timely attempt to preserve what is still known. There are entries on both wild and cultivated useable plants and both wild and domesticated animal species. The single entry ḡbar bar ‘rice’ (p. 425) has a total of 16 sub-entries including a possibly complete list of traditionally cultivated paddy varieties. Other food grains and their ways of preparation include kha-la khala ‘bitter buckwheat’ (p. 57), gun-tsung guntsung ‘sweet buckwheat’ (p. 104), pu-tang putang ‘noodles’ (p. 358), nam cha-min nam.chhamin ‘spicy condiment made of white sesame seed’ (p. 336) and ḡbe be ‘flat unleavened bread’ (p.
Similar coverage can be found for household items, agricultural implements and practices and items of daily use such as ḥche-ma ‘shifting cultivation land’ (p. 195), cang-zer-ma changzerma ‘arrow head’ (p. 170), tor-pa torpa ‘type of trap to catch small rodents’ (p. 253), run-ḥdi rundi ‘bamboo strap for carrying baskets’ (p. 592), tog-tsi toktsi ‘mortar’ (p. 251) and stan-pang tanpang ‘chopping block’ (p. 265). There are many references to places in the Pemakö area and their short history, such as villages like po-dung podung ‘Podung’ (p. 363), the tsho-khag lnga tsho khak lnga ‘five tsho divisions’ of Pemakö (p. 494) and the pilgrimage site of De-wa-ko-Ta Dewakota (p. 295), on the traditional dress style of the Pemakö Tshangla people including the ubiquitous mon-Di mgo-shubs monde.goshup ‘woollen tunic’ (p. 466) or mgo-shubs kha-mung gushup.khamung ‘ladies’ tunic’ (p. 121) still worn by women in Tibetan Pemakö; an example of a mkhar shig-pa kharshigpa3 ‘riddle (lit. both ‘telling the khar riddle’ and ‘destructing the khar mansion’)’ and the famous Tshangla test of cleverness and nursery rhyme a-ma la-nyi ko-ko ama.lanyi.koko ‘round mother moon’, in which ‘where is’ questions are asked and answered until either the person asking the question or answering it is at his wit’s end (p. 698-702); and on religious aspects such the practice of yong ra-ba yong.rawa ‘calling the life principle/energy’ (Tibetan bla ḡbod) (p. 562-567).

Also impressive is the rich recording of quintessentially Tshangla words, such as le-pong lepong (n.) ‘a person who eats whenever it suits him, not sticking to timings’ (p. 619), wam-pang wampang (adj.) ‘charming, graceful, elegant, flirtatious (said of the style of girls)’ (p. 512), pra-le-mo pralemo (n.) ‘a well-adorned and well-dressed girl or woman’ (p. 366), ḥga-leng-nang4 galengnang (n.) ‘rotational labour performed by girls of a peer group on individual household demand basis’ (p. 124), to-ka-re tokare (n.) ‘dish made of grain (usu. bitter buckwheat) flour’ (p. 249), and the characteristic (partially) reduplicated adjectives such as shang-shang shangshang (adj.) ‘unkempt, uncombed, ruffled (of hair)’ (p. 630), ba-na bo-no banabono (adj.) ‘said of a religious practitioner who is either insincere in his practice or unable to explain it’ (p. 399), ḡjab-pa-ḥjob-po japajopo (adj.)5 ‘omnivorous, said of a person eating anything without specific demand or

---

2 Note that both these entries basically refer to the same dress item, and also note the inconsistency in the transcription of the vowel, with gushup the Tibetan pronunciation, and gushup the Tshangla pronunciation.

3 This should be kharshigpa.

4 The Tshangla ‘Ucen spelling here applies a spurious ḡ.

5 The Roman Tshangla should have been jappajopo, and in ‘Ucen Tshangla again the ḡ is unwarranted.
preference’ (p. 207) and phe-se-ko-so *phesekoso* (adj.) ‘be covered with dust on the face and the body’ (p. 378), some of which, such as ḍjon-no-no *jonono* in the example on page 606 do not have a separate dictionary entry, with the Tibetan translation ‘tho-lo-lo’ not being particularly enlightening either. Also peculiar are many Tshangla verbs and noun-verb and verb-verb compounds, such as gyes-pa jespa ‘to crack open (said of fruits that are ripened)’ (p. 108), tang leb-pha *tang-lepha* ‘lightening to occur’ (p. 234), ming shog-pa *ming.shokpa* ‘1. (the eyes) to burn (e.g. because of chili); 2. to be jealous’ (p. 457), the archaic and particular Pemakö and local Bhutan Tshangla term ḍchoi-ba *chhoiba* ‘to wash (clothes)’ (p. 200, standard Bhutan Tshangla has *zik* {pe} for general washing, including clothes), pris-pa *prispa* ‘to pull back (the foreskin of the penis)’ (p. 366), hod-pa *hotpa* ‘1. to be capable of doing (work); 2. to menstruate’ (p. 691) and ngon-ma *ngonma* ‘to be pleased with, to like (of persons, food etc.)’ (p. 164). These terms are unique and are disappearing fast, and thus deserve recording as well as proper translation.

The focus on religious terms and terminology is sometimes a bit overdone, and the dictionary could have been served better with shorter entries than, for example, the almost two-page entries for the Buddhist mantra *badz+ra gu-ru* *bendzaguru* (p. 401) or on tsha-tsha *tshatsa* (sic. *tshatsha*) ‘votive tablets’ (p. 484). Also, entries such as zu-lu-kha *zulukha* (sic. *zi-lu-kha*) (p. 534), the name of a former village and now neighbourhood in Bhutan’s capital Thimphu, mon-kha *monkha* ‘Monkha Nering Shri Dzong’ (p. 466), the name of a pilgrimage place in eastern Bhutan, or gang-steng *gangteng* (p. 103) ‘Gangte’ a village and monastery in western Bhutan, seem out of place in a Pemakö Tshangla dictionary, as they have no apparent relation with the Tshangla people in Pemakö. Similarly, what personal names like tshe-ring rdo-rje *tshing.doje* (p. 491), nyim chos-rje *nyim.choije* and nyim nor-bu *nyim.norbu* (p. 224) do in the dictionary is a bit mysterious. A three-page entry on the concept of tsha-chu las-pa *tshachhu.laspa* ‘to soak in hot water springs’ (p. 486-489) also appears overdone. Some entries are reduplicated, e.g. tsau-tsau *tsautsau* ‘mental confusion or tension’ on both p. 478 and p. 483. The four-page entry for the lexeme smrang-ma *mrangma* ‘to grumble’ (p. 469-473) is obviously intended to state the author’s claims of the archaic antiquity and conservative phonology of Tshangla (cf. archaic Tibetan smreng ‘to speak’), but the Tibetan translation (‘dmod ngan ngag *sngags? nas ḍdon pa la bye ste’: ‘to chant a cursing mantra for causing harm’) does not suit the Tshangla meaning. Also, there are no references to any of the other Tshangla occurrences of the initial clus-

---

6 This should have been *tang.leppha.*
ter mr-, some of which, such as mras ‘pimple’, mrok {pa} ‘to keep in a
disorderly fashion’ and mrek ~ mrak ~ mres ~ mras {pa} ‘to be stained
with an oily or muddy substance; to get squashed’ ostensibly also
occur in Pemakö Tshangla.

On the whole, the dictionary provides a good overview of the
Tshangla language as spoken in Pemakö. There are examples from
all lexical fields and parts of speech, including some versatile parti-
cles like sho (p. 642) whose meaning is illustrated with examples.
Many terms recorded in it are very peculiar to the language, many of
them are very rarely used in everyday speech nowadays and might
thus disappear rather rapidly. Their recording in this dictionary
comes at the right time.

The definitions

The definitions of many of the entries are straightforward and illu-
minating, and the author provides adequate example phrases and
sentences that further clarify their meaning. Usually, when a clear
one-on-one Tibetan cognate is available for a Tshangla entry the
meaning becomes quite clear immediately, but it is often typical
Tshangla terms with no direct Tibetan translation that require con-
siderable explanation, in which the author has been more successful
in some cases than others.

Certain Tibetan definitions seem to reflect a marked variety of Ti-
betan, rather than standard Tibetan. It is not clear which variety this
is, but looking at the history of Pemakö this would perhaps be
rKong-po, sPo-bo or Kham s Tibetan. Random sampling indicates
that most speakers of Central Tibetan varieties have a problem with
understanding some of these definitions as well as their sample
phrases. An example is hpheng pheng ‘spindle’ which is defined as
zhu-lu (p. 393), whereas standard Tibetan has phang, hphang or
phang-ma. Perhaps in absence of any other clear translation, the Ti-
betan term spags-ma ‘side dish (‘curry’) to tsampa dough’ is used to
refer to any kind of side dish eaten with the main grain-based dish,
such as kam-tang kamtang ‘side dish’ (p. 6) and hor-pa horpa ‘to slurp
up the soup of a side dish’ (p. 692). Most Tibetans and Pemaköpa in
exile, however, would be more familiar with a Hindi term like ‘cu-
ry’ or ‘sabji’.

The value of the ethno-botanical and zoological entries could be
significantly increased by providing their respective common or scien-
tific names. Explanations such as ku-ku-mom kuku.mom ‘kind of
green vegetable’ (p. 8) and ping-ku-lung pinkulung and ping-pi-rung
pingpirung, both ‘a kind of bird’ (p. 358) are not particularly enlight-
ening and serve perhaps as ‘dictionary fillers’. Similarly, there are
some identification errors, a wa-ga-ri wagari is a hornbill and not a 'vulture' and for zum-phi zumphi 'porcupine' (p. 535) the Tibetan name byi-thur could have been provided. Some very common wild animals, like the phoskong 'civet cat', basha 'goral' or shangsha 'serow' are missing in the dictionary.

The dictionary makes no mention of which part of speech an entry belongs to. It is thus up to the reader to make out from the Tibetan translation and the examples what the function of the entry in Tshangla is. The lack of reference to the part of speech is partially understandable, as in Tshangla, like in many Tibeto-Burman languages, nominalisers can mark nouns, adverbs and adjectives as well as certain tense and aspect properties of verbs, and the formal distinction between various parts of speech is thus often blurred. Nonetheless, assigning a part of speech to every head entry would be a big improvement.

One major issue is encountered with the way in which verbs - be it what are basically monomorphemic verb roots or (noun-verb/verb-verb) compounds - are presented. Tshangla has a relatively complex verbal morphology, with what could be termed as five conjugational classes (Bodt 2014: 195-198 and Bodt 2012: 422-423). Whereas it is largely the phonotactic environment (i.e. the verb root coda) that determines the conjugational class of a verb, there are also homonymous cases where the historical simplification of an underlying coda cluster is responsible for the conjugation according to a certain class, rather than the present simple coda. This fact is, unfortunately, not acknowledged in the dictionary. Instead, orthographic inconsistencies are introduced haphazardly to indicate the distinction between what are basically homonyms. Take for example the verb nub-pha nupha [nupa] 'to enter' (on p. 343 exemplified with 'the sun to set', however, this verb is also used for, for example, people to enter a building) and the verb nub-pa nubpa [nupa] 'to perish, to disappear (usu. in a religious sense)'. The root of these verbs is in both cases [nup], with degemination of the coda bilabial consonant when followed by a morpheme with a bilabial consonant (in this case the past tense nominaliser -pa ~ -pha). Distinctive, at least in modern Tshangla, is to which conjugational class the verb belongs: i.e. either -pa or -pha7.

---

7 It goes beyond this review to pay attention to the underlying reasons for the existence of these conjugational classes and what determines a verb to belong to them. As a first indication, it may be noticed that verbs with stems ending on fricative -s always conjugate with the past tense nominaliser -pa, and that verbs with roots ending on plosive -p may conjugate either with the past tense nominaliser -pa or -pha. Relevant in this context is perhaps that the past tense spelling of the Tibetan verb snub 'do away with, cause to perish, abolish etc.' is bsnubs,
The dictionary would have greatly benefited if attention could have been given to this fact, by providing the stems of each verb in combination with the past tense nominaliser (or any other marker that indicates the conjugational class of the verb), e.g. *nup {pha}* ‘to enter’; *nup {pa}* ‘to perish’ rather than spurious spellings such as *nu-pha* ‘to set’ and *nubpa* ‘to perish’. Such an approach would also have avoided inconsistencies such as *zom-ma zoma* ‘to gather, to assemble’ (p. 531) where the stem of the verb appears to be *zo*-judging from the Roman Tshangla entry, whereas this is actually *zom*- [zom]. This approach would also have removed the need to provide a whole set of different head entries for conjugated verbs, such as the examples of the verb *khe* (*khewa/khencha/khenchuma*, p. 92-95) ‘1. to contract (a disease, intransitive); 2. to need, to have to, require to (auxiliary); 3. to hit (an arrow, but also the rain on the ground i.e. to rain, a latch of a lock etc., intransitive and transitive)’, or for a whole set of subentries, such as the examples of the verb *khowa* ‘to break, to split (of stones, bamboo, wood)’ (p. 95-97). The dictionary abounds in similar inconsistencies, again, for example, on p. 98 we find the entry *ḥkhobpha khopha* ‘to peel off (actually ‘peeled off’)’ and a few entries later on p. 99 the entry *ḥkhob-bca khobcha* ‘peels off’, in which, when relying on the Roman Tshangla, a reader who does not know Tshangla and cannot read Tibetan, might understand these as two different verbs. Rather than providing examples of the meaning of the same verb in different tense and aspect combinations, it would be advisable to provide the verb root and its conjugational class, and then focus on the semantics of the verb, i.e. on the various meanings that a verb can have in its various contexts, but also according to its transitivity, and whether a verb operates as an independent verb or as an auxiliary. The meaning of the various verbal suffixes with their allomorphs according to the conjugational class could then be provided in the introduction. There is no need to provide for each verb a separate entry or subentry simply stating, for example, that the verb stem followed by -*chhuma* gives the verb a completive sense.

---

while the past tense of the Tibetan verb *nub* ‘to go down, to set etc.’ is simply *nub*. For establishing a possible relation between Tshangla and Tibetan as well as for the identification of loan verbs, these conjugational classes are of great interest.

---

What appears to be an attempt at this might be observed in the entries for *bcebpapa chep.pa* ‘to hit, to bruise’ and *bcobpa chop.pa* ‘to loot kitchen utensils’(?) (p. 176).
Tshangla pronunciation
as closely approaching written Tibetan

The second aim that the author has, is to show that Tshangla is in many ways more archaic in its pronunciation than the modern Tibetan varieties, maintaining the pronunciation of Tibetan at the time it was committed to writing. The editor (p. ii) gives as example the word for ‘chest’, which is written as brang or brang-khog in written Tibetan, pronounced as drang [ɖaŋ] in most Tibetan varieties, but still pronounced as brang, actually (p. 414) brangtong [branɭəŋ], in Tshangla\textsuperscript{9}. This is an irrefutable fact. But more than this observation cannot sensibly be derived from it. The fact that Tshangla [bɭaŋ] and written Tibetan brang are the same, does not necessarily provide evidence to support any hypothesis that the historical speakers of (Old) Tibetan at the time it was committed to writing and the contemporary Tshangla speakers are somehow directly related to each other: the similarities between written Tibetan and spoken Tshangla might be the result of a much older shared Tibeto-Burman root. Two other examples might illustrate that: Proto-Tani *haŋ-branŋ/*haŋ-kɯŋ (Sun 1993: 99) and Dulong (Trung) [pʰaŋŋ] (Sūn 1982: 217) are also very similar, if not the same.

Loans versus inherited words

A distinction has to be made between loan words from Tibetan, and inherited Tshangla words that have cognates in Tibetan. These are two fundamentally different ways as to how the part of the present day Tshangla lexicon with similar forms in written Tibetan has come into being. Loans are obviously present in Tshangla. But the long and intricate relationship between Tshangla and Central Bodish varieties makes it difficult to determine what is a loan, what is a nativised loan (often with a nativised pronunciation) and what is a native word that just happens to have Central Bodish cognates because of a shared Proto-Tibeto-Burman root.

Tshangla has been under strong influence from Bodish languages at least since the 8\textsuperscript{th} century AD\textsuperscript{10}. Successive waves of migration

\textsuperscript{9} Incidentally, Tawang Monket also has [bɭaŋ], and the Tibetan speakers I am currently surrounded with pronounce ‘chest’ as [pʰaŋkʰɔʔ], with Nepali Sherpa speakers saying [pʰaŋɡɔʔ].

\textsuperscript{10} The question of whether Tshangla itself is a Bodish language, related to the Central and other Tibetan varieties, is an open question that has not yet been satisfactorily answered in linguistics. Perhaps it is rather intense language contact and borrowing that might have created this impression, with Tshangla a dis-
from the Tibetan plateau, the establishment of a Tibetan aristocracy ruling a Tshangla populace and the influence of both classical and spoken Tibetan through the spread of Buddhism and the administrative system has had an enormous impact on the Tshangla language. To this can be added the increasing influence of Bhutan’s national language Dzongkha during the latter century in the Tshangla homeland and, in the case of Pemakö Tshangla, the influence of different Tibetan varieties (mainly Kong-po, sPo-bo and Khams Tibetan) since the advent of the Tshangla speakers in the Pemakö area and the subsequent diaspora of part of their people.

But the distinction between inherited vocabulary and later loans is hard to make. To revert to the example of ‘chest’: can this word be considered a loan from Tibetan at the time that it was still pronounced as [braŋ] in Tibetan? And did the phonological changes that affected the pronunciation in Tibetan not take place in Tshangla? I think few people would agree to this idea, and rather consider a root like ‘chest’, which is shown cross-linguistically to be not very susceptible to borrowing, to be an inherited root. On the other hand, ḥu-lag ‘compulsory labour service’ (p. 542), zheb-sa zhepsa ‘honorific speech’ (p. 516), gtor-ma torma ‘dough offering’ (p. 257) and a verb like sgrub-pa ḍu IPA pha ‘to practice, accomplish (in a religious sense)’ (p.117) are clear Tibetan loans, cf. Tibetan ḥu-lag ‘compulsory service’, zhe-sa ‘honorific speech’, gtor-ma ‘dough offering’, sgrub ‘to accomplish, to attain etc.’, all introduced as administrative and religious terminology. There are, however, many doubt cases, even in basic lexical items. Pemakö Tshangla has gdong-pa ‘face’ (p. 303). Bhutan Tshangla, on the other hand, has gum ‘face’. Because Tibetan also has gdong-pa ‘face’, this might well be a Tibetan loan in Pemakö Tshangla. But does the fact that Dirang Tshangla also has dongpa ‘face’ mean that Bhutan Tshangla gum is actually an innovation? Or that Dirang Tshangla also borrowed dongpa ‘face’ from Tibetan?

Another example is the Tshangla verb nyong [ɲoŋ] ‘to get, to obtain’. The Tshangla dictionary lists this under the ’Ucen spelling myong, in consistency with a Tibetan spelling of a word with a wide range of meanings, myong ‘to enjoy, undergo, feel, comprehend, taste, to experience with one of the five senses, etc.’. But there are two main issues with this approach. First of all: in this case, as in many, Tshangla has not preserved the archaic Tibetan pronunciation tinctly non-Bodish language whose centuries of language contact and subsequent creolisation have made it to appear as a Bodish language.

11 This should be ḥulak.
12 This should have been sgrub-pha and ḍu IPA pha if consistency was maintained.
of the period when the language was committed to writing: any Tshangla speaker will say [ɲoŋ] similar to modern Tibetan pronunciation, not [mjɔŋ]. And secondly, considering the meanings of Tibetan myong, the question arises whether these two words perhaps just derive from the same root. These are issues that historical-comparative linguistics has to deal with, and should not be of concern to a compiler of a dictionary of a contemporary language. But by making the orthographic choice for the ‘Ucen Tshangla spelling myong, not simply nyong in accordance with Tshangla pronunciation, the author implicitly presumes either that Tibetan myong, with its wide variety of meanings, and Tshangla nyong, with a much more restricted definition, derive from the same Bodish (and not earlier, Proto-Tibeto-Burman) root, or that Tshangla borrowed the word from Tibetan, with subsequent semantic change resulting in divergent meanings and phonetic change resulting in a similar pronunciation. Luxi Bola (Pala, Jingpo) also has [mjɔ̃³¹ ju⁵⁵] ‘to get, to acquire’ (Huang and Dai, 1992), this form is even closer to the Tibetan spelling, but everyone would consider it spurious to consider this as evidence of a genetic relation between Luxi Bola and Tibetan.

Whereas I do not want to argue against using standard Tibetan spelling for Tshangla words that are clearly loans from Tibetan, I would caution against overdoing that by trying to find Tibetan spellings for each and every Tshangla word, irrespective of whether this word is an actual loan or a native word, and otherwise invent spurious spellings that do not reflect the actual Tshangla pronunciation. Thus accepting written Tibetan spellings for at least the most obvious loans, it is then puzzling to notice that the author has decided to spell an obvious recent Tibetan loan like mikshe ‘eye glasses’ in the ‘Ucen Tshangla orthography as mig-she (p. 453), in according with Tshangla pronunciation [mikɕe], and not according to the Tibetan spelling as mig-shel. On the other hand, for unknown reasons the author chose the ‘Ucen Tshangla spelling ḡah-hdang (p. 124) for the native Tshangla word gadang [gadan] without any obvious written Tibetan source. These kind of inconsistencies are a serious drawback to the dictionary.

The main point, apart from the possible ramifications of the approach taken by the author for the historical-comparative side of the story, is that this approach has serious implications for the usefulness and user-friendliness of the dictionary. A user of the dictionary will have to a priori know that Tshangla [ɲoŋ] has the ‘Ucen Tshangla spelling myong listed under the syllable MA, because he will not be able to find the entry nyong under the syllable NYA. This brings me to the next point, namely a general review of the ortho-
graphic choices of the author, the consistency of the use, and the implications for the user-friendliness of the dictionary.

The orthographies and consistency of its use

In the introduction, the author describes the conventions for both his 'Ucen Tshangla and his Roman Tshangla orthographies. Unfortunately, much is lacking in the consistency of the usage of these orthographic conventions throughout the dictionary. There are plenty of instances where the orthographic rules set out by the author at the onset are not followed in the main body of the dictionary.

The Roman orthography

The Roman orthography used in the dictionary is pretty straightforward, though no motivation for the choices made is given. The choice for representing the Tshangla unaspirated and aspirated affricates [ʨ, ʨʰ] with /ch, chh/ rather than /c, ch/ respectively is unfortunate from a linguistic point of view, but understandable under influence of the prevalence of haphazard romanisation in use throughout much of the Subcontinent, although it is at variance with both the Indological tradition and the principle of economy which should govern a new system of romanisation. Many native Tshangla speakers who write their language actually employ the same orthography, because for them the /c/ represents a [k], as in English cat [kʰæt] and not an affricate [ʨ].

But when it comes to the consistent use throughout the dictionary, there are some flaws to be observed. The main issue lies with the representation of the unvoiced and voiced syllable final plosives /k ~ ɡ/, /p ~ b/ and /t ~ d/. Whereas in some cases the unvoiced Tshangla coda /t/ is represented in the Roman orthography with a /t/, in other cases the author has followed the Tibetan orthography in the Roman orthography and written a voiced plosive /d/, e.g. stod-ka totka [totka]¹³'at the top of (in elevation)' (p. 266) and nad-pa natpa [natpa] (p. 335), but then pad-pa padpa [patpa] 'leech' not *patpa (p. 357). In other cases, the author, under written Tibetan influence, introduces a syllable-final plosive /t/ where the Tshangla pronunciation actually doesn’t even have one, such as in stod-tung todtung cf.

¹³ Not that here the author pronounces [tøka], in conformity with the written Tibetan spelling, rather than in accordance with the actual Tshangla pronunciation [totka]. The rounding of vowels [i] and [o] to [y] and [ø] under influence of written Tibetan spellings, even for native Tshangla words, can be observed throughout the recordings.
Tibetan stod-tung ‘jacket’ (p. 266) not *totung [totun] ‘jacket’. Other examples can be found with both the velar and bilabial plosive in coda position, which are sometimes written with Roman /p/ and /k/ and sometimes with Roman /b/ and /g/, as in lag-pa lakpa ‘hide’ (p. 609) but har-khag-tang harkhagtang not *harkhaktang ‘phlegm’ (p. 689), tseb-tseb tseptsep ‘crunchy when eating because of containing sand particles, said of e.g. flour’ (p. 477) but teb-pa tebpa not *tep-pa ‘be squeezed or quashed (in a crowd)’ (p. 247), and nub-pa nubpa [nupa] ‘to perish, to disappear (usu. in a religious sense)’ not *nuppa (p. 343), zhob zhob [zɔp] not *zhop ‘ritual hearth deity pollution’ (p. 519) or mo-rab morab ‘beautiful’ but then in the sample sentence morap (p. 465). Where degemination of the syllable final bilabial plosive takes place in actual pronunciation it is completely omitted in the Roman Tshangla, as in heb-pha hepha not *heppha ‘1. to settle down (of heated butter or oil); 2. to pant’ (p. 690), even though this creates a root *he- not hep-. This inconsistency between the actual Tshangla pronunciation, the written Tshangla in ‘Ucen script and the written Tshangla in Roman script is an almost constant source of ambiguity throughout the dictionary.

The choice for the use of dots to separate ‘which parts of the word are to be pronounced together’ (p. iv) in the Tshangla sample sentences is odd, as in English the full stop indicates the end of a sentence or a syllable boundary in phonetics. Moreover, this practice obscures which criteria are used to determine what in Tshangla constitutes a word, with many suffixes, enclitics and particles separated from their head word with a full stop. An example is the sentence khangri.zangpo.gai.lama.mangpo.jonma.la “Many lamas came from good lineages’, where both the ablative marker -gai and the existential copula -la, used in a periphrastic construction as the continuous past jonmala ‘having come’, are treated as independent words rather than suffixes.

The ‘Ucen orthography

The author both acknowledges that the phonology and pronunciation of Tshangla and Tibetan are different in many aspects (p. xx) and that in the past it must have been difficult for the Tibetan grammarians to compose the spelling with prefix, superscript, subscript and suffix letters and that this is still cause of weariness and inconvenience (p. ix). Nonetheless, the author then continues that as Tshangla shares 70% of its vocabulary with Tibetan\textsuperscript{14} and that Tibet-

\textsuperscript{14} This might be an overestimate. Lieberherr and Bodt (2015) in a lexicostatistical analysis of 100 basic roots found a cognate percentage between Written Tibetan
an and Tshangla have a similar sgra-gdangs ‘tune, pronunciation’, it is no more than logical and even a necessity to know and employ the various affixes of the Tibetan spelling in the Tshangla orthography as well, explaining why and how he has tried to harmonise the Tshangla spellings and grammar with that of Tibetan (p. x). In his 'Ucen Tshangla spellings, the author thus makes profuse use of the written Tibetan sngon-hjug ‘prefixed letters’, rjes-hjug ‘suffixed letters’, yang-hjug ‘final letters’, ya-byags, ra-btags, la-btags, wa-zur ‘subscript ya, ra, la, wa letters’ and ra-mgo, la-mgo, sa-mgo ‘superscript ra, la, sa letters’. He employs these in purported loans from Tibetan, in Tshangla words with Tibetan cognates, but, most unfortunately, also in purely native Tshangla terms without justifying the necessity of their use.

So, *wang* [waŋ] ‘blessing’ (p. 423) is written as dbang under the syllable BA, rather than with Tshangla spelling wang under the syllable WA because it is likely a Tibetan loan, cf. Tibetan dbang ‘blessing’, and *tsi* [isi] ‘fodder; weed’ (p. 482) might have been written as rtsi rather than simply tsi because of a (doubtful) Tibetan cognate rtswa ‘grass, weeds’. But why the orthographies bang [ban] ‘grass’ as ḡbang rather than simply bang (p. 424); *cha* [ca] ‘have [copula]’ as bcaḥ (p. 173) rather than simply ca; *khungma* ‘to wait’ as ḡḥung-ma (p. 92) rather than simply khung-ma (but on the other hand *khongma* ‘raw, uncooked’ as khong-ma, p. 82); or *bamung* [bamʊŋ] as ḡbaḥ-mung ‘mushroom’ (p. 429) rather than simply ba-mung? Similarly, in Tshangla there is no phonetic difference between the adjective *ringbu* [rɪŋbu] ‘long, tall’ (p. 586) and the noun *ringbu* [rɪŋbu] ‘intestinal worm’ (p. 586), thus the Tibetan orthography ring-bu for the former and ring-ḥbu for the latter is completely based on the spelling of bu [bu] ‘insect’ in Tibetan, ḡbu, and not on the pronunciation in Tshangla.

The effect of the use of the affixes of written Tibetan on the user-friendliness of a Tshangla dictionary can also be show through the following example. If a Tshangla user living in Delhi wants to find the meaning of the Tshangla word *lutumang* just used by his grand-

---

and Bhutan Tshangla of 41%. Despite being higher than the cognate percentages between Tshangla and any other language under review, or between Written Tibetan and any other language under review, this percentage is not so high considering the long period of language contact. Moreover, this percentage does not take into account roots descended from a common Proto-Tibeto-Burman root shared between all Tibeto-Burman languages. However, these basic roots exclude many lexemes from higher semantic fields, that are more susceptible to borrowing. The view that Tshangla is very close to, and even derived from, written Tibetan is very strongly maintained among educated Tshangla speakers, be it in the Tibetan diaspora or in Bhutan.
ma, and starts searching either in the main body of the dictionary or in the index in the beginning under the syllable LA, he will not find the word. It cannot be presupposed that every user will know written Tibetan orthography well enough to start searching all possible combinations of prefixes and sub- and superscript letters for the syllable LA and (luckily under KA) end up finding klu-tu-mang [lутu-ман] ‘pestle’. One simple solution for this problem would be to group all phonetically identical onsets together under the same syllable heading, rather than based on their ‘Ucen onsets.

In the following sections, I will shortly introduce some of the author’s orthographical choices for both the vowels and the consonants, and discuss the consequences this has, mainly for the user-friendliness of the dictionary.

The vowel representations

As for the vowels, the author introduces a long vowel A apparently solely on basis of the minimal pair wa wa ‘cattle’ (p. 509) and wA ḡ phi-ba wa phi wa ‘to joke’ (p. 510), with not a single other attestation of a long vowel /a/ in the dictionary apart from the Hindi loan words thA-li thali ‘plate’ (> थाली ‘plate’, p. 282) and DAg-khang drak.khang (> डाक ‘post, mail’ + Tibetan khang ‘building’, p. 328). This, in combination with the fact that in the recording there is no audible distinction between the vowel length in the two occurrences of wa and the knowledge that vowel length is not distinctive in any other phonological descriptions of varieties of Tshangla to date (Das Gupta 1968, Zhāng 1986, Andvik 2009, Grollmann 2013, Bodt 2014), leads to the conclusion that the long versus short vowel /a/ distinction that the author makes is unwarranted.

The author introduces the orthographic Tibetan AI and AU to represent two Tshangla diphthongs/offglides [ai ~ aj] and [au ~ aw]. These are commonly used for transcription of Sanskrit diphthongs and are as a choice defendable over, for example, a ḡi and a ḡu. It is unfortunate that, ostensibly under influence of Tibetan spelling conventions, the Tshangla diphthongs are neglected in many cases, such as bral-ba braiba [braiba] ‘to separate’ (p. 418) instead of brAI-ba (cf. Tibetan kha bral-ba ‘to divorce, separate’). It is also unfortunate that

---

15 In fact, rather than a vowel length distinction, the wa in wa phi wa appears to have a high register tone onset.

16 The same can be said of the aspirated voiced velar plosive gha [gʰ] on basis of the single lexeme ghi ghi [gil] ‘Sichuan pepper, Xanthoxylum armatum, X. bungeanum’, with neither a convincing minimal pair besides the near-minimal pair with the existential copula gila gila ‘to be’, nor clear aspiration in the recording.
the Tshangla diphthongs/offglides [oi ~ oj] and [ui ~ uj] are not recognised as distinctive phonemes in the introduction on page viii. In the remainder of the dictionary they are haphazardly represented, either by introducing a new vowel combination such as in nyoḥE-ba nyoiba [noiba] ‘to swallow without chewing’ (p. 228); with written Tibetan spelling conventions, e.g. sbkul-ba kuiba [kuiba] ‘to invoke, arouse, admonish’ (p. 43); or even completely ignored, as in bri-ba bruiba [bruiba] ‘to write’ (p. 440) under influence of Tibetan bri ‘write’. Over-reliance on written Tibetan spelling conventions rather than actual Tshangla pronunciation also results in inconsistencies such as [gau] ‘amulet box’ (p. 106), one of the few occurrences of the Tshangla diphthong [au] AU. Unfortunately, in the ’Ucen orthography the author stuck to the Tibetan spelling gwaḥu, with for the Roman orthography the odd spelling ga.’u.

The consonant representations

The consonant inventory described is pretty standard for Tshangla and the ’Ucen representations are straightforward. The author chose to represent the retroflex sounds with the lokta Ta17, Tha and Da, which is understandable. What is less clear is why these retroflex phonemes are then sometimes mentioned under their alveolar counterpart syllables TA, THA and DA and sometimes with their written Tibetan spellings like sgra under the syllable GA. As distinctive phonemes, they should have been accorded their own separate dictionary headings. In the current scenario, there is the confusing and inconsistent situation that a user has to look for ḏupha [quppʰa] ‘accomplished’ (spelling sgrub-pa, p. 117) and dom [dom] ‘box’ (spelling sgrom, p. 117) under the syllable GA, but for the phonetically same onsets in ḏumsho [qumeo] ‘gather towards this side (fire wood in a hearth)?18 (spelling Dum-sho, p. 330) and domdom ‘sound of feet stamping on a wooden floor during a traditional ‘kick dance’’ (spelling Dom-Dom, p. 332) under syllable DA.

In many cases, it is unfortunate that the author has resorted to innovating ’Ucen Tshangla spellings for the retroflex phonemes that deviate from his own proposed orthography. There is a justification in the case of actual or plausible loans from Tibetan, such as gru ḏu

---

17 The single unvoiced retroflex entry Tau-li ṭauli [ṭauli] ‘wrung out?’ (p. 268) is said to be a Chinese loan, even the Tibetan translation skra dkyu-li cannot be found in the most common dictionaries, and its inclusion in this dictionary is therefore questionable.

18 The meaning of Tibetan ḥtshur is unclear, and the reason why this verb is mentioned in the imperative is similarly unknown.
\[\text{ɖu} \] ‘boat’ (p. 109), Tibetan gru ‘boat’, not *Du and ḡrig-pe dikpe [dikpe] ‘to be ok’ (p. 142\(^{19}\)), Tibetan ḡrig ‘be ok, be alright etc.’ not *Dīg-pe. But little justification can be given to extend this even to lexemes where there is no written Tibetan basis to deviate from simply writing a lokta retroflex, such as khre thre [tʰe] ‘veranda’ (p. 85) instead of *Thre, phrog-rkyang thokyang [tʰokkjaŋ] ‘Sausage vine Holboellia latifolia’ (p. 383) instead of *Throk-kyang\(^{20}\), especially since the next lexeme, phros-pa phrospa ‘to vomit’ (p. 383) is pronounced as [pʰospa] and not as *[tʰospa].

The same line of thought, with plenty of examples of inconsistencies, holds for the various representations of the Tshangla affricates /ch, chh, j/, depending on the variety realised as [ʨ ~ ʃ, tʰ ~ ʃʰ, dʒ ~ dz]. Lexical entries that have an affricate onset can be found under the direct ‘Ucen syllables CA, CHA, and JA but also under the written Tibetan spellings rkya, skya, bskya spya (syllables KA, PA); khya, ḡkhya, phya, ḡ phya (syllables KHA, PHA); and gya, rgya, ḡya, bya, and ḡ bya (syllables GA, BA) respectively. What this means in practice is, that a potential user who has just been called a jungpo rolang [dʐunpo rolanʃ] by a Pemakö Tshangla speaker, and who has no idea of the origin or spelling the word might have in Tibetan, would have to look under syllable JA for jung-po, mjung-po, ḡjung-po or ljung-po, under syllable GA for gyung-po, rgyung-po or ḡgyung-po and under syllable BA for byung-po, to finally find it under ḡbyung-po ro-langangs jungpo rolangs ‘a boy with an evil or offensive behaviour and attitude’ (p. 439), from ḡbyung-po jungpo ‘class of evil spirits’ and ro-langangs rolang ‘zombie’. That’s simply not practical, and not user-friendly. Wouldn’t it have been easier to just write it in ‘Ucen Tshangla as jung-po ro-lang, and then give the Tibetan etymology as (< Tib. ḡbyung-po ro-lang)?

In his listing of Tshangla onsets on page ix, the author does not include the lateral fricative [l], in written Tibetan spelling lha, a fact consistent with most spoken Tshangla varieties. However, a grapheme /lh/ does occur in the Roman transcriptions in the dictionary, with Tibetan orthographies as divergent as rla, e.g. rlangs-pa lhankpa ‘left-over (food)’ (p. 606) under RA; kla, e.g. klam-pa lhampa ‘read, study’ (p. 41) under KA; gla, e.g. gleng lheng ‘over there, on the other side’ (p. 118) under GA; bla, e.g blug-pa lhug-pa ‘pour’ (p. 441) under

---

\(^{19}\) Why the author lists this as ḡrig-pe dikpe with the non-past nominaliser and not as ḡrig-pa dikpa with the past nominaliser like in other verb forms is another inconsistency.

\(^{20}\) For this lexeme even a spelling khrok-kyang might be preferable, to reflect the archaic pronunciation Standard Bhutan Tshangla [tʰokkjaŋ], archaic and dialect [kʰrokkjaŋ] which is, however, probably not known to the author.
BA; and sla, e.g. sla-nga lha-nga ‘frying pan’ (p. 677) under SA. Whereas the recordings do not attest a lateral fricative but a lateral approximant for these entries, there does appear to be a high register onset distinguishing these lexemes from langs-pa langpa ‘to sit; to suffice’ (p. 610); lam lam ‘road, path’ (p. 611); leng-ma lengma ‘to change (clothes)’ (p. 621); lugs luk ‘habit, custom’ (p. 616); and lam-ma lamma ‘to accept; to find’ (p. 612) respectively. But the contradictory spelling of the entries leng gtad-pa leng.tatpa ‘towards the other side’ and leng-gtad leng-gtad lengtat lengtat ‘further and further towards the other side’ (p. 622), derivations clearly based on gleng lheng ‘over there, on the other side’ (p. 118) appear to suggest that, rather than that the ‘Ucen spelling of the lexemes with onset /lh/ in the Roman orthography represents an actually realised high versus low register onset distinction in Tshangla, the pronunciation of the speaker has been adapted to the ‘Ucen spelling employed. The complete absence of any discussion on suprasegmental features such as register onset, pitch or tone, important in Tibetan but only marginal in some Tshangla varieties, is also a shortcoming of the dictionary.

**Coda consonant clusters**

From a historical linguistic point of view, the dictionary provides additional evidence of what could be considered archaic retentions of syllable-final consonant clusters in Pemakö Tshangla, a feature of the language also reported in Bodt (2012: 197-201, 2014: 421-424) and Grollmann (2013: 39-41). Some of the rather abundant examples include bordpa [bort-pa] ‘to fry in oil’ (p. 410), bertpa [bertpa] ‘to be spicy’ (p. 408); ḫbyard jart- [ʥart-] ‘to be stuck together’ (p. 119, but unfortunately a main entry for this lexeme seems missing), ḫphird phirt-la ‘to turn by itself’ (in the example on p. 390, but phirpa in the main entry), ḫkhord khort- ‘to turn’ (in the example on p. 389, but khorpa on p. 100). This is important information that needs to be further examined.

**Conclusions**

The Tshangla dictionary is an extremely rich source of lexical information on an important and enigmatic but nonetheless endangered Tibeto-Burman language. For an educated Tshangla speaker in Pemakö or the Tibetan diaspora the dictionary will be useful as a reference source on their own language. Similarly, for Tibetans who would like to study Tshangla it will be a useful assistance to master the vocabulary. For both groups of users, however, the biggest drawback will be the ‘Ucen orthography following Tibetan spelling
conventions and not the Tshangla phonology, not only for loans from Tibetan and Tshangla words with Tibetan cognates, but also for quintessentially native Tshangla words. This makes the usage of the dictionary time-consuming and complicated at the very least, and sometimes just outright frustrating: a user basically has to guess how the author has spelled a word. Another imminent danger is that following written Tibetan spelling conventions for Tshangla words results in a Tibetan, not a Tshangla pronunciation. In the included sound files, the author frequently, almost continuously, falls in this pit trap himself, by pronouncing the Tshangla entry based on Tibetan pronunciation rather than the Tshangla pronunciation. The absence of a reverse glossary with concise Tibetan glosses and their Tshangla translations is also a drawback, as the targeted audience has to know, or have access to, Tshangla speakers in order to use the dictionary. If someone would want to know how to say a certain Tibetan word in Tshangla, the dictionary will give no answer.

The dictionary might have some value for an educated Bhutanese audience. But for an external audience, including Tibeto-Burman linguists, Tibetologists and others, the ability to at least read, and preferably also understand Tibetan is a prerequisite to make use of this dictionary.

Hopefully, then, the author, the translator, the publisher and a linguist trained in the western tradition will find the time and funds to publish a second edition of this valuable dictionary. This should include a short overview of the basic Tshangla phonology, including onset clusters and rhymes and their realisation and IPA transcription. The Tshangla pronunciation, the spelling in the 'Ucen script, and the spelling in the Roman script should follow clear conventions and be consistent throughout the dictionary. Personally, I would strongly suggest that as much as possible, 'Ucen spellings conform the actual Tshangla pronunciation are maintained, neither adopting the spelling of cognate Tibetan words, which may or may not be loans, nor the innovation of spellings that do not reflect the Tshangla pronunciation but rather some Tibetan orthographical convention. If one of the aims be to show that Tshangla follows written Tibetan pronunciation rather closely, it is always possible to add an etymological or cognate note (cf. Tib./ < Tib.) with the written Tibetan spelling. At least the head entries, and preferably the entire dictionary should be translated into English. Entries should include a reference to the part of speech they belong to. The head entry of every verb should be its root, including the conjugational class, with as subentries noun-verb and noun-noun compounds with particular meanings. Definitions should be standardised in Central Tibetan and include as many common and/or scientific names as possible.
Definitely, the dictionary is a publication which merits being rendered accessible to a much wider audience, including Tibetologists, linguists, ethnologists and other interested individuals.
